Any delay in implementing this rule would be contrary to the public interest. The FmHA County Committee process is integral to the Agency's farm loan programs. Terms for County Committee Members will be expiring at the end of June. If the election procedures are not in place in time for this transition, the Agency will be faced with over 2,000 vacancies needed to be filled. With the expectation of receiving many more farm loans to process this year than last year, work of the County Committees will be greatly increased. Filling the County Committee's with temporary committee members will mean a lack of continuity in the process and possible unacceptable delays in dealing with the increased workload. Should this occur, it would place a significant hardship on the farm communities. In addition, the expiration of terms for County Committee Members is set to take place after farmers have completed spring planting. A delay in the election process would push the elections into a time period that would be disruptive to normal farm activities. A delay in the first year's elections would also result in disruption to future election cycles. Furthermore, pursuant to the Administrative Procedure Act, 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this action are impracticable; and good cause is found for making this interim rule effective less than 30 days after publication of this document in the Federal Register.

Discussion of Action

County committee members assist local FmHA offices by determining the eligibility of applicants for Farmer Program (FP) loans. Currently, the members of these committees are appointed by FmHA officials. Section 1311 of Pub. L. 99–198, however, requires two of the three members to ". . . be elected, from among their number, by farmers deriving the principal part of their income from farming who reside within the county or area . . ." FmHA hereby issues regulations for the nomination, election, appointment, pay

and functions of county and/or area committee members.

Paperwork Reduction Action

The paperwork requirements in this regulation have been approved by the Office of Management and Budget (OMB) and assigned OMB No. 0575–0117.

List of Subjects in 7 CFR Part 2054

Agriculture, County committee members.

Therefore, Chapter XVIII, Title 7 of the Code of Federal Regulations is amended by adding Part 2054 as follows:

Subparts A–V—[Reserved]

§§ 2054.1–2054.1100 [Reserved]

Subpart W—Employment, Pay, and Functions of County and/or Area Committees

§ 2054.1101 General.

This subpart provides instructions for selection of county committee members. Discrimination on the basis of race, color, sex, religion, national origin, age, political affiliation, marital status, and/or handicap is prohibited.

§ 2054.1102 Establishment and composition of county and/or area committees.

(a) *General.* In each county or area in which FmHA activities are carried out, there shall be a county or area committee composed of three members:

(1) Two members shall be elected, by farmers deriving the principal part of their income from farming and have their principal farming operation within the county or area. "Principal part of their income" means more than 50 percent of their gross income must come from agricultural production. One member, who shall reside within the county or area, shall be designated by the State Director. Designations also may be made for alternates for each member of the county committee and will be subject to all other requirements contained in this subpart.

(2) In selecting the designated member of the county committee, care should be taken to ensure, to the greatest extent practicable, that the committee is fairly representative of the farmers in the county or area. Designated committee members must be in sympathy and accord with the family farm concept, be familiar with the problems of farmers and residents of rural communities, and be in general agreement with the objectives of FmHA. Designated members and alternates may be nonfarmers engaged in local business or professional work who reside in the county or area in which activities of the county committee are carried out. Eligible minorities and females will be designated, wherever possible, on county and/or area committees. Efforts will be made to obtain recommendations from civil and women's rights organizations. Some minority representation is expected where minorities comprise 20 percent or more of the rural or farm operator population, whichever is greater.

(b) *Area committees.* A county committee will normally be established in each county. Area committees may be established by State Directors to serve a part of a county, parts of two or more counties, or a combination of two or more counties when:

(1) Topography and communications make it impractical to establish county committees according to county boundaries;

(2) The workload in an individual county is extremely low; or

(3) More than one county office is necessary to service the workload in an individual county.

For the first election and all subsequent elections when a State Director establishes an area committee, he or she must issue a State supplement designating the boundaries that the committee will serve. The State Director shall give public notice of boundary changes to county or area committees in official county newspapers or publications serving the area at least 30 days before a county committee election takes place.

(c) *Temporary absence of committee members.* When committee members are not available to attend meetings, the County Supervisor can call alternates to become acting members of the committee with the same duties and authorities as regular members. A quorum of at least two members or alternates is needed to have a county committee meeting.

(d) *Permanent vacancies.* In cases of permanent vacancies, alternates may be used to complete the unexpired terms of either elected or designated members. Alternates should be designated in order to succession; e.g., first alternate, second alternate, and third alternate. Alternates succeeding to members' unexpired terms will serve out the remainder of the term. If an alternate is not available to fill county committee vacancy, the State Director will review the prevailing circumstances and determine the best course of action as follows:

(1) Continue with existing members until the next regular election.

(2) Designate additional alternates.

(3) Call a special election to fill vacancies.

(e) *Special elections.* The State Director may set the date for special elections that might be necessary in filling permanent vacancies, or vacancies caused by inability to complete a slate of nominees during a regular election. Vacancies created by the inability to complete a slate of nominees to fill an expired term of an elected member must be filled through special elections held not later than 120 days after the regular elections.

§ 2054.1103 Functions of the county committee.

(a) The major functions to be performed by FmHA County Committees, which are more specifically set out in the FmHA regulations relating to various program activities, consist of:

(1) Determining the eligibility of applicants for certain types of loans, including farmer program loans, irrigation and drainage loans and loans to grazing associations;

(2) Making recommendations on resolving problem cases;

(3) Conferring with the County Supervisor on the servicing of FmHA loans and with respect to borrowers who should be referred to other credit sources, including graduation;

(4) Making recommendations regarding applications for compromise, adjustment or cancellation of debts owed to FmHA;

(5) When requested by the County Supervisor, advising the County Supervisor, debtors and their creditors in connection with voluntary debt adjustment; and

(6) Attending appeal hearings authorized under Subpart B of Part 1900 of this chapter.

(b) Members will not be assigned to perform service as individuals and will be paid for service only when requested to attend county committee meetings, make certain field visits with the County Supervisor, and will attend appeal hearings and training meetings in accordance with FmHA regulations. This will not prohibit a county committee member from making inquiries concerning applicants and borrowers during the normal contacts in his or her county or area.

(c) The County Supervisor is authorized to convene the county committee subject to the limitations specified in paragraph 2054.1127(a)(1) of this subpart. Form FmHA 2006–9, "Notice of Visit or Meeting," may be used to notify county committee members of meetings. The County Supervisor serves without extra compensation as Executive Secretary of the county committee.

(d) The County Supervisor will prepare Form FmHA 2054–7, "Record of County Committee Meetings," and maintain such files and records as may be required to reflect actions taken by the committee. The County Supervisor may designate the Assistant County Supervisor to represent him or her at county committee meetings, when it is not possible for the County Supervisor to attend. Such designations may be made orally. In these instances, the Assistant County Supervisor will prepare and sign minutes of the meeting as Executive Secretary and other records necessary to reflect actions taken by the committee.

§ 2054.1104 Eligibility to hold office.

Elected committee members must be persons who have their principal farming operation within the county or area in which activities of the county committee are carried out, and derive the principal part of their income from farming (as defined in § 2054.1102(a)(1) of this subpart). Criteria for selection of the designated member and alternate are found in § 2054.1105(a)(2) of this subpart. In addition, the elected and/or designated members and alternates must meet all of the following requirements to hold office as a county committee member:

(a) Be a citizen of the United States, or an alien lawfully admitted to the United States for permanent residence.

(b) Not have been removed for cause from any public office, or have been convicted of fraud, larceny, embezzlement, or any felony.

(c) Not have been dishonorably discharged from any branch of the armed services.

(d) Not be an officer or employee of a political party, or be active in the management or affairs of any political club, organization, or committee. Committee members are also subject to the prohibitions contained in several Executive Orders and the policy of the U.S. Department of Agriculture (USDA) with respect to holding public office. The general rules are contained in § 2045.1410 of FmHA Instruction 2045–CC (available in any FmHA office). Employees of FmHA, Agricultural Stabilization and Conservation Service, Soil Conservation Service, Extension Service or agents, or members of advisory boards or committees for these agencies are ineligible for appointment as FmHA county committee members.

(e) Not have served on other committees which make recommendations for approval of Federal Land Bank or Production Credit Association loans since FmHA may be involved in participation loans with such Farm Credit System loans. If serving on such other committees, county committee members may serve the remainder of their term on those committees provided they do not participate in any county committee actions which require a certification or recommendation on FmHA loan to applicants who are also obtaining Farm Credit System loans.

(f) Not be an individual (or spouse or dependent child of such an individual), stockholder of a corporation, member of a cooperative, joint operator of a joint operation, or partner in a partnership with an outstanding loan insured or guaranteed by FmHA, except as provided in FmHA Instruction 2045–BB (available in any FmHA office).

(g) Not perform any of the following functions for an FmHA-financed association or organization if he or she will continue such services after appointment:

(1) Serve as an official; or

(2) Perform administrative or employee functions, including performing clerical services, maintaining financial or other records, preparing financial reports, or developing operating budgets.

(h) Meet the legal or regulatory requirements for appointment to Federal employment. (See §§ 2054.1125 and 2054.1126 of this subpart.) This determination will be made subsequent to nomination but prior to the committee member taking office.

§ 2054.1105 Election requirements.

(a) *Election dates.* All regular elections of county committee members shall be held in those years that an elected member's term expires. This date must be in June but not either a Saturday or Sunday or a federally or State-recognized holiday. It shall be selected by the State Director and announced to the public.

(b) *Length of terms.* At the first election of county committee members, one member shall be elected for a term of one year and one member shall be elected for a term of two years. The individual receiving the highest votes will serve the two year term. Thereafter, elected and designated members of the county committee shall serve for a term of three years.

(c) *Beginning dates of terms.* County committee members begin their terms as follows:

(1) For regular elections, no later than July 31.

(2) For special elections, no later than 30 days after the election was held.

(d) *Notice to the public.* Information concerning county committee elections shall be made available to the general public through the use of official county newspapers or publications in general circulation serving the area, through notices prominently posted in FmHA offices within the area, and, if possible, through public service announcements on radio and/or television stations serving the area.

§ 2054.1106 Voting eligibility.

An individual farmer is entitled to one vote. A "Farmer" who is a legal entity such as a corporation, partnership, cooperative, joint operation, association or other legal entity is entitled to one vote by its duly authorized representative. A farmer may vote in only one county or area election. In order to vote in the election of a county committee member, voters must:

(a) Be farmers.

(b) Derive the principal part of their income from farming (as defined in § 2054.1102(a)(1) of this subpart).

(c) Have their principal farming operation within the county or area for which the election is being held.

§ 2054.1107-2054.1110 [Reserved]

§ 2054.1111 Conducting elections.

(a) *Election calendar (Exhibit C of this subpart,* available in any FmHA office).

(1) Election calendar provides a schedule of events for conducting the election.

(2) If the final date for any event is a nonworkday, it is, however, automatically extended to the next workday.

(b) *Developing slates of nominees.* Nomination by petition shall be the method used for developing slates of nominees.

(1) The period for nominating by petition should begin 45 days and end 20 days before the election date.

(2) The opportunity to nominate by petition shall be announced in official county newspapers or other publications in general circulation serving county or area and, if possible, through public service announcements on radio and television stations serving the area. In addition, notices shall be posted in all FmHA offices within the area. The Notice Of Right To Nominate By Petition shall be completed by the County Supervisor and read as set forth in Exhibit A of this subpart (available in any FmHA office).

(3) The minimum number of eligible nominees for a slate is one per vacant elected committee member position. The State Director or designated staff may solicit nominations to complete the slate.

(4) At least three eligible voters (including the nominee) within the county or area must sign a nominating petition in order for it to be valid. No one may sign more than one nominating petition.

(5) All eligible nominees nominated by valid petition shall be included on the slate for county committee.

(c) *Approval and processing of nominations by public petitions.* The County Supervisor shall review all petitions and verify their validity, including the eligibility of the nominee to hold office. In order to be valid, petitions must be:

(1) Limited to one nominee each.

(2) Signed by the nominee certifying that he or she is willing to serve if elected.

(3) Received in the County Office no later than 20 days before the election date, whether delivered in person or by mail.

(4) Accompanied by a signed statement from the nominee certifying that he or she meets the criteria to hold office.

(d) *Action to complete slate of nominees.* The State Director or designated staff may solicit nominations for enough candidates to complete the slate.

(1) The petitions will be returned to the County Office for execution of Form FmHA 2054-5, "Nominating Petition."

(2) The completed Form FmHA 2054-5 must be in the County Office no later than 20 days before the election. Attach all petitions and other documents as applicable.

(3) County Supervisor will send a letter to all eligible nominees explaining the duties of county committee member. See FmHA Guide Letter No. 2054-1 (available in any FmHA office).

(4) If less than the required minimum number of valid nominations are made by petition, the State Director will designate the necessary number of pro tem county committee members to have a full committee. These pro tem designees must meet all the requirements of this subpart concerning designated members and may serve only until a special election can be held. In no case will a pro tem appointment be made for more than 120 days.

§§ 2054.1112-2054.1114 [Reserved]

§ 2054.1115 Prohibition of employee participation in committee elections.

FmHA employees shall not campaign for or against any county committee candidate or nominee, or actively participate in the election except as necessary to:

(a) Perform their official duties.

(b) Vote, if eligible.

§ 2054.1116 Ballots.

Ballots shall be published at the time an election is announced in official county newspapers or publications serving the area. The Notice of Election, which contains the ballot, shall be completed by the County Supervisor and read as set forth in Exhibit B to this subpart (available in any FmHA office). Each State will supplement this section if additional notices are needed. The announcement must be made a least 10 days prior to the date of the election. There shall be a statement in the announcement as to where and when the ballots should be returned. Ballots shall also be available at the county office. Ballots should be mailed to any person who requests one even though the person's eligibility has not been determined. The names of voters who vote in person will be verified against an ASCS voter list and checked off from that list. The ASCS voter list will be used by FmHA only as an indicator that the prospective voter is a farmer. Presence or absence of an individual from the ASCS list does not automatically qualify or disqualify an individual. If a prospective voters' name is found on the ASCS list, and the individual submits a ballot, the prospective voter has self certified that he or she meets the criteria, and the ballot should be counted. If the prospective voter is not on the voter list, but can provide information that shows he or she is otherwise eligible, the voter's name should be added to the voter list and he or she permitted to vote.

§ 2054.1117 Absentee ballots.

Persons who do not plan to vote in person may request that a ballot be mailed to them. The ballot should be enclosed in an envelope along with voting instructions, a return envelope with the county office address, and a plain white envelope stamped ballot enclosed. The voter must pay the postage on the return envelope. The name of the voter will be verified against a ASCS voter list and checked off that list. If the prospective voter is not on the ASCS voter list, the County Supervisor will hold the ballot in abeyance and write the individual advising that he or she must either bring documentation in person to the county office or provide written evidence that he or she meets the voter criteria. Individuals must be given 5 working days to respond. If the prospective voter does not respond within the time frame permitted, or does not provide sufficient information for the County Supervisor to make a determination, the vote will not be counted, and the ballot will be destroyed. All verified mailed ballots will be placed unopened in the ballot box by the county staff.

§ 2054.1118 Ballot boxes and safekeeping of returned ballots.

Each county office holding an election will provide a ballot box in the county office. The boxes must:

(a) Be of sufficient size.

(b) Be constructed so ballots cannot be read or removed.

(c) Be sealed so that tampering with the box would be visible.

(d) Be identified as the ballot box for the county or area in which it is used.

§ 2054.1119 Basic requirements for ballot count.

Ballot counting by county office staff:

(a) Ballots shall be counted within 7 days after the election.

(b) The counting process should be public. This can be done by counting it in the county office during regular work hours.

§ 2054.1120 Counting ballots and announcing results.

The county office staff shall:

(a) Announce the beginning of the count, if witnesses are present.

(b) Open the ballot box in the presence of witnesses.

(c) Examine the ballots and determine whether each meets the election requirements.

(d) Separate the valid from the invalid ballots. Invalid ballots will not be counted and will be destroyed as specified in § 2054.1124 of this subpart.

(e) Call out the votes shown on the ballots.

(f) Review the final vote count and determine the candidates elected.

(g) Settle all two-way ties by coin toss, if necessary. Ties involving more than two will be settled by drawing lots.

§§ 2054.1121–2054.1122 [Reserved]

§ 2054.1123 Notifying candidates of election results.

The County Supervisor will promptly notify candidates of election results in writing. See FmHA Guide Letter No. 2054–2.

§ 2054.1124 Safekeeping and disposition of election records.

(a) Ballots for each County Office should be placed in a sealed container.

(b) Contents of containers should be retained for 30 days after the elections and then destroyed if no complaint or investigation is received.

(c) Voter lists, and other election documents should be retained in the county office files and disposed of after a period of 3 years.

§ 2054.1125 [Reserved]

§ 2054.1126 Appointment.

(a) *Employment conditions.* County committee members both elected and designated are given Federal appointments on an intermittent basis under "Schedule A, § 213.3113(e)(2)" of Civil Service Rules and Regulations. They are not required to take an Office of Personnel Management (OPM) examination and are not selected from OPM registers. They do not acquire competitive status through their appointment, but such service is creditable toward retention and retirement in connection with other Federal employment. Neither Retirement nor Social Security deductions are made from their pay, nor do they earn annual or sick leave. County committee members are not eligible for life insurance or health benefits coverage.

(b) A person may be appointed and paid as a county committee member while also holding another Federal appointment in an agency on a part-time or intermittent basis, subject to the exclusions found in § 2054.1104(d) of this subpart. In such cases, the member may not receive pay under both appointments for more than 40 hours in any one calendar week.

(1) A full-time Federal employee may be appointed only on a "Without Compensation" (WOC) basis.

(2) A full-time or part-time State government employee (not disqualified under § 2054.1104 of this subpart) may be appointed. If acceptance of Federal salary would violate a State law, while acceptance of the appointment itself would not be prohibited by the State Constitution or laws, it may be made on a WOC basis.

(3) A retired civilian employee of the Federal Government may be appointed only on a WOC basis.

(4) Dual compensation restrictions do not apply to persons receiving retired pay for enlisted military service, provided they are not receiving other payments from the Federal Government which would constitute violation of such restrictions.

(5) Dual compensation restrictions apply for persons receiving retired pay for *service as a commissioned officer.* The State Director will make the necessary determinations in such cases in accordance with FPM Chapter 550, Subchapter 6, "Reduction-in-Retired Pay Provision of the Dual Pay Status."

(c) *Appointment procedures.* The following procedures are to be followed:

(1) The County Supervisor will have the prospective county committee members including alternates complete Standard Form 171, "Application for Federal Employment," in an original only, which will be forwarded to the State Director by the County Supervisor with Form FmHA 2054–6, "Mileage Certification for County Committee Members," in an original completed by the County Supervisor. On Standard Form 171, in connection with the answers to questions on veteran's preference, the nominee should be told that he/she does not need to submit proof of military service.

(2) *Care should be taken that all Federal, territorial, State, county, or local offices held by a nominee for county committee appointment are specified on Standard Form 171,* in the space showing experience, so that the State Director may determine eligibility under the applicable restrictions.

(3) The State Director will review Standard Form 171 for completeness and conformity with requirements and will process Form AD–350A, "Personnel Action Input." The State Director will send a copy of Forms AD–350A, AD–349, "Declaration Sheet," with Part A completed, Treasury Form W–4, "Employee's Withholding Exemption Certificate," and State income tax withholding form, where applicable, to the County Supervisor. The copy of Form AD–350A will be retained in the county office committee file. FmHA Instruction 2045–BB and the USDA Employee Handbook entitled, "You and Your Job," and Appendix 1, "Employee Responsibilities & Conduct," will be sent to the County Supervisor with other forms for distribution to the new committee member.

(4) The County Supervisor will instruct the committee member in completing the Form AD–349, Treasury Form W–4, and State withholding form, when used, and will return these forms to the State Director for review. The date of Appointment Affidavit should be recorded on Form AD–321–3, "Time and Attendance Report," before Form AD–349 is forwarded to the State Director. Failure to enter the date of Appointment Affidavit on the Time and Attendance Report will delay the county committee member's pay. Form AD–349 must be executed in its entirety, including the continuation of Part C on the reverse. The State Director will forward the "Employee Copy" of Standard Form 50B printout produced by National Finance Center (NFC) to the County Supervisor for delivery to the county committee member.

(5) The terms of committee members and alternates begin on the effective date of the Schedule A Appointment.

§ 2054.1127 Compensation.

(a) *Computing time.* Service performed by regular and alternate county committee members will be computed in units of whole days. Alternate county committee members who, at the request of County Supervisors, attend county committee meetings for training purposes are entitled to compensation even if all three regular county committee members are present. The fact that alternates cannot take any official part in county committee functions under such circumstances does not preclude entitlement to compensation.

(1) *Service time limits.* County committee members are limited to a maximum of 20 days of service in any one calendar month. Avoid short or unnecessary meetings.

(2) *Compensation restrictions.* Payment of salary for county committee services (as distinguished from the allowance "in lieu of travel and subsistence") may be prohibited in some

BEST COPY AVAILABLE

cases as outlined in § 2054.1128(b) (3) and (4).

(b) *Rates of pay and allowance.* For county committee services performed in connection with the FmHA program, members will be paid at the basic daily rate of $21.00 plus an allowance in lieu of travel and subsistence on a sliding scale based on the distance from the county committee member's residence to the county office or other place where county committee meetings are normally held, as provided below:

One-way mileage from residence to meeting place	Salary	Allowance	Total
25 or less	$21.00	$6.00	$27.00
25–50	21.00	9.00	30.00
51 and over	21.00	12.00	33.00

(1) The allowance in lieu of travel and subsistence for each county committee member will be established by the State Director at the time of appointment. The rate will be based upon certification from the County Supervisor as to the mileage between the county committee member's residence and the place where meetings are normally held, by way of the most commonly traveled route. This rate will remain fixed after initially established, unless there is a change in the residence or the place where meetings are normally held, so as to place the member in a lower or higher allowance zone. The change in allowance is effective the first of the month which is not less than 30 calendar days after the change in residence or the first meeting at the new regular location. Changes in the allowance in lieu of travel and subsistence will not be made for attendance at training meetings, appeal hearings or for occasional county committee meetings not held at the regular location.

(2) County Supervisors will certify on Form FmHA 2054–6, for each person appointed. The certification will be submitted to the State Director at the time other documents required by § 2054.1128(a) of this subpart are submitted.

(3) A revised certification on Form FmHA 2054–6 will be submitted for a county committee member as required. This certification will be submitted as soon as possible after the county committee member's residence has changed, or after the first county committee meeting at the new location.

(4) If the County Supervisor has positive knowledge of the proper mileage zone, he or she may make the required certification without taking speedometer readings. Otherwise, the certification will be based on actual speedometer readings.

(5) The speedometer readings will be taken to the nearest full mile, with five tenths of a mile counted as the next highest mile (for example: 20.4 = 20; 20.5 = 21; 20.7 = 21). All certification will be prepared in duplicate, with a copy retained in the county office.

§ 2054.1128 Certification of services.

The County Supervisor will certify bi-weekly on Form AD–321–3, all services for which county committee members are to be paid. These forms should be completed and submitted promptly to NFC according to the Management of Objectives with Dollars through Employees (MODE) Time and Attendance Report Handbook.

§ 2054.1129 Termination of services.

If a county committee member is terminated prior to expiration of the appointment, the State Director will process Form AD–350A. The Employee's Copy will then be forwarded to the County Supervisor for delivery, using Form FmHA 2054–4, "Separation Notice to the County Area Committee members," or other suitable letter from the State Director to the committee member. If other than the form letter is used, a copy should be provided for the county committee file. If the form letter is used, no copy is needed.

(a) *Resignation.* The resignation of a county committee member may not be coerced by the County Supervisor or any other person. Members wishing to resign, however, should be urged to do so in writing so that the resignation may be accepted by official action. Resignations will be sent by the County Supervisor to the State Director, accompanied by a recommendation for replacement, if possible.

(b) *Other separations.* (1) The County Supervisors will inform members that they no longer meet eligibility requirements when they enter military service or move from the area and will also notify the State Director. If a resignation is not submitted promptly, termination of the appointment will be processed by the State Director.

(2) When a committee member accepts public office or engages in political activity in violation of the restrictions outlined in § 2054.1104 of this subpart, it is the State Director's responsibility on receipt of such information to make a full report to the Administrator. Upon receipt of a decision or guidance from the Administrator, the State Director will handle the case and direct the processing of any necessary personnel action.

(3) The County Supervisor will notify the State Director if a member dies so that the appropriate action may be processed.

(4) If the County Supervisor or other FmHA officials have information concerning personal conduct of a county committee member which adversely affects FmHA and the USDA, such information should be sent in a confidential letter to the State Director who will forward a report with recommendations to the Administrator. Upon receipt of a decision or guidance from the Administrator, the State Director will handle the case and direct the processing of any necessary personnel action.

(5) Where termination is due to the expiration of the term of appointment, a termination action is not necessary. NFC will automatically drop the county committee member from FmHA rolls. A letter of appreciation will be sent to the county committee member by the State Director.

§§ 2054.1130–2054.1149 [Reserved]

§ 2054.1150 OMB control number.

The collection of information requirements in this regulation have been approved by the Office of Management and Budget and assigned OMB control number 0575–0117.

Dated: April 7, 1986.

Vance L. Clark,

Administrator, Farmers Home Administration.

BILLING CODE 3410–07–M

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

8 CFR Part 212

Documentary Requirements; Nonimmigrants, Waivers, Admission of Certain Inadmissible Aliens; Parole

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This rule amends the listing of countries for which transit without visa privileges are unavailable to include Libya. This action is necessitated by the increase in Libyan sponsored terrorism.

EFFECTIVE DATE: May 22, 1986.

FOR FURTHER INFORMATION CONTACT:

For General Information:

Loretta J. Shogren, Director, Policy Directives and Instructions,

BEST COPY AVAILABLE

Immigration and Naturalization Service, 425 I Street, NW., Washington, DC 20536, Telephone: (202) 633-3048.

For General Information:
Dennis M. McCloskey, Assistant Chief Inspector, Immigration and Naturalization Service, 425 I Street, NW., Washington, DC 20536, Telephone: (202) 633-2680.

SUPPLEMENTARY INFORMATION: Recent state-sponsored activities by Libyan terrorists directed at American citizens, and in particular at airport facilities and air passengers have necessitated increased airport security measures. Libyans seeking admission into the United States undergo stringent visa application procedures prior to visa issuance and subsequent application for admission into the United States. 8 CFR 212.1(e) allows citizens and nationals of certain countries to transit through the United States without a formal visa application or issuance. In some instances, the individuals apply for admission into the United States and, if admitted, are allowed to access airport facilities to complete the necessary transfer to effect departure to a foreign destination. At certain locations within the United States, these individuals do not apply for admission into the United States, but remain sequestered in sterile transit lounge facilities until the onward flight to a foreign destination is ready for the boarding of passengers. In light of recent developments, the availability of this means of access into the United States without a formal visa application and review process by the Department of State is prejudicial to the safety and national welfare of the United States. Paragraph three (3) of 8 CFR 212.1(e) list the countries for which transit privileges are unavailable. Historically, this list has been amended to reflect changes brought on by a substantial abuse of transit privileges. This form of abuse primarily has been noncompliance with the conditions of administrative transit agreements.

Compliance with 5 U.S.C. 553 as to notice of proposed rulemaking and delayed effective date is unnecessary because this rule is related to foreign affairs functions of the United States.

In accordance with 5 U.S.C. 605(b), the Commissioner of Immigration and Naturalization certifies that this rule, if promulgated, does not have a significant economic impact on a substantial number of small entities. This rule is not a rule within the definition of section 1 (a) of E.O. 12291 as it relates to the foreign affairs function of the United States

List of Subjects in 8 CFR Part 212

Documentary requirements, Nonimmigrant visas, Transit conditions, Waivers, Parole of aliens.

Accordingly, Chapter 1 of Title 8 of the Code of Federal Regulations is amended as follows:

PART 212—DOCUMENTARY REQUIREMENTS: NONIMMIGRANTS; WAIVERS; ADMISSION OF CERTAIN INADMISSIBLE ALIENS; PAROLE

1. The authority citation for Part 212 continues to read as follows:

Authority: Secs. 101, 103, 212, 214, 235, 236, 238, 242, 66 Stat. 166, 173, 182, as amended, 189, 198, 200, 202, 208, as amended, 8 U.S.C. 1101, 1103, 1182, 1184, 1225, 1226, 1228, 1252, 1182b, 1182c, unless otherwise noted.

§ 212.1 [Amended]

2. Section 212.1(e)(3) is amended by adding the country Libya, after the country Iraq.

Dated: May 13, 1986.

Concurred by:

Alan C. Nelson,

Commissioner, Immigration and Naturalization Service.

Concurred by:

Joan M. Clark,

Assistant Secretary for Consular Affairs, Department of State.

[FR Doc. 86-11608 Filed 5-21-86; 8:45 am]

BILLING CODE 4410-10-M

---

8 CFR Part 238

Contracts with Transportation Lines; Addition of Air BC

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This rule amends the listing of transportation lines which have entered into agreements with the Service for the preinspection of their passengers and crew at locations outside the United States by adding the name of AirBC.

EFFECTIVE DATE: May 14, 1986.

FOR FURTHER INFORMATION CONTACT: Loretta J. Shogren, Director, Policy Directives and Instructions, Immigration and Naturalization Service, 425 I Street, NW., Washington, DC 20536, Telephone: (703) 633-3048.

SUPPLEMENTARY INFORMATION: The Commissioner of Immigration and Naturalization entered into an agreement with AirBC to provide for the preinspection of their passengers and crew as provided by section 238(b) of the Immigration and Nationality Act, as amended (8 U.S.C. 1228(b)). Preinspection outside the United States facilitates processing passengers and crew upon arrival at a U.S. port of entry and is a convenience to the travelling public.

Compliance with 5 U.S.C. 553 as to notice of proposed rulemaking and delayed effective date is unnecessary because the amendment merely adds transportation lines' names to the present listing and is editorial in nature.

This order constitutes a notice to the public under 5 U.S.C. 552 and is not a rule within the definition of section 1(a) of E.O. 12291.

List of Subjects in 8 CFR Part 238

Aliens, Common carriers, Government contracts, Inspections, Transportation lines.

Accordingly, Chapter I of Title 8 of the Code of Federal Regulations is amended as follows:

PART 238—CONTRACTS WITH TRANSPORTATION LINES

1. The authority citation for Part 238 continues to read as follows:

Authority: Secs. 103 and 238 of the Immigration and Nationality Act, as amended (8 U.S.C. 1103 and 1228).

§ 238.4 [Amended]

2. In § 238.4 Preinspection outside the United States, the listing of transportation lines is amended by adding the name "AirBC", in alphabetical order, under the column "at Vancouver."

BILLING CODE 4410-10-M

DEPARTMENT OF THE TREASURY

Comptroller of the Currency

12 CFR Part 16

[Docket No. 86-12]

Securities Offering Disclosure Rules; Technical Amendments

AGENCY: Comptroller of the Currency, Treasury.

ACTION: Final rule.

SUMMARY: The Office of the Comptroller of the Currency ("Office") is publishing technical amendments to its Securities Offering Disclosure Rules codified at 12

CFR Part 16. The technical amendments involve changes in references to provisions of the Office's Securities Exchange Act Disclosure Rules codified at 12 CFR Part 11. This action is necessary because a major recent amendment to Part 11 included a change in the format of that regulation. As a result, certain Part 16 references to sections in Part 11 are inaccurate. The intended effect of this final rule is to make Part 16 refer to appropriate sections in Part 11.

EFFECTIVE DATE: May 22, 1986.

FOR FURTHER INFORMATION CONTACT: Michael C. Dugas, Attorney, Securities and Corporate Practices Division, telephone (202) 447-1954, Office of the Comptroller of the Currency, 490 L'Enfant Plaza East, SW., Washington, DC 20219.

SUPPLEMENTARY INFORMATION: The Office is publishing this final rule which makes technical changes to its Securities Offering Disclosure Rules, 12 CFR Part 16. This final rule changes obsolete references to provisions of the Office's Securities Exchange Act Disclosure Rules (Part 11). On Wednesday, October 30, 1985, the Office published in the Federal Register (50 FR 45272) a final rule revising and restructuring Part 11. As a result of that final rule, several references in Part 16 to provisions of Part 11 are now inaccurate.

A. Regulatory Impact Analysis

Pursuant to Executive Order 12291 the Office has determined that this final rule does not constitute a major rule. Therefore, a regulatory impact analysis is not required.

B. Regulatory Flexibility Act

The Comptroller of the Currency has certified that this final rule will not have a significant impact on a substantial number of small banks or other small entities.

C. Adoption Without Notice and Comment

The Office has found that notice and comment procedures concerning this rulemaking are unnecessary. This rulemaking merely makes technical changes intended to eliminate confusion. There is no substantive effect.

D. Reason for Immediate Effective Date

This final rule is technical in nature, will have no substantive impact, and will eliminate confusion caused by references to obsolete provisions of Part 11. Therefore, an immediate effective date is in the public interest.

List of Subjects in 12 CFR Part 16

National banks, Securities, Disclosure.

Authority and Issuance:

For the reasons set out in the preamble, Part 16, of Chapter I of Title 12 of the Code of Federal Regulations is amended as follows:

PART 16—[AMENDED]

1. The authority citation for Part 16 continues to read as follows:

Authority: 12 U.S.C. 1 *et seq.*

§ 16.2 [Amended]

2. Section 16.2(g) is amended by changing the reference from "12 CFR 11.4(g)" to "12 CFR 11.403(a)–(d)."

§ 16.4 [Amended]

3. Section 16.4(b) is amended by changing the references from "12 CFR 11.5 and 11.51" to "12 CFR 11.501–11.512 and 11.560."

4. Section 16.4(f) is amended by changing the reference from "Item 7(a), including Instructions 1 and 2; Item 7(d); and Item 7(e) of 12 CFR 11.51" to "12 CFR 11.842(a) and 11.844(a) and (c)."

§ 16.6 [Amended]

5. Section 16.6(b), Item 13 is amended by changing the reference from "Item 7 of 12 CFR 11.51" to "12 CFR 11.842 and 11.844(a) and (c)."

Dated: May 14, 1986.

Robert L. Clarke,

Comptroller of the Currency.

[FR Doc. 86-11597 Filed 5-21-86; 8:45 am]

BILLING CODE 4810-33-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 85-NM-163-AD; Amdt. 39-5320]

Airworthiness Directives; Boeing Model 737 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive (AD) which requires inspection and modification, as necessary, of the horizontal stabilizer center section rear spar upper chord on certain Boeing 737 airplanes. An existing AD requires similar inspection and modifications on airplanes, line numbers 1 through 208, because of a history of cracking. Later airplanes are of a similar design and may also be subject to cracking. Such cracking, if undetected, could lead to failure of the horizontal stabilizer.

DATE: Effective June 30, 1986.

ADDRESS: The applicable service documents may be obtained upon request from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Carlton Holmes, Airframe Branch, ANM-120S; telephone (206) 431-2926. Mailing address: Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an AD requiring inspection and repair, as necessary, of the horizontal stabilizer center section rear spar upper chord on certain Boeing Model 737 series airplanes was published in the Federal Register on February 4, 1986 (51 FR 4383). The comment period for the proposal closed on March 28, 1986.

Interested persons have been afforded an opportunity to participate in the making of this AD and due consideration has been given to all comments received.

The Air Transport Association of America (ATA), on behalf of its affiliates, commented that Boeing Service Bulletin 737-53-1034, dated April 12, 1985, refers to modification of uncracked chords only. Therefore, paragraph B. of the proposed AD, which prescribes corrective action for cracked parts, should delete any reference to modification. The FAA concurs with the recommendation and the reference to the modification has been relocated to a more appropriate position in the final rule.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the proposed rule with the change as previously mentioned.

It is estimated that 218 airplanes of U.S. registry will be affected by this AD, that approximately 8 manhours per airplane will be required to accomplish the necessary inspections, and that the average labor cost will be $40 per manhour. Based on these estimates, the total cost to the U.S. operators will be $69,760 per inspection cycle.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic impact on a substantial number of small entities because few, if any, Boeing Model 737 airplanes are operated by small entities. A copy of a draft regulatory evaluation prepared for this action is contained in the regulatory docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.89.

2. By adding the following new airworthiness directive:

Boeing: Applies to Model 737 series airplanes, certificated in any category, as listed in Boeing Service Bulletin 737-55-1034, dated April 12, 1985.

To detect cracking in the horizontal stabilizer center section rear spar upper chord, accomplish the following prior to the accumulation of 50,000 landings; or prior to the accumulation of 30,000 landings after chord replacement; or prior to the accumulation of 35,000 landings after modification in accordance with Boeing Service Bulletin 737-55-1034, Part II, dated April 12, 1985; or within 500 landings after the effective date of this AD; whichever occurs latest, unless accomplished within the last 4,000 landings:

A. Eddy current inspect the horizontal stabilizer center section rear spar upper chord for cracks in the areas of each beam gusset plate in accordance with the Flight Safety Inspection Program in Boeing Service Bulletin 737-55-1034, dated April 12, 1985, or later FAA-approved revisions. Repeat the inspections at intervals not to exceed 4,500 landings.

B. If cracks are found in the horizontal stabilizer center section rear spar upper chord, repair in accordance with Part II, or replace in accordance with Part III, of the Accomplishment Instructions in Boeing Service Bulletin 737-55-1034, dated April 12, 1985, or later FAA-approved revisions. Resume the inspections required by paragraph A., above, no later than 9,000 landings after repair, or 50,000 landings after replacement, as appropriate.

C. For purposes of complying with this AD, subject to acceptance by the assigned FAA Maintenance Inspector, the number of landings may be determined by dividing each airplane's hours time in service by the operator's fleet average time for takeoff to landing for the airplane type.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

E. An alternate means of compliance or adjustment of the compliance time, which provide an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

All persons affected by this directive who have not already received the appropriate service bulletin from the manufacturer may obtain copies upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This document may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective June 30, 1986.

Issued in Seattle, Washington, on May 15, 1986.

David E. Jones,

Acting Manager, Northwest Mountain Region.

[FR Doc. 86-11474 Filed 5-21-86; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 85-NM-162-AD; Amdt. 39-5321]

Airworthiness Directives; Boeing Model 737 Series Airplanes

AGENCY: Federal Aviation Administration (FFA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive (AD) applicable to certain Boeing Model 737 airplanes which requires inspection and replacement, if necessary, of the horizontal stabilizer center section rear spar upper chord attach lugs. An existing AD requires similar inspections on earlier airplanes of this model because of a history of cracking. Later airplanes are of a similar design and may also be subject to cracking. Cracks, if undetected, could lead to loss of the horizontal stabilizer.

DATE: Effective June 30, 1986.

ADDRESSES: The applicable service documents may be obtained upon request from the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. This information may be examined at the FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Mr. Carlton Holmes, Airframe Branch, ANM-120S; telephone (206) 431-2926. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C-68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an AD requiring inspection and replacement, if necessary, of the horizontal stabilizer center section rear spar upper chord attach lugs on certain Boeing Model 737 series airplanes was published in the Federal Register on February 4, 1986 (51 FR 4384). The comment period for the proposal closed on March 28, 1986.

Interested parties have been afforded an opportunity to participate in the making of this AD, and due consideration has been given to all comments received.

The Air Transport Association of America (ATA) in behalf of one affiliate operator, commented that Boeing Service Bulletin 737-55-1033, dated April 12, 1985, provides for modification of uncracked lugs. This modification procedure includes replacement of lug bushings. The operator recommended that the final rule be revised to extend the compliance time for airplanes modified in accordance with this procedure. The FAA concurs with this recommendation and the final rule has been amended accordingly.

After careful review of the available data, including the comment noted above, the FAA has determined that air safety and the public interest require the adoption of the proposed rule with the change mentioned previously.

It is estimated that 219 airplanes of U.S. registry will be affected by this AD, and that approximately 4 manhours per airplane will be required to perform the necessary inspections. Based on an average labor cost of $40 per manhour, the total cost to the U.S. operators will be $35,040 per inspection cycle.

For the reasons discussed above, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 of significant

under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979) and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic effect on a substantial number of small entities because few, if any, Boeing Model 737 airplanes are operated by small entities. A final evaluation has been prepared for this regulation and has ben placed in the docket.

List of Subjects in 14 CFR Part 39

Aviation safety, Aircraft.

Adoption of the Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends § 39.13 of Part 39 of the Federal Aviation Regulations as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding the following new airworthiness directive:

Boeing: Applies to Model 737 series airplanes listed in Boeing Service Bulletin 737-55-1033, dated April 12, 1985, certificated in any category. To detect cracking in the horizontal stabilizer center section rear spar upper chord attach lugs, accomplish the following prior to the accumulation of 40,000 landings; or prior to the accumulation of 40,000 landings after a chord replacement or modification in accordance with Boeing Service Bulletin 737-55-1033, Option I, dated April 12, 1985; or within 200 landings after the effective date of this AD; whichever occurs latest, unless accomplished within the last 5,500 landings.

A. Eddy current inspect the horizontal stabilizer center section rear spar upper chord attach lug for cracks in accordance with the Flight Safety Inspection Program specified in Boeing Service Bulletin 737-55-1033, dated April 12, 1985, or later FAA-approved revisions. Repeat at intervals not to exceed 5,700 landings.

B. If cracks are found, replace the horizontal stabilizer center section rear spar upper chord in accordance with Boeing Service Bulletin 737-55-1033, dated April 12, 1985, or later FAA-approved revisions. Resume the inspections required by paragraph A., above, prior to the accumulation of 40,000 landings after the chord replacement, or modification in accordance with Boeing Service Bulletin 737-55-1033, Option I, dated April 12, 1985.

C. For purposes of complying with this AD, subject to acceptance by the assigned FAA Maintenance Inspector, the number of landings may be determined by dividing each airplane's hours time in service by the operator's fleet average time from takeoff to landing for the airplane type.

D. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

E. An alternate means of compliance or adjustment of the compliance time, which provide an acceptable level of safety, may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

All persons affected by this directive who have not already received the appropriate service bulletin from the manufacturer may obtain copies upon request to the Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. These documents may be examined at FAA, Northwest Mountain Region, 17900 Pacific Highway South, Seattle, Washington, or the Seattle Aircraft Certification Office, 9010 East Marginal Way South, Seattle, Washington.

This amendment becomes effective June 30, 1986.

Issued in Seattle, Washington, on May 15, 1986.

David E. Jones,

Acting Director, Northwest Mountain Region.

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 86-ASO-6]

Alteration of Transition Area, Orlando, FL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment increases the size of the Orlando, Florida, transition area to accommodate changes in an instrument approach procedure which serves Orlando Executive Airport. This alteration will lower the floor of controlled airspace in an area northwest of the airport from 1,200 to 700 feet above the surface.

EFFECTIVE DATE: 0901 UTC, August 28, 1986.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Supervisor, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

History

On Wednesday, March 26, 1986, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by altering the Orlando, Florida, transition area to designate additional controlled airspace northwest of Orlando Executive Airport. This airspace is required to support Instrument Flight Rule (IFR) aeronautical activities in the Orlando area (51 FR 10409). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. This amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6B dated January 2, 1986.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations increases the size of the Orlando, Florida, transition area to accommodate revised instrument approach procedures serving Orlando Executive Airport.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition area.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as amended (51 FR 5968), is further amended, as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. By amending § 71.181 as follows:

Orlando, FL—[Amended]

Following . . . long. 81°19'30"W.); . . . insert the following words: "within three miles each side of Orlando VORTAC 327° radial, extending from the 6.5-mile radius area to 14 miles northwest of the VORTAC."

Issued in East Point, Georgia, on May 12, 1986.

James L. Wright,

Acting Manager, Air Traffic Division Southern Region.

[FR Doc. 86-11476 Filed 5-21-86; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 86-ASO-7]

Alteration of Transition Area, Prentiss, MS

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment designates the Prentiss, Mississippi, transition area to accommodate Instrument Flight Rule (IFR) operations at Prentiss-Jefferson Davis County Airport. This action will lower the base of controlled airspace from 1,200 to 700 feet above the surface in the vicinity of the airport. An instrument approach procedure, based on the proposed Prentiss Non-direction Radio Beacon (RBN), has been developed to serve the airport and the controlled airspace is required for protection of IFR aeronautical activities.

EFFECTIVE DATE: 0901 UTC, July 3, 1986.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Supervisor, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

History

On Thursday, April 3, 1986, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by designating the Prentiss, Mississippi, transition area. This action will provide controlled airspace for aircraft executing a new instrument approach procedure to Prentiss-Jefferson Davis County Airport. The operating status of the airport is changed to IFR (51 FR 11455). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. This amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6B dated January 2, 1986.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations designates the Prentiss, Mississippi, transition area and lowers the base of controlled airspace in the vicinity of Prentiss-Jefferson Davis County Airport from 1,200 to 700 feet above the surface.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Aviation safety, Transition area.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. By amending § 71.181 as follows:

Prentiss, MS—[New]

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Prentiss-Jefferson Davis County Airport (Lat. 31°35'47"N., Long. 89°54'24"W.); within three miles each side of the 129° bearing from the Prentiss RBN (Lat. 31°35'45"N., Long. 89°54'18"W.), extending from the 6.5-mile radius area to 8.5 miles southeast of the RBN.

Issued in East Point, Georgia, on May 12, 1986.

James L. Wright,

Acting Manager, Air Traffic Division Southern Region.

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Part 370 and 373

[Docket No. 51068-6047]

Export Controls on the Republic of South Africa

AGENCY: Export Administration, Commerce.

ACTION: Final rule.

SUMMARY: The special licensing procedures outlined in Part 373 of the Export Administration Regulations allow persons or firms to make multiple shipments of designated classes of goods, and in some cases technical data to approved consignees. This rule prohibits the use of those licenses for goods that are to be used in a nuclear production or utilization facility in the Republic of South Africa or Namibia pursuant to Executive Order 12532 of September 9, 1985, which specifies that the procedures shall be effective on October 11, 1985.

This rule limits the use of all outstanding and future special licenses in the manner described above.

EFFECTIVE DATE: October 11, 1985.

FOR FURTHER INFORMATION CONTACT: Joan Sitnik, Strategic Policy & Planning Division, Export Administration, Department of Commerce, Washington, DC (Telephone: (202) 377-3160.

SUPPLEMENTARY INFORMATION:

Rulemaking Requirements

In connection with various rulemaking requirements, Export Administration has determined that:

1. Because this rule concerns a foreign affairs function of the United States, it is not a rule or regulation within the meaning of section 1(a) of Executive Order 12291, and it is not subject to the requirements of that Order. Accordingly, no preliminary or final Regulatory Impact Analysis has to be or will be prepared.

2. Section 13(a) of the Export Administration Act of 1979, as amended (50 U.S.C. App. 2412(a)), exempts this rule from all requirements of section 553 of the Administrative Procedure Act (APA) (5 U.S.C. 553), including those

requiring publication of a notice of proposed rulemaking, an opportunity for public comment, and a delay in effective date. This rule is also exempt from these APA requirements because it involves a foreign affairs function of the United States. Further, no other law requires that notice of proposed rulemaking and an opportunity for public comment be given for this rule. Accordingly, it is being issued in final form. However, as with other Department of Commerce rules, comments from the public are always welcome. Written comments (6 copies) should be submitted to Betty Ferrell, Office of Technology & Policy Analysis, Export Administration, Department of Commerce, Washington DC 20230.

3. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule by section 553 of the Administrative Procedure Act (5 U.S.C. 553) or by any other law, under sections 603(a) and 604(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a) and 604(a)) no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

4. This rule does not contain a collection of information requirement under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.).

2. Section 370.2 is amended by adding two new terms in alphabetical order as set forth below:

§ 370.2 Definition of terms.

* * * * *

Production Facility. As defined by 10 CFR 110.2 of the Nuclear Regulatory Commission Regulations, production facility means any nuclear reactor or plant specially designed or used to produce special nuclear material through the irradiation of source material or special nuclear material, the separation of isotopes or the chemical reprocessing or irradiated source or special nuclear material.

* * * * *

Utilization Facility. As defined by 10 CFR 110.2 of the Nuclear Regulatory Commission Regulations, utilization facility means any nuclear reactor, other than one that is a production facility, and the following major components of a nuclear reactor:

Pressure vessels designed to contain the core of a nuclear reactor;

Primary coolant pumps;

Fuel charging or discharging machines; and Control rods.

A utilization facility does not include the steam turbine generator portion of a nuclear power plant.

* * * * *

3. In § 373.1, paragraph (a)(1) is amended by adding a paragraph (iv) as follows:

§ 373.1 Introduction.

* * * * *

(a) Special Limitations.

(1) * * *

(i) * * *

(ii) * * *

(iii) * * *

(iv) Export or reexport any commodity to a nuclear production or utilization facility (as defined in section 370.2 of the EAR) in the Republic of South Africa or Namibia.

DEPARTMENT OF STATE

22 CFR Part 41

[Department Regulation 108.650]

Withdrawal of Nonimmigrant Visa Documentary Waivers

AGENCY: Department of State.

ACTION: Final rule.

SUMMARY: This final rule amends 22 CFR 41.6(e) to withdraw the privilege of transiting the United States without visas (TWOV) from citizens of Libya. The TWOV privilege normally facilitates passage through the United States of aliens in transit to third countries. Withdrawal of the privilege will require Libyan citizens to be in possession of visas and valid passports in order to transit the United States upon the effective date of this rule.

EFFECTIVE DATE: May 22, 1986.

ADDRESS: Stephen K. Fischel, Chief, Legislation and Regulations Division, Visa Services, Washington, DC 20520 (202) 632–1900.

FOR FURTHER INFORMATION CONTACT: Guida Evans-Magher, Legislation and Regulations Division, Visa Services, (202) 632–2907.

SUPPLEMENTARY INFORMATION: Under present regulations citizens of Libya who desire to travel through the United

States in transit from one country to another without the need of obtaining a visa may do so under the visa waiver provisions of § 41.6(e). Pursuant to paragraph (g) of Executive Order 12543, of January 7, 1986, (51 FR 875), which directed U.S. Government agencies to take appropriate measures to carry out the provisions of that Order, and given the nature and seriousness of Libyan sponsored terrorism against U.S. citizens and property, the Department has determined that it is in the national interest to withdraw the privilege to transit without a visa from citizens of Libya. Upon the effective date of this rule, all Libyans entering the United States for any purpose will be required to be in possession of valid visas and passports. The Immigration and Naturalization Service has also amended its regulations at 8 CFR 212.1(e) to withdraw this privilege from citizens of Libya. Because of the threat to United States national interests, the Department and the Immigration and Naturalization Service, acting jointly, amend the regulations to withdraw the transit without visa privilege as it applies to citizens of Libya and add its name to the list of countries whose nationals are precluded from transiting through the United States without a visa.

Due to the emergency nature of these actions relating to foreign affair functions the provisions of the Administrative Procedure Act, 5 U.S.C. 553, relative to notice of proposed rulemaking are impracticable and contrary to the public interest in this instance. In addition, this final rule is exempt from the requirements of Executive Order 12291 on the same basis. This rule is not considered to be a major rule for purposes of E.O. 12291 nor is it expected to have a significant impact on a substantial number of small entities.

List of Subjects in 22 CFR Part 41

Aliens, Nonimmigrants, Visas, Waivers.

In view of the foregoing, Part 41 is amended to read:

PART 41—PASSPORTS AND VISAS NOT REQUIRED FOR CERTAIN NONIMMIGRANTS

1. The authority citation for Part 41 is revised to read as follows:

Authority: Sec. 101, 84 Stat. 116, 8 U.S.C. 1101; 109(b), 91 Stat. 847; 104, 66 Stat. 174, 8 U.S.C. 1104.

2. The second sentence in § 41.6(e)(1) is revised to read:

§ 41.6 Nonimmigrants not required to present passports, visas, or border-crossing identification cards.

* * * * *

(e) *Aliens in immediate transit—(1) Aliens in bonded transit.* * * * This waiver of visa and passport requirement is not available to an alien who is a citizen of Afghanistan, Bangladesh, Cuba, India, Iran, Iraq, Libya, Pakistan or Sri Lanka. * * *

* * * * * *

Dated: May 19, 1986.

Joan M. Clark,

Assistant Secretary for Consular Affairs.

BILLING CODE 4710-06-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 8069]

Income Taxes; Investment Credit Limitation in Regulated Companies; Synchronization of Interest

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations relating to the limitation on the investment credit in the case of certain regulated companies. Questions have arisen concerning the permissibility of "synchronization of interest" and the "zero-cost capital" method under the ratable flow-through method of accounting for the investment credit with respect to public utility property. The regulations provide guidance on these issues and affect regulated companies that use the ratable flow-through method of accounting for the investment credit with respect to public utility property.

DATE: The regulations are generally effective with respect to public utility property constructed or acquired by the taxpayer after August 15, 1971.

FOR FURTHER INFORMATION CONTACT: Paulette Chernyshev of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224, Attention: CC:LR:T, 202-566-3288, not a toll-free call.

SUPPLEMENTARY INFORMATION:

Background

On June 28, 1985, proposed amendments to the Income Tax Regulations (26 CFR Part 1) under section 46(f) of the Internal Revenue Code were published in the Federal Register (50 FR 26385). The amendments were proposed to clarify the manner in which the limitation imposed by section 46(f) applies in the case of regulated companies that use the ratable flow-through method of accounting for the investment credit with respect to public utility property.

Many written comments were received with respect to the proposed amendments, and a public hearing on the amendments was held on August 28, 1985. After consideration of all comments and testimony received on the proposed amendments, the amendments are adopted as revised by this Treasury decision.

Interest Synchronization

Section 46(f)(2) permits the use of a ratable flow-through method of accounting for the investment credit with respect to public utility property. Under this method of accounting, the taxpayer's cost of service for ratemaking purposes may be reduced by a ratable portion of the investment credit. The credit is disallowed, however, if the taxpayer's cost of service is reduced by more than a ratable portion of the credit or if the base to which the taxpayer's rate of return for ratemaking purposes is applied ("rate base") is reduced by any portion of the credit.

In determining whether a credit has been used to reduce rate base, § 1.46-6(b)(3) of the regulations requires reference to "any accounting treatment that affects the permitted return on investment by treating the credit in any way other than as though it were capital supplied by common shareholders to which a 'cost of capital' rate is assigned that is not less than the taxpayer's overall cost of capital rate." This requirement appears only in the definition of rate base and it is unclear whether the credit also must be treated as capital provided by common shareholders in determining cost of service. As a result, the Service has received a number of ruling requests asking whether a portion of the return on the rate base attributable to the credit may be characterized as interest expense and taken into account in computing Federal income tax expense for ratemaking purposes ("interest synchronization" or "synchronization of interest").

This issue is addressed, either directly or indirectly, in several cases reviewing rate orders. Although the permissibility of synchronization of interest was an issue in these reviews, the Internal Revenue Service was not a party to the

cases and the decisions did not determine the actual tax liability of the regulated companies. Two Federal Courts of Appeal have determined that interest synchronization does not violate section 46(f)(2) or the existing regulations. *Union Electric v. FERC*, 668 F.2d 389 (8th Cir. 1981); *Nepco Municipal Rate Commission v. FERC*, 668 F.2d 1327 (D.C. Cir. 1981); *Public Service of New Mexico v. FERC*, 653 F.2d 681 (D.C. Cir. 1981). In addition, several state courts have approved the use of interest synchronization in ratemaking proceedings. *See, e.g., Narragansett Electric Company v. Burke*, 475 A.2d 1379 (R.I. 1984); *New England Telephone & Telegraph Company v. Public Utilities Commission*, 448 A.2d 272 (Me. 1982). Other courts, however, have concluded that synchronization of interest is not permitted under section 46(f)(2) and the existing regulations. *See, e.g., Utilities Commission v. Carolina Telephone & Telegraph*, 300 S.E. 2d 395 (Ct. App. N.C. 1983).

The proposed regulations provided that interest synchronization would not constitute a reduction in cost of service for purposes of section 46(f)(2); thus generally permitting interest synchronization for purposes of the ratable flow-through method of accounting for the investment credit. The preamble of the notice of proposed rulemaking set forth two reasons for this provision. The first was the Service's conclusion that synchronization of interest does not result in a reduction of cost of service that is attributable to the credit. This conclusion is consistent with financial market realities since, in the absence of the credit, the additional capital needed to finance the investment property generally would be obtained from a similar proportion of debt and equity as in the existing capital structure of the utility. Synchronization of interest properly takes account of the additional interest expense that would have been incurred in those circumstances.

In addition, the Service believed that synchronization of interest under section 46(f)(2) would result in an appropriate accounting for the credit in establishing rates. The basis for this conclusion may be illustrated by a comparison of the rates that would be established without synchronization of interest with the rates that would be established if the credit were unavailable. Under certain factual circumstances (e.g., long-lived assets with respect to which the credit was allowed), the rates that would be established without synchronization of interest may actually exceed in one or more service years the rates that would be established if the credit were unavailable. In contrast, the rates that would be established with synchronization of interest cannot exceed in any year the rates that would be established if the credit were unavailable.

The Service received a number of comments from public service commissions and other regulatory authorities generally supporting the position in the proposed regulations. On the other hand, the Service also received many comments from regulated public utilities and their representatives, which, with some exceptions, opposed interest synchronization on the ground that it constitutes an impermissible reduction in cost of service under section 46(f)(2). After careful consideration of all comments received, the Service has concluded that interest synchronization should be permitted for the reasons stated in the preamble of the notice of proposed rulemaking. Accordingly, the final regulations clarify that interest synchronization is permitted under a ratable flow-through method of accounting.

Zero-Cost Capital

Another issue addressed by the public comments concerned the effect of "zero-cost capital" on the rate of return assigned to the credit. The issue arises if, for example, the reserve for deferred taxes established under sections 167 and 168 is included in rate base as no-cost capital, as permitted under section 1.167(e) of the regulations. The issue may similarly arise, for example, if non-interest-bearing liabilities such as customer deposits are included in a taxpayer's rate base. In such situations, a ratemaking commission may reduce the overall rate of return on account of the zero-cost capital (*e.g.*, deferred taxes or non-interest-bearing liabilities) included in rate base. The issue raised by the public comments is whether the rate of return assigned to the credit under section 46(f)(2)(B) may also be reduced on account of such zero-cost capital.

The proposed regulations provided that the cost of capital assigned to the credit must be at least equal to the overall cost of the capital, determined on the basis of a weighted average, that would have been provided by common and preferred shareholders and long-term creditors if the credit were unavailable. Under the proposed regulations, the composition of such capital depended, generally, on all the relevant facts and circumstances; however, a safe-harbor provision permitted determinations that additional capital would have been provided in the same proportions and at the same rates of return as the capital actually provided by shareholders and long-term creditors. Neither the general rule nor the safe-harbor provision of the proposed regulations would have permitted any reduction in the rate of return assigned to the investment credit on account of zero-cost capital. This position was based on the assumption that items of zero-cost capital would not increase if the credit were unavailable.

After consideration of the comments the Service has concluded that, although this assumption regarding zero-cost capital is generally true, it is not strictly correct in certain situations. For example, if the basis of a utility's property has been reduced under section 48(q), the additional capital provided if the credit were unavailable would include not only equity and long-term debt, but also deferred taxes. This occurs because the utility's basis in the property would increase if the credit were unavailable, eventually resulting in a greater amount of deferred taxes. Accordingly, the final regulations permit zero-cost capital to be taken into account for purposes of determining the cost of capital assigned to the credit, but only to the extent that additional amounts of such capital would be provided if the credit were unavailable. In the case of a utility that has a basis reduction under section 48(q), for example, the amount of capital provided in the form of deferred taxes will, as explained above, generally be less in each period than the amount of deferred taxes that would be provided if the credit were unavailable. For any period, the difference between these two amounts is the amount of additional deferred taxes that would be provided if the credit were unavailable. The regulations provide that only the amount of additional deferred taxes for a period may be taken into account in determining the rate of return assigned to the credit for that period. Thus, the deferred taxes actually included in the utility's rate base may not be taken into account for this purpose. Under the regulations, any amount of additional zero-cost capital must also be taken into account for purposes of determining the amount of additional interest that the taxpayer would pay or accrue if the credit were unavailable, thus reducing the amount subject to interest synchronization.

The Service continues to believe that additional capital typically would be provided primarily in the form of equity and long-term debt if the credit were unavailable. Accordingly, the safe-

harbor provision of the proposed regulations is generally unchanged, except to clarify that the safe harbor applies only if it is used to determine both the cost of capital assigned to the credit and the amount subject to interest synchronization.

Hypothetical Capital Structure

An additional issue raised by the public comments concerned the effect of using a hypothetical capital structure to determine a utility's overall rate of return. A hypothetical capital structure may be used if, for example, a regulatory commission determines that the actual capital structure of a utility does not include sufficient debt and imputes debt of a parent holding company to the utility. The issue in such cases is whether the composition of the capital that would be provided if the credit were unavailable is determined by reference to the change that would occur in the actual capital structure of the utility or, instead, by reference to the change in the hypothetical capital structure used by the ratemaking commission. The final regulations clarify that it is the change in the hypothetical capital structure that is taken into account for this purpose.

Transitional Rule

The Service received a number of inquiries requesting clarification of the transitional rule in § 1.46–6(b)(iii) of the proposed regulations. In general, this rule (as revised by this Treasury decision) provides that rate orders put into effect before June 23, 1986 do not violate section 46(f) if they satisfy the requirements of either the amended regulations or the regulations in effect before the amendment. This is significant because the regulations in effect before the amendment provided that the overall cost of capital rate depends on the practice of the regulatory body. The Internal Revenue Service is aware that certain ratemaking commissions, relying on this language, have required utilities to use zero-cost capital in determining the earnings rate to be assigned to the credit in a manner inconsistent with the amended regulations. The use of zero-cost capital in such cases will not be treated as a violation of section 46(f)(2) under the regulations in effect before the amendments.

Amendments Not Covered by These Proposed Regulations

The amendments do not reflect amendments made to section 46 after the enactment of the Revenue Act of 1971, other than the redesignation of section 46(e) as section 46(f) by the Tax Reduction Act of 1975. In addition, the regulations do not reflect the amendment made to section 167(l)(2)(C) by section 209(d)(3) of the Economic Recovery Tax Act of 1981 (Pub. L. 97–34; 95 Stat. 227). That amendment has the effect of eliminating the special rule for immediate flow-through under section 46(f)(3) for property placed in service after December 31, 1980.

Regulatory Flexibility Act; Executive Order 12291

The Commissioner of Internal Revenue has determined that this final rule is not a major rule as defined in Executive Order 12291 and that a Regulatory Impact Analysis therefore is not required. Although a notice of proposed rulemaking that solicited public comment was issued, the Internal Revenue Service concluded when the notice was issued that the regulations are interpretative and that the notice and public procedure requirements of 5 U.S.C. 553 do not apply. Accordingly, the final regulations are not subject to the Regulatory Flexibility Act (5 U.S.C. Chapter 6).

Drafting Information

The principal author of these regulations is Paulette Chernyshev of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations on matters of both substance and style.

List of Subjects in 26 CFR Parts 1.0–1—1.58–8

Income taxes, Tax liability, Tax rates, Credits.

Amendments to the Regulations

Accordingly, 26 CFR Part 1 is amended as follows:

PART 1—[AMENDED]

Income Tax Regulations

Paragraph 1. The authority for Part 1 is amended by adding the following citation:

Authority: 26 U.S.C. 7805. * * * Section 1.46–6 also issued under 26 U.S.C. 46(f)(7).

Par. 2. Section 1.46–6 is amended by revising paragraph (b)(2)(i), (3), and (4)(ii) to read as follows:

§ 1.46–6 Limitation in case of certain regulated companies.

* * * * *

(b) *Definitions.* * * *

(2) *Cost of service.* (i) (A) For purposes of this section, "cost of service" is the amount required by a taxpayer to provide regulated goods or services. Cost of service includes operating expenses (including salaries, cost of materials, etc.) maintenance expenses, depreciation expenses, tax expenses, and interest expenses. For purposes of this section, any effect on a taxpayer's permitted return on investment that results from a reduction in the taxpayer's rate base does not constitute a reduction in cost of service, even though, as a technical ratemaking term, "cost of service" ordinarily includes a permitted return on investment. In addition, taking into account a deduction for the additional interest that the taxpayer would pay or accrue if the credit were unavailable in determining Federal income tax expense ("synchronization of interest") does not constitute a reduction in cost of service for purposes of section 46(f)(2). This adjustment to Federal income tax expense may be taken into account in determining cost of service for the regulated accounting period or periods that include the taxable year to which the adjustment relates or for any subsequent regulated accounting period.

(B) See paragraph (b)(3)(ii)(B) of this section for rules relating to the amount of additional interest that the taxpayer would pay or accrue if the credit were unavailable.

* * * * *

(3) *Rate base.* (i) For purposes of this section, "rate base" is the monetary amount that is multiplied by a rate of return to determine the permitted return on investment.

(ii)(A) In determining whether, or to what extent, a credit has been used to reduce rate base, reference shall be made to any accounting treatment that affects rate base. In addition, in those cases in which the rate of return is based on the taxpayer's cost of capital, reference shall be made to any accounting treatment that reduces the permitted return on investment by treating the credit less favorably than the capital that would have been provided if the credit were unavailable. Thus, the credit may not be assigned a "cost of capital" rate that is less than the overall cost of capital rate, determined on the basis of a weighted average, for the capital that would have been provided if the credit were unavailable.

(B) For purposes of determining the cost of capital rate assigned to the credit and the amount of additional interest that the taxpayer would pay or accrue, the composition of the capital that would have been provided if the credit were unavailable may be determined—

(*1*) On the basis of all the relevant facts and circumstances; or

(*2*) By assuming for both such

purposes that such capital would be provided solely by common shareholders, preferred shareholders, and long-term creditors in the same proportions and at the same rates of return as the capital actually provided to the taxpayer by such shareholders and creditors.

For purposes of this section, capital provided by long-term creditors does not include deferred taxes as described in section 167(a)(2)(C) or 168(e)(3)(B)(ii).

(C) If a taxpayer's overall rate of return is based on a deemed or hypothetical capital structure, paragraph (b)(3)(i)(B) of this section shall be applied by treating the deemed or hypothetical capital as if it were the capital actually provided to the taxpayer and determining the composition of the capital that would have been provided if the credit were unavailable in a manner consistent with such treatment.

(iii) Whether, or to what extent, a credit has been used to reduce rate base for any period to which pre-June 23, 1986 rates apply will be determined under 25 CFR 1.46-6(b) (3) and (4) (revised as of April 1, 1985) if such a determination avoids disallowance of a credit that would be disallowed under paragraph (b)(3)(ii) or (4)(ii) of this section. For this purpose, a period of which pre-June 23, 1986 rates apply is any period for which the effect of the credit on rate base for ratemaking purposes is established under a determination put into effect (within the meaning of paragraph (f) of this section) before June 23, 1986.

(4) *Indirect reductions to cost of service or rate base.* * * *

(ii) One type of such indirect reduction is any ratemaking decision in which the credit is treated as operating income (subject to ratemaking regulation) or is treated less favorably than the capital that would have been provided if the credit were unavailable. For example, if the credit is accounted for as nonoperating income on a company's regulated books of account but a ratemaking decision has the effect of treating the credit as operating income in determining rate of return to common shareholders, then cost of service has been indirectly reduced by reason of the credit.

BILLING CODE 4830-01-M

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

29 CFR Part 1601

Final Procedural Regulation

AGENCY: Equal Employment Opportunity Commission.

ACTION: Final rule.

SUMMARY: The Equal Employment Opportunity Commission is amending its procedural regulations to reflect a change in delegations of authority for issuance of administrative determinations on charges brought under Title VII of the Civil Rights Act of 1964, as amended.

EFFECTIVE DATE: May 22, 1986.

FOR FURTHER INFORMATION CONTACT: Nicholas M. Inzeo, Assistant Legal Counsel, Legal Services, Equal Employment Opportunity Commission, 2401 E Street, NW., Washington, DC 20507 (202) 634-6592.

SUPPLEMENTARY INFORMATION: Authority for issuing letters of determination on charges filed under Title VII of the Civil Rights Act generally has been delegated to Commission field offices. In the past the delegation in 29 CFR 1601.21(d) has included authority to issue determinations where previously issued Commission decisions or guidelines serve as precedent for the determination. In order to more effectively address issues of concern to the Commission, the Commission is amending its delegation of authority to issue letters of determination. The Commission will no longer use the criterion of existing decision or guideline precedent to determine when field offices are delegated authority to issue determinations on charges. Rather, the Commission periodically will identify issues which it wants to review and will delegate authority to issue determinations in all cases except those that contain such an issue. Those issues will be contained in Appendix A of Section 603 of Volume II of the EEOC Compliance Manual. Consistent with the change in delegation of authority in 29 CFR 1601.21(d), the Commission is amending 29 CFR 1601.77, to explain that the Commission will individually review charges closed by 706 agencies that contain an issue designated by the Commission for review.

This regulation has been reviewed in accordance with Executive Order 12291. It is not a major rule and does not require a regulatory impact analysis under section 3 of that Order. Similarly, the Commission certifies under 5 U.S.C. 605(b), enacted by the Regulatory Flexibility Act (Pub. L. 96-354), that this rule will not result in a significant impact on a substantial number of small entities. Therefore, a regulatory flexibility analysis is not required.

List of Subjects in 29 CFR Part 1601

Administrative practice and procedure, Equal employment opportunity, Inter-governmental Relations.

By virtue of the authority vested in the Commission under section 713(a) of Title VII of the Civil Rights Act of 1964, 42 U.S.C. 2000e-12(a), the Equal Employment Opportunity Commission hereby publishes the amendment to § 1601.21 and § 1601.77 of its procedural regulations.

For the Commission.

Clarence Thomas,
Chairman.

Accordingly, EEOC amends 29 CFR Part 1601 as follows:

1. The authority citation for Part 1601 continues to read as follows:

Authority: Sec. 713(a), Title VII of the Civil Rights Act of 1964, as amended, 42 U.S.C. 2000e-12(a), otherwise noted.

§ 1601.21 [Amended]

2. Section 1601.21(d) introductory text is amended by removing the clause "in those cases in which previously issued Commission Decisions serve as precedent for the determination and in those cases in which the Commission's Guidelines provide a statement of policy which serves as authority for the determination" and replacing it with the clause "except in those cases involving issues currently designated by the Commission for priority review."

§ 1601.77 [Amended]

3. Section 1601.77 is amended by removing the clause "or where no previously issued Commission decision serves as precedent for the determination in the charge" and replacing it with the clause "or where the charge involves an issue currently designated by the Commission for priority review."

BILLING CODE 6570-01-M

DEPARTMENT OF DEFENSE

Department of the Navy

32 CFR Part 732

Nonnaval Medical and Dental Care

AGENCY: Naval Medical Command, Navy, DOD.

ACTION: Final rule.

SUMMARY: The Naval Medical Command promulgated this regulation to disseminate the authority and policies involved in obtaining and having the Navy pay for nonnaval medical and dental care of active duty naval personnel and outpatient care from nonnaval sources for active duty members of North Atlantic Treaty Organization nations. Regulation also sets forth Third Party Liability Program recoupment for benefits received and collection action for subsistence furnished while such members are hospitalized in nonnaval facilities.

EFFECTIVE DATE: July 13, 1986.

FOR FURTHER INFORMATION CONTACT: Herbert L. Pelham, Program Analyst, Naval Medical Command, Washington, DC 20372–5120, (202) 653–1179.

SUPPLEMENTARY INFORMATION: This revision relates to internal naval management and personnel practices and largely reflects nonsubstantive changes adopted in NAVMEDCOMINST 6320.1. It was determined that invitation of public comment on these changes prior to adoption would be impracticable and is therefore not required under public rulemaking provisions of Parts 296 and 701 of 32 CFR.

List of Subjects in 32 CFR Part 732

Dental health, Health care, Military personnel.

Dated: May 15, 1986.

William F. Roos, Jr.,

Lt, JAGC, USNR Federal Register Liaison Officer.

Accordingly, 32 CFR Part 732 is revised to read as follows:

PART 732—NONNAVAL MEDICAL AND DENTAL CARE

Subpart A—General

Sec.
732.1 Purpose.
732.2 Scope.
732.3 Background.
732.4 Action.

Subpart B—Medical and Dental Care From Nonnaval Sources

732.13 General.
732.14 Authorized care.
732.15 Unauthorized care.
732.16 Authorizations.
732.17 NAVMED 6320/10, Statement of Civilian Medical/Dental Care.
732.18 Claims.
732.19 Medical board.
732.20 Recovery of medical care payments.
732.21 Collection for subsistence.
732.22 Appeal of denied claims.
732.23 Records.

Authority: 5 U.S.C. 301; 10 U.S.C. 1071–1090, 5031, 6148, 6201–6203, and 8140; and 32 CFR 700.1202.

Subpart A—General

§ 732.1 Purpose.

To delineate and promulgate the authority and policies concerning inpatient and outpatient medical and dental care obtained from nonnaval sources by active duty Navy and Marine Corps members and outpatient care from nonnaval sources for active duty members of North Atlantic Treaty Organization (NATO) nations. Provides the conditions under which the costs of such care may be borne by the Navy.

§ 732.2 Scope.

The provisions of this part are applicable for:

(a) Both inpatient and outpatient medical and dental care of U.S. Navy and Marine Corps personnel who incur disease or injury while on active duty. Reservists are entitled to care under the provisions of this part for conditions occurring during active duty for training and inactive duty training (drill), including travel to and from training sites.

(b) The outpatient care of naval members of NATO Status of Forces Agreement (SOFA) nations (Belgium, Canada, Denmark, Federal Republic of Germany, France, Greece, Iceland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Turkey, and the United Kingdom) who are stationed in or passing through the United States in connection with their official duties.

§ 732.3 Background.

(a) The special authority of the Manual of the Medical Department (MANMED), article 11–7(3)(b), applicable to patients under the jurisdiction of commanding officers of naval hospitals, remains in effect and is to be used for nonnaval medical and dental care of such patients. Guidelines concerning care for other eligible beneficiaries, not authorized care by this part, are contained in BUMED INST 6320.58 and Part 728 of this chapter. Subpart B provides guidelines and procedures whereby naval commands may:

(1) Arrange for appropriate care in other than naval facilities for authorized members under their jurisdiction.

(2) Assist in those instances when authorized personnel obtain civilian medical or dental care for themselves and seek reimbursement from the Navy.

(3) Authorize payment directly to providers of care when payment has not been made by the member or by someone acting on behalf of the member.

(4) Assist active duty Navy and Marine Corps maternity patients in obtaining care in civilian facilities, when appropriate, and arranging for payment of charges for the member and the routine care of the newborn in accordance with the Assistant Secretary of Defense for Health Affairs memo of 16 May 1979, Inpatient routine newborn care: Active duty female maternity episode, and Assistant Secretary of Defense for Health Affairs memo of 18 July 1979, Active duty female maternity episode.

(b) Subpart B also delineates areas over which geographic naval medical commands have responsibilities for administration of nonnaval medical and dental care program functions. Program management is vested in the Commander, Naval Medical Command, Washington, DC (MEDCOM–333).

(c) The Assistant Secretary of Defense (Comptroller) memo of 12 March 1981, Reimbursement for inpatient medical care provided foreign military and diplomatic personnel of their dependents in military hospitals in the United States, outlines the provisions of Pub. L. 96–527. This memo provides that inpatient care of foreign military members in the United States shall not be rendered at the expense of the United States Government. Accordingly, only the cost of outpatient care shall be paid under the provisions of this part for active duty members of NATO nations who are stationed in or passing through the United States in connection with their official duties.

§ 732.4 Action.

All commands shall ensure that personnel under their cognizance are made aware of the contents of this part. Failure to comply with the prescribed requirements could result in the Navy's denial of financial responsibility for the expenses of medical or dental care obtained.

Subpart B—Medical and Dental Care From Nonnaval Sources

§ 732.11 Definitions.

Unless otherwise qualified herein, the following terms when used throughout this part are defined as follows:

(a) *Active Duty.* Full-time duty in the active military service of the United States. This includes duty on the active list; full-time training duty; annual training duty; and attendance, while in the active military service, at a school designated as a service school by law or by the Secretary of the military department concerned.

(b) *Active Duty for Training.* A period of duty performed in the active military service by a member of a reserve component under orders by competent authority for a specified period which provides for automatic reversion to inactive duty when the specified period of active duty is completed. Includes not only the period of time from reporting to the time of release but also the time of travel to and from the duty station, not in excess of the allowable constructive travel time (see SECNAVINST 1770.3 and DOD Military Pay and Allowances Entitlements Manual (DODPM) paragraphs 10242 and 10243).

(c) *Constructive Return.* For purposes of medical and dental care, return of an unauthorized absentee to military control may be accomplished through notification of appropriate military authorities (§ 732.13(e) amplifies).

(d) *Designated Uniformed Services Treatment Facilities (Designated USTFs).* In accordance with Pub. L. 97–99, the following former U.S. Public Health Service (USPHS) facilities are now "designated USTFs" for the purpose of rendering medical and dental care to all categories of individuals entitled to care under the provisions of this part.

(1) *Hospitals.* (i) Wyman Park Health Systems, 3100 Wyman Park Drive, Baltimore, MD 21211, Telephone (301) 338–3000.

(ii) Allston-Brighton Aid and Health Group, 77 Warren Street, Boston, MA 02135, Telephone (617) 782–3400.

(iii) Hospital of St. John, 2050 Space Park Drive, Nassau Bay, TX 77058, Telephone (713) 757–7430.

(iv) Seattle Public Health Hospital, 1131 14th Avenue South, Seattle, WA 98144, Telephone (206) 324–7650.

(v) Bayley Seton Hospital, Bay Street and Vanderbilt Avenue, Staten Island, NY 10304, Telephone (212) 447–3010.

(2) *Clinics.* (i) Coastal Health Service, 331 Veranda Street, Portland, ME 04103, Telephone (207) 780–3210.

(ii) Lutheran Medical Center, Downtown Health Care Services, New Post Office Bldg., W. 3rd Street and Prospect Avenue, Cleveland, OH 44113, Telephone (216) 522–4524.

(iii) St. Mary's Hospital, 440 Avenue North, Galveston, TX 77550, Telephone (713) 787–7430.

(iv) St. Joseph Ambulatory Care Center, 204 U.S. Customs Bldg., 701 San Jacinto Street, Houston, TX 77002, Telephone (713) 757–7430.

(v) Family Practice Center, Port Arthur, TX 77640, Telephone (713) 757–7430.

(e) *Duty Status.* The performance category of the claimant at the time medical or dental care is received, either active duty or nonactive duty. Members, including reservists, on leave or liberty are considered in a duty status. Reservists, when performing active duty for training or inactive duty for training, are considered in a duty status, including their allowable constructive travel time to and from training.

(f) *Emergency.* A situation where the need or apparent need for medical or dental attention is such that time does not permit obtaining prior approval for civilian medical care.

(g) *Inactive Duty Training (Drill).* Includes that period between muster, dismissal, and allowable constructive travel time to and from such drills (see DODPM paragraphs 10242 and 10243).

(h) *Maternity Emergency.* A condition commencing or exacerbating during pregnancy in a manner such that a delay caused by referral to a USMTF or designated USTF would jeopardize the welfare of the mother or her unborn child.

(i) *Medical Management.* When an active duty member presents for treatment at a naval MTF, that patient is considered under the medical management of a naval physician when a naval physician exercises primary and continuing decision authority regarding diagnosis and treatment, regardless of whether the patient is actually treated by that physician.

(j) *Non-Federal Care.* Medical or dental care provided by civilian sources (includes State, local, and foreign MTFs).

(k) *Nonnaval Care.* Medical or dental care provided by other than naval MTFs. Includes care in other USMTFs, VA facilities, as well as from civilian sources.

(l) *Office of Medical Affairs (OMA) or Office of Dental Affairs (ODA).* Designated offices, under the program management control of COMNAVMEDCOM (MEDCOM–333) and the direct control of regional medical commands, responsible for the continued administration of the requirements of this part.

(m) *Prior Approval.* Permission granted to an individual for a specific episode of necessary but nonemergent maternity, medical, or dental care.

(n) *Reservist.* A member of the Naval or Marine Corps Reserve.

(o) *Supplemental Care.* When an active duty member is under the medical management (see § 732.11(i)) of a naval MTF physician and required care is not available at that facility, any additional materials or professional and personal services ordered by qualified naval MTF providers and obtained for the care of that patient are supplemental. This includes necessary referrals to civilian sources. Costs are chargeable to the operation and maintenance funds available for operation of the facility requesting care or services. For the exception to this policy, see § 732.18(c)(4).

(p) *Unauthorized Absence.* Absence without authority from a member's command or departure without authority from the assigned place of duty.

(q) *Uniformed Services Medical Treatment Facilities (USMTF).* Health care facilities of the Army, Air Force, Coast Guard, Navy, and the former U.S. Public Health Service facilities listed in § 732.11(d) that have been designated as USTFs in accordance with DOD and Department of Health and Human Services directives.

§ 732.12 Program management.

(a) *In the 48 Contiguous United States and Alaska.* Under program management control of COMNAVMEDCOM (MEDCOM–333) and direct control of regional medical commands, OMAs and the ODA listed in § 732.18(f)(1) shall:

(1) Exercise coordination over this program within their areas of responsibility including:

(i) Granting or denying approval for the procurement of nonemergency care from civilian sources.

(ii) Adjudicating medical and dental care claims.

(iii) Notifying COMNAVMEDCOM (MEDCOM–333, Autovon 294–1127 or Commercial 202–653–1127) in a situational report (MED 6320–30) when it appears that an episode of non-Federal care will extend beyond 15 days or will cost more than $25,000. Before calling, be prepared to furnish the following concerning the patient:

(A) Name, grade or rate, and social security number.

(B) Name of non-Federal medical facility rendering treatment.

(C) Date admitted.

(D) Reason patient cannot be or has not been moved to a Federal facility.

(E) Expected duration of non-Federal treatment.

(F) Expected total cost of non-Federal care.

(iv) Determining the need for medical boards subsequent to completion of nonnaval medical care and notifying COMNAVMEDCOM (MEDCOM–25), via the regional medical command, of the determination (see § 732.19 for further amplification).

(v) Issuing letters, upon written request, to recruiting offices far removed from USMTFs and designated USTFs granting blanket approval for civilian medical care of active duty recruiting office personnel. With a full realization that such blanket approval is an authorization to obligate the Government without individual prior approval, OMAs and the ODA shall ensure that:

(A) Each letter specifies a maximum dollar amount allowable in each instance of care.

(B) The location of each recruiting office authorized to obligate is clearly delineated.

(C) Travel distance and time required to reach the nearest USMTF, designated USTF, or VA facility have been considered.

(D) Certain conditions are specifically excluded, e.g., psychiatric care and elective surgical procedures. These conditions will continue to require individual prior approval.

(E) All requests for blanket authorization from other than recruiting offices are forwarded to COMNAVMEDCOM (MEDCOM–333), via the chain of command, for concurrence.

(F) COMNAVMEDCOM (MEDCOM–333) is made an information addressee on each letter of authorization.

(2) Furnish a monthly letter report (MED 6320–23) to COMNAVMEDCOM (MEDCOM–333), with a copy of the dental portion to MEDCOM–32, to reach the Command no later than the 15th day of the month following the month being reported. The report shall reflect the total cost of claims adjudicated and:

(i) The number of:

(A) Claims approved.

(B) Hospital days and dollar value of each.

(C) Outpatient visits and dollar value of each.

(D) Dental visits and dollar value of each.

(E) Ambulance trips and dollar value of each.

(F) Unadjudicated claims on hand at both the beginning and end of month.

(G) Claims on hand more than 30 days.

(H) Inpatient days, outpatient visits, and dollar value of each category of care provided by designated USTFs.

(I) Inpatient hospital days and dollar value of care provided by designated USTFs.

(J) Pharmacy, laboratory, and X-ray services (paid separately from care in § 732.12(a)(2)(i) (B) and (D)). Include the average cost of each and the total cost of all.

(K) Maternity episodes and average cost.

(ii) Name, grade or rate, social security number, and disposition (date and type) of each patient for whom notification is required in accordance with § 732.12(a)(1)(iii).

(iii) Amount of returned checks and overpayments submitted to OMA or ODA and fiscal year to which funds are being credited.

(iv) Personnel changes in OMA or ODA for the month.

(3) Coordinate, with each member and each member's command, convalescent leave granted in accordance with the Naval Military Personnel Manual (MILPERSMAN) and Marine Corps Order P1050.3E.

(4) Assume medical cognizance responsibility for members hospitalized in nonnaval facilities within the OMA's geographical area of responsibility.

(b) *Outside the 48 Contiguous United States and Alaska.* (1) In areas outside the 48 contiguous United States and Alaska, individual commanding officers are authorized to obtain required non-Federal care for members under their command when there are no Federal or NATO SOFA facilities available, or if available, are unable to render required care. If the commanding officer considers it in the best interest of the United States, immediate payment may be effected for such services. When payment is made out of any funds other than those specified for non-Federal medical or dental care, the commanding officer shall apply for reimbursement in accordance with the provisions of this part.

(2) The adjudicating authority at activities listed in § 732.18(f)(2) shall:

(i) Exercise coordination and technical control over this program outside the 48 contiguous United States and Alaska, including the coordination and cognizance responsibilities listed in § 732.12(a) (3) and (4), as appropriate.

(ii) Adjudicate medical and dental care claims.

(iii) Report non-Federal care expenditures as delineated in § 732.12(a)(1)(iii) and § 732.12(a)(2).

§ 732.13 General.

If medical or dental care is required and there are no naval facilities available, initial application shall always be made to other available Federal medical or dental facilities.

(FEDERAL FACILITIES: NAVY, ARMY, AIR FORCE, VETERANS ADMINISTRATION, AND DESIGNATED FORMER U.S. PUBLIC HEALTH SERVICE FACILITIES listed in § 732.11(d).)

Additionally, members shall obtain emergency and nonemergency care from military facilities of the host country, or if applicable, from civilian sources under the NATO SOFA when U.S. facilities are not available and the member is stationed in or passing through a NATO SOFA nation. When either emergency or nonemergency care is required and there are no Federal or NATO SOFA facilities available, care may be obtained from civilian sources under the following conditions:

(a) *Emergency Care.*—(1) *Maternity Emergency.* When a condition commences or exacerbates during pregnancy in a manner that a delay, caused by referral to a uniformed services or designated uniformed services medical treatment facility, would jeopardize the welfare of the mother or her unborn child, the following constitutes indications for admission to a non-Federal facility:

(i) Medical or surgical conditions which would constitute an emergency in the nonpregnant state.

(ii) Obstetric conditions:

(A) Spontaneous abortion, with first trimester hemorrhage.

(B) Premature term labor with delivery.

(C) Severe pre-eclampsia.

(D) Hemorrhage, second and third trimester.

(E) Ectopic pregnancy with cardiovascular instability.

(F) Premature rupture of membranes with prolapse of the umbilical cord.

(G) Obstetric sepsis.

(H) Any other obstetrical condition that, by definition, constitutes an emergent circumstance.

(2) *Medical or Dental.* A situation where the need or apparent need for medical or dental attention is such that time does not permit obtaining authority in advance.

(3) *Authority to Adjudicate.* Only in such a defined emergency shall medical, dental, or maternity services be obtained under this part by or on behalf of eligible personnel without the prior authority covered below. As soon as possible after obtaining such care, the

appropriate OMA or ODA listed in § 732.18(f) shall be provided the following information. This information will be used to make arrangements for transfer of the member and, if appropriate, newborn infant(s), to a Federal facility or for such other action as is appropriate. For the purpose of this part, this information shall be provided to the OMA or ODA in addition to the requirements of article 4210100 of MILPERSMAN or Marine Corps Order 6320.3B

(i) Name, grade or rate, and social security number of patient.

(ii) Name of non-Federal medical or dental facility rendering treatment.

(iii) Date(s) of such treatment.

(iv) Nature and extent of treatment or care already furnished.

(v) Need or apparent need for further treatment (for maternity patients, need or apparent need for further care of infant(s) also).

(vi) Earliest date on which transfer to a Federal facility can be effected.

(b) *Nonemergency Care.* The health benefits advisor (HBA) serving the regional medical command assigned responsibility for the OMA or ODA function shall:

(1) Receive information to complete sections I and III of NAVMED 6320/10's for coordination of requests for prior or after the fact approval of nonemergent medical or dental care and requests for approval of nonemergency maternity care (§ 732.13(f)).

(2) By endorsement, forward the request to the appropriate chief of service explaining non-Federal care regulations as they pertain to the request. The chief of service shall respond to the request within 24 hours.

(3) Upon return by the chief of service of an approved or disapproved NAVMED 6320/10 request for prior approval of nonemergency medical, dental, or maternity care, the HBA shall forward the original form to the member, a copy to the OMA or ODA, and retain a copy on file.

(c) *Eligibility.*—(1) *Regular Members.* To be eligible for non-Federal medical, dental, or emergency maternity care at Government expense. Regular active duty naval members must be in a duty status at the time care is provided.

(2) *Reservists.* Reservists on active duty for training and inactive duty training (drill), including leave and liberty therefrom, are considered to be in a duty status while participating in such training and while en route to and from such training. Accordingly, they are entitled to care for illnesses and injuries occurring while in such a status.

(3) *Absent Without Authority.* Naval members absent without authority during an entire episode of treatment are not eligible. The only exception occurs when the member's illness or injury is determined to have been the direct cause of the unauthorized absentee status. In such an instance eligibility shall be determined to have existed from the day and hour of such injury or illness, provided the member was not in an unauthorized absentee status prior to the initiation of treatment and the member is directly returned to military control.

(4) *Constructive Return.* When constructive return is effected in accordance with § 732.13(e), entitlement will be determined to have existed from 0001 of the day constructive return was accomplished, not necessarily the day and hour care was initiated.

(d) *Notification of Illness or Injury.* If able, members must notify or cause their parent command or the nearest naval activity to be notified of the circumstances requiring medical or dental attention in a non-Federal facility. The member's exact location shall be conveyed to facilitate movement, if appropriate, to a Federal facility. Transfer to a Federal facility shall be accomplished as soon as possible to ensure that disability benefits are not jeopardized. Should movement be delayed due to actions of the member of the member's family, payment may be denied for all care received after provision of written notification by the OMA or ODA. Denial shall be for care received after the member's condition has stabilized and after the cognizant OMA or ODA has made a request to the attending physician and hospital administration for the member's release from the civilian facility. This notification must specify the date and time the Navy will terminate its responsibility for payment. Care rendered subsequent to receipt of the written notification shall be at the expense of the member.

(1) When it becomes known that a member intends to seek medical care (inpatient or outpatient) from a non-Federal source and prior approval has not been granted for the use of the Nonnaval Medical and Dental Care Program, the member must be counseled by, or in the presence of, a Medical Department officer. The member should be requested to sign a statement on a Standard Form 600, Chronological Record of Medical Care, for inclusion in the member's Health Record, that counseling has been accomplished and that the member understands the significance of receiving civilian care which is unauthorized. This must be accomplished when either personal funds or third party payor (insurance) funds are intended to be used to defray the cost of care. Counseling shall include:

(i) Availability of care from a Federal source.

(ii) The requirement for prior approval if the Government may be expected to defray any of the cost of such care.

(iii) Information regarding the possible compromise of disability benefits should a therapeutic misadventure occur.

(iv) Notification that should hospitalization become necessary, or other time is lost from the member's place of duty, such lost time will be chargeable as "ordinary leave".

(v) Notification that the Government cannot be responsible for out-of-pocket expenses which may be required by the insurance carrier of when the member does not have insurance which covers the cost of contemplated care.

(vi) Direction to report to a uniformed services medical officer (preferably Navy) upon completion of treatment for determination of member's fitness for duty.

(2) When it becomes known that a member has already had non-Federal medical care without prior authorization, the member must be referred to a uniformed services medical officer (preferably Navy) to determine fitness for duty. At this time, the counseling measures delineated in § 732.13(d)(1) (iii), (iv), and (v) must be taken.

(e) *Constructive Return.* See § 732.11(c) for definition.

(1) For members in an unauthorized absentee status, constructive return to military control for the purpose of providing medical or dental care at Navy expense is effected when one of the following has occurred:

(i) A naval activity informs a civilian provider of medical or dental care, orally or in writing, that the Navy accepts responsibility for a naval member's care. The naval activity that provides this information shall also provide documentation of such notification to the appropriate OMA or ODA.

(ii) A member has been apprehended by civil authorities at the specific request of naval authorities and naval authorities have been notified that the member can be released to military custody.

(iii) A naval member has been arrested by civil authorities for a civil offense and naval authorities have been notified that the member can be released to military control.

(2) When a naval member has been arrested for a civil offense while in an unauthorized absentee status and the

offense does not allow release to military control, constructive return is not accomplished. The individual is thus responsible for medical or dental care required prior to arrest and the incarcerating jurisdiction is responsible for care required after arrest.

(f) *Maternity Care.* (1) All pregnant active duty members who reside outside the Military Health Services System (MHSS) catchment areas of uniformed services facilities with inpatient capability are permitted to choose whether to deliver in a closer civilian hospital or travel to a uniformed services facility. If the Government is to assume financial responsibility for non-Federal maternity care of any member regardless of where she resides, the member shall obtain authorization in accordance with §§ 732.13(b)(1) and 732.16. OMA officials shall not approve requests for care in non-Federal facilities for members residing within an MHSS catchment area unless:

(i) Capability does not (did not) exist at the uniformed services or other Federal MTF.

(ii) An emergency situation (as outlined in § 732.13(a)(1)) necessitated delivery or other treatment in a non-Federal facility.

(2) Inasmuch as confinement and delivery are foreseeable, prior approval shall be obtained for delivery in a non-Federal facility at Government expense. This approval shall be obtained from the HBA serving the OMA delineated in § 732.18(f) for the area where the duty station of the member is located. The provisions of this subpart do not apply to maternity emergency situations.

(i) Requests for prior approval shall be disapproved when members (residing in an MHSS catchment area) have been granted annual leave to commence just prior to the expected delivery date and to end after the expected delivery date. Requests for after-the-fact approval shall likewise not be honored in instances of normal delivery.

(ii) Members requiring maternity care while in a travel status in the execution of permanent change of station (PCS) orders shall be granted either prior or retroactive approval as the situation warrants.

(3) Normal delivery at or near the expected delivery date shall not be considered an emergency for members residing within an MHSS catchment area wherein delivery was expected to have occurred and, unless provided for in this part, shall not be reason for delivery in a civilian facility at Government expense.

(4) In a maternity emergency, the provisions of § 732.13(a)(3), relative to arrangements for transfer of the member, also apply to the newborn infant(s).

§ 732.14 Authorized care.

(a) *Medical.* Consultation and treatment provided by physicians or at medical facilities, as well as procedures not involving treatment when directed by COMNAVMED COM are authorized. Such care includes, but is not limited to: treatment by physicians, hospital inpatient and outpatient care, surgery, nursing, medicine, laboratory and x-ray services, physical therapy, eye examinations, etc.

(b) *Maternity Episode.* If an active duty Navy of Marine Corps member qualifies for care under the provisions of § 732.13(f) and delivers in a civilian hospital, routine newborn care (i.e., nursery, newborn examination, PKU test, etc.) is a part of the mother's admission expenses. Regardless of the circumstances which necessitated delivery in a civilian facility or the way in which the charges are separated on the bill, the charges shall be paid from funds available for the care of the mother. Should the infant become a patient in his or her own right—either through an extension of the birthing hospital stay because of complications, transfer to another facility, or subsequent admission—BUMEDINST 6320.58 or Part 728 of this chapter are applicable.

(c) *Dental.* (1) Includes:

(i) All types of treatment rendered (including operative, restorative, and oral surgical) to relieve pain and abort infection.

(ii) Prosthetic treatment rendered to restore extensive loss of masticatory function or the replacement of anterior teeth for esthetic reasons.

(iii) Repair of an existing dental prosthesis when neglect of the repair would result in unservice ability of the prosthesis.

(iv) Any type of treatment rendered as an adjunct to medical or surgical care.

(v) All x-rays, drugs, etc., required to accomplish treatment or care in § 732.14(c)(1)(i) through 732.14(c)(1)(iv).

(2) In emergencies (no prior approval), excluded are all measures except those appropriate to relieve pain or abort infection.

(d) *Eye Refractions and Spectacles.* Includes refractions of eyes by physicians and optometrists and the furnishing and repair of spectacles.

(1) *Refractions.* A refraction may be obtained from a civilian source only when Federal facilities are not available and no suitable prescription is in the member's Health Record.

(2) *Spectacles.* When a member has no suitable spectacles and the lack thereof, combined with the delay resulting from obtaining them from a Federal source, would prevent the performance of duty; repair, replacement, or procurement from a civilian source may be authorized upon initiation of a request in accordance with § 732.16. Otherwise, the prescription from the refractionist, with proper facial measurements, must be sent for fabrication to the appropriate dispensing activity set forth in BUMED INST 6810.4G.

(3) *Contact Lenses.* Neither examination for nor procurement of contact lenses is authorized by this part.

§ 732.15 Unauthorized care.

The following are not authorized by this part:

(a) Chiropractic services.

(b) Vasectomies.

(c) Tubal ligations.

(d) Breast augmentations or reductions.

(e) Psychiatric care, beyond the initial evaluation.

(f) Court ordered care.

(g) Other elective procedures.

§ 732.16 Authorizations.

Requests for prior or after the fact authorization shall be made on NAVMED 6320/10 and shall be submitted to the cognizant HBA after completion of sections I and III. The HAB will take the action indicated in § 732.13(b).

§ 732.17 NAVMED 6320/10, Statement of Civilian Medical/Dental Care.

In addition to its use as an authorization document (§ 732.16), a NAVMED 6320/10 is required in connection with payment for each instance of sickness, injury, or maternity care (except for the waiver outlined in § 732.18(b)) when treatment is received from a non-Federal source.

(a) *Preparation.* In preparation of claims for payment of nonnaval medical or dental care expenses, NAVMED 6320/10 shall be prepared in triplicate by a naval medical or dental officer, when practicable, by the senior officer present where a naval medical or dental officer is not on duty, or by the individual concerned when on detached duty where a senior officer is not present. The diagnosis shall be included and if prior approval was not obtained for the use of non-Federal facilities, the circumstances which necessitated their use shall also be stated.

(b) *Signing.* Signature by the certifying officer on the NAVMED 6320/10 will be considered certification that documentation has been entered in the

member's Health Record as directed in MANMED article 18-24. This responsibility is incumbent on the certifying offices for each episode of nonnaval medical or dental care. Signature by the member requesting reimbursement or payment implies agreement for release of information to the OMA or ODA receiving the claim for processing.

§ 732.18 Claims.

(a) *Preparation.* Claims shall be prepared using NAVMED 6320/10 and shall be submitted to the appropriate OMA or ODA. If a request has been made for prior or after the fact authorization in accordance with § 732.16, the NAVMED 6320/10 containing the approval shall be completed and submitted with the claim. Additionally, each claim shall include:

(1) Itemized bills submitted in quadruplicate to show:

(i) Dates on or between which services were rendered or supplies furnished.

(ii) Nature of and charges for each item.

(iii) Diagnosis.

(2) Acknowledgement of receipt of the services or supplies on the face of the bill, by separate certificate of the person receiving treatment or services, or by an officer having cognizance of the circumstances. This acknowledgement must include the statement "Services were received and were satisfactory."

(3) Separate bills for providers of care who charge on a "fee for service" basis unless the bill which includes such services is accompanied by:

(i) Receipts showing that the expenses have been defrayed by the physician, dentist, or other source of care submitting the bill.

(ii) A statement that the individual charging on a "fee for service" basis is a full-time employee of the payee.

(4) The complete address to which the check is to be mailed and the amount to be paid. This shall be indicated in sections IV and V of the NAVMED 6320/10.

(5) Paid receipts as well as itemized bills when expenses have already been paid by an individual, including a service member. In lieu of submission of paid receipts or itemized bills, the member may sign the face of the NAV COMPT Form 2160 as required by NAVCOMPT Manual 046383-1. Standard Form 1164, prepared in accordance with NAVCOMPT Manual 046377-2a and b, may be used to fill the requirement for a signed claim. Paid invoices supporting a claim for reimbursement on a Standard Form 1164 do not require certification. OMAs and the ODA shall certify the Standard Form 1164 and insert appropriate accounting classification thereon.

(b) *Processing.* Itemized bills, claims, or other documentary evidence of care received from non-Federal sources should be processed for payment by the cognizant OMA or ODA within 30 days of receipt. Advice on unusual or questionable instances of care may be requested from COM NAVMEDCOM (MEDCOM-333). When OMAs or the ODA already have information from messages or other correspondence which supports payment of a claim, the requirement for a NAVMED 6320/10 may be waived and the claim adjudicated. Claimants shall be advised by the OMA or ODA of any delay experienced in processing claims.

(c) *Adjudication of Claims.* When required documents have been received by the OMA or ODA; a determination shall be made whether:

(1) Claimant is entitled to benefits (i.e., was on active duty, active duty for training, inactive duty training (drill), was not an unauthorized absentee, etc.)

(2) Medical or dental care was rendered due to a bona fide emergency. Where questions arise as to the emergent nature of the care, the claim and all documentation shall be forwarded to the appropriate clinical specialist at the nearest naval hospital for review.

(3) Prior approval had been granted for the medical or dental care if a bona fide emergency did not exist. If prior approval was not obtained and the condition treated is determined to have been nonemergent, the claim shall be denied.

(4) Claimed medical or dental benefits resulted from a referral by a USMTF. Should it be determined that the member was an inpatient or an outpatient in a USMTF immediately prior to being referred to a civilian source of care, the care is supplemental and is the responsibility of the referring USMTF. EXCEPTION: the local USMTF will not assume financial responsibility (i) when the civilian health care *is not* supplemental to continuing health care that was being provided by the local USMTF, and (ii) when the local USMTF is not organized nor authorized to provide the needed health care services (e.g., a patient needing inpatient care is diagnosed at a clinic without inpatient capability). Under the latter two circumstances, the civilian care is payable under the provisions of this part. Saturation of USMTF services or facilities does not fall within this exception.

(5) Medical or dental care is payable under the provisions of this part. If a determination is made to disapprove a claim, the member (and provider of care, when applicable) shall be provided a prompt and courteous letter stating the reason for the denial. The appropriate avenues of appeal (§ 732.22) will be included in the denial letter.

(d) *Disbursing Activity.* Upon receipt of an approved claim, disbursing activities will forward a check to the appropriate payee and furnish the Authorization Accounting Activity (AAA) servicing COMNAVMEDCOM (i.e., NAVMEDCOM, National Capital Region, Bethesda, MD 20814) with copies of the NAVMED 6320/10 and with accounting data. OMAs, the ODA, and disbursing activities shall take precautions against duplicate payments in accordance with NAVCOMPT Manual 046073. For completion of the appropriate accounting classification data on the NAVMED 6320/10, the following are applicable:

Accounting Classification Code. This code shall include accounting data in the following sequence:

1	2	3	4	5	6	7	8	9
17*1804	1890	000	00018	0	000189	2D	000600	Cost Code.**

* "For the third digit in coding element 1, enter the *last digit of the fiscal year current at the time claim is approved for payment*, e.g., a claim approved in November 1983 for care rendered in December 1982 would have the number "4" as the third digit in coding element 1, i.e., "1741804" wherein the third digit is the last digit of fiscal year 1984.

** This cost code, coding element 9, is a 12 digit coding element constructed as follows:

Digits	Data entry
1 thru 5	"99002" will always be entered.
6	"O" if the services were inpatient, outpatient, or dental, and "E" if for ambulance service.
7	"1" if the patient was active duty Navy. "2" if the patient was active duty Marine Corps.

Digits	Data entry
	"3" if the patient was Navy, Reservist.
	"4" if the patient was Marine Corps, Reservist.
	"5" for all others.
8***	"1" for inpatient care; "2" for outpatient care; "3" for dental care.
9 and 10	Number of visits, occupied bed days, ambulance trips, or dental procedures, e.g., the entry for ten occupied bed days would be "10", and for three outpatient visits "03". Enter "00" for invoices involving services related to but billed separately from hospitalization charges.
11	"A" for medical and dental care rendered in the District of Columbia, Maryland, West Virginia, the Virginia counties of Arlington, Fairfax, Loudoun, and Prince William; and the Virginia cities of Alexandria, Fairfax, and Falls Church.
	"B" for medical care rendered in Illinois, Indiana, Iowa, Kentucky, Michigan, Minnesota, Missouri, and Wisconsin.
	"C" for medical care rendered in Maine, Massachusetts, New Hampshire, Rhode Island, and Vermont.
	"D" for medical care rendered in Connecticut and New York.
	"E" for medical care rendered in Delaware, New Jersey, Ohio, and Pennsylvania.
	"F" for dental care rendered in the entire Northeast Region which includes the States of Connecticut, Delaware, Illinois, Indiana, Iowa, Kentucky, Maine, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, and Wisconsin.
	"G" for medical and dental care rendered in the States of North Carolina, South Carolina, and all areas of Virginia south and west of Prince William and Loudoun counties.
	"H" for medical and dental care rendered in the States of Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, Oklahoma, Tennessee, and Texas.
	"I" for medical and dental care rendered in the States of Arizona, Nevada, and New Mexico and the counties of Kern, San Luis, Obispo, San Bernadino, Santa Barbara, and all other counties of California south thereof.
	"J" for medical care rendered in the States of Colorado, Kansas, and Utah and the counties of Inyo, Kings, Tulare, and all other counties of California north thereof.
	"K" for medical and dental care rendered in the States of Alaska, Idaho, Montana, Nebraska, North Dakota, Oregon, South Dakota, Washington, and Wyoming.
	"L" for medical and dental care rendered in the Pacific Region.
	"M" for medical and dental care rendered in the European Region.
	"N" for medical and dental care rendered in all other areas.
12	Last digit of the fiscal year in which claim is approved.

***Ambulance trips shall be coded as "1", "2", or "3" according to subsequent treatment.

(e) *Amount Payable.* Amounts payable shall be those considered reasonable by the OMA or ODA after taking into consideration all facts. Normally, payment should be approved at rates generally prevailing within the geographic area where the services or supplies were furnished. Although rates specially established by the Veterans Administration or those used in Medicare are not controlling, they may be considered along with other facts.

(1) *Excessive Charges.* If any charge is considered excessive, the provider of care should be apprised of the conclusion reached and provided an opportunity to voluntarily reduce the amount of the claim. If this does not result in a proper reduction of the bill and the claim is that of a physician or dentist, the difference in opinions should be referred to the grievance committee of the provider's professional group for an opinion of the reasonableness of the charge. If satisfactory settlement of any claim cannot thus be made, all documentation should be forwarded to COMNAVMEDCOM (MEDCOM–333) for decision. Any charges above the allowable amount or charges for noncovered services are the responsibility of the service member.

(2) *Third Party Payment.* Payment shall not be withheld to seek payment from health benefit plans or from insurance policies for which premiums are paid privately by service members (see § 732.20 for possible recovery of payments action).

(3) *No-Fault Insurance.* In States with no-fault automobile insurance requirements, the OMA or ODA shall notify the insurance carrier identified in item 16 of the NAVMED 6320/10 that Federal payment of the benefits in this part is secondary to any no-fault insurance coverage available to the potentially covered member.

(f) *Adjudication Authority.*—(1) *In the United States (Less Hawaii).* For the 48 contiguous United States, the District of Columbia, and Alaska, the following six regions have been designated as cohesive units to accept responsibility for medical cognizance, medical and dental claims processing and adjudication, and prior or after the fact approval or disapproval of requests for nonemergent medical, dental, or maternity care within their areas of responsibility. In accordance with MANMED articles 2–22 and 6–54, controlling activities for medical care have been designated as "offices of medical affairs" (OMA) and for dental care, "office of dental affairs" (ODA). It is incumbent upon commanders of regional medical commands to communicate with other commands within their regions to ensure that proper messages and medical cognizance reports are furnished in accordance with higher authority directives.

(i) *Northeast Region.* The States of Connecticut, Delaware, Illinois, Indiana, Iowa, Kentucky, Maine, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, and Wisconsin are served by 1 ODA, 1 OMA, and 2 field office OMAs:

(A) Responsibility for dental matters for all States in the Northeast Region is vested in: Commander, Naval Medical Command, Northeast Region, Office of Dental Affairs, Naval Hospital, Great Lakes, IL 60088, Tele: (A) 792–3940, (C) 312–688–3940.

(B) Responsibility for medical matters for the States of Illinois, Indiana, Iowa, Kentucky, Maine, Massachusetts, Michigan, Minnesota, Missouri, New Hampshire, Rhode Island, Vermont, and Wisconsin is also vested in: Commander, Naval Medical Command, Northeast Region, Office of Medical Affairs, Naval Hospital, Great Lakes, IL 60088, Tele: (A) 792–3950, (C) 312–688–3950.

(C) Responsibility for medical matters for the States of Connecticut and New York is vested in: Commanding Officer, Office of Medical Affairs, Naval Station, 207 Flushing Avenue, Brooklyn, NY 11251, Tele: (A) 456–2716, 2343, or 2612, (C) 212–834–2716, 2343, or 2612.

(D) Responsibility for medical matter for the States of Delaware, New Jersey, Ohio, and Pennsylvania is vested: Commanding Officer, Naval Hospital, 17th Street and Pattison Avenue, Philadelphia, PA 19145, Attn: Office of Medical Affiairs, Tele: (A) 443–6236, (C) 215–755–6236.

(ii) *National Capital Region.* For the States of Maryland and West Virginia; the Virginia counties of Arlington, Fairfax, Loudoun, and Prince William; the Virginia cities of Alexandria, Falls Church, and Fairfax; and the District of Columbia, responsibility for medical and dental matters is vested in: Commander, Naval Medical Command, National Capital Region, Office of Medical Affairs, Bethesda, MD 20814, Tele: (A) 295–5322, (C) 301–295–5322.

(iii) *Mid-Atlantic Region.* For the States of North Carolina, South Carolina, and all areas of Virginia south and west of Prince William and Loudoun counties, responsibility for medical and dental matters is vested in: Commander, Naval Medical Command, Mid-Atlantic Region, 6500 Hampton Boulevard, Norfolk, VA 23502, Attn: Office of Medical/Dental Affairs, Tele: (A) 565–1074 and 1075, (C) 804–445–1074 and 1075.

(iv) *Southeast Region.* For the States of Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, Oklahoma, Tennessee, and Texas, medical and dental responsibilities are vested in: Commanding Officer Naval Medical Clinic, Code 01A, New Orleans, LA 70146, Tele: (A) 485–2406, 2407, and 2408, (C) 504–361–2406, 2407, and 2408.

(v) *Southwest Region.* For the States of Arizona, Nevada, and New Mexico, the counties of Kern, San Bernadino, San Luis Obispo, Santa Barbara, and all other California counties south thereof, medical and dental responsibilities are vested in: Commander, Naval Medical

Command, Southwest Region, Office of Medical Affairs, San Diego, CA 92134, Tele: (A) 957-3831, (C) 619-225-3011.

(vi) *Northwest Region.* The States of Alaska, Colorado, Idaho, Kansas, Montana, Nebraska, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming, and the counties of Inyo, Kings, Tulare, and all other counties of California north thereof are served by 2 OMAs:

(A) Responsibility for medical and dental matters for the States of Colorado, Kansas, and Utah, and the California counties of Inyo, Kings, Tulare and all other counties of California north thereof is vested in: Commanding Officer, Naval Hospital, Oakland, CA 94627, Attn: Office of Medical Affairs, Tele: (A) 855-5705, (C) 415-633-5705.

(B) Responsibility for medical and dental matters for the States of Alaska, Idaho, Montana, Nebraska, North Dakota, Oregon, South Dakota, Washington, and Wyoming is vested in: Commanding Officer, Naval Medical Clinic, Naval Station, Seattle, WA 98115, Attn: Office of Medical/Dental Affairs, Tele: (A) 941-3823, (C) 206-526-3823.

(2) *Outside the Contiguous 48 United States, Except Alaska.* In all areas outside the contiguous 48 United States except Alaska, the following activities have been vested with responsibility for approval or disapproval of medical and dental care claims and requests for care:

(i) Executive Director, OCHAMPUSEUR, U.S. Army Medical Command, APO New York 09102, for care rendered within the U.S. European Command, Africa, the Malagasy Republic, and the Middle East.

(ii) Commanding Officer, U.S. Naval Hospital, FPO San Francisco 96652, for care rendered in Afghanistan, Bangladesh, Hong Kong, India, Nepal, Pakistan, the Philippines, Southeast Asia, Sri Lanka and Taiwan.

(iii) Commanding Officer, U.S. Naval Hospital, FPO Seattle 98765, for care rendered in Japan, Korea, and Okinawa.

(iv) Commanding Officer, U.S. Naval Hospital, FPO San Francisco 96668, for care rendered in New Zealand and Guam.

(v) Commanding Officer, U.S. Naval Communications Station, FPO San Francisco 96668, for care rendered in Australia.

(vi) Commanding Officer, U.S. Naval Air Station, FPO New York 09580, for care rendered in Bermuda.

(vii) Commander, U.S. Naval Forces, Southern Command, FPO Miami 34050, for care rendered in Central and South America.

(viii) Commanding Officer, U.S. Naval Hospital, FPO Miami 34051, for medical care and Commanding Officer, U.S. Naval Regional Dental Center, FPO Miami 34051, for dental care rendered in Puerto Rico, Virgin Islands, and other Caribbean Islands.

(ix) Commanding Officer, Naval Medical Clinic, Box 121, Pearl Harbor, HI 96860, for medical care and Commanding Officer, Naval Regional Dental Center, Box 111, Pearl Harbor, HI 96860, for dental care rendered in the State of Hawaii, Midway Island, and the Central Pacific basin.

(x) The OMA for either the Southeast Region, § 732.18(f)(1)(iv), or the Southwest Region, § 732.18(f)(1)(v) for care rendered in Mexico to members stationed within the respective areas of responsibility of these OMAs. Forward claims for care rendered in Mexico to all other personnel to Commander, Naval Medical Command, Washington, DC 20372 [MEDCOM-333].

(xi) Commander, Naval Medical Command, Washington, DC 20372 [MEDCOM-333]:

(A) For inpatient and outpatient care of active duty Navy and Marine Corps members in Canada.

(B) For outpatient care rendered to NATO active duty personnel in accordance with the Assistant Secretary of Defense (Comptroller) memo of 12 March 1981, Reimbursement for inpatient medical care provided foreign military and diplomatic personnel or their dependents in military hospitals in the United States.

(C) In unusual circumstances requiring Departmental level review prior to approval, adjudication, or payment.

(xii) Outside the 50 United States, commanding officers of operational units may either approve claims and direct payment by the disbursing officer serving the command or forward claims to the appropriate naval medical command enumerated in § 732.18(f)(1)(i) through 732.18(f)(2)(x). This is a local policy decision to enhance the maintenance of good public relations.

(xiii) The commanding officer authorizing the care in geographical areas not specifically delineated in § 732.18(f)(1)(i) through 732.18(f)(2)(ix).

(xiv) The appropriate command enumerated in § 732.18(f)(2)(i) through 732.18(f)(2)(x) for care rendered aboard commercial vessels en route to a location within any of the geographical areas enumerated in those subparts.

(g) *Standard Document Number.* (1) To enhance accountability procedures and facilitate identification of documents in the accounting and disbursement process, each NAVMED 6320/10 approved for payment shall be assigned a unique 15 position alpha/numeric standard document number composed in accordance with the following example: N0016883MD00025.

1	2 thru 6	7 & 8	9 & 10	11 thru 15
N	00168	83	MD	00025

Position	Data entry
1	"N" identifies Navy.
2 thru 6	Unit Identification Code of document issuing activity.
7 and 8	Last two digits of the fiscal year in which the basic document was issued.
9 and 10	"MD" is the document type code identifying this as a Miscellaneous Financial Document.
11 thru 15	Serial Number (In the example, "00025" identifies the 25th miscellaneous document prepared in fiscal year 83 by the activity.)

(2) This standard document number shall be prominently displayed on the NAVCOMPT Form 2160, Public Voucher for Medical Services, and on all other accompanying documentation of the claim. Diligent use of this number facilitates the establishment of an auditing trail and thus reduces opportunities for fraud.

§ 732.19 Medical board.

When the adjudication process uncovers conditions which may be chronic or otherwise potentially disabling, a determination shall be made by OMAs (in conjunction with appropriate clinical specialists) as to the need for a medical board. MANMED, chapter 18 and the Medical Disposition and Physical Standards Notes, available from COMNAVMEDCOM (MEDCOM-25), provide guidance.

(a) Chronic conditions requiring a medical board include (but are not limited to): (1) Peptic ulcer disease, (2) asthma, (3) hypertension, (4) arthritis, (5) alcoholism, (6) diabetes, (7) psychiatric conditions, (8) gout, (9) heart disease, and (10) allergic conditions requiring desensitization.

(b) Other potentially disabling or chronic conditions may be referred to a medical board by the OMA with the concurrence of an appropriate naval clinical specialist and regional commander.

§ 732.20 Recovery of medical care payments.

Evidence of payments shall be submitted to the action JAG designee in accordance with JAG manual, chapter 24, in each instance of payment where a third party may be legally liable for causing the injury or disease treated, or when a Government claim is possible under workmen's compensation, no-

fault insurance, or under medical payments insurance (all automobile accident cases).

(a) To assist in identifying possible third party liability cases, item 16 of each NAVMED 6320/10 shall be completed whenever benefits are received in connection with a vehicle accident. OMAs and the ODA shall return for completion, as applicable, any claim received without item 16 completed.

(b) The front of a NAVJAG Form 5890/12 (Hospital and Medical Care, 3rd Party Liability Case) shall be completed and submitted by OMAs and the ODA with evidence of payment. Block 4 of this form requires an appended statement of the patient or an accident report, if available. To ensure that Privacy Act procedures are accomplished and documented, the person securing such a statement from a recipient of care shall show the recipient the Privacy Act statement printed at the bottom of the form prior to securing such a statement. The member shall be asked to sign his or her name beneath the statement.

(c) In States with no-fault insurance laws, the procedures outlined in § 732.18(e)(3) shall also be followed.

§ 732.21 Collection for subsistence.

(a) *General.* Each OMA shall initiate subsistence collection action for enlisted personnel upon receipt of a bill for inpatient care from nonnaval facilities or under circumstances described in § 732.21(c)(3). OMAs shall also ensure that pay adjustment action has been initiated by the member's command, as appropriate. Commands submitting claims to OMAs without a locally prepared pay checkage form or a DD 139 shall be requested to provide a copy. If the claim is otherwise payable, payment action shall be held in abeyance pending receipt of the form.

(b) *Officers.* The accounts of officers (Navy and Marine Corps) receiving treatment in Veterans Administration facilities, the Canal Zone Hospital, or in civilian hospitals at the Department of the Navy's expense are required to be checked for subsistence. Collection action is initiated by completion and submission of a DD Form 139, Pay Adjustment Authorization, by the officer's commanding officer or the Pay/Personnel Administrative Support System (PASS) office to the disbursing officer having custody of the member's pay record. The Pay/Personnel Administrative Support System officer is responsible for ensuring that checkage has been accomplished in accordance with DOD Military Pay and Allowances Entitlements Manual 30137. When officers are hospitalized in an Army, Air Force, or designated USTF, the charge for subsistence will be collected by the facility.

(c) *Enlisted Members.* (1) The passage of the Defense Officer Personnel Management Act (DOPMA) placed a requirement on the uniformed services to collect subsistence from hospitalized enlisted personnel. To accomplish collection, it is necessary establish a pay checkage system similar to that described in § 732.21(b) for officers. Generally, the DD Form 139 can be used for this purpose; however, the Medical Department representative (or other appropriate individual) who completes or assists in the preparation of the NAVMED 6320/10 may attach thereto a locally prepared statement in the following format before submission of the claim to the OMA:

(i) Name, rate, and social security number of the hospitalized member.

(ii) Inclusive dates of hospitalization.

(iii) "NAVMEDCOM 00016", COMNAVMEDCOM's Unit Identification Code (UIC), as the organization providing meals.

(iv) Date forwarded to disbursing office.

(2) The pay checkage form shall be forwarded to the disbursing officer (DO) or Personnel Support Detachment (PSD) holding the member's pay record. Copies shall be provided COMNAVMEDCOM (MEDCOM–112) and shall accompany each inpatient claim submitted to an OMA.

§ 732.22 Appeal of Denied Claims.

When a claim for care under this part is initially denied, the member shall be advised of the appeal procedure in the denial letter specified in § 732.18(c)(5). Responses at all levels shall be prompt and courteous. The appeal procedure consists of three levels:

(a) Reconsideration by the OMA or ODA making the initial denial. The member should submit any additional information that may mitigate the initial denial.

(b) Consideration by the commander of the regional medical command having cognizance over the OMA or ODA which upheld the initial denial on reconsideration.

(c) The third level is consideration by COMNAVEMED COM (MEDCOM–333).

§ 712.23 Records.

The NAVMED 6320/10 or a copy of the Public Voucher for Medical Services (NAVCOMPT Form 2160) or other paid voucher and the Accounting Card (NAVCOMPT Form 632) containing the accounting classification and cost code information received from Navy finance centers, provide all the management information needed by COMNAVMEDCOM under normal circumstances. Except for the monthly letter report required in § 732.12(a)(2), no other records need be forwarded to COMNAVMEDCOM by approving authorities except, when in the judgment of the approving officer, copies of correspondence of other pertinent documents of a controversial nature might assist in improving administration of the program.

BILLING CODE 3810-AE-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD13 86–02]

Drawbridge Operation Regulations; Lake Washington Ship Canal, Seattle, WA

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: The Coast Guard is changing the regulations governing operation of the City of Seattle's drawbridges across the Lake Washington Ship Canal by permitting the draws to remain in the closed position, after receiving an opening request, for periods of up to ten minutes, if needed to pass accumulated vehicular traffic. Bridges affected by this change are the: Ballard Bridge, Fremont Bridge, University Bridge, and Montlake Bridge. This will relieve vehicular traffic congestion and still provide for the reasonable needs of navigation.

EFFECTIVE DATE: These regulations become effective on June 23, 1986.

FOR FURTHER INFORMATION CONTACT: John E. Mikesell, Chief, Bridge Section, Aids to Navigation Branch, (Telephone: (206) 442–5864.

SUPPLEMENTARY INFORMATION: On February 10, 1986, the Coast Guard published proposed rules (51 FR 4933) concerning this amendment. The Commander, Thirteenth Coast Guard District, also published the proposal as a public notice dated February 19, 1986. In each notice interested parties were given until March 27, 1986 to submit comments.

Drafting Information

The drafters of this notice are: John E. Mikesell, project officer, and Lieutenant Commander Judith M. Hammond, project attorney.

BEST COPY AVAILABLE

Discussion of Comments

Five comments were received in response to the Federal Register and Coast Guard notices. Two were from federal agencies who offered no objections to the proposal. One was from a towboat company and another was from an association of towboat companies; both supported the proposal. One, from a company engaged in shipyard and towing operations, felt that the exemption provided to towing vessels should extend to all commercial vessels. There does not appear to be sufficient justification to warrant this change.

Economic Assessment and Certification

These regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 CFR 11034); February 26, 1979).

The economic impact has been found to be so minimal that a full regulatory evaluation is unnecessary. Based on the results of a 60 day trial period using a temporary regulation to evaluate the effects of the change, the proposed rule was modified to exempt vessels engaged in towing fom the potential ten minute delay. Other than general vehicular traffic and navigation interests, there are no known businesses, including small entities, that would be affected by the change. There are only minimal impacts on navigation, and roadway traffic would benefit from improved traffic flow. Since the economic impact of these regulations is expected to be minimal, the Coast Guard certifies that they will not have a significant economic impact on a substantial number of small entities.

PART 117—[AMENDED]

In consideration of the foregoing, Part 117 of Title 33, Code of Federal Regulations is amended as follows:

1. The authority citation for Part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05-01(g).

PART 117—DRAWBRIDGE OPERATION REGULATIONS

2. Section 117.1051(d) is revised to read as follows:

§ 117.1051 Lake Washington Ship Canal.

* * * * *

(d) The draws of the Ballard (15th Avenue) Bridge, mile 1.1, Fremont Avenue Bridge, mile 2.6, University Bridge, mile 4.3, and Montlake Bridge, mile 5.2, shall open on signal, except that:

(1) The draws need not be opened for a period of up to 10 minutes after receiving an opening request, if needed to pass accumulated vehicular traffic. However, the draws shall open without delay, when requested by vessels engaged in towing operations.

(2) The draws need not open from 7 a.m. to 9 a.m. and 4 p.m. to 6 p.m. Monday through Friday, except Federal holidays for vessels of less than 1,000 tons, unless the vessel has in tow a vessel of over 1,000 tons, except under emergency conditions when the Seattle City Engineer is notified.

(3) Between the hours of 11 p.m. and 7 a.m. the draws shall open if at least one hour notice is given by telephone, radiotelephone, or otherwise to the drawtender at the Fremont Avenue Bridge.

Dated: May 6, 1986.

R.R. Garrett,

Captain, U.S. Coast Guard, Acting Commander, 13th Coast Guard District.

BILLING CODE 4910-14-M

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

36 CFR Part 1150

Compliance With Standards for Access to and Use of Buildings by Handicapped Persons

AGENCY: Architectural and Transportation Barriers Compliance Board.

ACTION: Interim rule with request for comments.

SUMMARY: The Architectural and Transportation Barriers Compliance Board (hereinafter ATBCB) is revising its regulation relating to Compliance with Standards for Access to and Use of Buildings by Handicapped, Subpart E-Proceedings Prior to Hearings; Pleadings and Motions, 36 CFR Part 1150.41. The changes are designed to extend the time period allowable for the informal resolution of complaints filed with the ATBCB indicating any violation of standards for accessibility and usability prescribed under the Architectural Barriers Act of 1968, Pub. L. 90-480, as amended, 42 USC 4151 et seq, from 90 to 180 days. Additionally, the time period will now commence at the time the ATBCB receives a complete complaint, not after receipt of the complaint by all affected agencies, as currently required. These revisions will make ATBCB's regulations consistent with similar regulations for the federally conducted programs of most Federal agencies.

DATES: This rule is effective May 22, 1986. Written comments must be received on or before July 21, 1986.

ADDRESS: Written comments may be mailed to the Executive Director, Architectural and Transportation Barriers Compliance Board, 330 C Street, SW., Washington, DC, 20202.

FOR FURTHER INFORMATION CONTACT: Nicholas L. Chiarkas, General Counsel, (202) 245-1801 (voice or TDD). This is not a toll-free number. Copies of this notice are available on tape for the visually impaired.

SUPPLEMENTARY INFORMATION:

Background

The ATBCB was established under section 502 of the Rehabilitation Act of 1973, Pub. L. 93-112, 87 Stat. 391. Section 502(d) [29 USC 792(d)] provides that the ATBCB shall hold hearings and issue orders it deems necessary to ensure compliance with standards of buildings and facilities issued under the Architectural Barriers Act of 1968, as amended. The provisions of subchapter II of Chapter 5 and Chapter 7 of Title 5, United States Code apply to the ATBCB procedures. An order of compliance issued by ATBCB is a final order of compliance for purposes of judicial review. Pub. L. 93-516, 58 Stat. 1621, the Rehabilitation Act Amendments of 1974, provides that an order of compliance may include the withholding or suspension of Federal funds with respect to any building found not to be in compliance with the applicable standards.

The 1978 Act provides that an order of compliance issued by an administrative law judge shall be deemed an order of the Board and shall be a final order for the purpose of judicial review. The 1978 Act also provides that any complainant or participant may obtain review of a final order. The 1978 Act vests in the Executive Director on behalf of the ATBCB the final authority with respect to the investigation of alleged noncompliance in the issuance of formal complaints. The 1978 Act also authorizes the ATBCB to direct the Executive Director to bring court actions to enforce compliance orders.

The ATBCB in 1978 adopted procedures to enable it to implement its enforcement responsibility with respect to buildings subject to section 502. 41 FR

55441 (1976). A review of the regulation was precipitated by the enactment of the 1978 Act. On April 30, 1980, revisions were proposed to various sections of the regulation. 45 FR 28969–28977. Comments were invited until June 30, 1980; a total of eight written comments were received containing suggestions. Final rules were published on November 25, 1980. 45 FR 78472–78480.

Summary of Changes

In the revised regulation, the time period allowed for the informal resolution of complaints filed with the ATBCB indicating any violation of standards for accessibility and usability prescribed under the Architectural Barriers Act of 1968, as amended, is extended from 90 to 180 days. This time period will commence at the time the ATBCB receives a complete complaint, not after receipt of the complaint by all affected agencies, as currently required.

The ATBCB considers these revisions necessary in order to assure more consistency with similar section 504 regulations for the federally conducted programs of most Federal agencies. Most section 504 regulations provide a 180-day time frame for the resolution of such complaints. In April, 1985, the Department of Justice asked the ATBCB to consider whether it should extend the time for complaint resolution to eliminate any conflict between investigatory time frames of the ATBCB and another agency, when both are conducting simultaneous investigations of the same facility. In response to this request, the ATBCB informed the Department of Justice that should such a conflict arise, the ATBCB time frame would be extended to equal that of the other agency. This rule eliminates the need to make such special arrangements on a case-by-case basis.

List of Subjects in 36 CFR Part 1150

Handicapped, Compliance hearings, Administrative practice and procedure.

Charles Hausot,

Chairperson, Architectural and Transportation Barriers Compliance Board.

PART 1150—[AMENDED]

Therefore, Title 36 CFR Part 1150 is amended as follows:

1. The authority citation for Part 1150 continues to read as follows:

Authority: Sec. 502 of the Rehabilitation Act of 1973, Pub. L. 93–112, as amended 87 Stat. 391 (29 U.S.C. 792).

§ 1150.41 [Amended]

2. Section 1150.41 is amended by changing "ninety (90) days" to "one hundred eighty (180) days" in paragraphs (f), (g), and (h).

3. Paragraph (i) of § 1150.41 is amended by changing "one hundred (100) days" to "one hundred ninety (190) days."

BILLING CODE 8820-BP-M

VETERANS ADMINISTRATION

38 CFR Parts 8 and 8

Implementation of the Balanced Budget and Emergency Deficit Control Act of 1985, Government Life Insurance; Policy Loan Reductions

AGENCY: Veterans Administration.

ACTION: Notice of Policy Loan Reduction under the Government life insurance programs.

SUMMARY: The Veterans Administration (VA) is giving notice that a change is being made to existing policy concerning the issuance of loans to policyholders under the United States Government Life Insurance (USGLI), Veterans Reopened Insurance (VRI), and Service-Disabled Veterans Insurance (S–DVI) programs. Effective April 1, 1986, and continuing through the fiscal year ending September 30, 1986, the percentage of reserve value (i.e., cash value) that a policyholder under the aforementioned programs may borrow against is reduced from 94 percent to the following levels:

Program	Percent of reserve
USGLI	10
VRI	50
S–DVI	75

These limitations apply only to the issuance of new policy loans under the USGLI, VRI, and S–DVI programs. Existing loans under these programs remain unchanged. However, policies with loans which exceed the above limits will have no further loan value until the loans are reduced below the applicable limit. The National Service Life Insurance (NSLI) program, Veterans Special Life Insurance (VSLI) program and the Veterans Insurance and Indemnities (VI&I) Appropriation are not affected by this change. The policy loan rate will remain at 11 percent for all programs except USGLI, which is statutorily fixed at 5 percent.

EFFECTIVE DATE: April 1, 1986.

FOR FURTHER INFORMATION CONTACT: Paul F. Koons, Assistant Director for Insurance (29), VA Regional Office and Insurance Center, Post Office Box 8079, Philadelphia, PA 19101, (215) 951–5360.

SUPPLEMENTARY INFORMATION: When certain targeted Federal budget deficits are not met for a fiscal year, section 252 of the Balanced Budget and Emergency Deficit Control Act of 1985 requires that the President issue an order sequestering a portion of the monies appropriated for payments under several VA administered programs. The Comptroller General has determined that policy loans under the Government life insurance programs are subject to the ceiling limitations imposed by the Act. An order sequestering funds under several VA programs, including policy loans under the six Government life insurance programs, was issued February 1, 1986. The changes affecting the Government life insurance programs made pursuant to the order are effective April 1, 1986.

In order to reduce the policy loan obligation to the level imposed under the Act, policy loans for each insurance program must be reduced by 4.3 percent from the VA's fiscal year 1986 estimates. To accomplish this, the policy loan rate will be maintained at the current level of 11 percent for all programs, except USGLI, which is set by law at 5 percent. For those programs where maintenance of the current rate will not enable us to meet the reduced ceiling, the maximum loan value will be reduced from 94 percent of reserve to a lower percentage of reserve, based on the amount of loan activity projected for the individual program during the balance of the fiscal year.

Medicare Program; Physician Fee Freeze Sanctions

AGENCY: Office of the Secretary, HHS; Office of Inspector General (OIG).

ACTION: Final rule.

SUMMARY: This final rule sets forth OIG procedures for the imposition of civil money penalties and Medicare program exclusions on physicians who have chosen not to be participating physicians and who have raised charges to Medicare beneficiaries in violation of the freeze on such fees contained in section 2306 of Pub. L. 98-369, the Deficit Reduction Act (DEFRA). This final rule also modifies existing regulations to permit the OIG to impose civil money penalties and assessments on those individuals who have chosen to be participating physicians under the Medicare program and who have violated their participation agreements set forth in section 2306.

EFFECTIVE DATE: May 22, 1986.

FOR FURTHER INFORMATION CONTACT: James Patton (301) 594-3857.

SUPPLEMENTARY INFORMATION:

I. Background

Under section 2306 of Pub. L. 98-369, new sections 1842(b)(4) and 1842(j) were added to the Social Security Act, respectively, (i) imposing a freeze on Medicare reimbursement for physician services for a period of 15 months, beginning July 1, 1984, and (ii) providing the Secretary with discretionary authority to exclude a non-participating physician from Medicare participation, impose a civil money penalty and assessment (as described in section 1128A of the Act), or both, if a non-participating physician knowingly and willfully bills Medicare beneficiaries during the 15-month period, beginning July 1, 1984, for charges in excess of such physician's actual charges for the calendar quarter beginning April 1, 1984.

In addition, section 2306 of DEFRA added section 1842 (h) and (i) to the Act by establishing a participating physician and supplier program under Medicare. A participating physician or supplier is one who voluntarily enters into an agreement to accept assignment of all services provided to Medicare patients during the period covered by the agreement. Under this section, the participating physician or supplier would be in violation of the participation agreement if the party collected or attempted to collect from the beneficiary any amount in excess of the applicable deductible and coinsurance. A participating physician or supplier would also be in violation of the agreement if the party refused to accept assignment for an item or service that is reimbursable under Medicare. Section 1128A(a) of the Act was also amended by section 2306 of DEFRA to provide that a participating physician or supplier may be subject to civil money penalties and assessments if he or she violates the participation agreement.

Temporary extensions of the physician fee freeze provision were passed by Congress under the Emergency Extension Act of 1985 (Pub. L. 99-107) and the Temporary Debt Limit Extension Act of 1985 (Pub. L. 99-155), extending this authority through December 14, 1985. A further extension of the physician fee freeze provision to March 15, 1986 was enacted as part of Pub. L. 99-201.

II. Summary of Proposed Rule

Proposed regulations were published in the **Federal Register** on September 13, 1985 (50 FR 37386). Specifically, these proposed regulations:

- Included a new section 42 CFR 420.102 stating that the OIG would utilize existing procedures contained in the current regulatory provisions pertaining to fraud and abuse determinations when determining the length of an exclusion and the amount of the money penalty and assessment applicable to physicians who are to be sanctioned. The notification, effectuation and appeal procedures under existing regulations would also be used for the fee freeze provisions.
- Specified that exclusions from the Medicare program based on violations of the fee freeze would be for a period not exceeding 5 years. The proposed regulations stated that any physician excluded from program participation under this provision would not be automatically reinstated into Medicare program participation until application for reinstatement was made under procedures set forth in 42 CFR 420.130 through 420.136.
- Provided that if an exclusion was for the full 5 years, the OIG would have to automatically approve an application for reinstatement. If the physician was also excluded for a longer period of time under another sanction provision, the 5 year maximum exclusion period would not be applicable.
- Stated that the OIG would not impose an exclusion if the physician is a sole community physician or the sole source of essential specialized services in a community (42 CFR 420.103). Where it is determined that such a physician has violated the fee freeze provision, the OIG would only impose a money penalty and assessment.
- Modified the regulations at 45 CFR 101.102 to include violations of a participation agreement as a basis for imposing penalties.

III. Response to Public Comments

In response to this notice of proposed rulemaking, we received a total of two public comments. Set forth below is a summary of those comments and our response to those concerns.

Comment: One commenter disagreed in general with the overall physician fee freeze concept. The commenter indicated that physicians and patients should be allowed the freedom to reach whatever contract for health care services they find mutually agreeable, and that there should be no interference by Medicare.

Response: The commenter's concern deals generally with dissatisfaction over congressional enactment of section 2306 of DEFRA and not specifically with this rulemaking activity. As indicated above, these regulations simply reflect congressional intent and the statutory change made by DEFRA to impose penalties and sanctions on those physicians who violate the Medicare physician fee freeze or their participation agreement.

Comment: A second commenter pointed out that section 1842(j)(4) of the Act permits the Secretary, out of any money penalties and assessments collected, to reimburse the beneficiary for the amount of excess charges billed by the sanctioned physician to the beneficiary. The commenter recommended that this provision be included in appropriate regulations.

Response: This comment has not been accepted. We believe that the provision

in question is simple, clear and straightforward, and can be implemented without a regulation. The Health Care Financing Administration, which has responsibility for implementing this provision, is currently developing the necessary administrative procedures for this purpose.

IV. Impact Analysis

Executive Order 12291

We have determined that these regulations do not meet the criteria for a major rule as defined by section 1(b) of Executive Order 12291 because they will not have an annual effect on the economy of $100 million or more; cause a major increase in costs or prices for consumers, government agencies, industry or a geographic region; or cause significant adverse effects on business or employment. We do not expect these regulations to have such an effect.

Regulatory Flexibility Analysis

Consistent with the Regulatory Flexibility Act of 1980 (Pub. L. 96-354, U.S.C. 604(a)), we prepare a regulatory flexibility analysis when the agency issues certain regulations that would have a significant economic impact on a substantial number of small businesses. The analysis is intended to explain what effect the regulatory action by the agency would have on small businesses and other small entities, and to develop lower cost or burden alternatives. The law on which these regulations are based is specific, and there is little leeway in implementing the requirements. Some of the sanctions that the Federal Government will impose as a result of these regulations will have an impact on physicians. However, we do not anticipate that a substantial number of physicians will be significantly affected by these regulations. Therefore, the Secretary certifies that a regulatory flexibility analysis is not required for this rulemaking.

TITLE 42—PUBLIC HEALTH

A. 42 CFR Chapter IV, Part 420 is amended as set forth below:

PART 420—PROGRAM INTEGRITY

1. The authority citation for Part 420 is revised to read as follows:

Authority: Secs. 1102, 1128, 1842(j), 1862(d), 1862(e), 1866(b)(2)(D), (E), and (F), 1871, 1902(a)(39), and 1903(i)(2) of the Social Security Act (42 U.S.C. 1302, 1320a–7, 1395u(j), 1395y(d), 1395y(e), 1395cc(b)(2)(D), (E), and (F), 1395hh, 1396a(a)(39), and 1396b(i)(2)), unless otherwise noted.

2. The Table of Contents for Subpart B is amended by adding entries for §§ 420.102 and 420.103.

Subpart B—Exclusion or Suspension of Practitioners, Providers, Suppliers of Services, and Other Individuals

Sec.

* * * * *

420.102 Sanction for violation of the freeze on physician charges.

420.103 Exclusion for violation of the freeze on physician charges.

* * * * *

3. In Subpart B, the authority citation and § 420.100 is revised to read as follows:

Subpart B—Exclusion or Suspension of Practitioners, Providers, Suppliers of Services, and Other Individuals

Authority: Secs. 1102, 1128, 1842(j), 1862(d), 1862(e), 1866(b)(2)(D), (E), and (F), 1871, 1902(a)(39), and 1903(i)(2) of the Social Security Act (42 U.S.C. 1302, 1320a–7, 1395u(j), 1395y(d), 1395(e), 1395cc(b)(2)(D),(E), and (F), 1395hh, 1396a(a)(39), and 1396b(i)(2)).

§ 420.100 Basis and scope.

This subpart implements Sections 1128, 1842(j), and 1862 (d) and (e) of the Act. It sets forth criteria and procedures for (a) excluding practitioners, providers, and suppliers of services who have defrauded or abused the Medicare program or, for those physician practitioners who are not participating physicians, who have violated the billing restrictions of section 1842(j) of the Act, and (b) for suspending practitioners and other individuals convicted of crimes related to their participation in the delivery of medical care or services under the Medicare, Medicaid or the social services programs. It also specifies the appeal rights of a suspended individual and the procedures for reinstatement of excluded and suspended individuals. The procedures set forth in § 420.101 through 420.115 also apply to terminations of provider agreements under § 489.53(a) (6), (7), or (8) of this chapter.

4. Subpart B is amended by adding new §§ 420.102 and 420.103 to read as follows:

§ 420.102 Sanctions for violations of the freeze on physician charges.

(a) Whenever the OIG determines that a physician, who is not a participating physician under section 1842(h) of the Act, has during the statutory period of the freeze (1) provided services to a beneficiary and (2) knowingly and willfully billed that beneficiary for actual charges that are in excess of the physician's actual charges for the calendar quarter beginning on April 1, 1984, the OIG may exclude the physician from program participation for a period of up to five years, impose a monetary penalty or assessment against the physician, or both.

(b) If the OIG makes a determination under paragraph (a) of this section that involves a monetary penalty or assessment, the OIG will use the penalty determination, notification, effectuation, and appeal procedures contained in 45 CFR 101.100 through 101.133.

(c) If the OIG makes a determination under paragraph (a) of this section and proposes to exclude a physician from Medicare program participation without imposing a monetary penalty or assessment, the OIG will use the determination, notification, effectuation, appeal, and reinstatement procedures contained in § 420.100 through § 420.115 and § 420.130 through § 420.134.

§ 420.103 Exclusion for violations of the freeze on physician charges.

(a) In excluding a physician under § 420.102, the exclusion period determined under § 420.114 may not exceed five years.

(b) The OIG will not impose an exclusion under § 420.102 if it determines that the physician is the sole source of essential specialized service or a sole community physician.

5. In Subpart B, § 420.134 is amended by adding a new paragraph (e) to read as follows:

§ 420.134 Notice of action on request for reinstatement.

* * * * *

(e) The OIG must automatically reinstate a physician excluded only on the basis of § 420.102 if that exclusion has been in effect for five (5) years.

TITLE 45—PUBLIC WELFARE

B. 45 CFR, Subtitle A, Part 101 is amended as set forth below:

PART 101—CIVIL MONEY PENALTIES AND ASSESSMENTS

1. The authority citation for Part 101 is revised to read as follows:

Authority: Secs. 1102, 1128, 1128A and 1842(j) of the Social Security Act (42 U.S.C. 1302, 1320a–7, 1320a–7a and 1395u(j)).

2. In § 101.100, paragraph (a) is revised to read as follows.

§ 101.100 Basis and purpose.

(a) *Basis.* This part implements sections 1128(c), 1128A, and 1842(j) of the Social Security Act (42 U.S.C. 1320a–7(c), 1320a–7a, and 1395u(j)).

* * * * *

3. In § 101.102, is amended by revising paragraph (b) to read as follows:

§ 101.102 Basis for civil money penalties and assessments.

* * * * *

(b) The Department may impose a penalty against any person whom it determines in accordance with this part:

(1) Has presented or caused to be presented a request for payment in violation of the terms of:

(i) An agreement to accept payments on the basis of an assignment under section 1842(b)(3)(B)(ii) of the Act;

(ii) An agreement with a State agency not to charge a person for an item or service in excess of the amount permitted to be charged; or

(iii) An agreement to be a participating physician or supplier under section 1842(h)(1); or

(2) Is a non-participating physician under section 1842(j) of the Act and has knowingly and willfully billed individuals enrolled under Part B of Title XVIII of the Act, during the statutory period of the freeze, for actual charges in excess of such physicians, actual charges for the calendar quarter beginning on April 1, 1984.

47 CFR Ch. 1

[CC Docket No. 81–893]

Common Carrier Services; Resolution of Dispute Concerning Reimbursement for Customer Premises Equipment Repair Parts Transferred to AT&T Information Systems, Inc. by the Bell Operating Companies at Divestiture

AGENCY: Federal Communications Commission.

ACTION: Memorandum Opinion and Order Clarifying Requirements.

SUMMARY: This action clarifies the Commission's requirements regarding the amount AT&T Information Systems, Inc. owes the Bell Operating Companies (BOCs), for customer premises equipment repair parts which it received from the BOCs at divestiture. It was in response to a Petition for Clarification or Further Partial Reconsideration of our *Memorandum Opinion and Order on Reconsideration,* published March 6, 1985 (50 FR 9016).

EFFECTIVE DATE: AT&T–IS is to reimburse the BOCs in accordance with paragraph 7 of this summary, and the appendix, by May 28, 1986.

FOR FURTHER INFORMATION CONTACT: Donald Burrell, (202) 632–7500.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Memorandum Opinion and Order, CC Docket 81–893, adopted May 6, 1986, and released May 13, 1986. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor International Transcription Service, (202) 857–3800, 2100 M Street, NW., Suite 140, Washington, DC 20037.

Summary of Memorandum Opinion and Order

1. American Telephone and Telegraph Co., Information Systems, Inc., (AT&T–IS) filed a "Petition for Clarification on Further Partial Reconsideration" of our *Memorandum Opinion and Order on Reconsideration, (Reconsideration Order)* concerning reimbursement to the Bell Operating Companies (BOCs) by AT&T–IS for exempt material expense. Specifically, AT&T–IS requests clarification regarding the definition of the phrase "exempt materials" and, depending on our intended meaning of this phrase, requests that we reconsider the formula used to calculate the amount of AT&T–IS's reimbursement.

2. In the *Second Computer Inquiry* (Computer II) we determined that the BOCs' customer premises equipment (CPE) should be removed from tariff regulation. We instituted our proceeding in Docket No. 81–893 to carry out the detariffing of the embedded CPE. While we were thus engaged in the implementation of our Computer II decisions, the United States District Court for the District of Columbia entered the Modification of the Final Judgement (MFJ) which required AT&T to divest itself of the BOCs and most of the assets held by those companies. Under the Plan of Reorganization which the Court approved, the embedded base of CPE owned by the BOCs was to be transferred to AT&T–IS at divestiture. As a result of the interplay between Computer II and the MFJ, we decided to make detariffing of the BOC embedded base effective at the time of divestiture and were obliged to resolve valuation questions in order to ensure that the transfer was implemented in a manner that was consistent with the rights of ratepayers and investors.

3. On January 30, 1984, AT&T–IS filed a petition for partial reconsideration of this order. AT&T–IS argued that the exempt materials expense in question was associated, not with the transferred CPE investment, but with station connections investment retained by the BOCs at divestiture. In the petition AT&T–IS suggested that the Commission may have intended to refer to "other expensed materials", which are minor items used in the repair and maintenance of CPE instead of "exempt materials". After considering the AT&T–IS petition and the comments of the BOCs and others, this Commission released its *Reconsideration Order* on January 28, 1985. In that order this Commission defined exempt materials and revised our formula for reimbursement of refurbishment costs, but we did not revise the formula for reimbursement of exempt materials expense.

4. On April 5, 1985, AT&T–IS filed a second petition for classification and further partial reconsideration. The BOCs filed comments opposing the AT&T–IS petition. AT&T–IS filed reply comments.

5. AT&T–IS stated that in the *Reconsideration Order* this Commission defined "exempt materials" to refer to the inventory of CPE repair parts transferred to AT&T–IS at divestiture. On the other hand, in their comments the BOCs state that the term "exempt

materials" in the *Reconsideration Order* referred to the BOCs' entire 1983 exempt materials expense, not just the inventory of this account at divestiture.

6. In the *Reconsideration Order*, we explicitly referred to the *inventory* of material and supplies only, and not to the portion of this account which had already been installed on telephone sets either on customer premises or in the telephone company warehouses and vans. AT&T–IS' interpretation of our use of "exempt materials" is correct.

7. In its petition AT&T–IS requested that, if this Commission should interpret "exempt materials" as the cost of the inventory of CPE repair parts transferred to AT&T–IS at divestiture, we should change the reimbursement formula, which currently calls for reimbursement of only 50% of these costs, to 100% of these costs. We agree with AT&T–IS that it is unreasonable to reimburse the BOCs for only half of the value of the exempt materials inventory transferred at the time of divestiture. We therefore order AT&T–IS to reimburse the BOCs for the full value of the exempt materials inventory that was transferred at divestiture.

8. *Valuation of "exempt materials" inventory.* One further matter must be resolved: What was the cost of the exempt material expense inventory at divestiture? In its petition AT&T–IS stated that the BOCs maintained an inventory of complete CPE units sufficient for approximately 32 days, and that repair parts were generally maintained for lesser periods than were the complete CPE units. The BOCs did not dispute AT&T–IS' assertion of a 32 day inventory for complete CPE. They did argue that the inventory period for repair parts is unrelated to that of complete CPE units, but they failed to provide any information as to how we could reasonably determine what the level of repair parts inventory might have been. Absent additional information, we find AT&T–IS' analysis and conclusions to be reasonable. Accordingly, we will use a 32 day inventory level to determine the value of the exempt materials inventory.

9. The BOCs also disputed the AT&T–IS figures as to the total level of the 1983 exempt materials expense. AT&T–IS estimated the figure to be $152 million while the BOCs stated the actual figure was approximately $201 million.

10. In its reply comments AT&T–IS accepted all but $23 million of the BOC 1983 exempt material expense estimate. AT&T–IS claimed that the BOCs had provided insufficient data to support reimbursement based on this amount. Because of the dispute, our staff requested and analyzed additional information and determined that some of the $23 million was, in fact, exempt materials expense related to CPE, but that a substantial portion of the associated equipment was not transferred to AT&T–IS at divestiture, rather it was retained by the BOCs as official equipment. The staff analysis shows that approximately $14 million of the $23 million was associated with equipment retained by the BOCs at divestiture. We therefore find that the $201 million proposed by the BOCs should be reduced by $14 million to approximately $186 million.

11. We estimate the value of the exempt materials expense inventory at divestiture to be the product of the 1983 BOC exempt materials expense and the ratio of the inventory period to 365 days, or $16.3 million. The portion of the $16.3 million attributable to each of the seven Bell Regional Holding Companies has been identified in the Appendix.

12. In their comments, the BOCs state that they are entitled to recover interest charges from January 1, 1984, on the funds used to purchase the materials and supplies defined as "exempt materials." The amounts that have become due for exempt materials transferred with the inventory of CPE transferred is nothing more than a part of a continuing series of adjustments that have become necessary as a result of divestiture. This process is one of great complexity, and one completely without precedent. These adjustments involve obligations whose nature and amounts become clear only as the consequence of the divestiture are identified. We do not believe that interest should accrue on obligations arising from the true-up process until such time as the amount of an obligation, and to whom it is owed, is determined. We consequently reject the BOCs claim that they are entitled to interest from January 1, 1984, on the amounts attributed to exempt materials expenses.

13. Accordingly, it is hereby ordered, that the Petition for Clarification or Further Partial Reconsideration is granted.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Private Land Mobile Radio Services; Revision and Simplification of Rule Governing Modification Applications

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission has amended its rules governing application procedures for Specialized Mobile Radio Service (SMRS) operators and end-users in the 800 MHz private land mobile band. This amendment reduces the number of instances when modification applications are required to be filed by SMR end-users.

EFFECTIVE DATE: June 18, 1986.

FOR FURTHER INFORMATION CONTACT: W. Riley Hollingsworth, Jr., Chief, Compliance Branch, Land Mobile and Microwave Division, Private Radio Bureau, (202) 632-7125.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, PR Docket 85-302, adopted May 5, 1986, and released May 12, 1986.

The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street, NW, Suite 140, Washington, DC 20037.

Summary of Report and Order

1. On October 17, 1985, the FCC released a Notice of Proposed Rule Making, PR Docket No. 85-302 (50 FR 42732, October 22, 1985) proposing to simplify the requirements contained in Rule § 90.135, 47 CFR § 90.135, which governs license modification procedures in the Private Land Mobile Radio Service. This rule required, among other things, both SMR operators and their end-users to file modification applications when: (i) A base station is sold to another operator; (ii) there is either an increase or decrease in the number of base station channel assignments; and (iii) an end-user obtains service from an additional base station.

2. The Report and Order in PR Docket 85-302 simplifies the Commission's application filing procedures in these three instances by eliminating the requirement that SMRS end-users file modification applications. However, when a base station is sold to another SMR operator, the assignee will be required to file a list of end-users with the Commission and when an end-user obtains service from more than one base station, the end-user will have to so notify the Commission by letter. If an end-user is obtaining service from more than one base station and wishes to be counted for loading purposes on more than one base station, then the end-user must file a modification application.

3. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. section 604, a final regulatory flexibility analysis has been prepared. It is available for public viewing as part of the full text of this decision, which may be obtained from the Commission or its copy contractor.

4. The proposal contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to decrease the information collection burden the Commission imposes on the public. This proposed reduction in information collection burden is subject to approval by the Office of the Management and Budget as prescribed by the Act.

Ordering Clause

5. Accordingly, it is ordered, that effective June 18, 1986, Part 90 is amended as shown at the end of this document and that this proceeding is terminated. Authority for this action is found in sections 4(i) and 303 of the Communications Act of 1934, as amended, 47 U.S.C. §§ 154(i) and 303.

List of Subjects in 47 CFR Part 90

Private land mobile radio services, Specialized mobile radio service, Application filing requirements.

Part 90 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

PART 90—PRIVATE LAND MOBILE RADIO SERVICES

1. The authority citation for Part 90 continues to read as follows:

Authority: Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303, unless otherwise noted.

2. Section 90.135 is amended by redesignating existing paragraphs (c)(1) and (c)(2) as (c)(2) and (c)(3) respectively, and by adding a new paragraph (c)(1).

§ 90.135 Modification of license.

* * * * *

(c)(1) No notification or application is required where a change noted in paragraphs (a)(1), (a)(6), or (a)(7) is made to an 800 MHz SMRS user license and is necessitated by: (1) An increase or reduction in frequencies assigned to an associated SMRS base station; (ii) the user licensee acquiring service from additional SMRS base stations without making changes in unit loading distribution; (iii) an assignment of the associated SMRS base station without a change of its call sign. If any changes are made that affect a user licensee's unit loading distribution, a Form 574 application must be filed for modification. If the call sign of an assigned SMRS base station will be changed as a result of the assignment, a list of all user licensees having stations loaded on the assigned SMRS must accompany the SMRS base station assignment application.

[Docket No. 60477-60771]

Ocean Salmon Fisheries off the Coasts of Washington, Oregon, and California

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of closure.

SUMMARY: The Secretary of Commerce (Secretary) announces the closure of the non-Indian commercial salmon fishery in the fishery conservation zone (FCZ) from the U.S.-Canada border to Cape Falcon, Oregon, at midnight, May 19, 1986, because the chinook salmon quota has been met. The Director, Northwest Region, NMFS (Regional Director), has determined in consultation with the Washington Department of Fisheries (WDF) and the Oregon Department of Fish and Wildlife (ODFW) that the commercial fishery quota of 33,700 chinook salmon for the area was reached by midnight, May 19, 1986. This closure is intended to ensure conservation of chinook salmon.

DATES: Closure of the FCZ from the U.S.-Canada border to Cape Falcon, Oregon, to commercial salmon fishing is effective at 2400 hours Pacific Daylight Time, May 19, 1986. Comments on this notice will be received until June 3, 1986.

ADDRESS: Comments may be mailed to the Northwest Regional Office, NMFS, BIN C15700, 7600 Sand Point Way, NE., Seattle, WA 98115-0070. Information relevant to this notice has been compiled in aggregate form and is available for public review during business hours at the same address.

FOR FURTHER INFORMATION CONTACT: Rolland A. Schmitten (Regional Director), 206-526-6150.

SUPPLEMENTARY INFORMATION: Regulations governing the ocean salmon fisheries at 50 CFR Part 661 specify at § 661.21(a)(1) that: "When a quota for the commercial or the recreational fishery, or both, for any salmon species in any portion of the fishery management area is projected by the Regional Director to be reached on or by a certain date, the Secretary will, by publishing a notice in the Federal Register under § 661.23, close the commercial or recreational fishery, or both, for all salmon species in the portion of the fishery management area to which the quota applies as of the date the quota is projected to be reached."

Management measures for 1986 were published on May 5, 1986 (51 FR 16520). The 1986 May non-Indian commercial fishery for all salmon species except coho in the FCZ from the U.S.-Canada border to Cape Falcon is separated into two seasons, May 1 through May 10, and May 14 through May 31, with both seasons subject to closure upon attainment of a quota of 33,700 chinook salmon. Based on the best available information, the non-Indian commercial fishery catch in the area was projected to reach the quota of 33,700 chinook salmon by midnight, May 19, 1986. This information was not available until after the close of business on Friday, May 16. The Secretary therefore issues this notice closing the non-Indian commercial fishery in the FCZ from the U.S.-Canada border to Cape Falcon, Oregon, at midnight, May 19, 1986. This notice does not apply to treaty Indian fisheries operating in the same area or to other fisheries which may be operating in other areas.

The Regional Director consulted with the Directors of WDF and ODFW regarding this closure. The Directors of WDF and ODFW have confirmed that Washington and Oregon closed the non-Indian commercial fishery in State waters adjacent to this area of the FCZ at midnight, May 17, 1986.

Other Matters

This action is taken under §§ 661.21 and 661.23 and is in compliance with Executive Order 12291.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 945

Irish Potatoes Grown in Certain Designated Counties in Idaho and Malheur County, Oregon; Proposed Amendment No. 1 to Handling Regulation

AGENCY: Agriculture Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would permit handlers to ship up to 200 hundredweight per day of yellow fleshed Finnish-type potatoes exempt from grade, size, maturity, pack, and inspection requirements, and permit prepeeled potatoes to be handled without a Certificate of Privilege. Yellow fleshed Finnish-type potatoes often fail marketing order requirements although there is a small specialized market for them. There is a limited market for prepeeled potatoes and the committee could obtain information needed to obtain compliance without a Certificate of Privilege. The proposed rule would reduce the regulatory and paperwork burdens of production area handlers.

DATE: Comments must be received by June 23, 1986.

ADDRESS: Comments should be sent to: Docket Clerk, F&V, AMS, Room 2085–S, U.S. Department of Agriculture, Washington, DC 20250. Two copies of all written material shall be submitted, and they will be made available for public inspection at the office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Washington, DC 20250, telephone (202) 447–5697.

SUPPLEMENTARY INFORMATION: This proposed rule has been received under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "nonmajor" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has certified that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such action in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act, and rules proposed thereunder, are unique in that they are brought about through the group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

It is estimated that approximately 100 handlers of potatoes will be subject to regulation under the Idaho-Eastern Oregon Potato Marketing Order during the course of the current season and that the great majority of this group may be classified as small entities. While regulations issued during the season impose some costs on affected handlers, the added burden imposed on small entities by this amendment, if present at all, is not significant.

Marketing Agreement No. 98 and Order No. 945 regulate the handling of potatoes grown in designated counties in Idaho and Malheur County, Oregon.

The program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The Idaho-Eastern Oregon Potato Committee, established under the order, is responsible for its local administration.

At its meeting on January 15, 1986, the committee recommended that yellow fleshed Finnish-type potatoes be exempt from the grade, size, maturity, pack, and inspection requirements of the handling regulation. These potatoes are generally small and often misshapen, and frequently do not meet the quality requirements of the order. However, there is a small but specialized market for this product which is often marketed as "organically grown." The committee believes that by permitting handlers to ship up to 200 hundredweight per day of these potatoes a small part of the consuming public could be served and a few growers and handlers could benefit, all with no adverse impact on the marketing of potatoes. There are few growers and even fewer handlers presently involved with this type of potato. If, however, the shipments of this type of potato reached a significant level, the committee would review the situation and would make any necessary changes at that time.

The committee also recommended that handlers be permitted to ship prepeeled potatoes without a Certificate of Privilege. According to committee sources, there is only one active prepeeler in the area, and the committee believes compliance would not present a problem. The market for prepeeled potatoes is limited, with most going to local restaurants throughout the production area and nearby locations. By removing the requirement for obtaining a Certificate of Privilege prior to shipment, the paperwork burden on handlers would be reduced.

PART 945—IRISH POTATOES GROWN IN CERTAIN DESIGNATED COUNTIES IN IDAHO AND MALHEUR COUNTY, OREGON

1. The authority citation for 7 CFR Part 945 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. Section 945.341 is hereby amended by revising (e)(1) introductory text to include "prepeeled potatoes," (f)(1) introductory text to exclude potatoes for prepeeling, and revising (g) to include yellow-fleshed Finnish potatoes as follows:

§ 945.341 Handling regulation.

* * * * *

(e) *Special purpose shipments.* (1) The minimum grade, size, cleanness, maturity, and pack requirements set forth in paragraphs (a), (b) and (c) of this section shall not be applicable to shipments of prepeeled potatoes as defined in paragraph (h) of this section or potatoes for any of the following purposes:

* * * * *

(f) *Safeguards.* (1) Each handler making shipments of potatoes for charity, experimentation, or export pursuant to paragraph (e) of this section shall.

* * * * *

(g) *Minimum quantity exemption.* Each handler may ship up to but not to exceed, five hundredweight of potatoes, except yellow fleshed Finnish-type potatoes, any day without regard to the inspection and assessment requirements of this part, but this exception shall not apply to any shipment that exceeds five hundredweight of potatoes. Handlers of potatoes commonly known as yellow fleshed Finnish potatoes may handle up to 200 hundredweight per day of such potatoes relieved of the requirements set forth in paragraphs (a), (b), (c), and (d) of this section.

[Docket No. R-0572]

Regulation Y; Conditions Imposed on Acquisition of Thrift Institutions by Bank Holding Companies

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Solicitation of public comments.

SUMMARY: The Federal Reserve Board is soliciting comments on whether the Board should modify and grant relief from the conditions it imposes on the acquisition of thrift institutions by bank holding companies under the Bank Holding Company Act and the Garn-St Germain Depository Institutions Act of 1982 to permit bank holding companies to conduct joint marketing and sales operations between thrift subsidiaries and other affiliates, advertise through thrift subsidiaries the services and products offered by its other affiliates, and engage in certain transactions between thrift and other affiliates.

DATES: All comments should be received by the Board by June 27, 1986.

ADDRESSES: All comments, which should refer to Docket No. R-0572, should be mailed to William W. Wiles, Secretary, Board of Governors of the Federal Reserve System, Washington, DC. 20551, or delivered to the courtyard entrance, Eccles Building, 20th Street, NW., between "C" Street and Constitution Avenue, Washington, DC, between 8:45 a.m. and 5:15 p.m. weekdays. Comments may be inspected in Room B-1122 between 8:45 a.m. and 5:15 p.m. weekdays.

FOR FURTHER INFORMATION CONTACT: J. Virgil Mattingly, Deputy General Counsel (202/452-3430); Melanie L. Fein, Senior Counsel (202/452-3594), or Scott G. Alvarez, Senior Attorney (202/452-3583), Legal Division; or, for users of Telecommunications Device for the Deaf, Earnestine Hill or Dorothea Thompson (202/452-3544).

SUPPLEMENTARY INFORMATION: Since 1982, the Board has approved several applications by bank holding companies to acquire thrift institutions pursuant to the provisions of the Garn-St Germain Depository Institutions Act of 1982 and the Bank Holding Company Act ("BHC Act"). In approving these cases, the Board established a number of conditions designed to guard against possible adverse effects that may result from the affiliation of a thrift institution and a bank holding company. *See Citicorp (Fidelity Federal Savings and Loan Association)*, 68 Federal Reserve Bulletin 658 (1982).

These conditions were developed in the context of specific applications pending before the Board and after informal public hearings and public comment that included comments from local and national bank and thrift trade associations, state regulatory authorities, local community groups, competing bank holding companies and thrift institutions, and members of Congress. The conditions have been adopted in each case involving a thrift acquisition by a bank holding company since 1982.

The conditions were designed to assure that the thrift continued to be operated as a separate and independent institution engaged primarily in mortgage lending activities and did not operate in fact as a bank in violation of the interstate banking prohibitions of the BHC Act. The conditions were also designed to prevent the acquiring bank holding company from obtaining an unfair competitive advantage over other banks and thrift institutions by using the thrift to conduct activities not permitted to bank holding companies or conducting banking activities through the thrift that are not permitted to a savings and loan association.

Among the conditions to the Board's approval adopted to accomplish these purposes are restrictions on certain operations between thrift institutions and their bank holding company affiliates. These conditions require that:

(a) the thrift institution be operated as a separate, independent, profit-oriented corporate entity and not be operated in tandem with any other subsidiary of the bank holding company. The thrift institution and bank holding company must limit their operations to effect this condition, and must observe the following conditions:

(1) no banking or other subsidiary of the bank holding company shall link its deposit-taking activities to accounts at the thrift institution in a sweeping arrangement or similar arrangement, and

(2) neither the bank holding company nor any of its subsidiaries shall solicit deposits or loans for the thrift institution, nor shall the thrift institution solicit deposits or loans for any other subsidiary of the bank holding company; and

(b) to the extent necessary to ensure independent operation of the thrift institution and prevent the improper diversion of funds, there shall be no transactions between the thrift institution and the bank holding company or any of its subsidiaries without the prior approval of the appropriate Federal Reserve Bank. This limitation encompasses the transfer, purchase, sale or loan of any assets or liabilities, but does not include infusions of capital by the bank holding company, the payment of dividends or the sale of residential real estate loans from the thrift institution to any subsidiary of the bank holding company.

Citicorp, which has acquired thrift institutions in California, Illinois, and Florida subject to these conditions, has requested relief from the above conditions in three general areas, so as to permit its thrifts to jointly market and sell products and services with other Citicorp affiliates, to cross-advertise the services and products of its affiliates through its thrifts, and to conduct certain limited transactions with other Citicorp affiliates. Citicorp contends that the conditions place the bank holding company and its subsidiary thrift institutions at a competitive disadvantage compared to local thrift insitutions and bank holding companies as well as out-of-state bank holding companies with nonbanking operations in those markets, none of whom are subject to the Board's conditions.

In this regard, Citicorp asserts that it will only conduct cooperative programs that are permissible under the BHC Act between Citicorp's other subsidiaries. Citicorp states that its thrifts will not be operated as banks for purposes of the BHC Act or branches of Citicorp's subsidiary banks for purposes of the McFadden Act. Citicorp states that the conditions in (a)(1) and (a)(2) above assure this by prohibiting the linking of deposit-taking activities of thrift institutions in any arrangement with affiliates, and by prohibiting the solicitation of deposits by the thrift institution for its affiliates or by its affiliates for the thrift institution.

In urging establishment of the conditions, commenters asserted that the restrictions on operations are neccessary to prevent bank holding

companies owning thrift institutions from operating the thrift institution as a bank, and from gaining a competitive advantage over local thrift institutions by permitting the thrift institution to appear to the local consumer to be offering commercial banking and other services that thrift institutions are generally unable or not legally permitted to offer. Commenters argued that joint marketing, cross-advertising of products and services available from affiliates, and transactions with bank holding company affiliates also may permit a thrift to avoid restrictions imposed by the Garn-St Germain Act on the activities of Federal S&Ls. Commenters argue further that the use of joint marketing or cross-advertising may permit the thrift institution to operate in effect as branches for soliciting deposits or loans for its bank affiliates, thereby undermining the interstate banking prohibitions.

The Board believes that the recent requests for relief from the above restrictions on operations present a framework for evaluating whether the conditions have accomplished their intended purposes and the continued appropriateness of the conditions. Commenters are requested to evaluate these matters taking into account, among other things, the significance of the deregulation of interest rate differentials, increasing similarity in the powers of banks and thrifts, and the spread of interstate deposit-taking in both the thrift and banking industries. The Board believes that, in considering action in this area, it is appropriate to seek public comment, in light of the significant public participation that surrounded the original development of the conditions.

Accordingly, the Board seeks public comment on whether the restrictions, other than the restrictions on linking deposit-taking activities and cross-solicitation of deposits, should be retained, modified of removed. In order to permit the Board to evaluate the conditions, the Board requests comment on whether it continues to be necessary and appropriate to limit thrifts affiliated with bank holding companies from conducting activities and marketing services that both thrifts and bank holding companies are otherwise permitted to conduct and market under applicable Federal law in order to accomplish the goals of avoiding the undermining of limitations on interstate deposit-taking and on preventing unfair competition. In this connection, the Board also notes that affiliation of bank holding companies with thrift institutions does not raise the same concerns regarding the separation of banking and commerce that has motivated consideration of similar restrictions on operations between a commercial organization and a bank or thrift affiliate that is contemplated by currently pending legislation and commmenters are requested to take these differences into account in formulating their comments.

The Board also requests comment on whether the deregulation of interest rate differentials, expansion of the powers of thrifts, the growing number of states authorizing interstate banking, and similar events since the formulation of the Board's conditions have affected the need for the restrictions to accomplish their objectives. In this regard, the acquisition of a thrift by a bank holding company that is located in the same state or that is authorized under state law to acquire a bank in the state in which the thrift is located does not raise the concern that the acquisition may evade the BHC Act's limitations on interstate bank acquisitions. The Board requests comment on the extent to which the restrictions should be modified in these situations.

The Board also requests comment on whether modification of the restrictions in any of the following areas would adversely affect their policy goals:

Joint Marketing and Sales: Specifically, the Board requests comment on whether thrift institutions owned by bank holding companies should be permitted to conduct joint marketing and sales activities with their bank holding company affiliates. For example, should a thrift institution and a bank holding company real estate lending affiliate be permitted to jointly solicit business from a real estate developer, with the real estate lending affiliate offering to provide construction lending for a building project and the thrift offering to provide end loan financing for prospective purchasers of the real estate project. In addition, should a holding company affiliate be permitted to introduce existing corporate customers to the thrift institution for the purpose of obtaining relocation assistance or other products and services available through the thrift institution.

In this regard, the Board requests comment on whether any adverse effects that may result from conducting joint marketing and sales activities are sufficiently limited by retaining the condition prohibiting the linking of deposit-taking activities, and by requiring that the terms and pricing of services not be tied in any way and be the same regardless of whether the prospective customer obtains services from both the thrift institution and its affiliate or from only one of the institutions.

Cross Advertising and Referral: The Board also requests comment on whether thrift institutions should be permitted to offer access to services and products of its bank holding company affiliates, and bank holding company affiliates should be permitted to offer access to services and products offered by the thrift institutions. For example, should a thrift institution be permitted to make applications available to its customers for credit cards marketed by and student loans underwritten by its bank holding company affiliates; advertise the products and services of its affiliates by placing brochures and posters in branch offices of the thrift institution and by including advertising inserts in monthly statements of customers of the thrift institution; provide customer lists to its bank holding company affiliates; and, refer its customers to affiliates and provide promotional material and a toll-free number for the affiliate. Similarly, should bank holding company affiliates of the thrift institutions be permitted to advertise the products and services of the thrift institutions.

The Board also seeks comment on whether any adverse effects that may result from cross-advertising and referral activities may be limited by maintaining the current conditions prohibiting the thrift institution from soliciting deposits for its bank holding company affiliates and prohibiting bank holding company affiliates from soliciting deposits for the thrift institution, and by imposing conditions preventing the thrift institution from providing credit analysis in connection with loans provided to customers of the thrift by a bank holding company affiliate, from disbursing credit funds on such loans, and from otherwise acting as a branch or loan production office of any holding company affiliate.

Transactions with Affiliates: The Board also requests comment on whether thrift institutions should be permitted to use services and products of bank holding company affiliates for the benefit of the thrift or its customers. For example, should a thrift institution be permitted to locate a branch office in a building owned by an affiliate and in which holding company affiliates also have offices with separate access?

Board of Governors of the Federal Reserve System, May 16, 1986.
William W. Wiles,
Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 86-ANE-50]

Airworthiness Directives; Allison Gas Turbine Division Model 501-D13, -D13A, -D13D, and -D13H Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) that would require replacing certain thrust sensitive switch assemblies installed in Allison Gas Turbine Division Model 501-D13, -D13A, -D13D, and -D13H engines. The proposed AD is needed to prevent unwanted autofeather (resulting in loss of thrust) or the inability to autofeather when required (resulting in excessive drag in the case of an engine failure), either of which could result in loss of the aircraft. A previous NPRM which provided a choice of two compliance action options has been withdrawn because it became apparent that one of the specified options did not improve airworthiness.

DATE: Comments must be received on or before June 23, 1986.

ADDRESS: Comments on the proposal may be mailed in duplicate to: Office of Regional Counsel, FAA, ATTN: Rules Docket No. 86-ANE-50, 12 New England Executive Park, Burlington, Massachusetts 01803, or delivered in duplicate to the above address, to Room No. 311.

Comments delivered must be marked: Docket No. 86-ANE-50.

Comments may be inspected at Room No. 311 on weekdays, except Federal holidays, between 8:00 a.m. and 4:30 p.m.

The applicable service bulletin may be obtained from Allison Gas Turbine Division, General Motors Corp., P.O. Box 420, Indianapolis, Indiana 46206-0420.

A copy of this bulletin is contained in the Rules Docket at the Office of Regional Counsel, FAA, ATTN: Rules Docket No. 86-ANE-50, 12 New England Executive Park, Burlington, Massachusetts 01803, and may be examined weekdays, except Federal holidays, between 8:00 a.m. and 4:30 p.m.

FOR FURTHER INFORMATION CONTACT: Mr. Ty Krolicki, Chicago Aircraft Certification Office, Propulsion Branch, ACE-140C, FAA, 2300 East Devon Avenue, Des Plains, Illinois 60018; telephone (312) 694-7032.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Director before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket, at the address given above, for examination by interested persons. A report summarizing each FAA-public contract regarding the substance of the proposed AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped post card on which the following statement is made: "Comments to Docket Number 86-ANE-50." The post card will be date/time stamped and returned to the commenter.

The FAA has determined that Allison Model 501-D13, -D13A, -D13D, and -D13H turboprop engine reduction gear assemblies with thrust sensitive switch assembly P/Ns 6792891, 6794122, 6794359, 6807776, 23005483, or 23005485 are subject to malfunction. Failure of the thrust sensitive switch can result in contact being made internally causing unwanted autofeather or in an electrical short circuit which opens a circuit breaker rendering the autofeather system inoperative.

Since this condition is likely to exist or develop on other engines of the same type design, the proposed AD would require replacement of the thrust sensitive switch assemblies with a different P/N assembly containing a single carbon contact switch instead of the two microswitches contained in each assembly being replaced. Extensive experience obtained in operation of T56 series engines, the military counterpart of the civilian 501 series engine, which utilize the carbon contact switch shows that it improves reliability by a factor of at least ten, compared to the microswitch.

The FAA had previously published an NPRM on this matter on January 17, 1983, Docket No. 82-ANE-50. One of the proposed compliance action options contained in that NPRM was replacement of the thrust sensitive switch assembly with P/N 23005483 or P/N 23005485 in accordance with Allison Commercial Engine Alter Bulletin CEB-A-73-82. The NPRM was held abeyance after it became apparent that the replacement switches specified by this bulletin did not improve airworthiness, in that they were experiencing failures and premature wear. Forty-three rejections of the replacement switches specified in CEB-A-73-82 were reported. Allison cancelled CEB-A-73-82 on March 6, 1984. The FAA is withdrawing the January 17, 1983, NPRM in a separate action.

Conclusion

The FAA has determined that only 11 small entities will be affected significantly by this regulation. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) if promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT."

List of Subjects in 14 CFR Part 39

Engines, Air transportation, Aircraft, Aviation safety, Incorporation by reference.

The Proposed Amendment

PART 39—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the FAA proposes to amend Part 39 of the Federal Aviation Regulations (FAR) as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.85.

Allison Gas Turbine Division, General Motors Corp. (Allison, formerly Detroit Diesel Allison): Applies to Allison 501-D13, -D13A, -D13D, and -D13H engine reduction gear assemblies equipped with thrust sensitive switch assembly, P/Ns 6792691, 6794122, 6794369, 6807776, 23005483, or 23005485.

Compliance is required within 60 days after the effective date of this AD, unless already accomplished.

To prevent the possibility of unwanted autofeather or the inability to autofeather when required, accomplish the following:

Replace thrust sensitive switch assemblies, P/Ns 6792691, 6794122, 6794369, 6807776, 23005483, and 23005485 with P/N 6870599, a single carbon contact switch assembly, in accordance with the detailed instructions provided in Allison Commercial Engine Alert Bulletin CEB-A-73-34, Revision 2, dated October 1, 1984, or FAA approved equivalent.

Aircraft may be ferried in accordance with the provisions of FARs 21.197 and 21.199 to a base where the AD can be accomplished.

Upon request, an equivalent means of compliances with the requirements of this AD may be approved by the Manager, Chicago Aircraft Certification Office, FAA, 2300 East Devon Avenue, Des Plaines, Illinois 60021.

Upon submission of substantiating data by an owner or operator through an FAA maintenance inspector, the Manager, Chicago Aircraft Certification Office may adjust the compliance time specified in this AD.

The FAA will request the permission of the **Federal Register** to incorporate by reference the manufacturer's service bulletin identified and described in this document.

Issued in Burlington, Massachusetts, on March 10, 1986.

Clyde M. DeHart,

Acting Director, New England Region.

14 CFR Parts 43 and 91

[Docket No. 22320]

Inoperative Instruments or Equipment

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of meeting.

SUMMARY: This notice announces a meeting to solicit information from the public concerning the operation of aircraft in general aviation operations with inoperative instruments and equipment. The information and views learned at the meeting will be used by the Federal Aviation Administration to address pending issues raised in Notice of Proposed Rulemaking (NPRM) No. 81-14 (46 FR 52278; October 26, 1981), an NPRM concerning the operation of aircraft with inoperative instruments and equipment. The information gathered at this meeting may also be used to explore possible alternatives to the minimum equipment list concept that may provide increased flexibility for those aircraft operators with inoperative instruments and equipment.

DATES: Written material to be presented orally during the meeting on June 17, 1986, must be submitted to the FAA by June 5, 1986. Later requests to make presentations will be accepted on a space-available basis only. Persons or organizations not able to attend this meeting may mail their comments (in duplicate) to the Federal Aviation Administration at the address noted in the "ADDRESSES" section of this document. This meeting is scheduled to begin at 9 a.m. and adjourn at 3 p.m. on June 17, 1986.

ADDRESSES: The meeting will be held at FAA Headquarters, Room 1010, 800 Independence Avenue, SW., Washington, DC. Comments on the subject matter of this meeting may be mailed in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, ATTN: Rules Docket (AGC-204), Docket No. 22320, 800 Independence Avenue, SW., Washington DC 20591, or deliver comments in duplicate to: FAA Rules Docket, Room 916, 800 Independence Avenue, SW., Washington, DC. Comments must be marked, "Docket No. 22320." Comments may be inspected at Room 916 between 8:30 a.m. and 5 p.m., Mondays through Fridays (excluding Federal holidays).

FOR FURTHER INFORMATION CONTACT: For requests to be heard at the meeting and for questions about the logistics of the meeting, contact Miss Jean Casciano, Safety Regulations Division (APR-200), Office of Program and Regulations Management, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; Telephone (202) 426-8357.

For questions concerning the subject matter of this meeting, contact Mr. John Lynch or Mr. Thomas E. Stuckey, Project Development Branch (AFS-850), General Aviation and Commercial Division, Office of Flight Standards, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; Telephone (202) 426-8150.

SUPPLEMENTARY INFORMATION:

Background

On July 18, 1979, the Federal Aviation Administration (FAA) issued Amendment No. 91-157 (44 43714; July 26, 1979). This amendment added a new § 91.30 for multiengine aircraft to be operated with inoperative instruments and equipment. Also, this amendment partially addressed the proposed establishment of Equipment Deviation Lists for Parts 23, 25, 27, and 29 aircraft as proposed in Notice of Proposed Rulemaking (NPRM) No. 75-20, "Type Certification Standards; Equipment Deviation List" (40 FR 22110; May 20, 1975). New § 91.30 applied only to operators of multiengine aircraft and was consistent with § 135.179. However, the FAA determined that based on the experience gained with §§ 91.30 and 135.179, it would reevaluate the need for a new minimum equipment list (MEL) rule for the other types of aircraft. Although this new § 91.30 was to become effective on November 1, 1979, it was suspended indefinitely by Amendment No. 91-160 (44 FR 62384; November 1, 1979) to permit time for the development of an adequate number of master minimum equipment lists (MMEL) for multiengine aircraft and to avoid confusion among aircraft operators regarding operation with inoperative instruments and equipment.

On September 16, 1981, FAA issued NPRM No. 81-14 (46 FR 52278; October 26, 1981). This notice proposed to permit the operation of powered civil aircraft with inoperative instruments and equipment that the Administrator found were not essential for the safe operation of the aircraft under certain conditions. The proposal included provisions to consolidate MEL requirements that were contained in Parts 121, 125, and 135 of the Federal Aviation Regulations (FAR) into Part 91. It also proposed to allow the operation of aircraft without an MEL with certain instruments or items of equipment inoperative in accordance with an FAA-approved aircraft flight manual or FAA-approved operating limitations statement. This proposal would have permitted the operation of an aircraft with certain instruments or items of equipment inoperative, if the inoperative instruments or equipment were properly identified, an appropriate entry was made in the aircraft maintenance record, and the maintenance record was available to the pilot before the flight. Even though this notice received mostly favorable comments, the general aviation community still had concerns and objections, and the FAA decided that the notice needed further changes.

The reinstatement of § 91.30 of the FAR effective March 13, 1986 (50 FR 51188; December 13, 1985), allowed Part 91 operators of multiengine aircraft,

under certain conditions, to operate their aircraft with inoperative instruments and equipment. The FAA, in making the decision to reinstate § 91.30, determined that the reasons for suspending the rule no longer existed since an adequate number of MMEL's had been developed. As was the case when § 91.30 was originally adopted, aircraft for which an MMEL had not been developed were excluded. Considering the significant number of exemptions sought and granted since § 91.30 was suspended, the FAA decided that to provide immediate relief to operators of multiengine aircraft, it would reinstate § 91.30 and take additional time to address the unresolved questions regarding other types of aircraft.

Before the FAA reinstated § 91.30, operators desiring use of an MEL petitioned for an exemption from the regulations. This procedure allowed operators to obtain individual approval to operate multiengine aircraft with inoperative instruments and equipment. The FAA was able to gain valuable information on the usefulness and safety aspects of MEL's when used in Part 91 operations during this time period. Before the FAA reinstated § 91.30, over 350 individual petitions for exemption were processed and granted.

The FAA recognizes that flight operations can be safely conducted with certain instruments and equipment inoperative under specified conditions; thus, the MEL concept was adopted. Presently, the MEL concept extends to air carrier, commercial, and general aviation operators of multiengine aircraft, but only if that type of aircraft has an MMEL.

Throughout this MEL rulemaking process, the FAA has worked closely with the general aviation community to encourage public comments. The FAA, by holding this meeting, is establishing a review process to further encourage the public to participate in a meaningful dialog concerning the further development of the MEL concept and alternatives to that concept. The FAA intends to examine the effectiveness of § 91.30 and solicit ideas and opinions from the public on the efficacy of broadening and extending the MEL concept and/or alternatives to the operators of all categories of aircraft. In consideration of this initiative, the FAA requests comments on the safety issues involved when permitting aircraft to be dispatched with certain inoperative instruments and equipment and, also, on the following questions.

1. To what extent do your operations require rulemaking to permit operations with inoperable instruments and equipment?

2. Current § 91.30 applies only to those multiengine aircraft for which an MMEL has been developed. Should other regulatory revisions be developed to provide for similar relief for other types of aircraft for which an MMEL has not been developed? If so, what revisions do you recommend?

3. The FAA's alternative to the MEL concept was proposed in NPRM No. 81-14. This notice intended to permit Part 91 operators of those types of aircraft for which an MMEL had not been developed to operate their aircraft with inoperative instruments and equipment under certain conditions. Does a need exist to continue to pursue an alternative to the MEL concept for these aircraft? If so, explain your ideas and thoughts on the method you would recommend.

The FAA requests the participation of all interested persons to make this a meaningful review. All comments will be considered in any future rulemaking action by the FAA.

Requests To Be Heard

Persons wishing to make formal presentations at the meeting are requested to provide the FAA an abstract or summary of the material to be presented by June 5, 1986. The material should include an estimate of the time needed to make the presentation and should be mailed to the person identified in the "FOR FURTHER INFORMATION CONTACT" section of this document.

Following receipt of the presentation material, the FAA will develop a detailed agenda that will be available at the meeting. Requests for time to make a presentation received after June 5, 1986, will be honored on a space-available basis and may not appear on the written agenda.

Meeting Procedures

Persons who plan to attend the meeting should be aware of the following procedures that are established to facilitate the workings of the meeting:

1. Registration will be from 8 a.m. to 8:45 a.m. on June 17, 1986.

2. The meeting will be open to all persons who register. If necessary to complete the agenda, the meeting may be accelerated to enable adjournment at the scheduled time.

3. A panel of FAA personnel who are involved in this rulemaking project will be present to answer questions.

4. The FAA will consider all material presented at the meeting by participants or comments forwarded to the public docket. Position papers or other handout material may be accepted at the discretion of the chairperson. However, enough copies should be provided for distribution to all participants.

5. Statements by FAA personnel at the meeting will be made to facilitate discussion and should not be taken as expressing a final FAA position.

6. The meeting will be recorded by a court reporter. Anyone interested in purchasing a copy of the transcript should contact the court reporter directly.

Issued in Washington, DC, on May 16, 1986.

Carol S. Rayburn,

Acting Director of Flight Standards.

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 113

Proposed Customs Regulations Amendment Relating to Carrier Liabilities for Unlawful Lading, Exportation or Disposition of Export-Controlled Merchandise

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Proposed rule.

SUMMARY: This document proposes to amend the Customs Regulations to provide for the assessment of liquidated damages under the international carrier's bond for unlawfully lading, exporting, or disposing of merchandise which is subject to the export control laws. Under the new bond provision, Customs would demand the redelivery of merchandise which has been seized or detained for violations of the export

control laws. Customs would also demand the redelivery of merchandise which has been exported and is subsequently discovered or suspected to be in violation of the export control laws, but which is still in the carrier's possession on the date of the demand for redelivery. Failure to comply with these demands would result in the assessment of liquidated damages in an amount equal to three times the value of the merchandise that is not redelivered. This amendment is necessary for more effective enforcement of the export control laws.

DATE: Comments must be received on or before July 21, 1986.

ADDRESS: Comments (preferably in triplicate) may be addressed to and inspected at the Regulations Control Branch, Room 2426, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229.

FOR FURTHER INFORMATION CONTACT: Elaine Colley, Entry Procedures and Penalties Division (202-566-8317), or William Lawlor, Carriers Drawback and Bonds Division (202-566-8858), U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC.

SUPPLEMENTARY INFORMATION:

Background

The Export Administration Regulations contained in title 15, Code of Federal Regulations, Parts 368 through 399 (15 CFR Parts 368–399), and the International Traffic in Arms Regulations found in title 22, Code of Federal Regulations, Parts 120 through 130 (22 CFR Parts 120–130), provide for sanctions in the event that export-controlled merchandise is exported or attempted to be exported without a valid license issued by either the Department of Commerce of the Department of State. Among these sanctions are the issuance of monetary penalties against those responsible for the illegal attempted or completed exportation, seizure and forfeiture of the merchandise involved, and subsequent denial of export privileges. In addition, title 22, United States Code, section 401 (22 U.S.C. 401), provides for the seizure and detention of any vessel, vehicle or aircraft which is being used or attempted to be used or has been used in an illegal exportation of munitions of war or other export-controlled merchandise. Also, title 18, United States Code, section 549 (18 U.S.C. 549), provides for criminal penalties for unlawfully removing any merchandise from Customs custody.

Customs has been delegated the authority to enforce the Export Administration Regulations and the International Traffic in Arms Regulations pursuant to 15 CFR 388.8 and 22 CFR 127.4, respectively. Under this authority Customs may demand, pursuant to 15 CFR 388.8, the redelivery or retention of merchandise which is known or suspected to be in violation of the export control regulations.

Customs also has the authority to enforce the export control regulations by virtue of the authority granted the Secretary of the Treasury, pursuant to 22 U.S.C. 401, to seize and forfeit illegal exportations of war materials and other articles, as well as the conveyances used to export the articles. Also, under section 113 of the Export Administration Amendments Act of 1985 (Pub. L. 99-64), effective July 12, 1985, Customs was given additional authority to enforce the export control regulations.

Customs has been enforcing the export control laws and regulations under its Operation Exodus program. This enforcement effort has necessarily depended, to a large extent, upon the cooperation of the exporting carriers in (1) not exporting or otherwise disposing of merchandise which Customs has placed under seizure of detention pending a determination as to whether a valid export license covering the merchandise has been issued and (2) redelivering to Customs or retaining merchandise which has been exported and is subsequently found or suspected to be in violation of the export control laws. During the past two years, however, Customs has become aware that some carriers are exporting detained or seized merchandise, despite the presence of warning labels on the merchandise indicating that it is under Customs seizure or detention, and despite notification to the carrier management of the detention or seizure. There have also been instances where carriers have not complied with Customs demand to redeliver or retain already exported merchandise subsequently found or suspected to be in violation of the export control laws, even though it is still in the carriers' possession.

Although the carriers' action may subject the conveyance to seizure and forfeiture under 22 U.S.C. 401 for its use in the illegal exportation, Customs views this as a drastic remedy which would entail much time and resources expended in effecting the seizure. Instead, it is believed that seeking liquidated damages under the international carrier's bond for exportations in violation of the export control laws, would be more expeditious, effective, and less of a drain upon Customs resources. Also, this sanction is within Customs control and can be used for every transgression, whereas a seizure action would require the U.S. Attorney to institute legal proceedings which is very time consuming.

The provisions of the international carrier's bond are contained in § 113.64, Customs Regulations (19 CFR 113.64). In § 113.64, however, there is no existing provision setting forth liquidated damages for illegal exportations of export-controlled merchandise. Customs has the authority to enact such a provision by virtue of section 623(a), Tariff Act of 1930, as amended (19 U.S.C. 1623(a)), which provides that "In any case in which bond or other security is not specifically required by law, the Secretary of the Treasury may by regulation or specific instruction require, or authorize customs officers to require, such bonds or other security as he, or they, may deem necessary for the protection of the revenue or to assure compliance with any provision of law, regulation, or instruction which the Secretary of the Treasury or the Customs Service may be authorized to enforce." Pursuant to 15 CFR 388.8 and 22 CFR 127.4, Customs is authorized to enforce the export control laws and regulations. Under the authority of 19 U.S.C. 1623(a), Customs may therefore require a bond to assure compliance with these laws and regulations.

Proposal

Accordingly, Customs proposes to amend Part 113, Customs Regulations (19 CFR Part 113), to include a provision in the international carrier's bond that sets forth liquidated damages for illegal exportations under the export control laws. It is proposed to add a new paragraph (e) to § 113.64 (19 CFR 113.64), that would require the carrier to redeliver to Customs, within 30 days after a demand for redelivery: (1) Illegally disposed of, laded or exported merchandise that has been placed under seizure or detention; and/or (2) merchandise which has been exported and is subsequently found or suspected to be in violation of the export control laws, but which is still in the carrier's possession. The demand for redelivery would be made within 20 days of Customs discovery of the unlawful or suspected unlawful disposition or exportation. Any demand under proposed paragraph (e) would specify the terms and conditions of compliance. If the carrier fails to comply with the redelivery notice, it would be liable for liquidated damages in an amount equal to three times the value of the merchandise that is not redelivered.

Comments

Before adopting this proposal, consideration will be given to any written comments timely submitted to Customs. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9:00 a.m. and 4:30 p.m. at the Regulations Control Branch, Room 2426, Customs Headquarters, 1301 Constitution Avenue, NW., Washington, DC 20229.

Regulatory Flexibility Act

Pursuant to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), it is certified that, if adopted, the proposed amendment will not have a significant economic impact on a substantial number of small entities. Accordingly, the amendment is not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

Executive Order 12291

This document does not meet the criteria for a "major rule" as specified in section 1(b) of E.O. 12291. Accordingly, no regulatory impact analysis has been prepared.

Drafting Information

The principal author of this document was Susan Terranova, Regulations Control Branch, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Carriers, Exports, Bonds.

Proposed Amendment

It is proposed to amend Part 113, Customs Regulations (19 CFR Part 113), as set forth below.

PART 113—CUSTOMS BONDS

1. The authority citation for Part 113 would continue to read as follows:

Authority: 19 U.S.C. 66, 1623, 1624. Subpart E also issued under 19 U.S.C. 1484.

2. It is proposed to amend § 113.64 by adding a new paragraph (e), to read as follows:

§ 113.64 International Carrier Bond Conditions.

* * * * *

(e) *Unlawful disposition, lading or exportation.* (1) Principal agrees that it will not allow seized or detained merchandise, marked with warning labels of the fact of seizure or detention, to be placed on board a vessel, vehicle or aircraft for exportation or to be otherwise disposed of without written permission from Customs, and that if it fails to prevent such placement or other disposition, it will redeliver the merchandise to Customs within 30 days, upon demand made within 20 days of Customs discovery of the unlawful placement or other disposition.

(2) Principal agrees that it will act, in regard to merchandise in its possession on the date the redelivery demand is issued, in accordance with any Customs demand for redelivery made within 20 days of Customs discovery that the merchandise was or may have been exported in violation of the export control laws.

(3) Obligors agree that if the principal defaults in either of these obligations, they will pay, as liquidated damages, an amount equal to three times the value of the merchandise which was not redelivered.

William von Raab,
Commissioner of Customs.

Approved: May 8, 1986.
Francis A. Keating, II,
Assistant Secretary of the Treasury.

Coast Guard

33 CFR Part 165

[CGD 86-56]

Safety Zone Regulations; Northville Industries Offshore Platform, Riverhead, Long Island, NY

AGENCY: Coast Guard, DOT.
ACTION: Notice of proposed rule making.

SUMMARY: The Coast Guard proposes to establish a permanent safety zone around the Northville Industries Offshore Platform, Riverhead, Long Island, New York. This zone is needed to protect vessels from the possible dangers and hazards associated with a Liquid Petroleum Gas (LPG) Carrier, while it is moored at the Northville Industries Offshore Platform. Entry into this area will be prohibited unless authorized by the Captain of the Port, New Haven.

DATES: Comments must be received on or before July 7, 1986.

ADDRESSES: Comments should be mailed to U.S. Coast Guard, Captain of the Port, 120 Woodward Avenue, New Haven, CT 06512. The comments and other materials referenced in this notice will be available for inspection and copying at 120 Woodward Avenue, New Haven, CT. Normal office hours are between 8:00 a.m. and 4:00 p.m. Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: LTjg MacMillan, Captain of the Port, New Haven (203) 773-2464.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written views, data or arguments. Persons submitting comments should include their names and addresses, identify this notice (CDG3 86-56) and the specific section of the proposal to which their comments apply, and give reasons for each comment. The regulations may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information

The drafters of this regulation are Lieutenant Junior Grade R. O. MacMillan, Project Officer for the Captain of the Port, and Ms. M. A. Arisman, Project Attorney, Third Coast Guard District Legal Office.

Discussion of Proposed Regulation

This action is being considered in view of the hazards associated with liquid petroleum gas. Liquid petroleum gas is generally carried aboard vessels as a liquid at reduced temperatures. In its natural state it is a colorless gas with a weak odor. This proposed safety zone is part of an overall safety program implemented by the Captain of the Port, New Haven, CT to enhance the safety of liquefied petroleum gas operations. Under present procedures, the Captain of the Port, New Haven issues a temporary safety zone each time an LPG vessel is moored at Northville Industries Offshore Platform, specifying the time and date it will be moored and describing the area of the zone. The area described is the same each time since these LPG transfers are at the Northville Industries Offshore Platform. Because of the recurring nature of the zone, the Coast Guard proposes to issue a permanent safety zone regulation. This safety zone will be in effect whenever an LPG vessel is moored at the

Northville Industries Offshore Platform and will remain in effect until the vessel departs.

Mariners will be provided notice of scheduled arrivals and departures via a Marine Safety Information Broadcast Notice to Mariners. For each LPG vessel arrival the Captain of the Port, New Haven has exercised his authority and established a temporary safety zone describing conditions similar to those contained in this notice of rulemaking. The Coast Guard believes that establishing this safety zone as a permanent rule will enhance its effectiveness through greater dissemination. This regulation is issued pursuant to 33 U.S.C. 1225 and 1231 as set out in the authority citation for all of Part 165.

Economic Assessment and Certification

These proposed regulations are considered to be non-major under Executive Order 12291 and nonsignificant under Department of Transportation regulatory policies and procedures (44 CFR Part 11034; February 26, 1979). The economic impact of this proposal is expected to be so minimal that a full regulatory evaluation is unnecessary since the theory and practice of establishing a safety zone around an LPG vessel has been in effect for a few years. The maritime community in the area is accustomed to planning vessel movement around scheduled LPG vessel Safety Zones with minimum economic impact. Since the impact of this proposal is expected to be minimal, the Coast Guard certifies that, if adopted, it will not have a significant economic impact on a substantial number of small entities.

Harbors, Marine safety, Navigation (water), Security measures, Vessels, Waterways.

Proposed Regulations

PART 165—[AMENDED]

In consideration of the foregoing, the Coast Guard proposes to amend Part 165 of Title 33, Code of Federal Regulations as follows:

1. The authority citation for Part 165 continues to read as follows:

Authority: 33 U.S.C. 1225 and 1231; 50 U.S.C. 191; 49 CFR 1.46 and 33 CFR 1.05–1(g), 6.04–1, 6.04–6, and 160.5.

2. Section 165.305 is added to read as follows:

§ 165.305 Northville Industries Offshore Platform, Riverhead, Long Island, New York—Safety Zone.

(a) The following area is established as a Safety Zone during the specified condition:

(1) The waters within a 500 yard radius of the Northville Industries Offshore Platform, Long Island, New York, 1 mile North of the Riverhead shoreline at 41°00" N., 072°36" W., while a Liquefied Petroleum Gas (LPG) vessel is moored at the Offshore Platform. The Safety Zone remains in effect until the LPG vessel departs the Offshore Platform.

(b) The general regulations governing safety zones contained in 33 CFR 165.23 apply.

(c) The Captain of the Port will notify the maritime community of periods during which this safety zone will be in effect by providing notice of scheduled moorings at the Offshore Platform of LPG vessels via Marine Safety Information Radio Broadcast.

Dated: May 6, 1986.

D.H. Lyon,

Commander, U.S. Coast Guard, Captain of the Port, New Haven.

BILLING CODE 7910-14-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 271

[FRL-3019-2]

Michigan; Final Authorization of State Hazardous Waste Management Program

AGENCY: Environmental Protection Agency.

ACTION: Notice of Delayed Determination on Michigan's Application for Final Authorization under the Resource Conservation and Recovery Act.

SUMMARY: This notice announces the decision by the United States Environmental Protection Agency (U.S. EPA) to delay its determination on granting final authorization to the State of Michigan. Michigan has applied for final authorization under the Resource Conservation and Recovery Act (RCRA). In the February 11, 1986, **Federal Register** (51 FR 5095), U.S. EPA proposed to tentatively approve the Michigan final authorization application upon receipt and review of the State's Official Response to U.S. EPA's Consolidated Comments on the application. Under 40 CFR 271.201(e), U.S. EPA's decision should have been issued by May 7, 1986; however, U.S. EPA is presently waiting for receipt of the Official Response from the State. U.S. EPA will publish a final determination in the **Federal Register** after receipt and review of the State's Official Response.

FOR FURTHER INFORMATION CONTACT: Ms. Diane Sharrow, Regulatory Specialist, U.S. EPA, Region V, Waste Management Division, 230 S. Dearborn Street, 5HS–JCK–13, Chicago, Illinois 60604, (312) 886–3718 (FTS: 8–886–3718).

SUPPLEMENTARY INFORMATION: Michigan did not apply for interim authorization to operate its hazardous waste program in lieu of the Federal program. However, on July 24, 1985, Michigan submitted a draft application for final authorization. The complete application for final authorization was submitted on November 7, 1985.

On January 22, 1986, U.S. EPA transmitted Consolidated Comments to Michigan on the State's complete application for final authorization. In the February 11, 1986, **Federal Register** (51 FR 5095), U.S. EPA proposed to tentatively approve Michigan's application, provided the State adequately responded to U.S. EPA's Consolidated Comments. A public hearing on U.S. EPA's tentative decision was held on March 14, 1986.

In the tentative approval, U.S. EPA identified five areas that required clarification. Under 40 CFR 271.20(e), U.S. EPA should have published a final decision by May 7, 1986; however, we are presently waiting for receipt of the State's Official Response to U.S. EPA's Consolidated Comments. U.S. EPA will publish a final determination in the **Federal Register** after receipt and review of the Official Response from the State of Michigan.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this notice will not have a significant economic impact on a substantial number of small entities. This notice announces to the public U.S. EPA's postponement of its determination on granting final authorization to Michigan. It does not impose any new burdens on small entities. This notice, therefore, does not require a regulatory flexibility analysis.

Compliance With Executive Order 12291

The Office of Management and Budget has exempted this notice from the requirements of Section 3, Executive Order 12291.

List of Subjects in 40 CFR Part 271

Administrative practice and procedure, Confidential business information, Hazardous materials transportation, Hazardous waste, Indian lands, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Water pollution control, Water supply.

Authority

This notice is issued under the authority of sections 2002(a), 3006, and 7004(b) of the Solid Waste Disposal Act, as amended, by the Resource Conservation and Recovery Act of 1976, as amended, 42 U.S.C. 6912(a), 6926, and 6974(b), and EPA Delegation 8-7.

Dated: May 13, 1986.

BILLING CODE 6560-50-M

GENERAL SERVICES ADMINISTRATION

41 CFR Part 101-20

Smoking Regulations

AGENCY: General Service Administration.

ACTION: Proposed rule.

SUMMARY: This regulation provides for revised smoking regulations in buildings controlled by GSA. It has become necessary to regulate smoking in certain areas of Federal buildings because smoke in a confined area may be irritating and annoying to non-smokers. In addition, the Office of the Surgeon General has indicated that current scientific evidence suggests that exposure to ambient tobacco smoke can be hazardous to non-smokers and may create a potential hazard to those suffering from heart and respiratory diseases or allergies. GSA also recognizes the right of individuals to smoke in such buildings provided such action does not cause discomfort or unreasonable annoyance to non-smokers or infringe upon their rights. The intent of this regulation is to provide a reasonably smoke-free environment for those working and visiting GSA-controlled buildings.

DATE: Comments must be received on or before July 21, 1986.

ADDRESS: Written comments should be sent to the General Services Administration (PMPS), Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: Mr. James A. Marsden, Acting Director, Facility Management Division, (202-566-1563).

SUPPLEMENTARY INFORMATION: The General Service Administration has determined that this rule is not a major rule for the purpose of E.O. 12291 of February 17, 1981, because it is not likely to result in an annual effect on the economy of $100 million or more; a major increase in costs to consumers or others; or significant adverse effects. Therefore, a Regulatory Impact Analysis has not been prepared. GSA has based all administrative decisions underlying this rule on adequate information concerning the need for, and the consequence of, this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximum the net benefits; and has chosen the alternative approach involving the least net cost to society.

List of Subjects in 41 CFR Part 101-20

Smoking, Federal buildings and facilities.

GSA proposes to amend Part 101-20 as follows:

PART 101-20—MANAGEMENT OF BUILDINGS AND GROUNDS

1. The authority citation for Part 101-20 continues to read as follows:

Authority: Sec. 205(c), 63 Stat. 390; 40 U.S.C. 486(c)

Subpart 101-20.1—Building Operations, Maintenance, Protection, and Alterations

2. Section 101-20.109-10 is revised to read as follows:

§ 101-20.109-10 Regulation of smoking.

Regulations for controlling smoking in GSA-controlled buildings and facilities are set forth below. Agencies are encouraged to develop additional guidelines for internal use for action when violations of these regulations occur. Nothing in these regulations precludes an agency from establishing more stringent guidelines. For purposes of these regulations, general office space is defined as space occupied by personnel performing their daily work functions; this includes, but is not limited to: ADP areas, mail rooms, file rooms, duplicating areas, court and jury rooms, office space, etc.

(a) Smoking is prohibited in the following areas, except as designated pursuant to paragraph (b)(1) below:

(1) General office space.

(2) Auditoriums, classrooms, and conference rooms.

(3) Elevators. "No smoking" signs shall be posted in elevators, adequate receptacles shall be placed outside the entrances.

(4) Corridors, lobbies and restrooms.

(5) Medical care facilities such as medical clinics and health units.

(6) Libraries.

(7) Hazardous areas. Each agency shall post and enforce "no smoking" rules in any location under its jurisdiction which involves flammable liquids, flammable gases, or flammable vapors, or in all other locations where there is a collection of readily ignitible, combustible materials.

(b) Smoking is permitted in the following designated "smoking areas:

(1) Agency heads will be responsible for establishment of designated "smoking" areas, in addition to monitoring and controlling these areas. Agencies are responsible for ensuring that designated "smoking" areas are identified by appropriate signs. Agencies in multi-tenant buildings are encouraged to work together to identify these designated "smoking" areas.

(2) "Smoking" areas shall be established in cafeterias, including Randolph-Sheppard vending facilities and automatic vending areas. These areas shall be designated as "smoking" areas by each buildings manager, in collaboration with the heads of the occupant agencies. The areas designated shall be based upon an estimate of the number of smoking and non-smoking patrons served. This may be adjusted on the basis of local experience. The designated "smoking" areas shall be identified by appropriate signs.

(3) A private office may be declared a "smoking" area by the agency.

(c) Agencies are responsible for providing adequate ash trays or receptacles in the designated "smoking" areas.

(d) Suitable, uniform signs reading "No Smoking Except in Designated Areas" shall be placed on or near entrance doors of buildings subject to these regulations. It should not be necessary to display a sign in every room of such buildings.

(e) An agency is not required by this regulation to make any expenditures for structural changes to accommodate the preferences of non-smoking employees.

Dated: April 17, 1986.

W.F. Sullivan,

Commissioner, Public Buildings Service.

BILLING CODE 6820-23-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Part 401

[CGD 86-020]

Great Lakes Pilotage Rates

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing to amend the Great Lakes Pilotage Regulations. These amendments propose an increase in the basic pilotage rates of thirteen percent in District 1 and six percent in District 3. No change is proposed in District 2. These changes are proposed in order to increase the revenue received by the pilot organizations so that they may meet their operating costs. They also provide for comparability between the three Districts regarding the recognition of the types of expenses incurred in providing pilotage services.

DATE: Comments must be received on or before June 23, 1986.

ADDRESSES: Comments should be mailed to Commandant (G-CMC/21) (CGD 86-020), U.S. Coast Guard, Washington DC 20593. Between 7:30 a.m. and 3:30 p.m., Monday through Friday, comments may be delivered to and will be available for inspection or copying at the Marine Safety Council (G-CMC/21), Room 2110, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington 20593, (202) 426-1477.

FOR FURTHER INFORMATION CONTACT: Mr. John J. Hartke, Office of Merchant Marine Safety (G-MVP/12), Room 1210, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593, (202) 426-2985.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rulemaking by submitting written data, views, or arguments. Written comments should include the docket number (CGD 86-020), the name and address of the persons submitting the comments, and the specific section of the proposal to which each comment is addressed. Persons desiring acknowledgement that their comment has been received should enclose a stamped, self addressed postcard or envelope. All comments received will be considered before final action is taken on this proposal. No public hearings are planned, but they may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information

The principal persons involved in drafting this rule are: Mr. John J. Hartke, Project Manager, Office of Merchant Marine Safety, and Commander Ronald C. Zabel, Project Attorney, Office of the Chief Counsel.

Discussion of the Proposed Regulations

The Coast Guard is proposing to increase U.S. Great Lakes Pilotage rates by 13% in District 1 and by 6% in District 3. No change is proposed in District 2. The rates for §§ 401.420 and 401.428 which provide charges for cancellation, delay or interruption in services, and charges for carrying a pilot beyond a normal change point, have been increased by 13%. The amount of revenue generated by these two rate provisions is minimal and thus the Coast Guard does not believe it is necessary to individualize these two rates for each District.

U.S. registered pilots are private entrepreneurs, and as such, their services must be priced so as to enable them to recover the costs of providing that service.

The Coast Guard has completed a review of revenues earned and expenses incurred by the three U.S. Great Lakes pilot organizations and has developed estimated expenses and revenue requirements for 1986 taking into account the sum of all operating costs. Estimated revenue requirements include administration, dispatching, pilot boats, pilot travel, pilot training, and target pilot compensation. A guideline followed in the development of the pilot compensation figure is that the target compensation for U.S. pilots should be comparable to the earnings of their licensed counterparts on U.S. Great Lakes vessels. A further guideline is that pilots providing services in designated waters (46 CFR 401.405) should earn compensation equivalent to that of a master on a U.S. Great Lakes vessel, and pilots providing services in undesignated waters (46 CFR 401.410) should earn compensation equivalent to that of a first mate on a U.S. Great Lakes vessel.

Projected traffic for 1986 was derived by reviewing traffic trends of prior years and by obtaining the views of knowledgeable interested persons including the pilots and the users of pilotage services. That analysis suggested that the number of vessels, their size, and route patterns for 1986 are expected to be similar to those in 1985 although in 1985 there was a substantial decrease for the previous year. Estimated revenue requirements, taken in conjunction with projected traffic volume, yield the basic rates that are required to enable the U.S. pilotage system to be self-supporting.

During this rate review, special emphasis was placed upon an examination of the concepts of pilot workload standards and target pilot compensation. This review also included special consideration of the administrative expenses in District 1 for which recovery should be authorized. This is in response to a 1984 request by district 1 to insure that the manner in which the 3 U.S. pilot associations organize themselves is not a factor in how such expenses are treated. The preamble to the final rule establishing pilotage rates for the 1985 season recognized certain non-uniform conditions but an across the board rate adjustment was made pending this current review.

The review process involved discussions between Coast Guard officials and representatives of industry and labor organizations regarding the compensation of Great Lakes masters and mates, and meetings between Coast Guard officials and the pilots in each of the three Districts to discuss compensation targets, workload standards and expense items. Coast Guard officials also accompanied pilots on pilotage assignments in each District in order to assess general operating conditions.

As indicated, the proposed pilotage rates were developed by determining the following for each Area and District:

a. Total operating costs.

b. Target pilot compensation (based on comparability with counterparts on U.S. Great Lakes vessels, and whether the services are provided in designated or undesignated waters).

c. The number of pilots required (based on the pilot workload standards of 1,000 hours per pilot per season in designated waters, and 2,000 hours per pilot per season in undesignated waters).

d. The individual target pilot compensation figure multiplied by the number of pilots required equals total target pilot compensation.

e. Total operating costs plus total target pilot compensation equals the total cost to be recovered.

f. Total estimated revenue at existing rates (in this instance we have estimated 1986 revenue to be the same as 1985 revenue).

g. Where total estimated costs exceed total estimated revenue, the difference between them is the additional amount

by which the rates must be increased to permit the pilot organizations to cover all of their costs.

Table 1 shows the derivation of proposed target pilot compensation for 1986.

Considering comparability with U.S. Great Lakes masters and first mates, the Daily Rate used in computing the master's and first mate's wages is an average of all master's and first mate's wages paid on Great Lakes vessels in 1985. These wages are not expected to increase in 1986.

TABLE 1—TARGET PILOT COMPENSATION

Union compensation component	Master	First mate
Daily Rate:		
$295.25 x 300 days	$81,575	
$124.49 x 300 days		$37,347
Bonus:		
10% of daily rate x 200 days	4,108	2,490
Medical	3,878	3,878
Pension	8,470	8,470
Holiday pay (5 days)	0	934
Clerical	0	1,252
Self unloader differential	0	300
Saturday and Sunday overtime	0	3,267
Total	[1] 77,829	[2] 58,028

[1] Target pilot compensation for designated waters.
[2] Target pilot compensation for undesignated waters.

Revenue for 1986 at current rates is estimated to be the same as 1985. The 1985 revenue was obtained from the three pilot organizations shortly after the close of the 1985 season.

The Coast Guard reviewed the pilot workload standards of 1,000 hours per pilot per season in designated waters, and 2,000 hours per pilot per season in undesignated waters, and is of the opinion that those workload standards are reasonable and should be retained. The number of pilots estimated to be required from adherence to those standards is calculated in Table 2.

TABLE 2—PROJECTION OF REQUIRED NUMBER OF PILOTS FOR 1986 BY AREA AND DISTRICT

[Hours and Number of Pilots Based on Pilot Workload Standards and Reduced by the Projected Change in Traffic from 1984 to 1986]

	1984		Projected change in traffic [2] (Percent)	1986	
	Hours [1]	Pilots [2]		Hours	Pilots
District 1					
Area I	7,764	8	−16.41	6,488	7
Area II	8,481	5	+.61	8,513	5
		13			12

Area VIII	16,671	9	−20.99	16,304	7
		28			22

[1] 1984 actual hours.
[2] Number of pilots resulting from dividing the actual hours by the pilot workload standards of 1,000 hours in designated waters and 2,000 hours in undesignated waters. (Areas I, V, and VII are designated waters; Areas II, IV, VI, and VIII are undesignated waters).
[3] This is the change in gross revenue between 1984 and 1985. 1986 is expected to be similar to 1985.

Table 3 presents estimated 1986 expenses, by District, segregated by expense category. These expenses are 1984 actual expenses increased by a 4% inflation factor for 1985 and for 1986 (actual 1985 expenses are not available at this time). For District 1, these figures include several new items added under Administration and Travel. These additional expense items are a portion of the amounts requested by District 1 and have been accepted after thorough Coast Guard evaluation.

TABLE 3—ESTIMATED EXPENSES—1986

[Excluding Pilot Compensation]

	District 1	District 2	District 3
Administration	$283,800	$220,900	$547,800
Dispatching	141,200	104,300	527,700
Pilot Boats	146,900	348,200	447,500
Travel	156,500	148,300	422,200
Training	41,000	70,000	105,000
Sub Total	769,400	891,700	2,050,200
Expense Recovery	0	[1] −173,800	[2] −295,800
Total	769,400	817,900	1,754,800

[1] Pilot Boat recovery $130,800; Dispatching recovery $38,400; Radio Charge Elimination $4,600.
[2] Canada $253,100; Property Rental $12,500.

Table 4 shows the derivation of the proposed rate adjustment, including estimated revenues and expenses. The pilot compensation figure is computed using the pilot workload standards of 1,000 (designated waters) and 2,000 (undesignated waters) hours per pilot per season in conjuction with the projected traffic for 1986, and multiplying the resulting number by the target pilot compensation standards of $77,829 and $58,028.

TABLE 4—ESTIMATED REVENUES AND EXPENSES, AND PROPOSED RATE ADJUSTMENT—1986

	Estimated operating expenses [1]	No. of Pilots [2]	Pilot compensation [3]	Total estimated expenses	Total estimated revenue [4]	Rate adjustment [5] (Percent)
Area I	$384,100	7	$544,803	$928,903	$864,900	7
Area II	385,240	5	290,130	675,370	581,200	23
District 1	769,400	12	834,933	1,604,333	1,416,200	13
Area IV	237,100	6	348,156	585,256	830,400	(29)
Area V	580,800	13	1,011,777	1,592,577	1,415,800	13
District 2	817,900	19	1,359,933	2,177,833	2,246,200	(3)
Area VI	770,200	11	638,286	1,408,486	1,309,400	8
Area VII	501,300	4	311,316	812,616	710,700	14
Area VIII	483,100	7	406,182	889,282	929,000	(4)
District 3	1,754,800	22	1,355,784	3,110,384	2,949,100	6

[1] From Table 3.
[2] From Table 2.
[3] Number of pilots from Table 2 multiplied by the appropriate target pilot compensation figure contained in Table 1.
[4] 1985 revenues based on 1985 rates and traffic.
[5] Items in ( ) are reductions.

We recognize that the rate increase will not be in effect for the entire season, therefore, if the projected traffic and the estimated expense levels are accurate, the pilot compensation target would not be met. However, based on past experience, considerable variation in traffic patterns and expenses are not unusual, therefore, the Coast Guard is not proposing to adjust the rate increases to compensate for the partial season. Additionally, adjustments for a partial season may distort pilotage rates for future years.

Evaluation

These proposed regulations are considered to be non-major under Executive Order 12291 and nonsignificant under DOT regulatory policies and procedures (44 FR 11034, February 26, 1979). A regulatory evaluation has been prepared and placed in the rulemaking docket. It may be inspected or copied at the Marine Safety Council, Room 2110, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593, between 7:30 a.m. and 3:30 p.m., Monday through Friday. Copies may also be obtained by contacting John J. Hartke, Room 1210, same address, telephone number (202) 426–2985. The estimated cost of this proposal is $384,300. This figure is the amount of additional revenue the U.S. pilots should receive under this regulation based on the projected 1986 traffic and is the increased amount that shippers would have to pay for pilotage services on the Great Lakes. This pilotage rate adjustment would result in an overall

BEST COPY AVAILABLE

system rate increase of 5.8% if the proposed rate increases were in effect for the entire season. It has been estimated, and widely accepted, that pilotage fees represent somewhere between 2% to 5% of total shipping costs. The estimated 5.8% overall rate increase multiplied by the 5% portion of total shipping costs (assuming the highest end of the scale) equals less than a three tenths of a percent increase in total shipping costs, which will not have a significant impact on the shipping industry. As this proposal would not be in effect for the entire season, the impact for 1986 would be decreased accordingly. The benefit of this rule is the value of avoiding or minimizing costly delays and disruptions in shipping attributable to the failure to retain qualified pilots and to attract new qualified pilots. Almost all of the vessels transiting the system which are required to use registered pilots are foreign flag vessels. Similar size U.S. vessels have daily ship operating expenses in the range of $10,000 to $15,000. Although the daily ship operating expenses for comparable foreign vessels are typically lower, it is clear that delays in transiting the system can result in substantial additional costs to the vessel. The overall efficiency and safety of the pilotage system is enhanced by having an appropriate number of pilots available to provide the required services.

The Regulatory Flexibility Act of 1980 (Pub. L. 96-354, 94 Stat. 1164) requires an initial regulatory flexibility analysis for regulations having a significant economic impact on a substantial number of small entities. Pursuant to section 605(b) of the Act, it is cetified that this regulation will not have a significant economic impact on a substantial number of small entitites.

In the development of this rate adjustment, U.S. and Canadian shipping associations and pilots organizations were consulted.

Administrative practice and procedure, Great Lakes, Navigation (water), Reporting requirements, Seamen.

PART 401—[AMENDED]

In consideration of the foregoing it is proposed that Part 401 of Title 46 of the Code of Federal Regulations be amended as follows:

1. The authority citation for Part 401 continues to read as follows:

Authority: 46 U.S.C. 2105, 2303, 2304; 49 CFR 1.46a.

2. by revising § 401.405 to read as follows:

§ 401.405 Basic rates and charges on designated waters.

Except as provided under § 401.420, the following basic rates shall be payable for all services and assignments performed by U.S. Registered Pilots in the areas described in § 401.300.

(a) District 1:

(1) For passage through the District or any part thereof, $10.32 for each statute mile, plus $128 for each lock transited, but with a minimum basic rate of $301 and a maximum basic rate for a through trip of $1,322.

(2) For a movage in any harbor—$453.

(b) District 2:

(1) Southeast Shoal to Toledo or any point on Lake Erie west of Southeast Shoal—$823.

(2) Between points on Lake Erie west of Southeast Shoal—$388.

(3) Southeast Shoal to Port Huron Change Point or any point on the St. Clair River when pilots are not changed at Detroit Pilot Boat—$1,085

(4) Southeast Shoal to Detroit/Windsor or any point on the Detroit River—$823.

(5) Southeast Shoal to Detroit Pilot Boat—$451.

(6) Toledo or any point on Lake Erie west of Southeast Shoal to Port Huron Change Point, when pilots are not changed at Detroit Pilot Boat—$1,257.

(7) Toledo or any point on Lake Erie west of Southeast Shoal to Detroit/Windsor or any point on the Detroit River—$800.

(8) Toledo or any point on Lake Erie west of Southeast Shoal to the Detroit Pilot Boat—$823.

(9) Detroit/Windsor to any point on the Detroit River and between points on the Detroit River—$368.

(10) Detroit/Windsor or any point on the Detroit River to Port Huron Change Point or any point on the St. Clair River—$816.

(11) Detroit Pilot Boat to any point on the St. Clair River—$816.

(12) Detroit Pilot Boat to Port Huron Change Point—$634.

(13) Between points on the St. Clair River—$368.

(14) Port Huron Change Point to any point on the St. Clair River—$451.

(c) District 3:

(1) Between the southerly limit of the District and the northerly limit of the District or the Algoma Steel Corporation Wharf at Sault Ste. Marie, Ontario—$1,129.

(2) Between the southerly limit of the District and Sault Ste. Marie, Ontario or any point in Sault Ste. Marie, Ontario other than the Algoma Steel Corporation Wharf—$94.

(3) Between the northerly limit of the District and Sault Ste. Marie, Ontario, including the Algoma Steel Corporation Wharf, or Sault Ste. Marie, Michigan—$425.

(4) For a movage in any harbor—$425.

3. Section 401.410 is amended by revising paragraph (a), adding a new paragraph (b), and redesignating existing paragraphs (b) and (c) as (c) and (d) respectively, to read as follows:

§ 401.410 Basic rates and charges on undesignated waters.

(a) Except as provided under § 401.420 and subject to paragraph (c) of this section, the basic rates for each 6 hour period or part thereof that a U.S. pilot is on board in the undesignated waters shall be:

(1) In Lake Ontario—$243.

(2) In Lake Erie—$206.

(3) In Lakes Huron, Michigan and Superior—$228.

(b) Each time a U.S. pilot performs the docking or undocking of a ship in undesignated waters there is an additional charge of:

(1) In District 1—$232.

(2) In District 2—$206.

(3) In District 3—$217.

(c) Between Buffalo and any point on the Niagara River below the Black Rock Lock—$523

* * * * *

4. Section 401.420 is revised to read as follows:

§ 401.420 Cancellation, delay or interruption in rendition of services.

(a) Except as provided in this paragraph, whenever the passage of a ship is interrupted and the services of a U.S. pilot are retained during the period of the interruption or when a U.S. pilot is detained on board a ship after the end of an assignment for the convenience of the ship, the ship shall pay an additional charge calculated on a basic rate of $38 for each hour or part of an hour during which each interruption lasts with a maximum basic rate of $601 for each continuous 24 hour period during which the interruption continues. There is no charge for an interruption caused by ice, weather, or traffic, except during the period beginning the 1st of December and ending on the 6th of the following April. No charge shall be made for an interruption if the total interruption ends during the 6 hour period for which a charge has been made under § 401.410.

(b) When the departure or movage of a ship for which a U.S. pilot has been ordered is delayed for the convenience of the ship for more than one hour after

BEST COPY AVAILABLE

the U.S. pilot reports for duty at the designated boarding point or after the time for which the pilot is ordered, whichever is later, the ship shall pay an additional charge calculated on a basic rate of $38 for each hour or part of an hour including the first hour of the delay, with a maximum basic rate of $601 for each continuous 24 hour period of the delay.

(c) When a U.S. pilot reports for duty as ordered and the order is cancelled, the ship shall pay:

(1) A cancellation charge calculated on a basic rate of $227;

(2) A charge for reasonable travel expenses if the cancellation occurs after the pilot has commenced travel; and

(3) If the cancellation is more than one hour after the pilot reports for duty at the designated boarding point or after the time for which the pilot is ordered, whichever is later, a charge calculated on a basic rate of $38 for each hour or part of an hour including the first hour, with a maximum basic rate of $601 for each 24 hour period.

5. Section 401.428 is revised to read as follows:

§ 401.428 Basic rates and charges for carrying a U.S. pilot beyond normal change point or for boarding at other than the normal boarding point.

If a U.S. pilot is carried beyond the normal change point or is unable to board at the normal boarding point the pilot shall be paid at the rate of $232 per day or part thereof, plus reasonable travel expenses to or from the pilot's base. These charges are not applicable if the ship utilizes the services of the pilot beyond the normal change point and the ship is billed for those services. The change points to which this section applies are designated in § 401.450.

Dated: May 19, 1986

J.W. Kime,

Rear Admiral, U.S. Coast Guard Chief, Office of Merchant Marine Safety.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 86-158, RM-5245]

Radio Broadcasting Services; Boonville, NY

AGENCY: Federal Communications Commission

ACTION: Proposed rule.

SUMMARY: This document request comments on a petition by Oswego-Jefferson Broadcasting to substitute Channel 267A for Channel 268A at Boonville, New York. The change in channel could permit petitioner to relocate its transmitter for a new station on Channel 269A at Pulaski, New York, so as to operate with maximum Class A facilities.

In addition to filing comments with the FCC, interested parties should serve the petitioners, or their counsel or consultant, as follows: Donald E. Martin, Esq., Suite 200, 2000 L Street, NW., Washington, DC 20036 (Counsel to petitioner).

DATES: Comments must be filed on or before June 23, 1986, and reply comments on or before July 8, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Notice of Proposed Rule Making, MM Docket No. 86-158, adopted April 17, 1986, and released April 30, 1986. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street NW., Washington, DC. The complete text of this decison may also be purchased from the Commission's copy contractors, International Transcription Service, (202) 857-3800, 2100 M Street NW., Suite 140, Washington, DC 20037.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is not longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1231 for rules governing permissible *ex parte* contact.

For information regarding proper filing procedures for comments, See 47 CFR 1.415 and 1.420.

OFFICE OF MANAGEMENT AND BUDGET

Office of Federal Procurement Policy

48 CFR Parts 6 and 19

Federal Acquisition Regulation; Small Business Set-Aside Determinations (Rule of Two)

AGENCY: Office of Federal Procurement Policy (OFPP), OMB.

ACTION: Proposed rule.

SUMMARY: OFPP is requesting comments on a proposed change to the Federal Acquisition Regulation (FAR) on Small Business Set-Aside Determinations to implement provisions of the Competition in Contracting Act of 1984 (Pub. L. 98-369).

DATE: Comments are due on or before July 21, 1986.

ADDRESS: All interested parties are invited to comment on this proposed regulation change. Comments should be forwarded to William S. Coleman, Jr., Office of Federal Procurement Policy, OMB, 726 Jackson Place, NW., Washington, DC 20503 on or before July 21, 1986. Mr. Coleman may be contacted by phone on (202) 395-3501.

FOR FURTHER INFORMATION CONTACT: William S. Coleman, Jr., Office of Federal Procurement Policy, OMB, 726 Jackson Place, NW., Washington, DC 20503, (202-395-3501).

SUPPLEMENTARY INFORMATION:

A. Background

Prior to the Federal Acquisition Regulation (FAR), the Federal Procurement Regulation (FPR) and the Defense Acquisition Regulation (DAR) contained different criteria for making a total small business set-aside determination.

The DAR provided that if ". . . there is a reasonable expectation that (i) offers will be obtained from *at least two* responsible small business concerns offering the products of different small business concerns and (ii) awards will be made *at reasonable prices* . . ." a set-aside shall be made. (Emphasis added)

The FPR provide that ". . . there must be a reasonable expectation that bids or proposals will be obtained from *a sufficient number* of responsible concerns, organizations, and individuals so that awards will be made *at reasonable prices.*" (Emphasis added)

When the small business section of the FAR was first published for public comment (July 1982), it contained the FPR "sufficient number" standard. Comments received supported a change to the DAR "rule of two" standard. Accordingly, when the final version of the FAR was published on April 1, 1984, it contained the "rule of two" standard.

In July 1984, following the issuance of the FAR, the Competition in Contracting Act of 1984 (CICA) was passed by Congress and signed into law by the President. The CICA contained the following requirement (section 2732):

". . . the head of each Executive agency shall, in accordance with applicable laws, Government-wide policies and regulations, and good business practices:
(1) increase the use of full and open competition in the procurement of property and services by the executive agency by establishing policies, procedures, and practices that assure that the executive agency receives a *sufficient number* of sealed bids or competitive proposals from responsible sources to fulfill the Government's requirements (including performance and delivery schedules) at the *lowest reasonable cost* considering the nature of the property or service procured." (Emphasis added).

The explanatory statement of the managers of the Conference Report on this amendment stated that:

"This requirement applies to all agency procurements, *including those made under set-aside programs." H.R. Rep. No. 98-861, 98th Cong. 2d Sess. 1984. (Emphasis added.)*

On February 21, 1986, OFPP submitted a proposed regulation to the Department of Defense, General Services Administration, and the National Aeronautics and Space Administration, and directed that it be published in the Federal Register for a 30-day comment period. The purpose of the regulation was to replace the "rule of two" criteria now in the FAR with the "sufficient number" criteria specified in the above provision of the Competition in Contracting Act. On March 29, 1986, the Deputy Assistant Secretary of Defense for Procurement advised OFPP that DOD, GSA, and NASA had concluded that ". . . since you have been the proponent of the change, it would be preferable for you to publish the policy directly." Accordingly, pursuant to the authorities granted in section 6 of the Office of Federal Procurement Policy Act, as amended (41 U.S.C. 401, et seq.), notice is hereby given that DOD, GSA, and NASA have failed to issue regulations in a timely manner and it is OFPP's intent to prescribe the following proposed regulation in the FAR due consideration of all comments received in response hereto.

B. Regulatory Flexibility Act

The proposed revision of FAR Parts 6 and 19 is not expected to have a significant impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601, et seq.).

Adoption of the "sufficient number/lower reasonable cost" formula should not reduce the number of small business set-asides. Executive branch agencies will continue to be charged with the obligation to insure a fair proportion of Government contracts be placed with small business concerns, as is required by the Business Act. The regulations will still continue to require that contracting officers review acquisitions to determine if they can be set-aside and will still provide for review of proposed acquisitions by procurement center SBA representatives and Small and Disadvantaged Business Utilization Specialists of the contracting agency.

Contracting officials will still evaluate the nature of the proposed buy to determine if it lends itself to performance by small business. They will also continue to review the purchase history of the item or service to determine if it has previously supplied by small business. They will look at the price history and current market information to determine a reasonable cost range for the item or service. After this review, they will determine if a "sufficient number" of offers can be obtained from small business sources to obtain the "lowest reasonable cost," under a procurement reserved exclusively for competition by small business. In fact, the "sufficient number" standard has been utilized for many years in small business set-asides. Prior to the FAR, all civilian agencies utilized the sufficient number standard. DOD's utilization of the "rule of two" commenced only about 5 years before the FAR.

Establishing that an agency will receive the "lowest reasonable cost" under a small business set-aside requires use of the same good judgment by contracting officials as the current standard of "reasonable price." It should be noted that in many instances, small business is the actual manufacturer of the items or suppliers of the service and, as such, is in a better position to respond than large business. Further, Congress has stated that small business set-asides meet the definition of full and open competition (Pub. L. 98-369, the

Competition in Contracting Act of 1984, and Pub. L. 98–577, the Small Business and Federal Procurement Competition Enhancement Act of 1984). Once it is established that reasonable cost can be obtained under a set-aside procurement, procurement officials are then required to award at the lowest reasonable cost. Only under circumstances where the price from a large business would be substantially lower than that proposed by small business would a set-aside be cancelled. This is the case under current regulations as well.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96–511) does not apply because the proposed changes to FAR Parts 6 and 19 do not impose any additional reporting or recordkeeping requirements or collection of information form offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501, et seq.

List of Subjects in 48 CFR Parts 6 and 19

Government procurement.

It is proposed to amend 48 CFR Parts 6 and 19 as follows:

1. The authority citation for Parts 6 and 19 continues to read as follows:

Authority: 40 U.S.C. 486(c); Chapter 137, 10 U.S.C. and 42 U.S.C. 2453(c).

PART 6—COMPETITION REQUIREMENTS

2. Section 6.101 is amended by adding paragraph (c) to read as follows:

6.101 Policy

* * * * *

(c) 41 U.S.C. 414 requires the establishment of policies, procedures and practices that assure that the executive agency receives a sufficient number of sealed bids or competitive proposals from responsible sources to fulfill the Government's requirements (including performance and delivery schedules) at the lowest reasonable cost considering the nature of the property or service procured. This requirement applies to all agency procurements, including those made under set-aside programs.

PART 19—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

3. Section 19.501 is amended by revising paragraph (g) to read as follows:

19.501 General.

* * * * *

(g) Once a product or service has been acquired successfully by a contracting office on the basis of a small business set-aside, all future requirements of that office for that particular product or service not subject to simplified small purchase procedures shall be acquired by repetitive set-aside if the contracting officer provides a written determination reaffirming that the original basis for concluding that full and open competition, consistent with the provisions of 41 U.S.C. 414, will apply to each subsequent procurement in that class.

* * * * *

4. Section 19.502–2 is revised to read as follows:

19.502–2 Total Set-asides.

The entire amount of an individual acquisition or class of acquisitions, including contracts for architect-engineer services, research, development, test and evaluation, maintenance repair, and construction, except small business-small purchase set-aside, shall be set aside for exclusive small business participation if the contracting officer determines that there is a reasonable expectation that full and open competition, consistent with the provisions of 41 U.S.C. 414, will result. The contracting officer's determination must demonstrate that under set-aside conditions, a sufficient number of responsible small business concerns will respond to fulfill the Government's requirements (including performance and delivery schedules) at the lowest reasonable cost, considering the nature of the property or service acquired. Compliance with the presumption of sufficiency will vary, taking into account the size, character and complexity of each procurement and the pool of prospective bidders. Total set-asides shall not be made unless such a reasonable expectation exists. Although past acquisition history or an item or similar items is important, it is not the only factor to be considered in determining whether a reasonable expectation exists. In determining that an entire class of acquisitions may be set aside, the contracting officer shall provide a written determination establishing the basis for concluding that full and open competition, consistent with the provisions of 41 U.S.C. 414, can be achieved on each procurement in that class, evaluating in detail the quality, timeliness and cost factors noted above.

David F. Baker,

Acting Administrator.

Dated: May 15, 1986.

or

Thomas J. Stilling, (202) 275–7442.

SUPPLEMENTARY INFORMATION: By decision served September 3, 1985, (50 FR 35562) in Ex Parte No. 347 (Sub-No. 1), *Coal Rate Guidelines, Nationwide, (Coal Rate Guidelines)* the Commission adopted guidelines for determining the reasonableness of captive coal rates. During the pendency of that proceeding the Commission, by and large with the concurrence of the affected parties, has deferred decision on much of its maximum rate docket. A petition to set guidelines for commodities other than coal was likewise dismissed as premature.[1] With the conclusion of the

[1] Ex Parte No. 454, *Petition for Determination of Maximum Reasonableness Guidelines for Non-Coal Commodities*, (not printed) served May 3, 1984.

Coal Rate Guidelines rulemaking, maximum rate cases involving coal have now been reactiviated, and it is appropriate to address the issue of standards for non-coal cases on a priority basis.

It was originally thought that the transportation characteristics of coal might be such as to require the adoption of one set of rate review guidelines for coal cases and another set for other commodities. This view reflected the fact that the coal guidelines arose out of a request to set rate standards for high-volume shipments from newly-developed reserves in the Western United States. We acknowledge that the specifics of the guidelines finally adopted are particularly well suited to high-volume, long-term movements, where the cost and complexity of rate regulation are not disproportionate to the public and private interest in developing economically efficient rates. It is our preliminary view, however, that the economic concepts underlying the coal rate guidelines appear to be equally applicable to all other commodities. Nevertheless, we are concerned that shippers of non-coal commodities or small coal shippers may question the viability of the *Coal Rate Guidelines* in their individual situations or the costs of presenting a case under these guidelines. For this reason, we are soliciting comments on these matters.

Shippers of commodities other than coal might argue that the *Coal Rate Guidelines* will not produce reasonable rates in all cases. Thus, the first issue that should be addressed is whether the *Coal Rate Guidelines* should be applied to non-coal rate cases. Just as Constrained Market Pricing, the methodology adopted in *Coal Rate Guidelines*, has several aspects, so does the foregoing issue. Respondents may wish to discuss separately those aspects of the guidelines which are believed to be inapplicable to non-coal commodities. For those rate cases where the *Coal Rate Guidelines* are believed to be inappropriate, respondents are requested to explain the basis for that belief, and to suggest alternatives, either by way of general rules or solutions designed to address specifically the circumstances of known and pending cases. (Any comments of the latter variety should be filed simultaneously in this docket and in the related complaint of investigation proceeding.)

The second issue that should be addressed is whether the use of the *Coal Rate Guidelines* would place upon small shippers (including Coal shippers whose movement are infrequent or small) too great a burden in the form of litigation costs. Notwithstanding the adoption of *Coal Rate Guidelines*, the Commission does not now foreclose the use of any defensible methods relied upon in pre-Staggers Act rate cases, so long as they are consistent with the statute. However, we are particularly concerned with the administrative cost of the rate regulation for small shippers and for isolated movements, and we will entertain all responsible suggestions for minimizing those costs. We are not predisposed against the use of novel solutions, such as the provision of public counsel, or the use of arbitration procedures, but here again we must be able to conclude that the outcome will be consistent with the statute. We will also consider the empanelling of an advisory committee to review our procedures and evidentiary requirements, if there is sufficient support for such an undertaking. Our purpose here is to develop a process that is accessible, inexpensive and consistent with balancing the interests of captive shippers, railroads and the general public. It is important, though, that commenters who suggest alternative treatment and procedures for rate cases involving small shippers, explain how such alternative treatment would be legally defensible.

This human action will not significantly affect either the quality of the human environment or energy conservation.

As we are proposing a general policy, not a rule under 5 U.S.C. 553(b), we need not conduct a separate regulatory flexibility analysis. 5 U.S.C. 604.

Authority: 49 U.S.C. 10301, 10321, 10328, 10701a, 10704, 10707, and 11701, and 5 U.S.C. 553.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre and Lamboley. Commissioner Andre voted to reject the notice as premature. He felt that before considering whether or how to extend the *Coal Rate Guidelines* methodologies to other products, the Commission should give itself and potential commenters a reasonable period to see how, and if they work for coal.

Dated: May 7, 1986.

James H. Bayne,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Parts 13 and 21

Intent To Prepare an Environmental Impact Statement on Proposed Regulatory Changes Dealing With Permits and Migratory Birds, Including Those Implementing the Endangered Species Act Exemption for Certain Raptors, for Raptor Propagation and Special Purpose Permits and Setting Federal Falconry Standards

AGENCY: Fish and Wildlife Service, Department of the Interior.

ACTION: Public meeting and request for comments.

SUMMARY: This notice advises the public that the Fish and Wildlife Service (FWS) intends to gather information necessary for the preparation of an Environmental Impact Statement (EIS) for regulatory changes dealing with permit issuance, revocation, amendment and enforcement and with migratory birds, including those regulations and permits implementing the Endangered Species Act exemption for certain raptors; for falconry, raptor propagation and special purposes; and setting Federal falconry standards. This action is of national scope and impact. A notice of intent to review the regulations was published January 4, 1985 (50 FR 518), with an extension of the comment period published February 4, 1985 (50 FR 4877).

A public meeting regarding this proposal and the preparation of the EIS will also be held. This notice is being furnished as required by the National Environmental Policy Act (NEPA) regulations (40 CFR 1501.7) to obtain suggestions and information from other agencies and from the public on the scope of the issues to be addressed in the EIS. Comments and participation in this scoping process are solicited.

DATES: Written comments are encouraged and should be received by June 23, 1986. A public meeting will be held in Washington, DC, on Tuesday, June 24, 1986, at 9:30 a.m. until 4:00 p.m.

ADDRESSES: Comments should be addressed to: Director, U.S. Fish and Wildlife Service, Division of Law Enforcement, P.O. Box 28006, Washington, DC 20005.

The public meeting on June 24, 1986, will be held in the following location:

The Penthouse, Room 8068, Department of the Interior Building, 18th and C Streets NW., Washington, DC

FOR FURTHER INFORMATION CONTACT: Kathleen King, Enforcement Specialist, U.S. Fish and Wildlife Service, Division of Law Enforcement, P.O. Box 28006, Washington, DC 20005, Telephone: (202) 343-9242.

SUPPLEMENTARY INFORMATION: Kathleen King is the primary author of this document. FWS, Department of the Interior, proposes changes in the regulations which govern the issuance, revocation, amendment, administration and appeal procedures related to all general permits issued by FWS and is considering especially proposal of changes related to permits and regulations related to migratory birds, including those which implement exemptions allowed certain raptors by the Endangered Species Act of 1973, as amended; which govern falconry, raptor propagation and special purpose activities with those raptors, and which set Federal falconry standards. In 1983 certain changes were implemented in the migratory bird regulations which allowed specific activities related to falconry and raptor propagation, including regulations related to marking of individual birds taken or captive bred and the sale, exchange, or barter of certain raptors. The changes also imposed recordkeeping and reporting duties upon permittees and subjected them to the requirements of inspections as a condition of the permit.

The FWS, based upon enforcement experience and public comments, is considering whether to eliminate sales of raptors, to eliminate sales of selected species which are endangered or threatened or otherwise specially protected, to eliminate controls on all but a few raptor species when the raptors are subject to uses for falconry or raptor propagation purposes, or to impose fees for permit issuance and inspections. Any changes in the taking requirements would be limited to concepts of uses of live raptors; no consideration will be given to allowing expansion of taking as part of a hunting or any other procedure involving killing of the birds. The FWS has received diverse comments since implementation of the 1983 changes in the regulations and wishes to be responsive, within its statutory mandate to protect and conserve migratory species, to genuine public concern.

It is the FWS position that the key to effective protection and conservation lies in effective and efficient regulatory mechanisms to achieve statutory protections. Faced with budget and personnel limitations, the FWS must identify ways and means to accomplish statutory responsibilities within those constraints; further, the FWS is advised that the states, which usually share burdens of enforcement in areas of wildlife protection, face similar diminishments in funds and people to protect wildlife resources. The FWS therefore solicits public participation and contribution to its review of a need for regulatory reform related to the permit process and especially to the migratory bird permits and regulations related to the take, use, possession, transportation, barter, sale, exchange and propagation of raptors. Before making a decision upon changes in the existing regulations, the Service desires to identify all possible alternatives and to asess potential environmental impacts of any selected alternatives.

The first obvious alternative is to take no action, leaving the present regulations in place. However, the FWS has received complaints that the present regulations either are too onerous upon those persons who desire or who do possess raptors for falconry or raptor propagation purposes or are not sufficiently strict to protect the species. Biological data for some species of raptors indicate that they are apparently doing well and may not require the same classes or degrees of regulatory protection that other species may; the sufficiency and reliability of these data must be assessed. Enforcement experience indicates that some regulatory requirements may not be effective, or may benefit from technical advances or changes that may increase effectiveness, particularly in the areas of identification and marking of raptors or in recordkeeping and reporting requirements. Enforcement experience also indicates that administrative procedures related to the permit process and to other requirements require updating. All of these observations suggest that other alternatives should be identified and public reaction solicited as part of the scoping process before decisions related to changes are made.

Therefore, the FWS solicits written comments upon the issues outlined, including proposed solutions or alternatives, and invites public participation at the public meeting to discuss, explain, elaborate upon, or question the commentors and the issues.

The environmental review of this project will be conducted in accordance with the requirements of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4371 et seq.), NEPA Regulations (40 CFR 1500-1508), other appropriate Federal regulations, and FWS procedures for compliance with those regulations.

We estimate that the Draft Environmental Impact Statement (DEIS) will be made available to the public by December 15, 1986.

Dated: May 14, 1986.

P. Daniel Smith,

Deputy Assistant Secretary for Fish and Wildlife and Parks.

BILLING CODE 4310-55-M

Notices

Federal Register
Vol. 51, No. 99
Thursday, May 22, 1986

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

ACTION

Student Service-Learning Project Guidelines; Final Notice

AGENCY: ACTION.

ACTION: Final Notice of Student Service-Learning Project Guidelines.

SUMMARY: This notice outlines the guidelines under which student service-learning projects will operate. The Guidelines are divided into seven parts which deal with the overall program philosophy, responsibilities of the sponsor, staff, volunteers, and volunteer placement sites. It also includes basic data on the administration of a student service-learning project.

DATE: The student service-learning project guidelines shall take effect July 7, 1986.

FOR FURTHER INFORMATION CONTACT: Suzanne Gibson Wise, Director of VISTA/Service-Learning Programs, ACTION, 806 Connecticut Avenue, N.W., Washington, D.C., (202) 634–9445.

SUPPLEMENTARY INFORMATION: Section 420 of the Domestic Volunteer Service Act of 1973 (42 U.S.C. 5060) was amended in 1979 to define the term regulation and to detail the procedures to be followed in prescribing regulations. Through its broad definition of a regulation, the section requires that "any rule, regulation, guidelines, interpretation, order, or requirement of general applicability" issued by the Director of ACTION must be published with a 30 day comment period. These guidelines, although not regulations under the Administrative Procedure Act (5 U.S.C. 551, et seq.), may, in whole or in part, be required by our Act to be published in proposed form for comments.

The student service-learning project guidelines were published in proposed form in the **Federal Register** for comment on March 17, 1986 (51 FR. 9083–9086).

ACTION has determined that student service-learning project guidelines are not major rules as defined in E.O. 12291. This determination is based on the proposed grants' size and purpose, neither of which will result in the economic impact of a major rule.

Student service-learning project guidelines are noted in the Catalog of Federal Domestic Assistance, number 72.005.

Discussion of Comments and Response

The Agency received one comment from the general public recommending that each project application discuss anticipated learning outcomes and specific ways in which those outcomes will be achieved. This selection criterion has been added to Part III, Item f.

Agency staff questioned the lack of specific age restrictions in the guidelines, indicating that a "student" could be of any age, not necessarily young. No such restriction is included since it is felt that the target age group is adequately identified by statements cited in Section II, such as "It is the intent of student service-learning projects to join community, school and *youth* in developing the scope and nature of volunteer experiences . . ." and, "Student volunteers must be enrolled in secondary, secondary vocational or post-secondary schools on an in-school or out-of-school basis." Additionally, Section IIIe, states: "Community representation in the project's operation, including representatives of *youth groups*, school systems, educational institutions, etc., must be identified in the grant application" (emphases added).

Student Service-Learning Project Guidelines

I. Introduction

This Notice sets forth the guidelines under which student service-learning projects will operate. Student service-learning project guidelines are contained in seven parts:

Part I—Introduction
Part II—Purpose
Part III—Grantee Eligibility and Selection Criteria
Part IV—Grant Application Procedures
Part V—Project Management
Part VI—Student Volunteer Assignments
Part VII—Restrictions

These guidelines supersede Young Volunteers in ACTION (YVA) Program Guidelines published in the **Federal Register**, dated August 12, 1982, and instructions and technical assistance provided to grants previously awarded under Title I, Part B of the Domestic Volunteer Service Act of 1973, as amended (Pub. L. 93–113). However, existing YVA grantees eligible for second year renewal will be permitted to apply for second year funding under YVA Program Guidelines published in the **Federal Register** dated August 12, 1982, and must abide by requirements and procedures as outlined therein.

II. Purpose

Student service-learning projects are authorized under Title I, Part B, Sec. 111 and Sec. 114 of the Domestic Volunteer Service Act of 1973, as amended (Pub. L. 93–113). The statutory purpose of student service-learning projects is to encourage students to undertake volunteer service in their communities in such a way as to enhance the educational value of the service experience, through participation in activities which address poverty-related problems. Student volunteers must be enrolled in secondary, secondary vocational or post-secondary schools on an in-school or out-of-school basis. They serve on a part-time, non-stipended basis.

Service opportunities must result in student volunteers gaining experiences through service in poverty communities which relate to classroom, vocational, or other learning needs.

It is the intent of student service-learning projects to join community, school and youth in developing the scope and nature of volunteer experiences which serve the needs of poverty communities while securing resources by which the effort can be continued and expanded after federal support ends.

Local communities should determine what their problems are and how best to solve them. ACTION resources can be made available to assist in helping communities solve some of their problems through fostering student volunteer service. The community must generate increasing resources to enable the project to continue once ACTION grant funds are no longer provided. Technical assistance and training in project management, fund raising and recruiting will be provided by ACTION as required.

III. Grantee Eligibility and Selection Criteria

The following criteria will be employed by ACTION staff in the selection and approval of student service-learning projects:

a. The applicant must be a Federal, State, or local agency, or private non-profit organization or foundation in the United States, the District of Columbia, Virgin Islands, Puerto Rico, American Samoa, or Guam, which has the authority to accept and the capability to administer a student service-learning project grant.

b. Student volunteer activities must be poverty-related in scope and otherwise comply with the provisions of the legislative authority outlined in Part II.

c. Grant funds must be used to initiate or expand a student volunteer service-learning project which addresses the needs of the low-income community.

d. The grantee must develop and maintain community support for the student service-learning project through a planned program including public awareness and communications.

e. Community representation in the project's operation, including representatives of youth groups, school systems, educational institutions, etc., must be identified in the grant application

f. The grant application must demonstrate that project goals and objectives are quantifiable, measurable, and show benefits to the student volunteers and to the low-income community. It must describe the expected learning outcomes which will result from the service experience. The projected number of student volunteers who will serve in the project and hours of service are to be included in project goals and objectives.

g. The grant application must demonstrate how student volunteers will be recruited and how they will receive orientation appropriate to their assignments.

h. The grantee must identify resources which will permit continuation of the service-learning project upon the conclusion of Federal funding as outlined in Part II.

i. The grantee must comply with all programmatic and fiscal aspects of the project and may not delegate or contract this responsibility to another entity. This does not refer to agreements made with volunteer placement sites as discussed in Part VI. This includes compliance with applicable financial and fiscal requirements established by ACTION or other elements of the Federal government.

j. The grantee must ensure compliance with the restrictions outlined in Part VII.

IV. Grant Application Procedures

A. Scope of Grant

Student service-learning project grants are awarded for up to a twelve month period. Requests for second or third year reduced funding can be sought by grantees. Maximum federal awards over a period of three years are up to $15,000 for the first year, up to $10,000 for the second, and up to $5,000 for the third. The grantee is required to contribute a local share of at least $3,000 each year. Final determination of the actual amount of grant awards rests with the ACTION Regional Director.

ACTION seeks sponsoring organizations which can demonstrate the ability to raise sufficient local support in order to achieve 100% non-ACTION funding of their student service-learning projects after Federal funding ends.

Applicants for new or renewal grants must comply with the provisions of Executive Order 12372, the "Intergovernmental Review of Federal Programs and Activities" as set forth in 45 CFR Part 1233. ACTION State Offices will provide applicant organizations with technical assistance regarding this requirement.

B. Procedures for New Grantees

Project application forms are available from ACTION State or Regional Offices which will also establish schedules for application submission. Grant allowable costs are contained in ACTION Handbook 2650.2, *Grants Management Handbook for Grantees*, which is available from the ACTION State or Regional Offices.

Applications will be submitted to the appropriate ACTION State Office for programmatic and technical review. ACTION Regional Offices will review all new applications recommended for funding by the State Offices and send them, along with Regional recommendations, to the Director of VISTA/Service-Learning Programs. The Director of VISTA/Service-Learning will render final decisions on new student service-learning project grant applications.

Regional Grants and Contracts Officers will issue Notices of Grant Awards upon notification from the Director of VISTA/Service-Learning Programs.

C. Procedures for Renewal Grantees

Applications for renewal will be evaluated using the factors identified in selecting initial grantees, as well as the grantee's compliance with these guidelines and the grantee's performance during the previous year(s), particularly in the achievement of measurable goals and objectives. All project renewals are subject to the availability of funds.

Renewal applications from first and second year grantees are reviewed at the ACTION State Office level and submitted to the ACTION Regional Director for final approval.

If the renewal application is denied, the sponsor will be notified that ACTION intends to deny the application for renewal and the sponsor will be given an opportunity to show cause why the application should not be denied in accordance with 45 CFR Part 1206. This regulation is available from ACTION State or Regional Offices.

V. Project Management

Sponsors shall manage grants awarded to them in accordance with the provisions of these guidelines and ACTION Handbook 2650.2, *Grants Management Handbook for Grantees*, which will be furnished the sponsor at the time the initial grant is awarded.

Project support provided under an ACTION grant will be furnished at the lowest possible cost consistent with the effective operation of the project. Project costs for which ACTION funds are budgeted must be justified as being essential to project operation.

A. Local Support Contributions

The student service-learning project sponsor shall be responsible for providing at least $3,000 in non-federal share contribution for each year of the grant's operation. This amount can be obtained through cash and/or allowable in-kind contributions.

Local share can include, but is not limited to, cash or in-kind contributions such as office space, office equipment, supplies, accounting services, insurance, vehicles, telephones, printing, postage, recognition, travel and personnel which directly benefit the project.

B. Reporting Requirements

Sponsors must comply with fiscal reporting requirements as outlined in ACTION Handbook 2650.2 and must maintain records in accordance with generally accepted accounting principles. Records shall be kept available for inspection at the request of ACTION and shall be preserved for at least three years following the date of submission of the final Financial Status Report for each budget period.

If any litigation, claim, or audit is started before the expiration of the 3-

year period, the records shall be retained until all litigation, claims, or audit findings involving the records have been resolved.

A quarterly project progress report shall also be submitted to the ACTION State Office no later than 30 days after the end of each project quarter. The report shall include, but not be limited to, the following items:

1. A comparison of actual accomplishments with the goals and objectives established for the period.
2. The number of volunteers participating in the project during the quarter.
3. The number of volunteer hours generated during the quarter.
4. Problems, delays, or adverse conditions that have affected or will affect the attainment of project objectives.

C. Insurance

Grantees are responsible for ensuring that student volunteers, while performing their assignments, have adequate accident, personal liability, and automobile liability insurance coverage consistent with other insurance maintained by the organization, and with sound institutional and business practices.

D. Transportation

The sponsor should structure student volunteer assignments to minimize transportation expenses and requirements.

When transportation is not provided, volunteers may be reimbursed for actual costs within the limitations prescribed by the local project and the availability of funds.

E. Project Staff

Each grantee will designate a person to serve as the Project Director. A full-time Director is desirable yet fiscal realities or project needs may dictate otherwise. A rationale for less than a full-time Project Director must be included with the project application. Supervision of the Project Director is the responsibility of the sponsor.

Student service-learning project staff are employees of the grantee organization and are subject to its personnel policies and practices.

F. Community Relations

1. Public Awareness: A strong community relations program ensures public awareness of start-up and continuing project activities. It is essential for the successful recruiting of volunteers and for the recognition of volunteer service. The project sponsor and Project Director should inform community, city and county officials, and the media about development, growth and success of the student service-learning project.

2. Volunteer Recognition: With the participation of the sponsor, the staff, and volunteer placement sites, recognition should be given to student volunteers for service to the community. Projects can also provide recognition to local individuals and agencies or organizations for significant activities in support of project goals.

3. Community support: A viable community support system needs to be initiated to ensure project success and project continuation without Federal funds. Project support may be sought from school districts, governmental entities, religious and service groups, United Way, foundations, the business community, youth organizations, etc. One method of enlisting and maintaining community support for the project's operation is through the establishment of a project advisory council and/or working committee of the sponsor's board.

VI. Student Volunteer Assignments

Student volunteers are assigned to serve low-income communities in a variety of ways. Local sponsors are expected to develop volunteer service opportunities taking into consideration the focus of the project, the age, skills, and interests of student volunteers, as well as the value of the learning experience itself.

Clear understanding concerning the responsibilities of volunteer placement sites must be reached between representatives of the grantee's project staff and the volunteer site supervisor. Agreements may be formally arranged through the utilization of a Memorandum of Understanding, a Letter of Agreement or other means.

A formal agreement between the project staff and volunteer site will greatly assist the staff and volunteers in the management of volunteers. Issues and responsibilities concerning volunteer orientation/training, volunteer transportation, recognition and reporting of service hours, are functions outlined in this agreement.

VII. Restrictions

A. Special Restrictions on Student Service-Learning Project Grantees

1. *Political Activities:* a. Grant funds shall not be used to finance, directly or indirectly, any activity to influence the outcome of any election to public office or any voter registration activity.

b. No project shall use grant funds to provide services, employ or assign personnel or volunteers for, or take any action which would result in the identification or apparent identification of the project with:

(1) Any partisan or non-partisan political activity or any other political activity associated with a candidate, or contending faction or group, in an election for public or party office;

(2) Any activity to provide voters or prospective voters with transportation to the polls or similar assistance in connection with any election; or

(3) Any voter registration activity.

2. *Lobbying:* a. No grant funds or volunteers may be used by the sponsor in any activity for the purpose of influencing the passage or defeat of legislation or proposals by initiative petition, except as follows:

(1) In any case in which a legislative body, a committee of a legislative body, or a member of a legislative body requests a student volunteer, a sponsor chief executive, his or her designee, or project staff to draft, review, or testify regarding measures or to make representations to such legislative body, committee, or member; or

(2) In connection with an authorization or appropriation measure directly affecting operation of the program.

Regulations found in 45 CFR Part 1226, "Prohibitions On Electoral and Lobbying Activities," apply fully hereto, and provide further details on the limitations of political and lobbying activities that apply to volunteers and sponsors. Each grantee is obliged to know, and communicate to staff and volunteers, the prohibitions included therein.

3. *Special Restriction on State or Local Government Employees:* If the sponsor receiving a grant from ACTION is a state or local government agency, certain restrictions contained in Chapter 15 of Title 5 of the United States Code are applicable to persons who are principally employed in activities associated with the project. The restrictions are not applicable to employees of educational or research institutions. An employee subject to these restrictions may not:

a. Use his or her official authority or influence for the purpose of interfering with or affecting the result of an election or nomination for office.

b. Directly or indirectly coerce, attempt to coerce, command, or advise a State or local officer or employee to pay, lend, or contribute anything of value to a party, committee, organization, agency or person for political purposes; or

c. Be a candidate for elective office, except in a non-partisan election. "Non-partisan election" means an election at

which none of the candidates is to be nominated or elected as representing a political party any of whose candidates for Presidential election received votes in the last preceding election at which Presidential electors were selected.

If a project staff member, whose salary is traceable in whole or in part to an ACTION grant, is also a State or local government employee, the staff member is covered by provisions of the Hatch Act, restricting in many instances public participation in partisan political activities. Questions about the coverage of the Hatch Act may be addressed to the Office of General Counsel, ACTION, Washington, DC 20525.

4. *Non-discrimination:* No person with responsibility for the operation of a project shall discriminate with respect to any activity or program because of race, creed, belief, color, national origin, sex, age, handicap, or political affiliation.

5. *Religious Activities:* Volunteers and project staff funded by ACTION shall not give religious instruction, conduct worship services, or engage in any form of proselytization as part of their duties.

6. *Labor and Anti-Labor Activity:* No grant funds shall be directly or indirectly utilized to finance labor or anti-labor organization or related activity.

7. *Non-displacement of Employed Workers:* A student volunteer may not perform any service or duty which would supplant the hiring of workers who would otherwise be employed to perform similar services or duties; or result in the displacement of employed workers or impair existing contracts for service.

8. *Non-compensation for Services:* No volunteer or other person, organization, or agency shall request or receive any compensation for services of student volunteers. No volunteer site or any member or cooperating organization shall be requested or required to contribute or to solicit contribution to establish any part of a local share. This does not prevent the acceptance of cash contributions made voluntarily and without condition to the grantee for legitimate charitable purposes.

9. *Volunteer Status:* Student volunteers are not employees of the sponsoring organization or the U.S. Government while volunteers.

10. *Nepotism:* Persons selected for project staff positions may not be related by blood or marriage to other project staff, sponsor staff or officers, or members of the sponsor Board of Directors unless there is concurrence by ACTION.

ADVISORY COUNCIL ON HISTORIC PRESERVATION

Programmatic Memorandum of Agreement Regarding Management of Historical Properties, Operation and Management of the Chief Joseph Dam Project, Washington

AGENCY: Advisory Council and Historic Preservation.

ACTION: Notice.

SUMMARY: The Advisory Council on Historic Preservation proposes to execute a Programmatic Memoradum of Agreement pursuant to § 800.8 of the Council's regulations, "Protection of Historic and Cultural Properties" (36 CFR Part 800), with the Seattle District, Corps of Engineers, and the Washington State Historic Preservation Officer for the management of historical properties affected by the operation and maintenance of the Chief Joseph Dam project in eastern Washington. The proposed Programmatic Memorandum of Agreement will establish mechanisms by which historical properties will be identified, evaluated, monitored, and protected in order to meet the requirements of section 106 of the National Historic Preservation Act (16 U.S.C. 470f).

Comments Due: June 23, 1986.

ADDRESS: Executive Director, Advisory Council on Historic Preservation, Western Division of Project Review, Suite 450, 730 Simms Street, Golden, Colorado 80401.

Dated: May 16, 1986.

BILLING CODE 4310–10–M

Meeting

ACTION: Notice.

SUMMARY: Notice is hereby given in accordance with § 800.6(d)(3) of the regulations of the Advisory Council on Historic Preservation, "Protection of Historic and Cultural Properties" (36 CFR Part 800), that a panel of five members of the Council will meet on May 30, 1986 to consider the proposed construction of a visitors' center and parking facility at Arlington National Cemetery, Arlington, Virginia by the U.S. Army Corps of Engineers. It has been determined that this undertaking will adversely affect the Arlington House, Arlington National Cemetery, the Lincoln Memorial, and the Arlington Memorial Bridge. These properties are either included in or eligible for inclusion in the National Register of Historic Places. This review by the Council is taking place in accordance with Section 106 of the National Historic Preservation Act. The meeting will be held in Room M–07, in the Old Post Office Building, 1100 Pennsylvania Avenue, NW, Washington, DC at 9:00 a.m.

The panel will consider written and oral statements from concerned parties. Written statements should be submitted to the Council by May 26, 1986. Persons wishing to make oral statements should notify the Council by May 26, 1986.

Additional information concerning the meeting or submission of statements is available from: The Executive Director, Advisory Council on Historic Preservation, The Old Post Office Building, 1100 Pennsylvania Ave., NW, Washington, DC 20004 (202–786–0505); ATTN. Ms. Eleni Silverman.

Dated: May 21, 1986.

John M. Fowler,

Acting Executive Director.

DEPARTMENT OF AGRICULTURE

Forest Service

Mount St. Helens Scientific Advisory Board; Meeting

The Mount St. Helens Scientific Advisory Board will meet at 9:30 a.m., July 10, 1986, at the Forest Supervisor's Office, Gifford Pinchot National Forest, 500 West 12 Street, Vancouver, Washington 98660, to receive information on and discuss the following:

1. A review of the recommendation made on July 7, 1983, to place a 5-year moratorium on fish stocking of lakes within the National Volcanic Monument (NVM).

2. A review of the recommendation made on July 7, 1983, to place a 5-year moratorium on removal of natural blockages to anadromous fish migrations in the Green River.

3. Discussion of the NVM Science Panel as recommended by the Comprehensive Management Plan.

4. Initiate plans for NVM Research Workshop in Fall 1986.

5. Open discussion of topics of interest to the Advisory Board.

The meeting will be open to the public. Persons who wish to make a statement to the Board should notify Dr. Jack K. Winjum, Chairperson, c/o Gifford Pinchot National Forest, 500 West 12th Street, Vancouver, Washington 98660, 206–696–7570. Written statements may be filed with the Board before or after the meeting.

Dated: May 14, 1986.

Allan O. Lampi,

Acting Regional Forester.

DEPARTMENT OF COMMERCE

Bureau of the Census

Census Advisory Committee on Agriculture Statistics; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463 as amended by Pub. L. 94–409), we are giving notice that the Census Advisory Committee on Agriculture Statistics will convene on June 18, 1986, at 9 a.m. The

Committee will meet in Room 2424, Federal Building 3, at the Bureau of the Census in Suitland, Maryland.

This Committee advises the Director, Bureau of the Census, concerning the kind of information that should be obtained from respondents associated with agricultural production; prepares recommendations regarding the contents of agricultural reports; and presents the views and needs for data of major agricultural organizations and their members, and other suppliers of agricultural statistics.

The Committee is composed of 20 members appointed by the presidents of the nonprofit organizations having representatives on the Committee and a representative from the Department of Agriculture.

The agenda for the meeting, which is scheduled to adjourn at 4 p.m., is: (1) Introductory remarks by the Director, Bureau of the Census; (2) staff changes and Census Bureau organization; (3) update on the Census Bureau's agriculture programs; (4) 1987 Agriculture Census content test results; (5) 1987 Agriculture Census content and collection procedure; (6) computer bulletin board and compact disc-read only memory demonstrations; (7) 1987 Agriculture Census methodology; and (8) Committee recommendations.

The meeting will be open to the public, and a brief period will be set aside for public comment and questions. Extensive questions or statements must be submitted in writing to the Committee Control Officer at least 3 days before the meeting.

Persons planning to attend and wishing additional information concerning this meeting or who wish to submit written statements may contact the Committee Control Officer, Mr. George Pierce, Agriculture Division, Bureau of the Census, Room 3009, Federal Building 4, Suitland, Maryland. (Mail address: Washington, D.C. 20233). Telephone (301) 763–7731.

Dated: May 10, 1986.

John G. Keane,

Director, Bureau of the Census.

BILLING CODE 3510-07-M

International Trade Administration

Short Supply Review on Certain Steel Wire Rope; Request for Comments

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice and request for comments.

SUMMARY: The Department of Commerce hereby announces its review of a request for a short supply determination under Article 8 of the U.S.-EC Arrangement on Certain Steel Products with respect to certain steel wire rope.

EFFECTIVE DATE: Comments must be submitted no later than June 2, 1986.

ADDRESS: Send all comments to Nicholas C. Tolerico, Acting Director, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, 14th ad Constitution Ave., NW, Washington, D.C. 20230, Room 3099.

FOR FURTHER INFORMATION CONTACT: Richard O. Weible, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, 14th and Constitution Ave., NW, Washington, D.C. 20230, Room 3099, (202) 377–0159.

SUPPLEMENTARY INFORMATION: Article 8 of the U.S.-EC Arrangement on Certain Steel Products provides that if the U.S. ". . . determines that because of abnormal supply or demand factors, the U.S. steel industry will be unable to meet demand in the USA for a particular product (including substantial objective evidence such as allocation, extended delivery periods, or other relevant factors), an additional tonnage shall be allowed for such product . . . ."

We have received a short supply request for certain high strength steel wire rope, whether or not galvanized, with nominal diameters ranging from ⅝ to 1¾ inches, that is used as hoist lines for offshore rig and platform cranes.

Any party interested in commenting on this request should send written comments as soon as possible, and no later than ten days from publication of this notice. Comments should focus on the economic factors involved in granting or denying this request.

Commerce will maintain this request and all comments in a public file. Anyone submitting business proprietary information should clearly identify that portion of their submission and also provide a non-proprietary submission which can be placed in the public file. The public file will be maintained in the Central Records Unit, Import Administration, U.S. Department of Commerce, Room B–099 at the above address.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

May 15, 1986.

BILLING CODE 3510-DS-M

Industrial Nitrocellulose From France; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: International Trade Administration/Import Administration, Department of Commerce.

ACTION: Notice of Preliminary Results of Antidumping Duty Administrative Review.

SUMMARY: In response to a request by Societe Nationale des Poudres et Explosifs, the Department of Commerce has conducted an administrative review of the antidumping duty order on industrial nitrocellulose from France. The review covers the one known exporter of this merchandise to the United States and the period May 13, 1983 through July 31, 1984. The review indicates the existence of *de minimis* dumping margins for the period.

As a result of the review, the Department has preliminarily determined to assess antidumping duties equal to the calculated differences between United States price and foreign market value.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: May 22, 1986.

FOR FURTHER INFORMATION CONTACT: Craig Daugherty of Linnea Bucher, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230; telephone: (202) 377–2923.

SUPPLEMENTARY INFORMATION:

Background

On August 10, 1983, the Department of Commerce ("the Department") published in the **Federal Register** (48 FR 36303) and antidumping duty order on industrial nitrocellulose from France. The Department received a request for an administrative review from Societe Nationale des Poudres et Explosifs ("SNPE"), in accordance with § 353.53a(a) of the Commerce Regulations, and we published a notice of initiation of the antidumping duty administrative review in the **Federal Register** on November 27, 1985 (50 FR 48825].

Scope of the Review

Imports covered by the review are shipments of industrial nitrocellulose containing between 10.8 and 12.2 percent nitrogen. Industrial nitrocellulose is a dry, white, amorphous synthetic chemical produced by the action of nitric acid on cellulose. The product comes in several viscosities and is used to form films in lacquers, coatings, furniture finishes and printing

inks. Such merchandise is currently classifiable under item 445.2500 of the Tariff Schedules of the United States Annotated. The review covers the one known French exporter of industrial nitrocellulose to the United States, Societe Nationale des Poudres et Explosifs, and the period May 13, 1983 through July 31, 1984.

United States Price

In calculating United States price the Department used purchase price, as defined in section 772 of the Tariff Act of 1930 ("the Tariff Act"). Purchase price was based on the c.i.f. packed price to unrelated purchasers in the United States. We made deductions, where applicable, for foreign inland freight, foreign inland insurance, foreign brokerage and handling, ocean freight and marine insurance. No other deductions were claimed or allowed.

Foreign Market Value

In calculating foreign market value the Department used home market price, as defined in section 773 of the Tariff Act, since sufficient quantities of such or similar merchandise were sold in the home market at or above the cost of production to provide a basis of comparison. Home market price was based on the packed, delivered price to unrelated purchasers in the home market. We made adjustments, where applicable, for inland freight, inland insurance, rebates, commissions, differences in the physical characteristics of the merchandise, credit and packing.

No other adjustments were claimed or allowed.

Preliminary Results of the Review

As a result of our comparison of United States price to foreign market value, we preliminarily determine that a weighted-average margin of .17 percent exists for SNPE for the period May 13, 1983 through July 31, 1984.

Interested parties may submit written comments on these preliminary results within 30 days of the date of publication of this notice and may request disclosure and/or a hearing within 10 days of the date of publication. Any hearing, if requested, will be held 45 days after the date of publication or the first workday thereafter. Any request for an administrative protective order must be made no later than 5 days after the date of publication. The Department will publish the final results of the administrative review including the results of its analysis of issues raised in any such comments or hearing.

The Department shall determine, and the Customs Service shall assess antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentage stated above. The Department will issue appraisement instructions directly to the Customs Service.

Further, since the margin for SNPE is less than 0.5 percent and therefore *de minimis* for cash deposit purposes, the Department shall not require a cash deposit of estimated antidumping duties, as provided for by § 353.48(b) of the Commerce Regulations, on shipments of French industrial nitrocellulose entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and section 353.53a of the Commerce Regulations (19 CFR 353.53a; 50 FR 32556, August 13, 1985).

Dated: May 16, 1986.

Gilbert B. Kaplan,

Deputy Assistant Secretary, Import Administration.

BILLING CODE 3510-DS-M

[Docket Numbers 2639-01, 2639-02, 2639-03]

Export Privileges in the Matter of Suin, S.A., et al.

Order

On May 13, 1986, the Administrative Law Judge entered an Order adopting and implementing the consent proposal submitted by the parties in the above matter. The Order was referred to me pursuant to section 13(c) of the Export Administration Act of 1979, 50 U.S.C. app. 2401–2420 (1982), as amended, for final action.

Having examined the record and based on facts adduced in this case, I affirm the Order of the Administrative Law Judge. This constitutes final agency action in this matter.

Dated: May 20, 1986.

Paul Freedenberg

In the matter of Suin, S.A., SIC, S.A., Carlos Mira Gallart, Respondents.

Appearance for Respondents: Mark N. Rae, Esq., Stroock & Stroock & Lavan, 1150 17th Street NW., Washington, DC 20036

Appearance for Government: Thomas C. Barbour, Esq., Office of the Assistant General Counsel for Export Administration, U.S. Department of Commerce, Washington, DC. 20230.

Order

By Charging Letter dated March 29, 1984, the Office of Export Enforcement (OEE), International Trade Administration, United States Department of Commerce (Agency), initiated an administrative proceeding [1] against Carlos Mira Gallart (also known as Carlos Mira), SIC, S.A. and Suin, S.A. (hereinafter collectively referred to as Respondents) pursuant to sections 11(c) and 13(c) of the Export Administration Act of 1979, (50 U.S.C. app. 2401–2420 (1982), as amended by the Export Administration Act Amendments of 1985, Pub. L. 99–64, 99 Stat. 120 (July 12, 1985)) (the Act), and the Export Administration Regulations (15 CFR Parts 368–399 (1985)) (the Regulations), alleging that: (1) between December 20, 1978 and October 22, 1980, Respondents reexported or caused to be reexported from Spain to Bulgaria seven shipments of U.S.—origin integrated circuit testing equipment without having obtained reexport authorization from the Office of Export Administration which Respondents knew, or had reason to know, was required, and (2) on April 15, 1980, and March 3, 1982, Respondent Mira made false representations of material facts to United States Government officials in the course of an investigation under the Act.

The Agency and Respondents having entered into a Consent Agreement whereby the parties have agreed to settle this matter: (1) By Respondents' paying to the Agency a civil penalty of $80,000; and (2) by denying Respondents' export privileges for a period of 10 years following the date of entry of this Order.

I find that these terms are sufficient to achieve effective enforcement of the Act and;

It Is Therefore Ordered,

First, that Respondents shall pay to the Agency a civil penalty of $80,000. Payment to the Agency shall be made in accordance with the following schedule: $10,000 on or before June 1, 1986, $6,000 on or before December 1, 1986, with the remainder to be paid in four equal installments of $16,000, each due on or before December 1, 1987, December 1, 1988, December 1, 1989, and December 1, 1990, respectively. Each payment shall be made in the manner specified in the attached instructions.

---

[1] A Temporary Denial Order had been issued naming Respondents Carlos Mira Gallart and Suin, S.A. on October 14, 1982 (47 FR 47876, Oct. 21, 1982). SIC, S.A. was added on Feb. 28, 1984 (49 FR 8057, Mar. 5, 1984).

Second, all outstanding validated export licenses in which any Respondent or any related party appears or participates in any manner or capacity, are hereby revoked and shall be returned to the Office of Export Licensing for cancellation.

Third, for a period of 10 years from the date of entry of this Order, Respondents:

Suin, S.A., with addresses at both Calle Clot 194 Barcelona 27, Spain

and

Paseo and Manual Girona, 11 Bajos, Ctra. N–340 km 243'400, Vilaseca (Tarragona), Spain

Carlos Mira Gallart, a/k/a Carlos Mira, with addresses at both Barcelona and Tarragona, Spain

and

Hernandez Inglesias No. 4, Madrid 27, Spain

and

SIC, S.A., Avda De Chile 40, 2–0 1–A, Barcelona 28, Spain,

their successors or assignees, officers, partners, representatives, agents and employees hereby are denied all privileges of participating, directly or indirectly, in any transaction involving commodities or technical data exported from the United States in whole or in part, or that are otherwise subject to the Regulations. Without limiting the generality of the foregoing, participation prohibited in any such transaction, either in the United States or abroad, shall include, directly or indirectly, in any manner or capacity: (i) As a party or as a representative of a party to any export license application submitted to the Agency, (ii) preparing or filing with the Agency any export license application or request for reexport authorization, or any document to be submitted therewith; (iii) in obtaining or using any validated or general export license or other export control document; (iv) in carrying on negotiations with respect to, or in receiving, ordering, buying, selling, delivering, storing, using, or disposing of any commodities or technical data, in whole or in part, exported or to be exported from the United States, and (v) in financing, forwarding, transporting, or other servicing of such commodities or technical data. Such denial of export privileges shall extend only to those commodities and technical data which are subject to the Act and the Regulations.

Fourth, after notice and opportunity for comment, such denial may also be made applicable to any person, firm, corporation, or business organization with which any Respondent is now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of trade or related services. Business organizations and individuals now known to be affiliated with one or more of the above-named Respondents in the conduct of trade or related services, and which are accordingly subject to the provisions of this Order, are:

Ciec, S.A., Avenida Madrid 68, 5–3, Barcelona, Spain 08028

Commercial R.M.S., S.A., Calle Clot 194, Barcelona 27, Spain

Famisa, S.A., Maestre Valls, 8, Valencia, Spain

Intelco, S.A., Barcelona, Spain

Juan Jose Ciuro Munoz, Avda De Chile 40, 2–0 1–A, Barcelona 28, Spain

Juan Antonio Perez Olle, Calle Corcega 361, Barcelona, Spain

Fifth, no person, firm, corporation, partnership or other business organization, whether in the United States or elsewhere, without prior disclosure to and specific authorization from the Office of Export Licensing, shall, with respect to U.S.-origin commodities and technical data, do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with any Respondent or any related party, or whereby any Respondent or any related party may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly: (i) Apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any export, reexport, transshipment, or diversion of any commodity or technical data exported, in whole or in part, or to be exported by, to, or for any Respondent or any related party denied export privileges; or (ii) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate in any export, reexport, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States.

Sixth, that the Charging Letter, the Consent Agreement and this Order shall be made available to the public.

Seventh, this Order shall become effective upon entry of the Secretary's action in this proceeding pursuant to Section 13(c) of the 1985 Amendments to the Export Administration Act, at which time the outstanding Temporary Denial Orders, which are referenced above, will be terminated.

Hugh J. Dolan,
Administrative Law Judge.
Dated: May 13, 1986.

Attachment to Administrative Law Judge's Order

Instructions for Payment of Civil Penalty

1. The civil penalty check should be made payable to: U.S. Department of Commerce.

2. The check should be mailed to: U.S. Department of Commerce, Office of Assistant General Counsel for Export Administration, Room H–3845, 14th Street and Constitution Avenue NW., Washington, D.C. 20230.

BILLING CODE 3510–DT–M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Increasing the Import Limit for Certain Man-Made Fiber Luggage Produced or Manufactured in the People's Republic of China

May 16, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 16, 1986. For further information contact Diana B. Solkoff, International Trade Specialist, Office of Textiles and Apparel, U.S Department of Commerce, (202)377–4212.

Background

On December 26, 1985 a notice was published in the **Federal Register** (50 FR 52824) announcing establishment of a level of 12,042,805 pounds for braided and unbraided luggage of man-made fibers in Category 670 pt. (only T.S.U.S.A. numbers 706.3420, 706.4144, and 706.4152), produced or manufactured in China and exported during the twelve-month period which began on September 3, 1985, and extends through September 2, 1986. CITA has indications that the trade data reported to Census on which this level was based were understated. Consequently, as an interim measure, pending completion of a data investigation to determine the correct trade base, the level is being increased by 2,000,000 pounds to 14,042,805 pounds. A further adjustment in the

form of an increase or a decrease may be made in this level depending on the outcome of the data investigation.

In the letter which follows this notice the Chairman of CITA directs the Commissioner of Customs to increase the current level to 14,042,805 pounds.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44872), and in Statistical Headnote 5, Schedule 3 of the TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED (1986).

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

May 16, 1986.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of December 19, 1985, which directed you to prohibit entry of man-made fiber textile products in Category 670 pt.[1], produced or manufactured in China and exported during the twelve-month period which began on September 3, 1985 and extends through September 2, 1986.

Effective on May 16, 1986, the directive of December 19, 1985 is hereby amended to increase the import restraint level of Category 670 pt.[1] to 14,042,805 pounds.[2]

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

[1] In Category 670 only T.S.U.S.A. numbers 706.3420, 706.4144 and 706.4152.

[2] The level has not been adjusted to account for any imports exported after September 2, 1985.

Import Levels for Certain Cotton Textile Products Produced or Manufactured in the Philippines

May 19, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 23, 1986. For further information contact Ross Arnold, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

On December 26, 1985, a notice was published in the Federal Register (50 FR 52830) which established import control limits for certain cotton, wool and man-made fiber textile products, produced or manufactured in the Philippines and exported during the twelve-month period which began on January 1, 1986 and extends through December 31, 1986. In the letter which follows this notice, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to also control imports of cottom textile products in Categories 363 (terry and other pile towels) and 369 (other cotton manufactures), produced or manufactured in the Philippines and exported during the same twelve-month period, at levels of 2,763,348 numbers (Category 363) and 1,350,611 pounds (Category 369).

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

May 19, 1986.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of December 20, 1985 which directed you to prohibit entry of certain cotton, wool and man-made fiber textile products, produced or manufactured in the Philippines.

Effective May 23, 1986, the directive of December 20, 1985 is hereby amended to include levels for cotton textile products in Category 363 at 2,763,348 numbers and Category 369 at 1,350,611 pounds.[1]

Textile products in Categories 363 and 369 which have been exported to the United States prior to January 1, 1986 shall not be subject to this directive.

Textile products in Categories 363 and 369 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a) (1) (A) prior to the effective date of this directive shall not be denied entry under this directive.

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C 553 (a)(1).

Sincerely,

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Import Limits for Certain Wool Textile Products Produced or Manufactured in Uruguay

May 19, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on May 23, 1986. For further information contact Nathaniel Cohen, Trade Reference Assistant, Office of Textiles and Apparel, U.S. Department of Commerce (202) 377-4212.

Background

The Governments of the United States and Uruguay have agreed to further amend their Bilateral Wool Textile

[1] The levels have not been adjusted to account for any imports exported after December 31, 1986.

Agreement of December 30, 1983 and January 23, 1984, as amened, to establish specific limits of 2,100,000 square yards for woolen and worsted fabric in Category 410 produced or manufactured in Uruguay and exported during the twelve-month period which began on February 1, 1986 and extends through January 31, 1987, and 13,500 dozen for wool skirts in Category 442, produced or manufactured in Uruguay and exported during the six-month period which began on January 1, 1986 and extends through June 30, 1986. The United States Government has decided to control imports at the new limits. Accordingly, in the letter which follows this notice, the Chairman of CITA directs the Commissioner of Customs to establish these limits.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 F.R. 38754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

William H. Houston III,

Chairman, Committee for the Implementation of Textiles Agreements.

Committee for the Implementation of Textile Agreements

May 19, 1986.

Commissioner of Customs,
Department of the Treasury,
Washington, DC 20229

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Wool Textile Agreement of December 30, 1983 and January 23, 1984, as amended, between the Governments of the United States and Uruguay; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on May 23, 1986, entry into the United States for consumption and withdrawal from warehouse for consumption of wool textile products in Categories 410 and 442, produced or manufactured in Uruguay and exported during the indicated periods in excess of:

Category	Restraint limit [1]	Period
410	2,100,000 square yards	Feb. 1, 1986–Jan. 31, 1987.
442	13,500 dozen	Jan. 1, 1986–June 30, 1986.

[1] The limits have not been adjusted to reflect any import exported after January 31, 1986 (Category 410) or after December 31, 1985 (Category 442). Imports during the period February 1 through March 31, 1986 have amounted to 216,959 square yards (Category 410) and during the period January 1 through March 31, 1986, 22 dozen (Category 442).

Textile products in Category 410 produced or manufactured in Uruguay and exported to the United States on or after February 1, 1985 and extending through January 31, 1986, shall, to the extent of any unfilled balance, be charged against the level of restraint established for such goods during that twelve month period. In the event the level of restraint established for that period has been exhausted by previous entries, such goods shall be subject to the level set forth in this letter. Textile products in Category 442 which have been exported to the United States prior to January 1, 1986 shall not be subject to this directive.

Textile products in Categories 410 and 442 which have been been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

These limits are subject to adjustment in the future according to the provisions of the bilateral agreement of December 30, 1983 and January 23, 1984, which provide, in part, that: (1) Specific limit may be adjusted for carryover and carryforward and (2) administrative arrangements of adjustment may be made to resolve problems arising in the implementation of the agreement.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26622), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the implementation of Textile Agreements has determined that the actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely.

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreement.

[FR Doc. 86-11528 Filed 5-21-86; 8:45 am]

BILLING CODE 3510-DR-M

May 19, 1986.

Requesting Public Comment on Bilateral Textile Consultations With the Government of Pakistan Concerning Category 613-C

On April 27, 1986, the United States Government, under Article 3 of the Arrangement Regarding International Trade in Textiles, requested the Government of Pakistan to enter into consultations concerning exports to the United States of lightweight, plainweave polyester/cotton fabric in Category 613-C (only TSUSA numbers 338.5039, 338.5042, 338.5043, 338.5047, 338.5048, 338.5053, 338.5054, 338.5058 and 338.5059), produced or manufactured in Pakistan.

The purpose of this notice is to advise that, if no solution is agreed upon in consultations with Pakistan, the Committee for the Implementation of Textile Agreements may later establish a limit for the entry and withdrawal from warehouse for consumption of lightweight, plainweave ployester/cotton fabric in Category 613-C, produced or manufactured in Pakistan and exported to the United States during the twelve-month period which began on April 27, 1986 and extends through April 26, 1987 at a level of 14,049,876 square yards.

A summary market statement follows this notice.

Anyone wishing to comment or provide data or information regarding the treatment of Category 613-C under the agreement with Pakistan, or on any other aspect thereof, or to comment on domestic production or availability of textile products included in the category, is invited to submit such comments or information in ten copies to Mr. William H. Houston III, Chairman, Committee for the Implementation of Textile Agreements, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230. Because the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, Room 3100, U.S. Department of Commerce, 14th and Constitution Avenue NW., Washington, DC, and may be obtained upon written request.

Further comment may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating

to matters which constitute "a foreign affairs function of the United States."

William H. Houston III,

Chairman, Committee for the Implementation of Textile Agreement.

Market Statement

Category 613pt.—Lightweight, Plainweave, Polyester/Cotton Fabric; Pakistan, April 1986

Summary and Conclusions

U.S. imports of Category 613pt.—TSUSA No. 338.5039, 338.5042, 338.5043, 338.5047, 338.5048, 338.5053, 338.5054, 338.5058 and 338.5059, from Pakistan was 19.0 million square yards during the year ending February 1986 compared with only 420,000 square yards a year earlier. Most of the year ending February 1986 imports, 13.7 million square yards, were imported during December 1985 through February 1986.

Pakistan accounted for 14.5 percent of the year ending February 1986 total imports when it was the second largest supplier. It was the largest supplier in the first two months of 1986 when it accounted for 30 percent of the total imports.

This sharp and substantial increase in low valued imports is disrupting the U.S. market for these type fabrics.

U.S. Market

The U.S. lightweight, plainweave ployester/cotton gray fabric market is adversely affected by imports. The U.S. producer's share of the market for domestically produced and imported Category 613pt. declined in 1985. The market continues to be disrupted by imports in 1986 and Pakistan's position as a major supplier of these fabrics makes it a major contributor to the market disruption.

U.S. Production

U.S. production of lightweight, plainweave polyester/cotton gray fabric declined in 1985 by 34 percent.

U.S. Imports and Import Penetration

Total U.S. imports of these fabrics increased from 88.6 million square yards in 1984 to 115.8 million in 1985. These imports were nearly equal to domestic production in 1984 and nearly double the 1985 domestic production.

Import Values vs Domestic Producer's Price

Approximately 88 percent of Category 613pt.—lightweight, plainweave ployester/cotton fabric—from Pakistan enter under TSUSA No. 338.5048, polyester/cotton printcloth not over 5 oz. per square yard. These imports enter at duty-paid values below the U.S. producer price for comparable fabric.

Department of Defense Wage Committee; Closed Meetings

Pursuant to the provisions of section 10 of Pub. L. 92-463, the Federal Advisory Committee Act, notice is hereby given that a meeting of the Department of Defense Wage Committee will be held on Tuesday, June 3, 1986; Tuesday, June 10, 1986; Tuesday, June 17, 1986; and Tuesday, June 24, 1986 at 10:00 a.m. in Room 1E801, The Pentagon, Washington, DC.

The Committee's primary responsibility is to consider and submit recommendations to the Assistant Secretary of Defense (Force Management and Personnel) concerning all matters involved in the development and authorization of wage schedules for federal prevailing rate employees pursuant to Pub. L. 92-392. At this meeting, the Committee will consider wage survey specifications, wage survey data, local wage survey committee reports and recommendations, and wage schedules derived therefrom.

Under the provisions of section 10(d) of Pub. L. 92-463, meetings may be closed to the public when they are "concerned with matters listed in 5 U.S.C. 552b." Two of the matters so listed are those "related solely to the internal personnel rules and practices of an agency," (5 U.S.C. 552b(c)(2)), and those involving "trade secrets and commercial or financial information obtained from a person and privileged or confidential" (5 U.S.C. 552b(c)(4)).

Accordingly, the Deputy Assistant Secretary of Defense (Civilian Personnel Policy) hereby determines that all portions of the meeting will be closed to the public because the matters considered are related to the internal rules and practices of the Department of Defense (5 U.S.C. 552b(c)(2)), and the detailed wage data considered by the Committee during its meetings have been obtained from officials of private establishments with a guarantee that the data will be held in confidence (5 U.S.C. 552b(c)(4)).

However, members of the public who may wish to do so are invited to submit material in writing to the chairman concerning matters believed to be deserving of the Committee's attention.

Additional information concerning this meeting may be obtained by writing the Chairman, Department of Defense Wage Committee, Room 3D264, The Pentagon, Washington, DC 20301.

Patricia H. Means,
OSD Federal Register Liaison Officer, Department of Defense.

Department of the Navy

Naval Research Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Naval Research Advisory Committee Panel on Under Ice Warfare Requirements will meet on June 17-18, 1986 at the Naval Research Laboratory, Washington, DC. The meeting will commence at 8:00 a.m. and terminate at 3:00 p.m. on June 17, and commence at 8:00 a.m. and terminate at 5:00 p.m. on June 18, 1986. All sessions of the meeting will be closed to the public.

The purpose of the meeting is to understand, deal with, and exploit environmental surveillance issues in polar waters, identify what study has been done on the subject thus far, identify promising technologies, and drive operational requirements to deal with under ice anti-submarine warfare. The agenda will include technical briefings on the threat, maritime strategy and environmental considerations. These briefings will contain classified information that is specifically authorized under criteria established by Executive order to be kept secret in the interest of national defense and are in fact properly classified pursuant to such Executive order. The classified and nonclassified matters to be discussed are so inextricably intertwined as to preclude opening any portion of the meeting. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting contact: Commander T.C. Fritz, U.S. Navy, Office of Naval Research (Code 100N) 800 North Quincy Street, Arlington, VA 22217-5000, Telephone number (202) 696-4870.

Naval Research Advisory Committee; Closed Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (5 U.S.C. app.), notice is hereby given that the Naval Research Advisory Committee Panel on Automated Submarine Detection will meet on June 10-13, 1986, at the Science Applications International Corporation, 1710 Goodridge Drive, McLean, Virginia. The meeting will commence at 8:00 a.m. and terminate at 5:00 p.m. on June 10 and 11; commence at 8:00 a.m. and terminate at 6:00 p.m. on June 12; and commence at 8:00 a.m. and terminate at 5:00 p.m. on June 13, 1986. All sessions of the meeting will be closed to the public.

The purpose of the meeting is to review present undersea surveillance automated submarine detection and classification techniques and capabilities. The agenda will include

technical briefings on the threat, maritime strategy, and industry overviews of past, present and future automated efforts. These briefings will contain classified information that is specifically authorized under criteria established by Executive order to be kept secret in the interest of national defense and are in fact properly classified pursuant to such Executive order. The classified and nonclassified matters to be discussed are so inextricably intertwinded as to preclude opening any portion of the meeting. Accordingly, the Secretary of the Navy has determined in writing that the public interest requires that all sessions of the meeting be closed to the public because they will be concerned with matters listed in section 552b(c)(1) of title 5, United States Code.

For further information concerning this meeting contact: Commander T.C. Fritz, U.S. Navy, Office of Naval Research (Code 100N), 800 North Quincy Street, Arlington, VA 22217–5000, Telephone number (202) 696–4870.

Publication of Alternative Fuel Price Ceilings and Incremental Price Threshold for High Cost Natural Gas

The Natural Gas Policy Act of 1978 (NGPA) (Pub. L. 95–621) signed into law on November 9, 1978, mandated a new framework for the regulation of most facets of the natural gas industry. In general, under Title II of the NGPA, interstate natural gas pipeline companies are required to pass through certain portions of their acquisition costs for natural gas to industrial users in the form of a surcharge. The statute requires that the ultimate costs of gas to the industrial facility should not exceed the cost of the fuel oil which the facility could use as an alternative.

Pursuant to Title II Of the NGPA, Section 204(e), the Energy Information Administration (EIA) herewith publishes for the Federal Energy Regulatory Commission (FERC) computed natural gas ceiling prices and the high cost gas incremental pricing threshold which are to be effective June 1, 1986. These prices are based on the prices of alternative fuels.

FOR FURTHER INFORMATION CONTACT: Leroy Brown, Jr., Department of Energy, Energy Information Administration, 1000 Independence Avenue, SW., Room BE–034, Washington, DC 20585, Telephone: (202) 252–6077.

Section I

As required by FERC Order No. 50, computed prices are shown for the 48 contiguous States. The District of Columbia's ceiling is included with the ceiling for the State of Maryland. FERC, by an Interim Rule issued on April 2, 1981, in Docket No. RM79–21, revised the methodology for calculating the monthly alternative fuel price ceilings for State regions. Under the revised methodology, the applicable alternative fuel price ceiling published for each of the contiguous States shall be the lower of the alternative fuel price ceiling for the State or the alternative fuel price ceiling for the multistate region in which the State is located.

The price ceiling is expressed in dollars per million British thermal units (Btu's). The method used to determine the price ceilings is described in Section III.

State	Dollars per million Btu's
Alabama [1]	$1.90
Arizona [1]	1.71
Arkansas [1]	1.93
California	1.69
Colorado [2]	1.87
Connecticut [1]	1.86
Delaware [1]	2.04
Florida	1.75
Georgia	1.84
Idaho [1]	1.87
Illinois	1.87
Indiana [1]	1.94
Iowa [1]	2.03
Kansas	1.83
Kentucky [1]	1.84
Louisiana	1.88
Maine [1]	1.85
Maryland [1]	2.04
Massachusetts	1.71
Michigan [1]	1.94
Minnesota [1]	2.03
Mississippi	1.88
Missouri	1.81
Montana [1]	1.87
Nebraska	2.00
Nevada [1]	1.71
New Hampshire [1]	1.86
New Jersey [1]	2.04
New Mexico [1]	1.93
New York	2.00
North Carolina [1]	1.90
North Dakota [1]	2.03
Ohio	1.89
Oklahoma [1]	1.93
Oregon	1.52
Pennsylvania [1]	2.04
Rhode Island [1]	1.86
South Carolina [1]	1.91
South Dakota [1]	2.03
Tennessee [1]	1.90
Texas	1.69
Utah [2]	1.87
Vermont [1]	1.86
Virginia [1]	1.90
Washington [1]	1.71
West Virginia	1.91
Wisconsin [1]	1.94
Wyoming [2]	1.87

[1] Region based price as required by FERC Interim Rule, issued on April 2, 1981, in Docket No. RM–79–21.
[2] Region based price computed as the weighted average price of Regions E, F, G, and H.

Section II.—Incremental Pricing Threshold for High Cost Natural Gas

The EIA has determined that the volume-weighted average price for No. 2 distillate fuel oil landed in the greater New York City Metropolitan area during March 1986 was $21.87 per barrel. The EIA has implemented a procedure to partially compensate for the two-month lag between the end of the month for which data are collected and the beginning of the month for which the incremental pricing threshold becomes effective. The prices found in *Platt's Oilgram Price Report* are given for each trading day in the form of high and low prices for No. 2 fuel oil in Metropolitan New York and Northern New Jersey. A lag adjustment factor was calculated using the average of the low posted price for these two areas for the ten trading days ending May 14, 1986, and dividing that price by the corresponding average price computed from prices published by Platt's for the month of March 1986. This lag adjustment factor was applied to the March price yielding $17.76 per barrel. In order to establish the incremental pricing threshold for high cost natural gas, as identified in the NGPA, Title II, Section 203(a)(7), this price was multiplied by 1.3 and converted to its equivalent in millions of Btu's by dividing by 5.8. Therefore, the incremental pricing threshold for high cost natural gas, effective June 1, 1986, is $3.98 per million Btu's.

Section III.—Method Used to Compute Price Ceilings

The FERC, by Order No. 50, issued on September 29, 1979, in Docket No.

RM79–21, established the basis for determining the price ceilings required by the NGPA. FERC also, by Order No. 167, issued in Docket No. RM81–27 on July 24, 1981, made permanent the rule that established that only the price paid for No. 6 high sulfur content residual fuel oil would be used to determine the price ceilings. In addition, the FERC, by Order No. 181, issued on November 6, 1981, in Docket No. RM81–28, established that price ceilings should be published for only the 48 contingent States on a permanent basis.

A. Data Collected

The following data were required from all companies identified by the EIA as sellers of No. 6 high sulfur content (greater than 1 percent sulfur content by weight) residual fuel oil: for each selling price, the number of gallons sold to large industrial users in the month of January 1986, February 1986, and March 1986.[1] All reports of volume sold and price were identified by the State into which the oil was sold.

B. Method Used to Determine Alternative Price Ceilings

(1) Calculation of Volume-Weighted Average Price

The prices which will become effective June 1, 1986 (shown in Section I) are based on the reported price of No. 6 high sulfur content residual fuel oil, for each of the 48 contiguous States, for each of the 3 months, January 1986, February 1986, and March 1986. Reported prices for sales in January 1986 were adjusted by the percent change in the nationwide volume-weighted average price from January 1986 to March 1986. Prices for February 1986 were similarly adjusted by the percent change in the nationwide volume-weighted average price from February 1986 to March 1986. The volume-weighted 3-month average of the adjusted January 1986 and February 1986, and the reported March 1986 prices were then computed for each State.

(2) Adjustment for Price Variation

States were grouped into the regions identified by the FERC (see Section III.C.). Using the adjusted prices and associated volumes reported in a region during the 3-month period, the volume-weighted standard deviation of prices was calculated for each region. The volume-weighted 3-month average price (as calculated in Section III.B.(1) above) for each State was adjusted downward by two times this standard deviation for the region to form the adjusted weighted average price for the State.

(3) Calculation of Ceiling Price

The lowest selling price within the State was determined for each month of the 3-month period (after adjusting up or down by the percent change in oil prices at the national level as discussed in Section III.B(1) above). The products of the adjusted low price for each month times the State's total reported sales volume for each month were summed over the 3-month period for each State and divided by the State's total sales volume during the 3 months to determine the State's average low price. The adjusted weighted average price (as calculated in Section III.B. (2)) was compared to this average low price, and the higher of the values was selected as the base for determining the alternative fuel price ceiling for each State. For those States which had no reported sales during one or more months of the 3-month period, the appropriate regional volume-weighted alternative fuel price was computed and used in combination with the available State data to calculate the State alternative fuel price ceiling base. The State's alternative fuel price ceiling base was compared to the alternative fuel price ceiling base for the multistate region in which the State is located and the lower of these two prices was selected as the final alternative fuel price ceiling base for the State. The appropriate lag adjustment factor (as discussed in Section III.B.4) was then applied to the alternative fuel price ceiling base. The alternative fuel price (expressed in dollars per gallon) was multiplied by 42 and divided by 6.3 to estimate the alternative fuel price ceiling for the State (expressed in dollars per million Btu's).

There were insufficient sales reported in Region G for the months of January 1986, February 1986, and March 1986. The alternative fuel price ceilings for the States in Region G were determined by calculating the volume-weighted average price ceilings for Region E, Region F, Region G, and Region H.

(4) Lag Adjustment

The EIA has implemented a procedure to partially compensate for the two-month lag between the end of the month for which data are collected and the beginning of the month for which ceiling prices become effective. It was determined that *Platt's Oilgram Price Report* publication provides timely information relative to the subject. The prices found in *Platt's Oilgram Price Report* publication are given for each trading day in the form of high and low prices for No. 6 residual oil in 20 cities throughout the United States. The low posted prices for No. 6 residual oil in these cities were used to calculate a national and a regional lag adjustment factor. The national lag adjustment factor was obtained by calculating a weighted average price for No. 6 high sulfur residual fuel oil for the ten trading days ending May 14, 1986, and dividing that price by the corresponding weighted average price computed from prices published by Platt's for the month of March 1986. A regional lag adjustment factor was similarly calculated for four regions. These are: one for FERC Regions A and B combined; one for FERC Region C; one for FERC Regions D, E, and G combined; and one for FERC Regions F and H combined. The lower of the national or regional lag factor was then applied to the alternative fuel price ceiling for each State in a given region as calculated in Section III.B.(3).

Listing of States by Region

States were grouped by the FERC to form eight distinct regions as follows:

Region A	*Region B*
Connecticut	Delaware
Maine	Maryland
Massachusetts	New Jersey
New Hampshire	New York
Rhode Island	Pennsylvania
Vermont	

Region C	*Region D*
Alabama	Illinois
Florida	Indiana
Georgia	Kentucky
Mississippi	Michigan
North Carolina	Ohio
South Carolina	West Virginia
Tennessee	Wisconsin
Virginia	

Region E	*Region F*
Iowa	Arkansas
Kansas	Louisiana
Missouri	New Mexico
Minnesota	Oklahoma
Nebraska	Texas
North Dakota	
South Dakota	

Region G	*Region H*
Colorado	Arizona
Idaho	California
Montana	Nevada
Utah	Oregon
Wyoming	Washington

Issued in Washington, DC, May 16, 1986.

L.A. Pettis,

Deputy Administrator, Energy Information Administration.

[FR Doc. 86–11620 Filed 5–21–86; 8:45 am]

BILLING CODE 6450-01-M

[1] Large Industrial User—A person/firm which purchases No. 6 fuel oil in quantities of 4,000 gallons or greater for consumption in a business, including the space heating of the business premises. Electric utilities, governmental bodies (Federal, State, or Local), and the military are excluded.

BEST COPY AVAILABLE

Federal Energy Regulatory Commission

[Docket Nos. ER86-483-000 et al.]

Electric Rate and Corporate Regulation Filings; Arkansas Power and Light Co. et al.

May 16, 1986.

Take notice that the following filings have been made with the Commission:

1. Arkansas Power and Light Company

[Docket No. ER86-483-000]

Take notice that on May 13, 1986, Arkansas Power and Light Company (APL) submitted for filing Agreements between APaL and the Cities of Conway, Osceola and West Memphis, Arkansas. The Agreements describe the costs associated with the Grand Gulf Nuclear Plant Unit 1.

APL requests that the Commission waive any requirements with which APL has not already complied.

Comment date: May 29, 1986, in accordance with Standard Paragraph E at the end of this notice.

2. Commonwealth Edison Company

[Docket No. ER86-481-000]

Take notice that Commonwealth Edison Company on May 12, 1986 tendered for filing Amendment No. 1 dated March 31, 1986 to an Agreement dated August 15, 1985 between Commonwealth Edison Company (Commonwealth), Consumers Power Compan; and the Detroit Edison Company (Michigan Companies).

The Amendment No. 1 to August 15, 1985 Agreement extends the period through December 31, 1986 during which Commonwealth would supply Experimental Off-Peak Energy to the Michigan Companies in order to effect economies of operation among the parties. It will be the responsibility of the Michigan Companies to make arrangements for the extension of an existing agreement with a third party to transfer such energy through the system of a third party having interconnections with both Commonwealth and the Michigan Companies.

Copies of the filing were served upon Consumers Power Company, the Detroit Edison Company, the Michigan Public Service Commission and the Illinois Commerce Commission.

Comment date: May 30, 1986, in accordance with Standard Paragraph E at the end of this notice.

3. Iowa Public Service Company

[Docket No. ER86-320-000]

Take notice that Iowa Public Service Company on May 12, 1986, tendered for filing a revision to an executed Firm Power Interchange Service Agreement dated August 21, 1985, whereby Iowa Public Service Company will supply the City of Independence, Missouri with firm electric capacity, commencing June 1, 1986 and continuing through May 21, 2006, which Agreement was tendered for filing with FERC on March 18, 1986. Copies of this filing have been mailed to each of the parties to this Agreement and the Iowa State Commerce Commission and the Missouri Public Service Commission.

An effective date of June 1, 1986 is requested for the revised Agreement, as is a waiver or the Commission's notice requirement, if needed.

Comment date: May 29, 1986, in accordance with Standard Paragraph E at the end of this notice.

4. Kansas Gas and Electric Company

[Docket No. ER86-478-000]

Takle notice that Kansas Gas and Electric Company (KG&E) on May 12, 1986 tendered for filing a proposed Generating Municipal Electric Service Agreement superseding FERC Rate Schedule No. 135 between KG&E and the City of Oxford, Kansas (City).

This filing is necessary because the City desires to cancel its existing Agreement which provides for full requirements service and to began receiving service as a partial requirements customer. KG&E has requested an effective date of May 12, 1986.

Copies of the filing were served upon the City of Oxford, Kansas and the Utilities Division of the Kansas Corporation Commission.

Comment date: May 29, 1986, in accordance with Standard Paragraph E at the end of this notice.

5. Pacific Power & Light Company, an assumed business name of PacifiCorp

[Docket No. ER86-482-000]

Take Notice that Pacific Power & Light Compay (Pacific), as assumed business name of PacifiCorp, on May 12, 1986, tendered for filing, in accordance with Section 35 of the Commission's Regulations, Notices of Cancellation of Service Agreement Nos. 4 and 6 to Pacific's FERC Electric Tariff, Original Volume No. 4 (Tariff) and First Revised Sheet Nos. 10, 11, 13 and 14 superseding Original Sheet Nos. 10, 11, 13 and 14 respectively, of the Tariff.

Pacific states that these Service Agreements have been terminated by mutual agreement or appropriate notice in accordance with the terms of the agreements. The FERC Rate Schedule Designations are as follows:

FERC Rate Schedule Number and Party

Service Agreement No. 4 under FERC Electric Tariff Original Volume No. 4 (Redesignation of Rate Schedule FPC No. 119)—City of Powell, Wyoming

Service Agreement No. 6 under FERC Electric Tariff Original Volume No. 4 (Redesignation of Rate Schedule FERC No. 207)—Svilar Light and Power, Inc.

Pacific requests waiver of Commission's notice requirements to permit Service Agreement No. 4 to terminate on May 21, 1986, and Service Agreement No. 6 to terminate on February 14, 1986, which it claims are the dates of termination of service.

Comment date: May 29, 1986, in accordance with Standard Paragraph E at the end of this notice.

6. Puget Sound Power & Light Company

[Docket No. ER86-449-000]

Take notice that on April 28, 1986 Puget Sound Power and Light Company (Puget) tendered for filing documents demonstrating the calculation of Average System Cost (ASC) for Puget for the Exchange Period effective October 1, 1985 through January 31, 1986.

Comment date: May 27, 1986, in accordance with Standard Paragraph E at the end of this notice.

7. South Carolina Electric & Gas Company

[Docket No. ER86-480-000]

Take notice that South Carolina Electric & Gas Company on May 12, 1986, tendered for filing proposed changes in its September 4, 1973, and August 13, 1973, service agreements with Central Electric Power Cooperative, Inc.

Under the proposed changes, South Carolina Electric and Gas Company proposes to replace the current Exhibit A dated September 4, 1973, for the McClellanville delivery point, the current exhibit A dated September 4 1973, for the John's Island delivery point, the current exhibit A dated September 4, 1973, for the Jedburg delivery point, and the current exhibit A dated August 13, 1973 for the Limehouse delivery point with the revised Exhibits A. These Exhibits A have been changed to reflect the current terms and conditions of service to these delivery points. South Carolina Electric and Gas also proposes to terminate the current Exhibit A dated September 4, 1973 for the Mt. Pleasant delivery point and replace with the Exhibit A for the Hamlin Substation delivery point.

Copies of this filing were served upon Central Electric Power Cooperative, Inc.

Comment date: May 29, 1986, in accordance with Standard Paragraph E at the end of this notice.

8. Tucson Electric Power Company

[Docket No. ER86-479-000]

Take notice that Tucson Electric Power Company ("Tucson") on May 12, 1986, tendered for filing a Short Term Energy Agreement between Tucson and Southern California Edison Company ("Edison"). The primary purpose of this Agreement is to provide the terms and conditions relating to the sale by Tucson and the purchase by Edison of energy between May 1, 1986 and midnight, April 30, 1987. Tucson states that copies of the filing were served upon Edison.

Comment date: May 29, 1986, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-11574 Filed 5-21-86; 8:45 am]

BILLING CODE 6717-01-M

[Project No. 5068-001 et al.]

Hydroelectric Applications [Vermont Public Power Supply Authority et al.]; Applications Filed With the Commission

Take notice that the following hydroelectric applications have been filed with the Federal Energy Regulatory Commission and are available for public inspection:

1 a. Type of Application: Surrender of License.

b. Project No.: 5068-001.

c. Date Filed: December 20, 1985.

d. Applicants: Vermont Public Power Supply Authority.

e. Name of Project: North Troy Project.

f. Location: On the Missisquoi River in Orleans County, Vermont.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. Robert E. Howland, Vermont Public Power Supply Authority, P.O. Box 425, Williston, VT 05495, (802) 878-5274.

i. Comment Date: June 26, 1986.

j. Description of Proposed Surrender: The proposed project would have consisted of: (1) An existing concrete overflow dam, with a height of 12 feet and a length of 80 feet; (2) the existing reservoir having a storage capacity of 25 acre-feet and a dam crest elevation of 536.7 feet (NGVD); (3) a proposed powerhouse with one generating unit with a capacity of 600 kW; (4) a new tailrace channel; and (5) appurtenant facilities.

The Applicant estimates the average annual energy would have been 2,200,000 kWh. Vermont Public Power Supply Authority would have wheeled all of the project's power over Citizens Utilities lines to its member utilities.

k. This notice also consists of the following standard paragraphs: B, C, & D2.

2 a. Type of Application: Transfer of License (Minor).

b. Project No: 5297-003.

c. Date Filed: March 20, 1986.

d. Applicants: Forte Brothers, Inc., and Manville Hydro Co., Inc.

e. Name of Project: Manville Dam.

f. Location: On the Blackstone River in Providence County, Rhode Island.

g. Filed Pursuant: Section 9 of the Federal Power Act sections 791(a)-825(r).

h. Contact Person: Mr. Michael A. Kelly, Adler Pollock & Sheehan, Inc., 2300 Hospital Trust Power, Providence, RI 02903, (401) 333-3400.

i. Comment Date: June 16, 1986.

j. Description of Project: On August 29, 1983, a minor license was issued to the Forte Brothers, Inc. to construct, operate, and maintain the Manville Dam Project No. 5297. Forte Brothers, Inc. intends to sell its interest in the project to the Manville Hydro Company, Inc. For that reason, the Forte Brothers, Inc. and the Manville Hydro Company, Inc. filed a request that the project license be transferred to the Manville Hydro Company, Inc.

k. This notice also consists of the following standard paragraphs: B and C.

3 a. Type of Application: Conduit Exemption.

b. Project No: 9701-000.

c. Date Filed: December 20, 1985.

d. Applicant: Irvine Ranch Water District.

e. Name of Project: Sand Canyon.

f. Location: On a conduit used to supply domestic and irrigation water to the Sand Canyon pipeline in Block 119 of Irvine's Subdivision in Orange County, California.

g. Filed Pursuant to: Section 408 of the Energy Security Act of 1980 (16 U.S.C. 2705 and 2708 as amended).

h. Contact Person: Mr. Arthur E. Bruington, General Manager, Irvine Ranch Water District, 16802 Bardeen Avenue, Irvine, CA 92715, (714) 838-1223.

i. Comment Date: June 16, 1986.

j. Description of Project: The proposed project would use an existing conduit from the ST-03 turnout of the Municipal Water District of Orange County Allen-McColloch pipeline and would consist of a powerhouse containing one generating unit having a capacity of 500 kW and an average annual generation of 1.9 GWh.

k. Purpose of Exemption: An exemption, if issued, gives an Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the exemptee from permit or license applicants that would seek to take or develop the project.

l. Purpose of Project: Project power would be sold.

m. This notice also consists of the following standard paragraphs: A3, A9, B, C, and D3b.

4 a. Type of Application: Transfer of License.

b. Project No.: 2593-006.

c. Date Filed: April 7, 1986.

d. Applicant: Beaver Falls Power Company (licensee) and Missisquoi Associates (transferee).

e. Name of Project: Beaver Falls.

f. Location: On the Missisquoi River in Lewis County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. Contact Person: Mr. John P. Borgwardt, Boise Cascade Corporation, P.O. Box 1414, Portland, OR 97207, (503) 224-7250.

i. Comment Date: June 16, 1986.

j. Description of Transfer:

On April 7, 1986, Beaver Falls Power Company (licensee), and Missisquoi Associates (transferee), filed a joint application for transfer of a minor license for the Beaver Falls Project No. 2593.

The purpose of the proposed transfer of the license is to facilitate the financing of the Missisquoi Associates' Sheldon Springs Project No. 7186. The transferee states that the positive cash flow from the Beaver Falls project will enable Missisquoi Associates to expedite construction of its Sheldon Springs project.

No changes to the operation of the project would occur as a result of the transfer. The transferee has proposed to operate the existing project in accordance with the license. The

transferee states that it would comply with all the terms and the conditions of the license.

k. This notice also consists of the following standard paragraphs: B & C.

5 a. Type of Application: Transfer of License.

b. Project No.: 2823–002.

c. Date Filed: April 7, 1986.

d. Applicant: Beaver Falls Power Company (licensee) and Missisquoi Associates (transferee).

e. Name of Project: Lower Beaver Falls.

f. Location: On the Missisquoi River in Lewis County, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. John P. Borgwardt, Boise Cascade Corporation, P.O. Box 1414, Portland, OR 97207 (503) 224–7250.

i. Comment Date: June 16, 1986.

j. Description of Transfer:

On April 7, 1986, Beaver Falls Power Company (licensee), and Missisquoi Associates (transferee), filed a joint application for transfer of a minor license for the Lower Beaver Falls Project No. 2823.

The purpose of the proposed transfer of the license is to facilitate the financing of the Missisquoi Associates' Sheldon Springs Project No. 7186. The transferee states that the positive cash flow from the Lower Beaver Falls project will enable Missisquoi Associates to expedite construction of its Sheldon Springs project.

No changes to the operation of the project would occur as a result of the transfer. The transferee has proposed to operate the existing project in accordance with the license. The transferee states that it would comply with all the terms and the conditions of the license.

k. This notice also consists of the following standard paragraphs: B & C.

6 a. Type of Application: Exemption.

b. Project No: 9691–000.

c. Date Filed: December 18, 1985.

d. Applicant: Matthew W. Foley and Elizabeth E. Rapalee.

e. Name of Project: Wadhams Hydroelectric Project.

f. Location: On the Boquet River in Essex County, New York.

g. Filed Pursuant to: Section 408 of the Energy Security Act of 1980, 16 U.S.C. 2705 and 2708, as amended.

h. Contact Person: Matthew W. Foley or Elizabeth E. Rapalee, Riverat Glass & Electric, Church Street, Wadhams, NY 12990, (518) 962–4514.

i. Comment Date: June 20, 1986.

j. Description of Project: The proposed project would consist of: (1) The existing 140-foot-long, reinforced concrete dam with a maximum height of 7 feet; (2) the the spillway crest elevation of 342.6 feet msl is surmounted by 6 to 12 inches of flashboards; (3) the existing 15-acre reservoir with 75 acre-feet of storage capacity; (4) a proposed 400-foot-long, 66-inch-diameter penstock; (5) an existing powerhouse which contains two generating units with a combined generating capacity of 410-kW; (6) the proposed installation of a 150-kW generating unit into the powerhouse thereby increasing the total installed generation capacity to 560-kW; (7) an existing 70-foot-long, 4.8 kV transmission line connection; and (8) appurtenant facilities.

k. The Applicant intends to sell the power output to the Niagra Mohawk Power Corporation.

l. This notice also consists of the following standard paragraphs: A3, A9, B, C, D, 3A.

m. Purpose of Exemption: An exemption, if issued, gives the Exemptee priority of control, development, and operation of the project under the terms of the exemption from licensing, and protects the Exemptee from permit or license applicants that would seek to take or develop the project.

7 a. Type of Application: Amendment of License.

b. Project No.: 803–014.

c. Date Filed: December 24, 1985.

d. Applicant: Pacific Gas and Electric Company.

e. Name of Project: DeSabla—Centerville Water Power Project.

f. Location: On Butte Creek and West Branch Feather River, in Butte County, California.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Stephen P. Reynolds Vice-President, Rates, Pacific Gas & Electric Company, 77 Beale Street, Room 1065, San Francisco, CA 94106.

i. Comment Date: June 19, 1986.

j. Description of Project: The proposed amendment to Pacific Gas and Electric Company's (PG&E) existing licensed Project No. 803 would consist of:

A. DeSabla Powerhouse Unit 2 Development comprising: (1) A 24-inch-diameter, 125-foot-long steel penstock; (2) a 45-inch-diameter, 11,200-foot-long steel or concrete siphon pipeline; (3) adding one generating unit with an installed capacity of 4.2 MW to the existing DeSabla Powerhouse operating under a head of 1,540 feet; and (4) appurtenant facilities.

B. Centerville Powerhouse Development comprising: (1) Replacing the existing penstock with a 66-inch-diameter, 2,600-foot-long steel penstock; (2) replacing the existing Centerville Powerhouse with a new Centerville Powerhouse with one generating unit with an installed capacity of 8.5 MW operating under a head of 590 feet; and (3) appurtenant facilities.

The project cost of the developments has been estimated to be about $24.9 million. No additional recreational facilities are proposed by PG&E.

k. This notice also consists of the following standard paragraphs: B and C:

8 a. Type of Application: Surrender of License.

b. Project No.: 2930–010.

c. Date Filed: April 4, 1986.

d. Applicant: Idaho Power Company.

e. Name of Project: North Fork Payette River.

f. Location: On the North Fork of the Payette River in Boise, Valley, and Gem Counties, Idaho.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Contact Person: Mr. Nicolas R. Ysursa, Attorney, Idaho Power Company, Box 70, Boise, ID 83707, (208) 383–2878.

i. Comment Date: June 20, 1986.

j. Description of Project: The project would have consisted of two developments. The Ferncroft Development consists of: (1) A 36-foot-high concrete gravity diversion dam, having a crest length of 110 feet at elevation of 4,458 feet, impounding a reservoir with a storage capacity of about 17 acre-feet; (2) a gated spillway, with one 30-foot-long, 10-foot-high overflow flap gate and one 20-foot-long, 25-foot-high radial gate; (3) a 16-foot-horseshoe shaped concrete-lined power tunnel extending 38,000 feet from its intake to an underground surge-tank; (4) a 12-foot-diameter vertical steel penstock with a 920-foot vertical drop and a 200-foot horizontal length; (5) a 180-foot-long, 100-foot-high underground powerhouse containing three identical generating units, each rated at 66.4 MW; and (6) a 3,600-foot-long, 20-foot-wide tailrace tunnel.

The Banks Development consists of: (1) A 36-foot-high concrete gravity diversion dam, having a crest length of 110 feet at elevation of 3,431 feet, impounding a reservoir with a storage capacity of about 17 acre-feet; (2) a gated spillway with one 30-foot-long, 10-foot-high overflow flap gate and one 20-foot-long, 25-foot-high radial gate; (3) a 16-foot horseshoe shaped concrete-lined power tunnel extending 22,000 feet from its intake to an underground surge-tank; (4) a 12-foot-diameter vertical steel penstock with a 465-foot vertical drop and a 200-foot horizontal length; (5) a 180-foot-long, 100-foot-high underground powerhouse containing three identical

generating units, each rated 36.9 MW; and (6) a 760-foot-long, 20-foot-wide tailrace tunnel.

The project would have also included (1) 13.8-kV generator leads for the Ferncroft Unit; (2) three (3) three-phase 13.8/230-kV, 75 MVA step-up transformers; (3) 13.8-kV generator leads for the Banks Unit; (4) one three-phase 13.8/230-kV, 120 MVA step-up transformer; (5) a 10-mile-long, 230-kV transmission line from the Ferncroft Unit Switchyard to the Banks Unit Switchyard; and (6) a 24-mile-long, 230-kV transmission line from the Banks Unit Switchyard to the proposed Shellrock Switching Station.

The licensee states that its evaluation of the need for power indicates that construction and operation of the project is not feasible at this time. Therefore, the licensee requests that its license be terminated.

k. This notice also consists of the following standard paragraphs: B, C and D2.

Standard Paragraphs

A3. Development Application—Any qualified development applicant desiring to file a competing application must submit to the Commission, on or before the specified comment date for the particular application, a competing development application, or a notice of intent to file such an application. Submission of a timely notice of intent allows an interested person to file the competing development application no later than 120 days after the specified comment date for the particular application. Applications for preliminary permit will not be accepted in response to this notice.

A9. Notice of intent—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, include an unequivocal statement of intent to submit, if such an application may be filed, either (1) a preliminary permit application or (2) a development application (specify which type of application), and be served on the applicant(s) named in this public notice.

B. *Comments, Protests, or Motions to Intervene*—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of the Rules of Practice and Procedure, 18 CFR 385.210, 385.211, 385.214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. *Filing and Service of Responsive Documents*—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST" or "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing is in response. Any of the above named documents must be filed by providing the original and the number of copies required by the Commission's regulations to: Kenneth F. Plumb, Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426. An additional copy must be sent to: Mr. Fred E. Springer, Director, Division of Project Management, Federal Energy Regulatory Commission, Room 203–RB, at the above address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D2. *Agency Comments*—Federal, State, and local agencies are invited to file comments on the described application. (A copy of the application may be obtained by agencies directly from the Applicant.) If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3a. *Agency Comments*—The U.S. Fish and Wildlife Service and the State Fish and Game agency(ies) are requested, for the purposes set forth in section 408 of the Energy Security Act of 1980, to file within 60 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or to otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide any comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. If an agency does not file comments within 60 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D3b. *Agency Comments*—The U.S. Fish and Wildlife Service and the State Fish and Game agency(ies) are requested, for the purposes set forth in section 30 of the Federal Power Act, to file within 45 days from the date of issuance of this notice appropriate terms and conditions to protect any fish and wildlife resources or otherwise carry out the provisions of the Fish and Wildlife Coordination Act. General comments concerning the project and its resources are requested; however, specific terms and conditions to be included as a condition of exemption must be clearly identified in the agency letter. If an agency does not file terms and conditions within this time period, that agency will be presumed to have none. Other Federal, State, and local agencies are requested to provide comments they may have in accordance with their duties and responsibilities. No other formal requests for comments will be made. Comments should be confined to substantive issues relevant to the granting of an exemption. It an agency does not file comments within 45 days from the date of issuance of this notice, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Dated: May 19, 1986.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86–11575 Filed 5–21–86; 8:45 am]

BILLING CODE 6717–01–M

[Docket Nos. CP74–192–009 et al.]

Natural Gas Certificate Filings; Florida Gas Transmission Co. et al.

Take notice that the following filings have been made with the Commission:

1. Florida Gas Transmission Company

[Docket No. CP74–192–009]

May 15, 1986.

Take notice that on April 9, 1986, as supplemented on April 17, 1986 and April 23, 1986, Florida Gas Transmission Company (Petitioner), P.O. Box 1188, Houston, Texas 77001, filed in Docket No. CP74–192–009 a petition to amend the authorization issued in Docket Nos. CP–74–192–005 and CP74–192–007, *et al.*, Opinion Nos. 144 and 144–A, so as to be authorized to construct and operate

approximately 51 miles of pipeline and related compressor station modifications necessary to complete or "stitch" Petitioner's 30-inch and 26-inch system between Baton Rouge, Louisiana, and Miami, Florida, and to vacate the remaining authorizations issued in Opinion Nos. 144 and 144–A, all as more fully set forth in the petition on file with the Commission and open to public inspection.

Petitioner states that the Commission's Opinion Nos. 144 and 144–A authorized the

(a) Construction and operation of facilities to complete or "stitch" its 30-inch and 26-inch pipeline system;

(b) Construction and operation of additional 30-inch loops necessary to provide its system with an annual average capacity of 725,000 Mcf per day;

(c) Abandonment from natural gas service of that portion of Petitioner's 24-inch line between Baton Rouge, Louisiana, and Port Everglades, Florida, by transfer to Petitioner's affiliate, Transgulf Pipeline Company (Transgulf), for use in the transportation of liquid petroleum products (LPP) from the Gulf Coast to various points in Florida; and

(d) Variant accounting and rate base treatment, as detailed in the Commission's opinions.

Petitioner states that the Transgulf LPP conversion project has been abandoned and that in light of the cancellation of that project, it requests the Commission to vacate items (b), (c), and (d) above. Petitioner is currently seeking authority to perform only the acts contemplated by item (a). Petitioner asserts that this would involve the construction of approximately 51 miles of pipeline and related modifications to piping at four compressor stations at an approximate cost of $28,400,000. The addition of the "stitching" facilities in item (a) to Petitioner's current system would add capacity of approximately 100,000 Mcf per day thus raising Petitioner's total system capacity to 825,000 Mcf per day, it is stated. This additional capacity would be utilized to serve new and incremental demand for natural gas in Petitioner's Florida markets, it is asserted.

Furthermore, Petitioner states that the Commission adopted as part of its previous authorization twenty-eight environmental conditions which were listed in 13 FERC ¶ 63,048 at 65,279–80. Petitioner asserts as a result of the instant request to vacate and amend Opinion Nos. 144 and No. 144–A that the environmental conditions Nos. 4, 8 thru 12, 25 and 26 as well as the portion of condition No. 6 pertaining to the Tangipahoa River crossing should remain in effect; the other environmental conditions listed would become moot upon issuance of the requested amended certificate, it is asserted.

Comment date: June 5, 1986, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

2. East Tennessee Natural Gas Company

[Docket No. CP86–479–000]

May 19, 1986.

Take notice that on April 23, 1986, East Tennessee Natural Gas Company (Applicant), P.O. Box 10245, Knoxville, Tennessee 37939–0245, filed in Docket No. CP86–479–000 a request pursuant to §§ 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205 and 157.212) that Applicant be allowed to establish, construct, and operate new delivery points for Tennessee-Virginia Energy Corporation (Tennessee-Virginia) and Roanoke Gas Company (Roanoke) under the certificate issued in Docket No. CP82–412–000, pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Applicant proposes to establish the new delivery points for Tennessee-Virginia, on its Johnson City-Elizabethton lateral in the Boone's Creek community in Washington County, Tennessee; and the new delivery point for Roanoke in the Cave Springs community on Applicant's 3300 Line in Roanoke County, Virginia. The new delivery points would enable Tennessee-Virginia and Roanoke to serve the Boone's Creek area and southwest Roanoke County, respectively, two areas which presently do not have natural gas service. It is stated that the cost of all of the proposed facilities is estimated to be $57,800 and would be paid from funds on hand. It is further stated that all gas to be sold through the proposed new facilities would be within existing contract volume and/or curtailment period quantity entitlements.

Comment date: July 3, 1986, in accordance with Standard Paragraph G at the end of this notice.

3. Southern Natural Gas Company

[Docket No. CP86–458–000]

May 19, 1986.

Take notice that on April 18, 1986, Southern Natural Gas Company (Applicant), P.O. Box 2563, Birmingham, Alabama 35202–2563, filed in Docket No. CP86–458–000 an application pursuant to section 7 of the Natural Gas Act for a limited-term certificate of public convenience and necessity with pre-granted abandonment, authorizing the transportation of natural gas for Bickerstaff Clay Products Company, Inc. (Bickerstaff), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport up to 2.2 billion Btu of natural gas per day for Bickerstaff, on an interruptible basis, for a one-year term. It is indicated that Bickerstaff would purchase the gas from SNG Trading Inc. (SNG Trading). Applicant states that it would receive the gas for the account of Bickerstaff at various existing points on Southern's system in East Plaquemines Parish, Louisiana, and in Walthall County, Mississippi. Applicant proposes to redeliver equivalent volumes of gas, less 3.25 percent for fuel and company-use gas, to Bickerstaff at the Brickyard Meter Station and Dixieland Meter Station in Russell County, Alabama.

Applicant proposes to charge Bickerstaff a transportation rate of 64.9 cents per million Btu of gas redelivered by Southern. In addition Applicant proposes to collect the GRI surcharge of 1.35 cents per Mcf.

Applicant states that the proposed transportation arrangement would enable Bickerstaff to diversity its natural gas supply sources and to obtain gas at competitive prices. It is alleged that Applicant's entire system will benefit by retaining Bickerstaff as a customer on the system. In addition, Applicant will obtain take-or-pay relief of the gas Bickerstaff may obtain from its suppliers.

Applicant also requests flexible authority to add delivery points in the event that Bickerstaff obtains alternative sources of supply. It is stated that the redelivery point, the recipient and the maximum daily transportation volume would remain unchanged. It is further stated that Applicant would file periodic reports providing certain information with regard to the addition of any delivery points.

Comment date: June 9, 1986, in accordance with Standard Paragraph F at the end of this notice.

4. Southern Natural Gas Company

[Docket No. CP86–459–000]

May 19, 1986.

Take notice that on April 18, 1986, Southern Natural Gas Company (Applicant), P.O. Box 2563, Birmingham, Alabama 35202–2563, filed in Docket No. CP86–459–000 an application pursuant to section 7 of the Natural Gas Act for a limited-term certificate of public convenience and necessity with pre-

granted abandonment, authorizing the transportation of natural gas for Atlanta Gas Light Company (Atlanta), acting as agent for Bickerstaff Clay Products Company, Inc. (Bickerstaff), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport up to 1.5 billion Btu of natural gas per day for Atlanta, as agent for Bickerstaff, on an interruptible basis, for a one-year term. It is indicated that Bickerstaff would purchase the gas from SNG Trading Inc. (SNG Trading). Applicant states that it would receive the gas for the account of Bickerstaff at various existing points on Southern's system in Desoto Parish, Louisiana; Shelby County, Texas; East Plaquemines Parish, Louisiana; and Walthall County, Mississippi. Applicant proposes to redeliver equivalent volumes of gas, less 3.25 percent for fuel and company-use gas, to Atlanta at the existing Atlanta Area Delivery Point.

Applicant proposes to charge Atlanta a transportation rate of 48.2 cents per million Btu where the aggregate of the volumes transported by Applicant for Atlanta under any and all transportation agreements between Applicant and Atlanta, when added to the volumes of gas delivered under Applicant's Rate Schedule OCD, does not exceed Atlanta's daily contract demand from Applicant. For those volumes that exceed Atlanta's daily contract demand, Applicant proposes to charge 77.6 cents per million Btu. In addition Applicant proposes to collect the GRI surcharge of 1.35 cents per Mcf.

Applicant states that the proposed transportation arrangement would enable Bickerstaff to diversify its natural gas supply sources and to obtain gas at competitive prices. In addition, Applicant indicates that it would obtain take-or-pay credit on all volumes transported under the arrangement.

Applicant also requests flexible authority to add delivery points in the event that Bickerstaff obtains alternative sources of supply. It is stated that the redelivery point, the recipient and the maximum daily transportation volume would remain unchanged. It is further stated that Applicant would file periodic reports providing certain information with regard to the addition of any delivery points.

Comment date: June 9, 1986, in accordance with Standard Paragraph F at the end of this notice.

5. Southern Natural Gas Company

[Docket No. CP86-460-000]

May 19, 1986.

Take notice that on April 18, 1986, Southern Natural Gas Company (Applicant), P.O. Box 2563, Birmingham, Alabama 35202-2563, filed in Docket No. CP86-460-000 an application pursuant to section 7 of the Natural Gas Act for a limited-term certificate of public convenience and necessity with pre-granted abandonment, authorizing the transportation of natural gas for the Utilities Board of City of Phenix City, Alabama (Phenix City), acting as agent for Bickerstaff Clay Products Company, Inc. (Bickerstaff), all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to transport on an interruptible basis, up to 1.5 billion Btu of natural gas per day for Phenix City, as agent for Bickerstaff for a one-year term. It is indicated that Bickerstaff would purchase the gas from SNG Trading Inc. (SNG). Applicant states that it would receive the gas for the account of Bickerstaff at various existing points on Southern's system in Desoto Parish and East Plaquemines Parish, Louisiana, Walthall County, Mississippi, and Shelby County, Texas. Applicant proposes to redeliver equivalent volumes of gas, less 3.25 percent for fuel and company-use gas, at an existing delivery points to Phenix City at the Phenix City Meter Stations No. 1, 2 and 3 in Russell County, Alabama.

Applicant proposes to charge Phenix City a transportation rate of 39.9 cents per million Btu where the aggregate of the volumes transported by Applicant to Phenix City under any and all transportation agreements between Applicant and Phenix City, when added to the volumes of gas delivered under Applicant's Rate Schedule OCD, does not exceed Atlanta's daily contract demand from Applicant. For those volumes that exceed Phenix City's daily contract demand, Applicant proposes to charge 64.9 cents per million Btu. In addition Applicant proposes to collect the GRI surcharge of 1.35 cents per Mcf.

Applicant states that the proposed transportation arrangement would enable Phenix City to diversify its natural gas supply sources and to obtain gas at competitive prices. In addition, Applicant indicates that it would obtain take-or-pay credit on all volumes transported under the arrangement.

Applicant also requests flexible authority to add delivery points in the event that Phenix City obtains alternative sources of supply. It is stated that at the redelivery point, the recipient and the maximum daily transportation volume would remain unchanged. It is further stated that Applicant would file a report providing certain information with regard to the addition of any delivery points.

Comment date: June 9, 1986, in accordance with Standard Paragraph F at the end of this notice.

6. Southern Natural Gas Company

[Docket No. CP86-461-000]

May 19, 1986.

Take notice that on April 18, 1986, Southern Natural Gas Company (Applicant), P.O. Box 2563, Birmingham, Alabama 35202-2563, filed in Docket No. CP86-461-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Atlanta Gas Light Company (Atlanta), acting as agent for Packaging Corporation of America (Packaging), and for permission and approval to abandon such service, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant requests authorization to transport on an interruptible basis up to 2,000 MMBtu of natural gas per day for Atlanta for a term of one year from the date of any order issued herein. It is stated that Packaging would purchase the gas from Consolidated Fuel Supply, Inc. Applicant states that Atlanta would cause the gas to be delivered to Southern at various existing points of interconnection located in Breton Sound Area and Main Pass Area, offshore Louisiana, and in DeSoto and Jefferson Parishes, Louisiana. Applicant states that it would redeliver the gas to Atlanta at the Macon Area Delivery Point in Georgia, less 3.25 percent for compressor fuel and company-use gas (including system unaccounted-for gas losses); less any and all shrinkage, fuel or loss resulting from or consumed in the processing of gas; and less Atlanta's *pro-rata* share of any gas delivered for Atlanta's account which is lost or vented for any reason.

Applicant states that it would charge Atlanta each month the following transportation rate:

(a) Where the aggregate of the volumes transported and redelivered by Applicant on any day to Atlanta under any and all transportation agreements with Applicant, when added to the volumes of gas delivered under Southern's Rate Schedule OCD on such day to Atlanta do not exceed the daily contract demand of Atlanta, the

transportation rate would be 40.2 cents per MMBtu; and

(b) Where the aggregate of the volumes transported and redelivered by Applicant on any day to Atlanta under any and all transportation agreements with Applicant, when added to the volumes of gas delivered under Applicant's Rate Schedule OCD on such day to Atlanta exceed the daily contract demand of Atlanta, the transportation rate for the excess volumes would be 77.6 cents per MMBtu.

Applicant would collect from Atlanta the GRI surcharge of 1.35 cents per Mcf or any such other GRI funding unit or surcharge as hereafter prescribed.

Applicant also requests flexible authority to provide transportation from additional delivery points in the event that Packaging would obtain alternative sources of supply of natural gas. The additional transportation service would be to the same redelivery point, the same recipient, and within the same maximum daily transportation volume of gas as stated in the application. Applicant would file periodic reports providing certain information with regard to the addition of any delivery points.

Comment date: June 9, 1986, in accordance with Standard Paragraph F at the end of this notice.

7. Southern Natural Gas Company

[Docket No. CP86-406-000]

May 19, 1986.

Take notice that on April 21, 1986, Southern Natural Gas Company (Southern), P.O. Box 2563, Birmingham, Alabama 35202-2563, filed in Docket No. CP86-406-000 an application pursuant to section 7(c) of the Natural Gas Act for a limited-term certificate of public convenience and necessity authorizing it to transport gas on behalf of the Utilities Board of the City of Sylacauga, Alabama (Sylacauga), all are more fully set forth in the application which is on file with the Commission and open to public inspection.

Southern proposes to transport natural gas for Sylacauga in accordance with the terms and conditions of a transportation agreement between Sylacauga and Southern dated April 14, 1986. Southern states it has agreed to transport on an interruptible basis up to 3 billion Btu of gas per day purchased by Sylacauga from SNG Trading Inc., subject to the receipt of all necessary governmental authorizations. Southern requests that the Commission issue a limited-term certificate for a term expiring one year from the date of the Commission's order issuing the requested authorization.

Southern states that the transportation agreement provides for Sylacauga to cause natural gas to be delivered to Southern for transportation at various existing points on Southern's contiguous pipeline system in the Breton Sound and East Cameron Areas, offshore Louisiana, and St. Mary, St. Martin, and St. Bernard Parishes, Louisiana. Southern would redeliver to Sylacauga at the Sylacauga Meter Station, Talladega County, Alabama, an equivalent of gas less 3.25 percent of such amount which would have been deemed to have been used as compressor fuel and company-use gas (including system unaccounted-for gas losses); less any and all shrinkage, fuel or loss resulting from or consumed in the processing of gas; and less Sylacauga's pro-rate share of any gas delivered for Sylacauga's account which is lost or vented for any reason.

Southern states that Sylacauga has agreed to pay Southern each month the following tranportation rate:

(a) Where the aggregate of the volumes transported and redelivered by Southern on any day to Sylacauga under any and all transportation agreements with Southern, when added to the volumes of gas delivered under Southern's Rate Schedule OCD on such day to Sylacauga do not exceed the daily contract demand of Sylacauga, the transportation rate would be 39.9 cents per MMBtu; and

(b) Where the aggregate of the volumes transported and redelivered by Southern on any day to Sylacauga under any and all transportation agreements with Southern, when added to the volumes of gas delivered under Southern's Rate Schedule OCD on such day to Sylacauga exceed the daily contract demand of Sylacauga, the transportation rate for the excess volumes would be 64.9 cents per MMBtu.

Additionally, Southern would collect from Sylacauga the GRI surcharge of 1.35 cents per Mcf or any such other GRI funding unit or surcharge as hereafter prescribed.

Southern also requests flexible authority to provide transportation from additional delivery points in the event Sylacauga obtains alternative sources of supply of natural gas. The additional transportation service would be to the same redelivery point, the same recipient, and within the maximum daily transportation volume of gas as stated in the application. Furthermore, Southern would file a report providing information with regard to the addition of any delivery points.

Southern states that the transportation arrangement would enable Sylacauga to diversity its natural gas supply sources and to obtain gas at competitive prices. Also, Southern would be able to obtain take-or-pay relief on the gas Sylacauga may obtain from Southern's suppliers. Southern explains it would release for resale by others gas in NGPA Categories 102(c), 103 and 107. Additionally Southern would release section 102(d) gas subject to receipt of appropriate abandonment authorization.

Southern states that Sylacauga has advised Southern that the gas to be transported pursuant to the transportation agreement would be used to supply certain of its industrial customers who have the installed capability to utilize fuel oil. It is asserted that because of the recent precipitous decline in the prices of fuel oil, many of these industrial customers have switched to fuel oil for substantially all of their energy requirements. It is stated Sylacauga has advised Southern that unless it is able to obtain the transportation services for which authorization is requested by Southern, it would be unable to offer natural gas to these customers at a price that is competitive with fuel oil. It is further stated that, as a result, these industria customers would continue to utilize fuel oil to the maximum extent possible causing a corresponding loss of throughput on Southern's system. Southern avers, to the extent the transportation service proposed herein would enable Sylacauga, and ultimately its customers, to obtain access to competitively priced natural gas, the entire Southern system would benefit by retaining Sylacauga as a customer on the system.

Comment date: June 9, 1986, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in

any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if on motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is field and not withdrawn within 30 days after the time allowed for flining a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. QF86-715-000 et al.]

Small Power Production and Cogeneration Facilities; Qualifying Status; Certificate Applications, Etc.; Gerald L. & Lois R. Sims et al.

Comment date: Thirty days from publication in the Federal Register, in accordance with Standard Paragraph E at the end of this notice.

May 19, 1986.Q04

Take notice that the following filings have been made with the Commission.

1. Gerald L. & Lois R. Sims

[Docket No. QF86-715-000]

On May 2, 1986, Gerald L. & Lois R. Simms (Applicant), of 6907 216th Street, S.W., Lynnwood, Washington 98036, submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The 1.6 megawatts facility (FERC P. 7182) will be located on the Davis Creek, Lewis County, Washington.

A separate application is required for a hydroelectric project license, preliminary permit or exemption from licensing. Comments on such applications are requested by separate public notice. Qualifying status serves only to establish eligibility for benefits provided by PURPA, as implemented by the Commission's regulations, 18 CFR Part 292. It does not relieve a facility of any other requirements of local, State or Federal law, including those regarding siting, construction, operation, licensing and pollution abatement.

2. SNC Hydro Inc.

[Docket No. QF86-696-001]

On April 25, 1986, SNC Hydro Inc. (Applicant), of 125 Wolf Road, Albany, New York 12205, submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The 1,230 kilowatt hydroelectric facility (FERC P. 7153) will be located on Fish Creek, Saratoga County, New York.

A separate application is required for a hydroelectric project license, preliminary permit or exemption from licensing. Comments on such applications are requested by separate public notice. Qualifying status serves only to establish eligibility for benefits provided by PURPA, as implemented by the Commission's regulations, 18 CFR Part 292. It does not relieve a facility of any other requirements of local, State or Federal law, including those regarding siting, construction, operation, licensing and pollution abatement.

3. Waycot Systems North Carolina, Inc.

[Docket No. QF86-714-000]

On May 5, 1986, Waycot Systems North Carolina, Inc. (Applicant), of 2021 K. Street, NW., Washington, DC 20006 submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The facility will be located in Washington County, North Carolina. The net electric power production capacity will be 13 megawatts. The primary energy source will be biomass in the form of wood chips. Pre-treated #6 fuel oil and diesel fuel will be used for trim combustion and combustor pre heating (5.6%, 25% of the total annual heat input to the facility respectively). The facility will not utilized natural gas or coal.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CI86-413-000]

Application of ANR Gathering Company for Blanket Certificate of Public Convenience and Necessity and for order Permitting and approving Pre-Granted Abandonment and Request for Temporary Authority

May 19, 1986.

Take notice that on May 6, 1986, ANR Gathering Company (Gathering) applied for a blanket certificate of public convenience and necessity authorizing (1) Gathering to make sales for resale in interstate commerce of gas subject to the Commission's Natural Gas Act (NGA) jurisdiction, (2) authorizing sales of natural gas by others to Gathering for resale in interstate commerce, (3) authorizing sales for resale of natural gas by others through Gathering acting as their agent, and (4) authorizing the pregranted abandonment of all sales for resale for which sales certificate

authority is requested herein. Gathering also requests temporary authority to undertake the services set forth herein. This application is filed pursuant to Sections 4 and 7 of the Natural Gas Act (NGA) and Part 157 of Title 18 of the Code of Federal Regulations.

The certificate and abandonment authority sought herein, if granted, will enable Gathering to sell natural gas it purchases from various producers or for whom it has authority to act, to various purchasers.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 3, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.211, .214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. C186-418-000]

Application of ANR Supply Company for Blanket Certificate of Public Convenience and Necessity and for Order Permitting and Approving Pre-Granted Abandonment and Request for Temporary Authority

May 19, 1986.

Take Notice that on May 9, 1986, ANR Supply Company (Supply) applied for a blanket certificate of public convenience and necessity authorizing (1) Supply to make sales for resale in interstate commerce of gas subject to the Commission's Natural Gas Act (NGA) jurisdiction, (2) authorizing sales of natural gas by others to Supply for resale in interstate commerce, (3) authorizing sales for resale of natural gas by others through Supply acting as their agent, and (4) authorizing the pregranted abandonment of all sales for resale for which sales certificate authority is requested herein. Supply also requests temporary authority to undertake the services set forth herein. This application is filed pursuant to Sections 4 and 7 of the Natural Gas Act (NGA) and Part 157 of Title 18 of the Code of Federal Regulations.

The certificate and abandonment authority sought herein, if granted, will enable Supply to sell natural gas it purchases from various producers or for whom it has authority to act, to various purchasers.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 3, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

BILLING CODE 6717-01-M

[Docket No. C186-425-000]

Application of Energy Marketing Exchange, Inc. To Amend Blanket Certificate of Public Convenience and Necessity and for an Order Approving Pre-Granted Abandonment

May 19, 1986.

Take notice that on May 12, 1986, Energy Marketing Exchange Inc. ("EME") pursuant to sections 4 and 7 of the Natural Gas Act, 15 U.S.C. 717-717z (1982) (NGA) and Part 157 of the regulations of the Federal Energy Regulatory Commission (Commission), 18 CFR Part 157 (1984), applied for a one (1) year extension of the limited-term sales and abandonment authority granted in this proceeding. EME states that such an extension is in the public interest as it will allow a smooth transition into the abandonment procedures established in Order No. 436.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 3, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 385.211 and 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

BILLING CODE 6717-01-M

[Docket No. C186-421-000]

Application of Texcol Industrial Sales Co.; Inc. for Blanket Certificate of Public Convenience and Necessity and for Order Permitting and Approving Abandonment and Pre-Granted Abandonment and Request for Temporary Authority

May 19, 1986.

Take Notice that on May 12, 1986, Texcol Industrial Sales Company Inc. (TISCO) applied for a blanket certificate of public convenience and necessity authorizing (1) TISCO to make sales for resale in interstate commerce of gas subject to the Commission's Natural Gas Act (NGA) jurisdiction, (2) authorizing sales of natural gas by others to TISCO for resale in interstate commerce, (3) authorizing sales for resale of natural gas by others through TISCO acting as their agent, and (4) authorizing the pregranted abandonment of all sales for resale for which sales certificate authority is requested herein. This application is filed pursuant to Sections 4 and 7 of the Natural Gas Act (NGA) and Part 157 of Title 18 of the Code of Federal Regulations.

The certificate and abandonment authority sought herein, if granted, will enable TISCO to sell natural gas it purchases from various producers, or for whom it has authority to act, to various purchasers.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 3, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or protest in accordance with the

requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, .214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

BILLING CODE 6717-01-M

[Docket No. GP86-32-000, etc.]

Minerals Management Service; Preliminary Finding

May 15, 1986.

In the matter of Minerals Management Service, Louisiana, Section 102(d) NGPA Determination, Taylor Energy Company, West Delta Block 133, MMS Docket G4-4440; FERC No. JD85-31411 MMS Docket G4-4581; FERC No. JD86-01307 MMS Docket G4-4433; FERC No. JD86-01308 MMS Docket G4-4328; FERC No. JD86-01309.

On December 17, 1985, the Minerals Management Service, Department of Interior (MMS) at Metrairie, Louisiana, submitted to the Commission notices of determination. These notices state that gas produced from certain wells located on the Outer Continental Shelf (OCS), offshore Louisiana, (West Delta Block 133 Field) owned by Taylor Energy Company (Taylor) meets all the requirements of section 102(d) of the Natural Gas Policy Act of 1978 (NGPA).[1]

Under section 102(d)(1) of the NGPA, natural gas produced from an old lease on the OCS qualifies for the new natural gas ceiling price if the natural gas is produced from a reservoir which was not discovered before July 27, 1976. Section 102(d)(2) states that a reservoir that was penetrated by a well before July 27, 1976, will be considered to have been discovered before July 27, 1976, if any of the criteria in subsection 102(d)(2)(B), concerning production tests and evidence regarding production capability, are satisfied. The section 102(d) criteria specifically refer to the requirements of OCS Order No. 4.[2]

The record shows that Taylor purchased the lease from Shell Oil Company (Shell) in 1983. Shell penetrated three of the four reservoirs involved in this proceeding prior to July 27, 1976. At that time, Shell conducted induction-electric log tests for the wells in question which showed the presence of a zone of commerically producible sand. In September 1985, MMS issued notices of negative determinations for the three penetrated reservoirs based upon this evidence. However, in December 1985, MMS issued notices of positive determinations superseding the September notices stating, "Shell Oil Company has furnished an affidavit which states that Shell believed the West Delta Block 133 Field to be non-economical and sold it to the Taylor Energy Company for a negative value."

On January 31, 1986, prior to expiration of the forty-five day period for review of MMS' determinations, a tolling letter was issued to MMS requesting that it furnish a statement pursuant to § 271.104(a)(6) of the Commission's regulations explaining the basis of its conclusion that the reservoirs were not discovered prior to July 27, 1976.

On March 31, 1986, MMS furnished a statement explaining the basis for its reversal of the negative determination. It stated that the original determination was based upon an economic analysis which did not permit the inclusion of the costs of marketing, such as pipelines. Upon reconsideration, MMS, relying upon a legal memorandum from the Solicitor's Office, Department of the Interior, concluded that these costs are proper costs in determining whether revenues exceed costs, and that with the inclusion of these costs, the reservoirs in question would not have been "commercially producible" when the wells in question were logged.

In this case there was evidence which appeared to satisfy the production capability test, within the meaning of section 102(d)(2)(B)(iii), since the induction-electric log test showed that the reservoirs contained a zone of producible sand when the reservoirs were penetrated prior to July 27, 1976. Under section 102(d)(4)(B) of the NGPA, where evidence regarding production capability exists, the producer has the burden of showing that the evidence does not provide the applicable indication specified in 102(d)(2) of the NGPA that the reservoir was commercially producible. Here, Taylor has failed to do so.

Accordingly, the Commission hereby makes a preliminary finding (pursaunt to 18 CFR § 275.202(a)(1)(i) that the determinations submitted by the MMS are not supported by substantial evidence in the record on which the determinations were made.[3]

By direction of the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-11577 Filed 5-21-86; 8:45 am]

BILLING CODE 6717-01-M

---

[1] U.S.C. 3312(d) (1985).

[2] NGPA section 102(d)(5) defines OCS Order No. 4 as "the order numbered 4 of the Conservation Division, Geological Survey, Department of the Interior, approved by the Chief of the Conservation Division on August 28, 1968." Order No. 4 sets forth certain tests, which if satisfied, permit an extension of an OCS lease beyond its primary term in the absence of actual production.

[3] There was no evidance showing that the Q8 Reservoir G, included in MMS Docket G4-4440, was penetrated prior to July 27, 1976. Accordingly, this notice of preliminary finding shall not apply to that portion of production attributable to that reservoir.

[Docket No. ER86-354-000]

Niagara Mohawk Power Corporation; Order Accepting for Filing and Suspending Rates, Granting Intervention, Denying Motions To Reject, Denying Request for Summary Disposition, and Establishing Hearing Procedures

Issued: May 16, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C. M. Naeve.

On March 17, 1986, Niagara Mohawk Power Corporation (Niagara) submitted for filing an increase in rates for transmission service to the Power Authority of the State of New York (PASNY).[1] The proposed rates would increase transmission revenues by approximately $6.0 million (59%) based on a twelve-month test period ending March 31, 1987. Niagara requests that its

[1] *See* Attachment for affected PASNY customers and rate schedule designations.

proposed rates become effective on May 19, 1986.

Notice of the filing was published in the Federal Register,[1] with comments due, after extension, on or before April 8, 1986. Timely motions to intervene were filed by PASNY; the City of New York (NYC); the County of Westchester Public Utility Service Agency (COW/PUSA); the Metropolitan Transit Authority (MTA); the Municipal Electric Utilities Association of New York State (MEUA); the New York State Rural Electric Cooperative Association, Inc. (NYSRECA); Allegheny Electric Cooperative, Inc. (Allegheny); American Municipal Power-Ohio, the Connecticut Municipal Electric Energy Cooperative, and the Massachusetts Municipal Wholesale Electric Company (collectively referred to as Municipals); and the New Jersey Public Power Association (NJPPA). In addition, an untimely motion to intervene was filed by General Motors Corporation (GM).

PASNY, GM COW/PUSA, and NYC request intervenor status, but raise no specific issues for investigation. COW/PUSA and NYC further request a five month suspension. NYC states that the propesed increase will significantly impair its efforts to strengthen marginally-economic energy-intensive manufacturing firms and to attract new industrial and commercial customers.

On April 9, 1986, Niagara filed an answer to NYC's pleading, contending that it had not supported its request for maximum suspension in terms of the Commission's *West Texas* criteria.[2] Niagara also disputes the allegation of irreparable harm.

The MTA requests maximum suspension, alleging that the return on common equity is excessive and that Niagara has understated the revenue credit associated with wheeling revenues received from the New York Power Pool.

MEUA, NYSRECA, Allegheny, the Municipals, and the NJPPA request issuance of a deficiency letter or, in the alternative, a maximum suspension of the rates. They allege that the instant filing is deficient in that Niagara failed to submit complete statements and workpapers as required by § 35.13 of the Commission's regulations. If a deficiency letter is not issued, they request a five month suspension of the rates, raising a variety of cost of service issues, including: (1) Return on common equity; (2) demand projections; (3) use of a 12 CP allocator rather than a 1 CP allocator; (4) elimination of separate rates based on delivery voltage; (5) rate discrimination between MEUA and replacement energy customers, who are currently being served at rates below those proposed herein; (6) inclusion in the cost of service of payments made to the PJM pool for unscheduled transmission service; (7) use of revenue credits rather han direct cost allocations to account for firm wheeling services not at issue here; (8) use of a 45-day lag for cash work capital; (9) failure to provide a depreciation study to support new depreciation rates; and (10) failure to justify the differential between PASNY in-state and out-of-state rates. The Municipals also request summary rejection of Niagara's inclusion of compensating bank balances in determining the cash working capital allowance.

On April 23, 1986, Niagara filed an answer to the motions to intervene. Niagara contends that its submittal is in compliance with the filing requirements and denies that a five month suspension is warranted. Niagara also disputes the specific objections to the filing raised by the intervenors.

Discussion

Under Rule 214 of the Commission's rules of practice and procedure (18 CFR 385.214), the timely, unopposed motions to intervene serve to make NYC, COW/PUSA, the MTA, MEUA, NYSRECA, Allegheny, the Municipals, and the NJPPA parties to this proceeding. Furthermore, we find that good cause exists to grant GM's untimely intervention, given its stated interest, the early stage of this proceeding, and the apparent absence of any undue prejudice or delay.

In support of the requests for rejection, the intervenors cite a number of alleged omissions from Niagara's filing. Having evaluated Niagara's submittal, we find that it minimally complies with our threshold filing requirements and is not patently deficient. Absent any other basis for rejection, we shall therefore deny the requests for rejection. In addition, we conclude that the Municipals have not justified their cryptic request for summary disposition as to the inclusion of compensating bank balances in determining the working capital allowance. This request will also be denied.

Our review of Niagara's filing and the pleadings indicates that the rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the rates for filing and suspend them as ordered below.

In *West Texas Utilities Co., supra,* we explained that where our preliminary examination indicates that proposed rates may be unjust and unreasonable, but may not be substantially excessive, as defined in *West Texas,* we would generally impose a nominal suspension. Here, our examination suggests that the rates may not yield substantially excessive revenues. Therefore we shall suspend Niagara's rates for one day, to become effective, subject to refund, on May 20, 1986.

The Commission orders

(A) GM's untimely motion to intervene is hereby granted, subject to the Commission's rules of practice and procedure.

(B) The motions to reject Niagra's filing are hereby denied.

(C) The Municipals' request for summary disposition is hereby denied.

(D) Niagara's proposed rates are hereby accepted for filing and suspended for one day, to become effective, subject to refund, on May 20, 1986.

(E) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's rules of practice and procedure and the regulations under the Federal Power Act (18 CFR, Chapter I), a public hearing shall be held concerning the justness and reasonableness of Niagara's rates.

(F) The Commission staff shall serve top sheets in this proceeding within ten (10) days of the date of this order.

(G) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days after service of top sheets in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's rules of practice and procedure.

(H) Subdocket No. 000 of Docket No. ER86-354 is hereby terminated. The evidentiary hearing established herein is assigned Docket No. ER86-354-001.

---

[1] 51 FR 10,919 (1986).

[2] *See West Texas Utilities Co.*, 18 FERC ¶ 61,160 (1982).

(I) The Secretary shall promptly publish this order in the Federal Register.

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ER86-361-000]

Upper Peninsula Power Co.; Order Accepting for Filing and Suspending Rates, Noting Intervention, and Establishing Hearing Procedures

Issued May 16, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

On March 17, 1986, Upper Peninsula Power Company (UPPCO) submitted for filing a proposed rate increase for firm service to eight wholesale customers.[1] The proposed rates would increase revenues by approximately $278,600 (4.8%) based upon a test period ending December 31, 1986. UPPCO requests that the proposed rates become effective on May 17, 1986.

Notice of UPPCO's filing was published in the Federal Register,[2] with comments due on or before April 4, 1986. Alger Delta Cooperative and Ontonagon County Rural Electrification Association (Cooperatives) timely filed a joint protest and motion to intervene, requesting a five month suspension of the proposed rate increase and a hearing. In support of their requests, the Cooperatives allege that: (1) UPPCO's proposed common equity return exceeds the advisory benchmark allowance for this filing period; (2) UPPCO erred in its allocation of cash working capital to the wholesale class; and (3) UPPCO erred in developing its labor allocator.[3]

On April 16, 1986, UPPCO filed an answer to the Cooperatives' motion. While UPPCO does not oppose their intervention, it denies the Cooperatives' substantive allegations and further denies that a five month suspension is warranted.

Discussion

Pursuant to Rule 214 of the Commission's rules of practice and procedure (18 CFR 385.214), the timely, unopposed motion to intervene makes the Cooperatives parties to this proceeding.

Our preliminary examination of UPPCO's filing and the pleadings indicates that the rates have not been shown to be just and reasonable and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we shall accept the rates for filing and suspend them as ordered below.

In *West Texas Utilities Company*, 18 FERC ¶ 61,189 (1982), we explained that where our preliminary examination indicates that proposed rates may be unjust and unreasonable, and may be substantially excessive, as defined in *West Texas*, we would generally impose a maximum suspension. Here, our examination suggests that the proposed rates may yield substantially excessive revenues. Accordingly, we shall suspend those rates for five months, to become effective, subject to refund, on October 17, 1986.

The Commission Orders

(A) UPPCO's proposed rates are hereby accepted for filing and are suspended for five months, to become effective on October 17, 1986, subject to refund.

(B) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's rules of practice and procedure and the regulations under the Federal Power Act (18 CFR Chapter I), a public hearing shall be held concerning the justness and reasonableness of UPPCO's rates.

(C) The Commission staff shall serve top sheets in this proceeding within 10 days of the date of this order.

(D) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held within approximately fifteen (15) days after service of top sheets in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. Such conference shall be held for purposes of establishing a procedural schedule. The presiding judge is authorized to establish procedural dates and to rule on all motions (except motions to dismiss) as provided in the Commission's rules of practice and procedure.

(E) Subdocket 000 in Docket No. ER86-361 is hereby terminated. Docket No. ER86-361-001 is assigned to the evidentiary hearing ordered herein.

(F) The Secretary shall promptly publish this order in the Federal Register.

By the Commission.

Kenneth F. Plumb,

Secretary.

[3] On May 9, 1986, the Cooperative filed an amendment to their motion to intervene, contending that UPPCO has erred with respect to the allocation of (1) non-fuel production O&M expenses and (2) transmission plant.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-3030-8]

Science Advisory Board; Environmental Effects, Transport and Fate Committee, Municipal Waste Combustion Subcommittee, Open Meeting—May 29–30, 1986; Amended Notice

Notice is hereby given in accordance with Pub. L. 92–463 of a change in the date of the meeting of the Municipal Waste Combustion Subcommittee of the Environmental Effects, Transport and Fate Committee of the Science Advisory Board. Publication of the original notice appeared in the Federal Register on Monday, May 12, 1986, Volume 51, Number 91, page 17407. The amended notice is to inform the public that the two day meeting will be held from 1:30 p.m. to 4:30 p.m. on May 29 and from 8:30 a.m. to approximately 2:00 p.m. on May 30. The meeting will be held at the College of Wiliam and Mary Alumni House, Main Room, 500 Richmond Road, Williamsburg, Virginia.

The meeting is open to the public. Any member of the public wishing to attend, obtain information, or submit written comments should contact Dr. Terry F. Yosie, Director, Science Advisory Board or Mrs. Joanna A. Foellmer located at 401 M Street, SW, Washington, D.C. 20460 or call (202) 382–4126 by close of business May 22, 1986.

Dated: May 16, 1986.

Terry F. Yosie,

Director, Science Advisory Board.

BILLING CODE 6560-50-M

[OPP-180694; FRL-3019-9]

Department of the Interior, Fish and Wildlife Service; Receipt of Applications for Specific Exemptions To Use a Pesticide for an Unregistered Use; Solicitation of Public Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received specific exemption requests from the United States Department of the Interior, Fish and Wildlife Service (hereafter referred to as USDI) for use of sodium cyanide in the M–44 device. One request proposes use of the M–44 device to control coyotes and red foxes in the Grays Lake National Wildlife Refuge in Idaho for the protection of the endangered whooping crane, and the other proposes use of the M–44 device to control coyotes and foxes on the Mississippi Sandhill Crane National Wildlife Refuge in Jackson County, Mississippi, for the protection of the endangered Mississippi Sandhill Crane. EPA is soliciting comment before making the decision whether or not to grant these specific exemption requests.

DATE: Comments must be received on or before May 27, 1986.

ADDRESS: Three copies of written comments, bearing the identifying notation "OPP–180694," should be submitted—

By mail to: Information Services Section, Program Management and Support Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

In person, bring comments to: Rm. 236, Crystal Mall Building #2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information (CBI)." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. All written comments will be available for inspection in Rm. 236 at the address given above from 8 a.m. to 4 p.m., Monday through Friday excluding legal holidays.

FOR FURTHER INFORMATION:

By mail: Jack E. Housenger, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW, Washington, DC 20460.

Office location and telephone number: Rm. 716C, Crystal Mall Building #2, 1921 Jefferson Davis Highway, Arlington, VA, (703–557–1806).

SUPPLEMENTARY INFORMATION: Pursuant to section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136p), the Administrator may, at his discretion, exempt a State agency from any registration provision of FIFRA if he determines that emergency conditions exist which require such exemption.

USDI has requested the Administrator to issue specific exemptions to permit the use of sodium cyanide in the M–44 device to control wild canids for the purpose of protecting the endangered whooping crane and Mississippi Sandhill crane. Information in accordance with 40 CFR Part 166 was submitted as part of these requests.

USDI has requested the use of the product M–44 Cyanide Capsules, EPA Reg. No. 6704–75, in M–44 devices. One capsule per device will be used. A maximum of 40 M–44 devices and 800 sodium cyanide capsules is requested for use on 3,000 acres of land and marsh at the Grays Lake Wildlife Refuge and a maximum of 100 M–44 devices and 300 sodium cyanide capsules is requested for use on 10,000 acres of land at the Mississippi Sandhill Crane National Wildlife Refuge. Only trained USDI personnel will hand-place the devices. All applicable precautions and restrictions governing the use of sodium cyanide registrations will be adhered to. USDI has requested authorization to use sodium cyanide for a one-year period.

The use of sodium cyanide is being requested to aid in establishing populations of the endangered whooping crane and the endangered Mississippi Sandhill Crane within the wildlife refuges. In order to effectively accomplish this, USDI claims that it is necessary to remove the wild canids which prey on the birds and eggs. Although a number of means are available with which to accomplish this, they are often disruptive to the cranes, are manpower intensive and/or too costly.

USDI has requested and received similar exemptions for this use of sodium cyanide for use at the Gray's Lake site since 1977. Use of sodium cyanide at the Mississippi Sandhill Crane site was authorized under a specific exemption for the first time last year; however, all M–44 devices were removed in December after a Mississippi Sandhill Crane died from cyanide poisoning from an M–44 device. As a result, USDI has reexamined its procedures and conducted an intra-service consultation under Section 7 of the Endangered Species Act. Preventative measures and guidelines have been developed regarding the use of the M–44 device which will minimize the possibility of another such occurrence. The Section 7 consultation determined that the use of the M–44 device ". . . is not likely to jeopardize the existence of the Mississippi sandhill crane or result in the destruction or adverse modification of habitat for this species."

The use of sodium cyanide for predator control was cancelled in 1972 due, in part, to the adverse effects of this pesticide on nontarget species. In 1975, EPA modified that decision to permit

use of sodium cyanide in a springloaded ejector device known as the M–44 to control certain wild canid predators, subject to a number of restrictions. These restrictions include one which prohibits the use of M–44's in wildlife refuges, national wilderness, State and Federal parks, and similar areas. Subsequently, the Agency registered this use in accordance with this decision.

On March 19, 1986, the Agency announced in the Federal Register (51 FR 9518) that it would hold a hearing, in accordance with the Subpart D procedures, to consider substantial new evidence presented by USDI which may warrant further modification of the 1972 cancellation order. Specifically, the hearing will be to determine whether to permit the use of sodium cyanide in the M–44 device to protect endangered/threatened species in areas where such use is currently prohibited.

At the same time, the Agency announced its intent to modify ten restrictions governing the use of sodium cyanide in the M–44 device which had been requested by USDI. Although these modifications were not subject to Subpart D and therefore did not require that a hearing be held, the Agency provided the opportunity for any affected person to request that one or more of these modifications be included in the adjudicatory hearing. Subsequently, these modifications have been included in the hearing at the request of the National Audubon Society, the Environmental Defense Fund, and the Defenders of Wildlife. The date on which the evidentiary phase of the hearing will begin has not been determined.

This notice does not constitute a decision by EPA on the application itself. Interested persons may submit written views on this subject to the Program Management and Support Division at the address above. The comments must be received on or before May 27, 1986, and should bear the identifying notation "OPP–180694." All written comments filed pursuant to this notice will be available for public inspection in Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

The Agency will review and consider all comments received during the comment period in determining whether to issue the emergency exemptions requested by the United States Department of the Interior.

Dated: May 16, 1986.

Douglas D. Campt,

Director, Registration Division.

BILLING CODE 6560–50–M

FEDERAL EMERGENCY MANAGEMENT AGENCY

[Docket No.: FEMA–REP–7–IA–1]

The Iowa Radiological Emergency Response Plan Site-Specific for the Quad Cities Nuclear Power Station

ACTION: Certification of FEMA Findings and Determination.

In accordance with the Federal Emergency Management Agency (FEMA) rule 44 CFR 350, the State of Iowa submitted its plans relating to the Quad Cities Nuclear Power Station to the Director of FEMA Region VII on March 28, 1983, for FEMA review and approval. On August 31, 1983, the Regional Director forwarded his evaluation to the Associate Director for State and Local Programs and Support in accordance with § 350.11 of the FEMA rule. However, areas requiring action by the Iowa Office of Disaster Services in order to complete processing of the State's submission were not resolved until January 3, 1986. Included in the August 20, 1983, evaluation is a review of exercises conducted on May 20, 1981, August 24, 1982 and May 11, 1983, in accordance with § 350.9 of the FEMA rule; and, a report of the public meeting held on June 17, 1981, to discuss the site-specific aspects of the State and local plans in accordance with § 350.10 of the FEMA ruie. In addition there was a review of exercises conducted on August 28/29, 1984 and August 27, 1985.

Based on the evaluation by the Regional Director and the review by the FEMA Headquarters staff, I find and determine that the State and local plans and preparedness for the Quad Cities Nuclear Power Station are adequate to protect the health and safety of the public living in the vicinity of the plant. The offsite plans and preparedness are assessed as adequate in that they provide reasonable assurance that appropriate protective actions can be taken offsite in the event of a radiological emergency and are capable of being implemented. However, while there is a public alert and notification (A&N) system in place and operational, this approval is conditional upon FEMA's verification of the A&N system in accordance with the criteria of Appendix 3 of NUREG–0654/FEMA–REP–1, Rev. 1; and, FEMA–REP–10, "Guide for the Evaluation of Alert and Notification Systems for Nuclear Power Plants".

FEMA will continue to review the status of offsite plans and preparedness associated with the Quad Cities Nuclear Power Station in accordance with § 350.13 of the FEMA rule.

For further details with respect to this action, refer to Docket File FEMA–REP–7–IA–1 maintained by the Regional Director, FEMA Region VII, 911 Walnut Street, Kansas City, Missouri 64106.

Dated: March 20, 1986.

For the Federal Emergency Management Agency.

Samuel W. Speck,

Associate Director, State and Local Programs Support.

[FR Doc. 86–11490 Filed 5–21–86; 8:45 am]

BILLING CODE 6718–02–M

FEDERAL MARITIME COMMISSION

Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, D.C. Office of the Federal Maritime Commission, 1100 L Street, NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 224–004166–003.

Title: Port of Oakland Terminal Agreement.

Parties:

Port of Oakland (Port)

Pasha Properties, Inc. (Pasha)

Synopsis: The proposed amendment would modify the agreement to provide for the Port's review and discussion with Pasha of the extension of the agreement to September 30, 1994 at the end of its present term. It would also provide for increases in the minimum annual compensation to $800,000.00 and the breakpoint sum to $1,250,000 effective February 1, 1986 and for a two percent reduction in Pasha's retention or tariff charges for automobile cargo and vessel operations upon the Port's completion of certain bridge improvements on the assigned premises.

Agreement No.: 202–008848A–031.
Title: Inter-American Freight Conference.
Parties:
A. Bottachi S.A. De Navegacion C.F.I.e.I.
Antilles and Amazon Line
A/S Ivarans Rederi
Brazil-America Container Line
Companhia Maritima Nacional
Companhia De Navegacao Lloyd Brasileiro
Companhia De Navegacao Maritimas Netumar
Empresa Lineas Maritimas Argentinas S/A
Empresa De Navagacao Alliance S.A.
Flota Mercante Del Estado
Frota Amazonica S.A.
Georgia-Aztec Line
Van Nievelt Goudriaan & Co. B.V.
J. Lauritzen Holding A/S
Kimberly Navigation Company
Passaat Line N.V.
Reefer Express Lines Pty. Ltd.
R.M.C. Lines, Inc.
Ship Operators (International) Inc.
Transportaction Maritima Mexicana S.A.
United States Lines (S.A.), Inc.
Synopsis: The proposed amendment would provide that the actions of nember lines and any future modifications of the agreement are subject to governmental requirements and review on a section-by-section basis rather than a conference-wide review.

Agreement No.: 202–010093–012.
Title: Florida/Caribbean Liner Association.
Parties:
Bernuth Lines Ltd.
Tecmarine Lines, Inc.
West Indies Shipping Corp.
Shipping Corporation of Trinidad and Tobago
Sea-Land Service, Inc.
Concorde Caribe Lines, Ltd.
Synopsis: The proposed amendment would delete Jacksonville, Florida, the Leeward/Windward Islands, Surinam and Guyana from the geographic scope of the agreement. It would also change the voting requirement provisions of the agreement to reflect the reduced geographic scope. The parties have requested a shortened review period.

Agreement No.: 213–010786–002.
Title: Costa/Transatlantica Space Charter and Sailing Agreement.
Parties:
Costa Container Lines, S.p.A.
Compania Transatlantica Espanola, S.A.
Synopsis: The proposed amendment would permit the parties to discuss and agree upon rates, terms of service and service contracts in all or any portion of the agreement trade (between U.S. Gulf, Florida and Puerto Rico Ports and ports in Italy, France, Spain, Portugal and the Canary Islands and between interior and coastal points served via such ports) in which neither party is a member of a conference. The parties have requested a shortened review period.

Agreement No.: 224–010940.
Title: Port Everglades Lease Agreement.
Parties:
Port Everglades Authority (Lessor)
Sea-Land Service, Inc. (Lessee)
Synopsis: The proposed agreement would provide for the use by the Lessee of the Demised Premises devoted to receiving, dispatching, handling, documentation, processing, storage, maintenance and security of loaded and empty cargo containers, container chassis and related vehicles. The term of this lease shall be for a period of two (2) years and 364 days beginning at 12:00 Noon, EST, on the day the agreement becomes effective.

Agreement No.: 218–010941.
Title: Nonexclusive Transshipment Agreement Between American President Lines, Ltd. and Totem Ocean Trailer Express, Inc.
Parties:
American President Lines, Ltd.
Totem Ocean Trailer Express, Inc.
Synopsis: The proposed agreement would establish a non-exclusive, intermodal transshipment arrangement between the parties in the trade between points in Alaska and points in the Far East, with transshipment at Seattle or Tacoma, Washington.

By Order of the Federal Maritime Commission.
Dated: May 19, 1986.
John Robert Ewers,
Secretary.

GENERAL SERVICES ADMINISTRATION

Procedures for Ordering Fiscal Year 1987 Updates to the 1984 Looseleaf Edition of the Federal Information Resources Management Regulation (FIRMR)

AGENCY: Information Resources Management Service, GSA.

ACTION: Notice of procedures for Federal agencies/departments to order FY 1987 updates to the looseleaf edition of the FIRMR.

SUMMARY: This notice is to advise Federal agencies/departments to submit their FY 1987 copy requirements for the looseleaf edition of the FIRMR to the Government Printing Office (GPO). Individual agency offices are responsible for making their requirements known to their agency GPO liaison Officer. Agency GPO Liaison Officers are responsible for submitting agency copy requirements to GPO through their Printing and Publishing Official. Agencies failing to submit orders will not receive FIRMR updates distributed in FY 1987.

DATE: The looseleaf edition of the FIRMR is distributed to agencies by GPO based on agency-established copy requirements. Copy requirements are submitted to GPO annually. Agencies must submit their FY 1987 FIRMR copy requirements to GPO by June 20, 1986.

FOR FURTHER INFORMATION CONTACT: Carolyn A. Thomas, Regulations Branch (KMPR), Information Resources Management Service, telephone (202) 566–0194 or FTS, 566–0194.

SUPPLEMENTARY INFORMATION: (1) The Federal Information Resources Management Regulation (FIRMR) established on April 1, 1984, is located in the Code of Federal Regulation at Title 41, Chapter 201. It provides Governmentwide regulations for the management, acquisition, and use of information resources (including automatic data processing, office automation, records management, and telecommunications).

(2) The basic 1984 Looseleaf Edition of the FIRMR was distributed to agencies by the GPO in March of 1985, based on agency-established copy requirements for FY 1985. Updates to the basic edition were distributed in FY 1985, also based on agency-established copy requirements for that year. GPO now requires agencies to submit their FY 1987 FIRMR copy requirements by June 20, 1986. Agencies not submitting copy-requirements for 1987 will no longer receive FIRMR updates after September 30, 1986.

(3) Agency GPO Liaison Officers responsible for managing FIRMR distribution are being reminded to consolidate their agency's FY 1987 FIRMR copy requirements and make those requirements known to GPO through their agency Printing and Publication Official. By Circular Number 266, dated April 30, 1986, GPO advised Federal Printing and Publications Officials to submit their agencies' FY 1987 copy requirements for all open requisitions (including the FIRMR) by June 20, 1986.

(4) FIRMR materials issued in FY 1987 will consist of updates to the basic looseleaf edition only. The basic 1984 Looseleaf Edition of the FIRMR and updates distributed prior to October 1, 1986, will not be reprinted for distribution prior to FY 1987. Federal employees unable to obtain the basic looseleaf edition and updates distributed in FY 1985 and 1986 through their agency GPO Liaison Officer may subscribe to the FIRMR directly with GPO by following the procedures in paragraph six below.

(5) FIRMR updates in FY 1987 will continue to be issued under Transmittal Circulars (TC's) which will include amendments, temporary regulations, and bulletins and other informational guides. TC's will continue to contain "Transmittal Circular 84–X" as part of the title to indicate that attachments should be filed in the basic 1984 Looseleaf Edition of the FIRMR text. All FY 1987 production costs will be prorated to participating agencies by GPO. Based on previous year estimates, costs for FY 1987 are expected to be between $10.00 and $12.00 per user.

(6) Private sector companies, associations, businesses, and other interested parties wishing to receive the basic 1984 Looseleaf edition of the FIRMR and all updates may place subscription orders with GPO by writing or calling, Superintendent of Documents, Government Printing Office, Washington, DC 20405, telephone (202) 783–3238. The price for each subscription order is $66.00 domestic and $82.50 foreign. (GPO requires payment in advance unless charged to MasterCard, Visa, or GPO charge account.) Individuals already having a FIRMR subscription with GPO will continue to receive FIRMR updates in FY 1987 and are not required to reorder at this time.

Dated: May 14, 1986.

Larry L. Jackson,

Director, Policy and Regulations Division.

[FR Doc. 86–11523 Filed 5–21–86; 8:45 am]

BILLING CODE 6820–24–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Federally Assisted Health Professions and Nurse Teaching Facilities; Federal Right of Recovery and Calculation of Recovery Amount and Interest Charges

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notice.

SUMMARY: This notice announces the Department's policy regarding the recovery of Federal funds when a health professions or nurse training facility assisted under Title VII or Title VIII of the Public Health Service (PHS) Act undergoes a change in ownership, control, or use. This policy implements the provisions of the Health Professions Training Assistance Act of 1985 and the Nurse Education Amendments of 1985 regarding written notification to the Secretary of changes in status or use, imposition of interest charges on the recovery amount, and waiver of the right of recovery.

FOR FURTHER INFORMATION CONTACT: Richard R. Ashbaugh, Assistant Surgeon General, Associate Director for Health Facilities, Bureau of Health Maintenance Organizations and Resources Development, 5600 Fishers Lane, Room 11–03, Rockville, Maryland 20857, Attention: Ms. Tuei Doong, 301–443–3465.

SUPPLEMENTARY INFORMATION: The Health Professions Training Assistance Act of 1985 (Pub. L. 99–129) amended section 723 of Title VII of the PHS Act, and the Nurse Education Amendments of 1985 (Pub. L. 99–92) amended section 804 of Title VIII. Pub. L. 99–92 also redesignated section 804 as section 858. Sections 723 and 858 still provide for recovery of Federal funds if, within 20 years after completion of construction, (1) an owner of an assisted facility ceases to be a public or nonprofit agency, school, or entity; (2) the assisted facility ceases to be used for the teaching or training purposes for which it was constructed; or (3) the assisted facility is used for sectarian instruction or as a place for religious worship.

The amendments to sections 723 and 858 may be summarized as follows: (1) The owner of a facility that received construction assistance under Title VII Title VIII and which undergoes a change in ownership, control or use within 20 years after the completion of the grant assisted construction must provide written notice of such change to the Secretary within 10 days after the change occurs. (2) Where such timely notice is provided and the Secretary determines that a recovery of Federal funds is appropriate, the facility and the Department have a period of time (190 days after the change occurs) within which to agree upon the amount the United States is entitled to recover. If agreement is not reached within that time frame, the United States is entitled to charge interest on any eventual recovery amount. The interest rate is based on the average of the bond equivalent rates of 91-day Treasury bills auctioned during the interest period. The interest period will begin 191 days after the date of change in status or use and will end on the date the recovery amount is collected.

(3) If the owner does not provide timely, written notice to the Secretary of the change in status or use, the interest period will begin 11 days after the date of such change, and will end on the date the recovery amount is collected. However, sections 723 and 858 provide that the interest period will in no case begin earlier than 181 days after enactment of the pertinent amendments. The date of enactment for section 723 was October 22, 1985 and the date of enactment for section 858 was August 16, 1985.

These amendments are similar to the provisions related to the Federal right of recovery of funds provided under Title VI and Title XVI of the PHS Act which were enacted by the Deficit Reduction Act of 1984 (Pub. L. 98–369). The Department has issued regulations to implement the provisions of Pub. L. 98–369 at 42 CFR Part 124 Subpart H (51 FR 7935, March 7, 1986). Given the similarity in statutory language, the Department has determined that the requirements of the Titles VI and XVI regulations regarding the content of the notice of change in status or use (42 CFR 124.704 (b) and (c)) and the facility valuation methods (42 CFR 124.705) also will be applied by the Department to Title VII and Title VIII assisted facilities

which undergo a change in status or use for which a recovery may be appropriate. The requirements regarding the content of the Notice of change (42 CFR 124.704(b)) are as follows:

(b) Content of Notice. The notice required by paragraph (a) of this section shall be sent to the Secretary by certified mail, and shall contain or be accompanied by

(1) The date of the sale, transfer, or other event that gives rise to the notice;

(2) Copies of any sales contracts, lease agreements, management contracts or other documents pertinent to the event giving rise to the notice;

(3) Estimates of current assets, current liabilities, book value of equipment, the expected value of land on the new owner's books, and the remaining depreciation for all fixed assets involved in the transaction calculated on a straigth line basis using commonly adopted expected useful lifetimes.

No other requirements of 42 CFR Part 124 Subpart H will be applied to recovery of funds provided under Titles VII and VIII. The information collection requirements for the Notice of Change for Titles VII and VIII are subject to OMB approval under the Paperwork Reduction Act of 1980 and have been approved under control number 0915–0108.

It should be noted that sections 723 and 859 retained the Secretary's authority to waive the right of recovery for good cause in cases where a facility is converted to a use different from the purpose for which it was constructed. The conditions under which such a waiver may be granted have been previously established in regulations (for facilities assisted under Title VII see 42 CFR 57.109 and for facilities assisted under Title VIII see 42 CFR 57.409).

Dated: May 19, 1986.

John H. Kelso,

Acting Administrator.

Mount Diablo Meridian, Yuba County

T. 19 N., R. 6 E.

2. This plat, representing the dependent resurvey of a portion of the boundaries of Mineral Survey No. 5893, and a portion of Lots 30 and 31 (former Lot 10), and the metes-and-bounds survey of Lot 30, section 10, Township 19 North, Range 6 East, Mount Diablo Meridian, California, under Group No. 944, was accepted April 30, 1986.

3. This plat will immediately become the basic record of describing the land for all authorized purposes. This plat has been placed in the open files and is available to the public for information only.

4. This plat was executed to meet certain administrative needs of the Bureau of Land Management.

5. All inquiries relating to this land should be sent to the California State Office, Bureau of Land Management, Federal Office Building, 2800 Cottage Way, Room E–2841, Sacramento, California 95825.

Herman J. Lyttge,

Chief, Records & Information Section.

BILLING CODE 4310–40–M

[ES–036152, Group 91]

Michigan; Filing of Plat of Island Survey, Section 1

May 16, 1986.

1. On May 2, 1986, the plat representing the survey of an island in Rennie Lake, which was omitted from the original survey, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m., on June 30, 1986.

The tract shown below describes the island omitted from the original survey.

Michigan Meridian, Michigan

T. 28 N., R. 10 W.
Tract 37

2. The island described above is separate and distinct yet similar in all respects to that of the adjacent surveyed lands.

3. Tract 37 rises approximately 3 feet above the oridinary high water mark of Rennie Lake and is composed of sandy loam. Tree species consist of white pine,

red pine, jack pine, birch, and aspen. The understory consists of aspen, maple, pine, and oak.

4. The present water level of the lake compares favorably with that of the original meander line, therefore, the elevation and upland character of the island along with the depth and width of the channel between the upland and the island are considered evidence that the island did exist in 1837, the year Michigan was admitted into the Union.

5. Tract 37 is more than 50% upland in character within the purview of the Act of September 28, 1850 (9 Stat. 519). Therefore, the island is held to be public land.

6. Except for valid existing rights, this island will not be subject to application, petition, location, or selection under any public law until June 30, 1986.

7. Interested parties protesting the determination that this island is public land of the United States, must present valid proof showing that the island did not exist at the time of statehood or that it was attached to the mainland at the time of the original survey. Such protests must be submitted in writing to the Deputy State Director of Cadastral Survey, Bureau of Land Management, Eastern States Office, prior to 7:30 a.m., June 30, 1986.

8. All inquiries concerning the color-of-title claims should be filed with the Deputy State Director for lands and Renewable Resources, Bureau of Land Management, Eastern States Office, 350 South Pickett Street, Alexandria, Virginia 22304, after June 30, 1986.

9. Copies of the plat will be made available upon request and prepayment of the reproduction fee of $4.00 per copy.

Lane J. Bouman,

Deputy State Director for Cadastral Survey.

Michigan; Filing of Plat of Island Survey, Section 9

May 16, 1986.

1. On May 2, 1986, the plat representing the survey of an island in Arbutus Lake, which was omitted from the original survey, was accepted. It will be officially filed in the Eastern States Office, Alexandria, Virginia, at 7:30 a.m., on June 30, 1986.

The tract shown below describes the island omitted from the original survey.

Michigan Meridian, Michigan

T. 28 N., R. 19 W.,
Tract 39

2. The island described above is separate and distinct yet similar in all respects to that of the adjacent surveyed lands.

3. Tract 39 rises approximately 35 feet above the ordinary high water mark of Arbutus Lake and is composed of sandy loam. Tree species consist of white pine, red pine, jack pine, birch, red oak, and white oak. The understory consists of aspen, hazel, maple, pine, and oak.

4. The present water level of the lake compares favorably with that of the original meander line, therefore, the elevation and upland character of the island along with the depth and width of the channel between the upland and the island are considered evidence that the island did exist in 1837, the year Michigan was admitted into the Union.

Tract 39 is more than 50% upland in character within the purview of the Act of September 28, 1850 (9 Stat. 519). Therefore, the island is held to be public land.

6. Except for valid existing rights, this island will not be subject to application, petition, location, or selection under any public law until June 30, 1986.

7. Interested parties protesting the determination that this island is public land of the United States, must present valid proof showing that the island did not exist at the time of statehood or that it was attached to the mainland at the time of the original survey. Such protests must be submitted in writing to the Deputy State Director for Cadastral Survey, Bureau of Land Management, Eastern States Office, prior to 7:30 a.m., June 30, 1986.

8. All inquiries concerning the color-of-title claims should be filed with the Deputy State Director for Lands and Renewable Resources, Bureau of Land Management, Eastern States Office, 350 South Pickett Street, Alexandria, Virginia 22304, after June 30, 1986.

9. Copies of the plat will be made available upon request and prepayment of the reproduction fee of $4.00 per copy.

Alaska Native Claims Selection; Bethel Native Corp.

In accordance with Department regulation 43 CFR 2650.7(d), notice is hereby given that decisions to issue conveyance under the provisions of section 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(a), will be issued to Bethel Native Corporation. The lands involved are in the vicinity of Bethel, Alaska.

Serial No.	Land description	Approximate acreage
AA-50370	A parcel of land within U.S. Survey No. 4117, lot 35, Alaska.	10.91
AA-50374	A parcel of land within U.S. Survey No. 4117, lot 26, Alaska.	102.62
AA-50373	Seward Meridian, Alaska, T. 8 N., R. 72 W. (Partially Surveyed) A parcel of land located within Secs. 11, 14, and 15.	230.00

A notice of the decisions will be published once a week, for four (4) consecutive weeks, in The Tundra Drums. Copies of the decisions may be obtained by contacting the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513 ((907) 271–5960).

Any party claiming a property interest which is adversely affected by the decisions shall have until June 23, 1986 to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management, Division of Conveyance Management (960), address identified above, where the requirements for filing an appeal can be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E shall be deemed to have waived their rights.

Ann Adams,

Section Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310-JA-M

Designation of the Ione Tertiary Oxisol Area of Critical Environmental Concern, Folsom Resource Area, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice that certain public lands in the Folsom Resource Area, Bakersfield District, California are designated as an Area of Critical Environmental Concern (ACEC).

SUMMARY: Notice is hereby given pursuant to authority in the Federal Land Policy and Management Act of 1976 (section 202(c)(3)), 43 CFR Part 1610, and land use decisions developed in the Sierra Management Framework Plan (February 1983), that public lands near Ione, California are designated as an Area of Critical Environmental Concern. The approximately 90 acres of public land are described as follows:

Mount Diablo Meridian, California

T. 5 N., R. 10 E.,
Sec. 16, NW¼SW¼;
Sec. 17, N½N½SE¼ and N½S½NE¼SE¼.

SUPPLEMENTARY INFORMATION: The Ione Tertiary Oxisol Soils ACEC area is located in Amador County about 5 miles southeast of Ione, within the Folsom Resource Area of the Bakersfield District.

This ACEC is established to protect a unique soil profile. An intensely weathered soil (an Oxisol) was formed during the Eocene epoch (part of the Tertiary period) when a tropical climate predominated parts of central California. A few hundred acres of the oxisol near Ione were exhumed by natural erosion, thereby exposing a soil with all the properties of soils that are only found in the tropics. No other soil exists like this within 2,000 miles of California.

Management of this area as a ACEC will include the following:

1. Withdraw the area from mineral entry.
2. Prohibit mineral material sales or mineral leasing.
3. Prohibit issuance of grazing leases.
4. Allow a total of only 5 acres to be disturbed by scientific study.

Opportunities for public participation were provided through the Management Framework Plan process and by a special public meeting held on March 28, 1985 (50 FR 7839, February 26, 1985) to discuss protection of this area as an ACEC.

FOR FURTHER INFORMATION CONTACT: Deane Swickard, Folsom Resource Area Manager, 63 Natoma Street, Folsom, California 95630; (916) 985–4474.

Dated: May 15, 1986.

Ed Hastey,

State Director, California.

BILLING CODE 4310-40-M

[Serial Number MT-020-LUP-86]

Permit of Public Land; Montana

AGENCY: Bureau of Land Management, Interior.

ACTION: Realty Action—FLPMA section 302 Permit.

SUMMARY: The following described tract of land has been examined and through land use planning identified as suitable for permit pursuant to section 302 of the Federal Land Policy and Management Act.

Principal Meridian, Montana

T. 9 S., R. 40 E.,
Sec. 7: SESE;
Sec. 8: N½SW¼, SW¼SW¼.

(Totaling approximately 160 acres)

This Notice of Realty Action proposes the permitting of lands under the jurisdiction of the Bureau of Land Management near the town of Decker, Big Horn County, Montana. The permit is intended to authorize use of these lands by the Decker Coal Company in conjunction with neighboring coal leases. The public lands involved are included in the mining use mitigation plan signed by Decker Coal Company and the Montana Department of Fish, Wildlife and Parks in 1985.

The permit is a noncompetitive offer at fair market value pursuant to completion of future investigation into the exchange of surface ownership and/or long-term FLPMA lease.

Permittee Qualifications

The Permittee must be legally capable of holding and conveying lands or interest therein under the laws of the State of Montana.

FOR FURTHER INFORMATION CONTACT: Detailed information concerning this action, including the Environmental Assessment, Land Report and Decision Record, is available for review at the Miles City District, Powder River Resource Area Office, Miles City Plaza, Miles City, Montana 59301, or call Steve Durkee at (406) 232–7000.

SUPPLEMENTARY INFORMATION: For a period of 45 days from the date of publication of this Notice, interested parties may submit comments to the above address. Any adverse comments will be evaluated by the Miles City District Manager who may cancel or modify this action and issue a final determination. In the absence of any adverse action by the Miles City District Manager, this realty action will become the final determination of the Department of the Interior.

Dated: May 15, 1986.

David Swogger,

Acting District Manager.

[FR Doc. 86-11403 Filed 5-21-86; 8:45 am]

BILLING CODE 4310-DN-M

Realty Action—Exchange; Oregon

May 15, 1986.

The following described public land has been examined and determined to be suitable for transfer out of Federal ownership by exchange under Section 206 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2756; 43 U.S.C. 1716):

Willamette Meridian, Oregon

T. 13 S., R. 3 E.,
Sec. 20, W½.
Containing 320.00 acres in Linn County.

In exchange for this parcel, the United States will acquire the following described lands and interest in lands from Willamette Industries, Inc.:

Willamette Meridian, Oregon

T. 7 S., R. 4 E.,
Secs. 26 and 27 (reserved timber only).
T. 14 S., R. 8 W.,
Sec. 33, all that portion of the NW¼SE¼ and Lot 2 lying northerly of the center of Little Lobster Creek.
T. 15 S., R. 7 W.,
Sec. 6, Lot 7, SE¼SW¼, S½SE¼.
T. 15 S., R. 8 W.,
Sec. 23, S½NE¼, S½N½SW¼NW¼, S½SW¼NW¼, SE¼NW¼.
Sec. 26, SE¼.
Containing 196.00 acres in Benton County and 310.00 acres in Lane County.

The purpose of the exchange is to improve both the resource management program of the Bureau of Land Management and the timber management program of the company. The public land that will be exchange is a relatively isolated parcel. Although the company does not own the adjoining lands, it does operate lumber and plywood mills nearby. The company lands and interest in lands have important timber and anadromous fish habitat values. These lands will be managed for multiple use along with the adjoining public lands. The exchange proposal has been given public exposure and no adverse comments were received. The exchange is in the public interest.

The fair market values of the lands and interest in lands are either approximately equal or the acreage will be adjusted to bring the values as close as possible. Full equalization of values will be achieved by payment to the United States of funds in the amount not to exceed 25 percent of the total value of the public land to be transferred. All mineral rights will be transferred with the surface estate.

The public land will be subject to the following terms and conditions:

1. Valid, existing rights, including any right-of-way, easement, or lease of record.

2. A reservation to the United States for right-of-way for ditches and canals under the Act of Agust 30, 1890.

Publication of this notice in the **Federal Register** segregates the public land, described above, from appropriation under the public land laws, including the mining laws, but not from exchange pursuant to Section 206 of the Federal Land Policy and Management Act of 1976. The segregative effect of this notice will terminate upon issuance of patent or in two years, whichever occurs first.

Detailed information concerning this exchange, including the environmental assessment and the record of public discussions, is available for review at the Salem District Office, P.O. Box 3227 (1717 Fabry Road SE), Salem, Oregon 97302.

For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the Salem District Manager at the above address. Any objections will be reviewed by the Oregon State Director, Bureau of Land Management, who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

Edward S. Lewis III,
Acting District Manager.

BILLING CODE 4310-33-M

[W-57410]

Realty Action; Receipt of Exchange Proposal (Amended); Wyoming

AGENCY: Bureau of Land Management, Interior.

ACTION: Amended Notice of Receipt of Exchange Proposal between Laurance S. Rockefeller and the Department of the Interior.

SUMMARY: The proposed exchange of a scenic easement of approximately 902 acres of the Heartland Area of Laurance Rockefeller's J–Y Ranch, an inholding in the Grand Teton National Park, for federal coal has been amended to include an additional 200 acres of land.

These additional acres are described by metes and bounds but lie in portions of section 5, 6, and 8 of T. 42 N., R. 116 W., 6th P.M. Teton County, Wyoming.

In addition to the Youngs Creek area of Sheridan County, alternate areas of federal coal reserves are being considered in this exchange proposal.

The soliciting of comments described in 51 FR 16234, May 1, 1986 by the Casper District Bureau of Land Management has been extended to June 23, 1986.

FOR FURTHER INFORMATION CONTACT: All comments or any further information should be addressed to: Chuck Wilkie, Special Project Team Leader, Casper District Office, Bureau of Land Management, 951 North Poplar, Casper, WY 82601 (307) 261–5554.

Dated: May 14, 1986.

William H. Mortimer,
Acting District Manager.

BILLING CODE 4310-22-M

New Mexico; Intent To Prepare Resource Management Plan and Invitation To Participate in Identification of Issues and Planning Criteria

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent to prepare resource management plan.

SUMMARY: The Bureau of Land Management, Taos Resource Area, New Mexico, is resuming the preparation of a Resource Management Plan (RMP), which will include the preparation of an Environmental Impact Statement (EIS), initially begun in 1984. The Plan will establish the basis for future management actions on approximately 24,000 square miles of public land and mineral resources by the BLM's Taos Resource Area. The Code of Federal Regulations, Title 43, Subpart 1600, will be followed for this planning effort. The public is invited to participate in this planning process.

DATE: Comments relating to the identification of issues and planning criteria will be accepted until June 27, 1986.

ADDRESS: Send comments to: Bureau of Land Management, Taos Resource Area, P.O. Box 1045, Taos, NM 87571–1045.

FOR FURTHER INFORMATION CONTACT: Dan Wood, Area Manager or Mary Zuschlag, RMP Team Leader, Taos Resource Area, (505) 758–8851.

SUPPLEMENTARY INFORMATION: The planning area will include the public land and Federal mineral ownership in all, or parts of, Union, Mora, Rio Arriba, Colfax, San Miguel, Los Alamos, Harding, Taos, and Santa Fe Counties. This encompasses approximately 564,000 acres of BLM-administered surface and approximately 1,600,000 acres of Federal minerals under Federal, State, or private subsurface in the nine-county area. The Taos RMP is an issue-

BEST COPY AVAILABLE

based document. To date, five issues have been identified which will be addressed in the Taos RMP. They include, but are not limited to, the following: (1) *Land Ownership Adjustments:* Identifying those portions of the Taos Resource Area where land ownership adjustments may be needed to achieve more efficient management and utilization of public resources; (2) *Rights-of-Way Corridors:* Ensuring that development of linear rights-of-way does not result in undesirable impacts on other public resources and natural resource values; (3) *Transportation:* Determining the appropriate levels of access for all the public land in the Taos Resource Area to minimize conflicts with wildlife, range, and private land ownership, and to avoid damage to sensitive watershed; (4) *Special Management Areas:* Identifying areas which may require special management attention through special designation; and (5) *Vegetative Uses:* Changing management in some livestock grazing allotments in order to reduce conflicts between livestock grazing and other important natural resource uses and values.

These preliminary issues are not final and may be further defined by direct imput through active public participation. The Taos RMP will be prepared by an inter-disciplinary team which will include a team leader, technical coordinator, writer-editor, range conservationists, realty specialists, a wildlife biologist, an outdoor recreation planner, an archaeologist, a hydrologist, a geologist, a forester, and an economist, with additional technical support to be provided by other specialists as needed.

Five public meetings have been held, in different communities within the Resource Area. The anticipated issues were presented and comments were requested. A total of 74 individuals attended these public meetings, and their comments were generally favorable to both the planning effort and the identified issues. Only a few written comments were received. No further public meetings are anticipated, unless specifically requested. Written comments, however, will be accepted until June 27, 1986. Complete records of all phases of the planning process will be available for public review at the Taos Resource Area Office throughout the preparation of the Taos RMP. Draft and final documents will be published, the Draft RMP/EIS anticipated in March 1987.

Dated: May 15, 1986.

Charles W. Luecher,

State Director.

Camping and Firearms Use Restriction Order for the South Yuba Recreation Area

AGENCY: Bureau of Land Management, Interior.

ACTION: Establishment of camping, Day Use, and Firearms Use Restriction Order on Public Lands within the South Yuba Recreation Area of the Folsom Resource Area, Bakersfield District, California.

SUMMARY: The South Yuba Recreation Area camping, day use and firearms use restrictions will be as follows:

1. Day use only will be allowed one quarter mile downstream and one-half mile downstream from Edwards Crossing.
2. Camping will be authorized for a period not to exceed 14 days in any 90-day period outside the day use area.
3. Each campsite in the South Yuba Campground may have no more than two motor vehicles, or combination of a motor vehicle and a recreation vehicle; and a maximum of 4 adults (16 years and older).
4. Discharge of firearms is prohibited within ¼ mile of all developed campgrounds, day use areas, and ¼ mile of the center of the river for all public lands along the South Yuba River.

For the purpose of this order, a firearm is defined as under Title 18,

U.S.C., Chapter 44, section 921(a)(3). Federal, State and local law enforcement officers are exempt from this order in the course of their official duties. This order goes into effect on May 31, 1986

DATE: This order is in effect on May 31, 1986.

FOR FURTHER INFORMATION CONTACT: Deane K. Swickard, Folsom Resource Area Manager, Folsom Resource Area Office, 63 Natoma Street, Folsom, California 95630. Telephone (916) 985–4474.

SUPPLEMENTARY INFORMATION: The purpose of this order is to protect resources of the public land, persons and property, and augument the Camping and Occupancy Restriction Order published in the **Federal Register** Volume 48, No. 208, October 26, 1983, 49555. Authority for this restriction order is contained in CFR Title 43, Chapter II, subpart 8364, §§ 8364.1 and 8365.1–2(a).

Any person who fails to comply with this restriction order may be subject to a fine not to exceed $1,000 and/or imprisonment not to exceed 12 months. Penalties are contained in CFR Title 43, Chapter II, Part 8360, Subpart 8360.0–7.

Dated: May 15, 1986.

BILLING CODE 4310-40-M

Notice of Intent To Prepare Environmental Impact Statement; New Mexico

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Intent to prepare an Environmental Impact Statement.

SUMMARY: The Bureau of Land Management (BLM), Albuquerque District, is participating in the preparation of an Environmental Impact Statement (EIS) for a Molybdenum Tailings Disposal Facility near Questa, New Mexico. The EIS will determine if the proposal will result in any unnecessary or undue degradation of the public lands.

Scoping meetings will be conducted to inform the public of the proposed development and EIS process, and to elicit public comment on the resource concerns to be addressed. Informal open house scoping meetings are scheduled to take place in Taos, New Mexico, on July 22, 1986, at The Kachina Lodge, North Pueblo Road, beginning at 1:00 p.m. and 7:00 p.m., and Questa, New Mexico, on July 23, 1986, at the Municipal Building, room no. 7, formally State Highway 3, beginning at 1:00 p.m. and 7:00 p.m.

SUPPLEMENTARY INFORMATION: Molycorp Inc. has applied for 1320-acre millsite location on Guadalupe Mountain near Questa, New Mexico pursuant to 30 U.S.C. section 42 (1976). The Bureau of Land Management has prepared an Environmental Assessment on the proposal and subsequently issued a Record of Decision (ROD) on September 25, 1985, requiring an EIS for the proposal. The EIS will be prepared by a third party contractor with the Bureau of Land Management responsible for content and quality control of the EIS. Bids and proposals were accepted, and ERT, A Resource Engineering Company, was selected as the contractor to prepare the EIS.

The Bureau of Land Management contact for the Proposed Tailing Disposal Facility is: Gene Tatum, Bureau of Land Management, Albuquerque District Office, 505 Marquette NW., P.O. Box 6770, Albuquerque, NM 87197–6770, Telephone: Commercial (505) 766–3114, FTS 474–3114.

Charles W. Luschar,

State Director.

Dated: May 15, 1986.

BILLING CODE 4310-FB-M

[NM 63247]

Realty Action; Modified Competitive Sale of Public Lands, New Mexico

The following described land has been identified through the East Chaves Management Framework Plan and found suitable for disposal by sale under section 203 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2750, 43 U.S.C. 1713), at no less than the appraised fair market value.

New Mexico Principal Meridian

Legal description	Acreage	Appraised fair market value
T. 5 S., R. 27 E., sec. 10, SE¼NW¼	40	$800

The land described is hereby segregated from appropriation under the public land laws, including the mining laws, until a patent is issued or 270 days from the date of publication of this notice, whichever occurs first.

The above described lands will be offered for sale at public auction at 2:00 p.m., on Wednesday, August 13, 1986 at the Roswell Resource Area Conference Room, Federal Building, 5th and Richardson Streets, Roswell, New Mexico.

Because the tract to be offered is isolated, has no legal access, and is predominently within the ranch boundaries of Fred and Louise Van Eaton, the sale will be a modified competitive sale, i.e., the Van Eatons will be given the opportunity to meet the highest bid received at the public auction.

Bidding must be submitted to the BLM's Roswell Resource Area office in an envelope clearly marked "Bid for Public Sale NM 63247" no later than 4:30 p.m. August 12, 1986. No bids will be accepted for less than the fair market value specified in this notice. Each sealed bid must be accompanied by a certified check, postal money order, bank draft, or cashier's check made payable to the Bureau of Land Management for not less than 10% of the amount bid. Federal law requires that all bidders be United States citizens, or in the case of corporations, be subject to the laws of any State in the United States Proof of these requirements must accompany the bid. An apparent high bid will be declared at the auction. The apparent high bidder and the designated bidder (Fred and Louise Van Eaton), will be notified. The designated bidder shall have 14 days from the date of the sale to exercise their preference consideration. Should the designated bidder fail to submit a bid that matches the apparent high bid within the specified time period, the tract will be sold to the apparent high bidder.

The successful bidder must pay the balance of the full bid price within 180 days of notification by the BLM. Failure to pay the full price within 180 days shall disqualify the apparent high bidder and cause the bid deposit to be forfeited to the BLM.

Terms and conditions applicable to the sale are:

(1) The patent will contain a reservation to the United States for ditches and canals constructed under the Authority of the Act of August 30, 1890 (27 Stat. 391, 43 U.S.C. 945).

(2) All minerals, together with the right to prospect for, mine and remove the minerals shall be reserved to the United States.

(3) The patent will be subject to those rights granted to the existing mineral lessee to use as much of the surface as is necessary for exploration, development, and production of the mineral estate.

(4) The patent will be subject to the right of the BLM to manage existing grazing lease rights issued through 2/28/1995, unless waived by the lessee.

Detailed information concerning the sale, including the reservations, conditions of sale, and planning and environmental documents are available at the Roswell Resource Area office, Federal Building, 5th and Richardson Streets, Roswell, New Mexico.

For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, Roswell District, P.O. Box 1397, Roswell, New Mexico 88201. Any adverse comments will be evaluated by the District Manager who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

Francis R. Cherry Jr.,
District Manager.

BILLING CODE 4310-FB-M

Proposed Reinstatement of a Terminated Oil and Gas Lease

In accordance with Title IV of the Federal Oil and Gas Royalty Management Act (Pub. L. 97-451), a petition for reinstatement of oil and gas lease AA-49443-AT has been received covering the following lands:

Fairbanks Meridian, Alaska

T. 20 S., R. 4 E.,
Sec. 27, SW¼NW¼, SW¼.
(200 acres)

The proposed reinstatement of the lease would be under the same terms and conditions of the original lease, except the rental will be increased to $5 per acres per year, and royalty increased to 16⅔ percent. The $500 administrative fee and the cost of publishing this Notice have been paid. The required rentals and royalties accruing from June 1, 1985, the date of termination, have been paid.

Having met all the requirements for reinstatement of lease AA-49443-AT as set out in section 31 (d) and (e) of the Mineral Leasing Act of 1920 (30 U.S.C. 188), the Bureau of Land Management is proposing to reinstate the lease, effective June 1, 1985, subject to the terms and conditions cited above.

Dated: May 14, 1986.
Kay F. Kletka,
Acting Chief, Branch of Mineral Adjudication.

BILLING CODE 4310-JA-M

[CA 19824]

Realty Action; Land Exchange in Trinity County, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action, Exchange of Public Lands.

SUMMARY: The following described public land has been determined to be suitable for disposal by exchange under the provisions of section 206 of the Act of October 21, 1976 (90 Stat. 2750; 43 U.S.C. 1716):

T. 33 N., R. 9 W., M.D.B.&M.,
Sec. 14, W½.
(containing 320 acres)

In exchange for these lands, the United States will acquire the following described lands from Santa Fe Pacific Timber Company, 1626 Court Street, Redding, California 96001:

T. 32 N., R. 10 W., M.D.B.&M.
Sec. 1, SW¼SW¼.
(containing 40 acres)
T. 33 N., R. 9 W., M.D.B.&M.,
Sec. 31, SE¼NE¼and the NE¼SE¼.
(containing 80 acres).
T. 33 N., R. 9 W., M.D.B.&M.,
Sec. 29, E½SE¼.
(containing 80 acres)
T. 33 N., R. 10 W., M.D.B.&M.
Sec. 33, SE¼SW¼ and the SE¼.
(containing 200 acres)

The purpose of this exchange is to acquire these private lands which have high public values for recreation purposes. These parcels lie along the Trinity River, a designated "recreation river" under the Wild and Scenic Rivers Act (Pub. L. 95-625). Acquisition is consistent with the approved Trinity River Recreation Area Management Plan (which provides for land tenure adjustments through exchange), and the Redding Resources Area Land Use Plans.

The values of the lands to be exchanged are approximately equal; Full equalization of values will be in accordance with regulations cited in 43 CFR 2201.3. Appraisal values will be available prior to consummation of the exchange at the BLM area office, Redding, California.

Publication of this notice in the Federal Register segregates the public land described herein from all forms of appropriation under the public land laws, including the mining laws, for a period of two years from the date of first publication.

Evidence of title acceptable to the Department of Justice is required on private land conveyed to the United States.

Detailed information concerning the exchange, including the Land Report, environmental assessment, and the record of non-federal participation, is available for review at the Redding Resource Area Office, 355 Hemsted Drive, Redding, California 96002.

DATE: For a period of 45 days from the date of first publication, interested parties may submit comments to Robert J. Bainbridge, Area Manager, Redding Resource Area.

ADDRESS: Comments should be sent to: Area Manager, Redding Resource Area, Bureau of Land Management, 355 Hemsted Drive, Redding, Califpmia 96002.

Objections will be reviewed by the California State Director, who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

FOR FURTHER INFORMATION CONTACT: Robert J. Bainbridge, (916) 246-5325.

Dated: May 8, 1986.
Marion J. Francis, Jr.,
Acting Area Manager.

BILLING CODE 4310-84-M

Minerals Management Service

Development Operations Coordination Document; Pennzoil Producing Co.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the Receipt of a Proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that Pennzoil Producing Company has submitted a DOCD describing the activities it proposes to conduct on Leases OCS-G 2062 and 2439, Blocks 334 and 335, respectively, East Cameron Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Intracoastal City, Louisiana.

DATE: The subject DOCD was deemed submitted on May 13, 1986.

ADDRESSES: A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Michael J. Tolbert; Minerals Management Service; Gulf of Mexico OCS Region; Rules and Production; Plans, Platform and Pipeline Section; Exploration/Development Plans Unit; Phone (504) 838-0875.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to Sec. 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected States, local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: May 15, 1986.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-236]

Certain Portable Bag Sewing Machines and Parts Thereof; Initial Determination Terminating Respondent on the Basis of Settlement Agreement

AGENCY: U.S. International Trade Commission.

ACTION: Notice is hereby given that the Commission has received an initial determination from the presiding officer in the above-captioned investigation terminating the following respondent on the basis of a settlement agreement: American-Newlong, Inc.

SUPPLEMENTARY INFORMATION: This investigation is being conducted pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). Under the Commission's rules, the presiding officer's initial determination will become the determination of the Commission thirty (30) days after the date of its service upon the parties, unless the Commission orders review of the initial determination. The initial determination in this matter was served upon the parties on May 6, 1986.

Copies of the initial determination, the settlement agreement, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202-523-0161. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-724-0002.

Written Comments: Interested persons may file written comments with the Commission concerning termination of the aforementioned respondent. The original and 14 copies of all such comments must be filed with the Secretary to the Commission, 701 E Street NW., Washington, D.C. 20436, no later than 10 days after publication of this notice in the **Federal Register**. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request confidential treatment. Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why confidential treatment should be granted. The Commission will either accept the submission in confidence or return it.

FOR FURTHER INFORMATION CONTACT: Ruby J. Dionne, Office of the Secretary, U.S. International Trade Commission, telephone 202–523–0176.

By order of the Commission.

Issued: May 19, 1986.

INTERSTATE COMMERCE COMMISSION

[Finance Docket No. 30618]

The Denver and Rio Grande Western Railroad Co., Trackage Rights Exemption; Missouri Pacific Railroad

The Missouri Pacific Railroad has agreed to grant overhead trackage rights to The Denver and Rio Grande Western Railroad Company, between M.P. 276.66 at Rock Creek Junction and M.P. 277.90 at Southwest Junction, on the Sedalia Subdivision, a distance of 1.02 miles; and between a point of switch connection at said M.P. 277.90 and the point of switch connection at M.P. 278.59 at Southwest Junction on the Kansas City Subdivision, a distance of .36 miles. The trackage rights will be effective on June 16, 1986.

This notice is filed under 49 CFR 1180.2(d)(7). Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not stay the transaction.

As a condition to use of this exemption any employee affected by the trackage rights will be protected pursuant to *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), and modified in *Mendocino Coast Ry. Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

Dated: May 16, 1986.

By the Commission, Jane F. Mackall, Director, Office of Proceedings.

James H. Bayne,

Secretary.

BILLING CODE 7035-01-M

JOINT BOARD FOR THE ENROLLMENT OF ACTUARIES

Advisory Committee on Actuarial Examinations; Meeting

Notice is hereby given that the Advisory Committee on Actuarial Examinations will meet in Room 3313, Internal Revenue Service Building, 1111 Constitution Avenue, NW., in Washington, D.C. on June 16 and 17, 1986, from 8:30 a.m. to 5:00 p.m. each day.

The purpose of the meeting is to discuss recommended questions for the Joint Board's examinations referred to in Title 29 U.S. Code, section 1242(a)(1)(B) and to review the May 1986 Joint Board examinations in order to make recommendations relative thereto, including the minimum acceptable pass scores. A determination as required by section 10(d) of the Federal Advisory Committee Act (Pub. L. 92–463) has been made that the portions of the meeting dealing with the discussion of questions which may appear on the Joint Board's examinations and review of the May 1986 Joint Board basic examinations fall within the exceptions to the open meeting requirement set forth in Title 5 U.S. Code, section 552b(c)(9)(B), and that the public interest requires that such portions be closed to public participation.

In addition, there will be a discussion of (1) the concept of open book examinations for future Joint Board examinations and (2) an increase in the fees structure for participation in Joint Board examinations. The portion of the meeting dealing with the discussion of these topics will be open to the public as space is available. Such discussion will commence at 1:30 p.m. on June 16 and will continue until the discussion is finished but not beyond the 3:30 p.m. that day.

Time permitting, after discussion of the open meeting agenda items by Committee members, interested persons may make statements germane to the subjects under consideration. Persons wishing to make oral statements are requested to notify the Committee Management Officer in writing prior to the meeting in order to aid in scheduling the time available, and should submit the written text or, at a minimum, an outline of comments they propose to make orally. Such comments will be limited to ten minutes in length. Any interested person also may file a written statement for consideration by the Advisory Committee and the Joint Board by sending it to the Committee Management Office. Notifications and statements should be received no later than June 9, 1986. They should be sent to Mr. Leslie S. Shapiro, Joint Board for the Enrollment of Actuaries, c/o U.S. Department of the Treasury, Washington, D.C. 20220. Telephone inquiries may be directed to Mr. Shapiro at (202) 535–0787.

Dated: May 19, 1986.

Leslie S. Shapiro,

Advisory Committee Management Officer, Joint Board for the Enrollment of Actuaries.

Information Collection(s) Under Review

May 19, 1986.

The Office of Management and Budget (OMB) has been sent for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. Entries are grouped into new forms, revisions, or extensions. Each entry contains the following information: The name and telephone number of the Agency Clearance Officer (from whom a copy of the form and supporting documents is available); the office of the agency issuing the form; the title of the form; the agency form number, if applicable; how often the form must be filled out; who will be required on asked to report; an estimate of the number or responses; an estimate of the total number of hours needed to fill out the form; an indication of whether section 3504(h) of Pub. L. 96–511 applies; and, the name and telephone number of the person or office responsible for the OMB review. Copies of the proposed form(s) and the Agency Clearance Officer whose name and telephone number appear under the agency name. Comments and questions regarding the item(s) contained in this list should be directed to the reviewer listed at the end of each entry *AND* to the Agency Clearance Officer. If you anticipate commenting on a form but find that time to prepare will prevent

you from submitting comments promptly, you should advise the reviewer and the Agency Clearance Officer of your intent as early as possible.

BILLING CODE 4410-10-M

Lodging of Consent Decree Pursuant to Clean Air Act

In accordance with Department policy, 28 CFR 50.7, Notice is hereby given that on May 9, 1986 a proposed Consent Decree in *United States* v. *Ben's Truck and Equipment, Inc. and P&M Cedar Products, Inc.*, Civil Action No. S-84-1672-MLS, was lodged with the United States Court for the Eastern District of California. The proposed Consent Decree concerns the prevention of visible emissions and the proper procedures to be followed during demolition operations involving the removal of friable asbestos material. The proposed Consent Decree only relates to defendant Ben's Truck and Equipment, Inc. and requires Ben's Truck to pay a civil penalty of $25,000 and enjoins Ben's Truck from further violations of various Sections of the Clean Air Act and the National Emission Standard for Hazardous Air Pollutants for asbestos.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Ben's Truck and Equipment, Inc., and P&M Cedar Products, Inc.*, D.J. Ref. 90-5-2-1-743.

The proposed Consent Decree may be examined at the office of the United States Attorney, Eastern District of California, 650 Capitol Mall, Sacramento, California 95814 and at the Region 9 Office of the Environmental Protection Agency, 215 Fremont Street, San Francisco, California. Copies of the Consent Decree also may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1517, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice.

F. Henry Habicht II,
Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-10-M

Lodging of Consent Decree Pursuant to Clean Water Act

In accordance with Department policy, 28 CFR 50.7, Notice is hereby given that on May 13, 1986 a proposed Consent Decree in *United States* v. *City of Key West, Florida*, and *State of Florida*, Civil Action No. 85-3332-Civ-Scott, was lodged with the United States Court for the Southern District of Florida. The proposed Consent Decree concerns prevention of the discharge of pollutants by the City of Key West into the Atlantic Ocean in violation of the Clean Water Act. The proposed Consent Decree relates only to defendant City of Key West and requires Key West to pay a civil penalty of $500,000, to rehabilitate its existing sewer system, to construct a wastewater treatment plant, to comply with interim effluent limitations until completion of the treatment plant and then to comply with

final effluent limitations contained in the City's NPDES permit, to report any violations of the Consent Decree and subjects Key West to certain stipulated contempt penalties for violation of the provisions of the Consent Decree.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *City of Key West, Florida* and *State of Florida*, D.J. Ref. 90-5-1-1-2457.

The proposed Consent Decree may be examined at the office of the United States Attorney, Southern District of Florida, 155 South Miami Avenue, Suite 700, Miami, Florida 33130 and at the Region 4 Office of the Environmental Protection Agency, 345 Courtland Street, Atlanta, Georgia 30365. Copies of the Consent Decree also may be examined at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1517, Ninth Street and Pennsylvania Avenue, NW., Washington, DC 20530. A copy of the Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $1.30 (10 cents per page reproduction cost) payable to the Treasurer of the United States.

F. Henry Habicht II,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Drug Enforcement Administration

Manufacturer of Controlled Substances; Registration

By Notice dated March 3, 1986, and published in the **Federal Register** on March 10, 1986; (51 FR 3257), Sterling Drug, Inc., 33 Riverside Avenue, Rensselaer, New York 12144, made application to the Drug Enforcement Administration to be registered as a bulk manufacturer of Pethidine (meperidine) (9230), a basic class of controlled substance listed in Schedule II.

No comments or objections have been received. Therefore, pursuant to section 303 of the Comprehensive Drug Abuse Prevention and Control Act of 1970 and Title 21, Code of Federal Regulations, section 1301.54(e), the Deputy Assistant Administrator hereby orders that the application submitted by the above firm for registration as a bulk manufacturer of the basic classes of controlled substances listed above is granted.

Dated: May 16, 1986.

Gene R. Haislip,

Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 86-11533 Filed 5-21-86; 8:45 am]

BILLING CODE 4410-09-M

[Docket No. 85-47]

Medicine Shoppe; Denial of Application

On September 4, 1985, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued an Order to Show Cause to the Medicine Shoppe, 206 Donelson Pike, Donelson, Tennessee 37214 (Respondent). The Order to Show Cause sought to deny the application for DEA registration executed by Daniel C. Dickson on behalf of the Medicine Shoppe on August 13, 1985. The statutory predicate for the Order to Show Cause was that Daniel C. Dickson, owner of the Medicine Shoppe, had been convicted, in the Criminal Court of Davidson County Tennessee, of four counts of illegal sale of controlled substances, felonies relating to controlled substances; and that he had materially falsified four applications for renewal of the pharmacy's DEA Certificate of Registration, indicating that he had not been convicted of a felony relating to controlled substances.

Respondent, through counsel, requested a hearing on the issues raised in the Order to Show Cause. The matter was placed on the docket of Administrative Law Judge Francis L. Young. After prehearing proceedings, a hearing was held in Nashville, Tennessee on November 19, 1985. On February 5, 1986, Judge Young issued his opinion and recommended ruling, findings of fact, conclusions of law and decision. Government counsel filed exceptions to the Administrative Law Judge's opinion and recommended decision. In response to the Government's exceptions, Judge Young issued a supplemental opinion and recommendation. On April 11, 1986, the Administrative Law Judge transmitted the record of the proceedings to the Administrator. The Administrator has considered this record in its entirety and pursuant to 21 CFR 1316.67, hereby issues his final order in this matter based upon the findings of fact and conclusions of law as hereinafter set forth.

The Administrative Law Judge found that Daniel C. Dickson, owner of the Medicine Shoppe has been employed as a pharmacist in Nashville, Tennessee since 1971. In 1973, he began to operate a Medicine Shoppe pharmacy under a franchise. Investigation of Mr. Dickson by the Tennessee Bureau of Investigation in 1980 and 1981 established that he wrongfully filled prescriptions for controlled substances at his pharmacy. An agent of the Tennessee Bureau of Investigation, acting in an undercover capacity, obtained at least 13 refills of a prescription for Ionamin. Ionamin is a Schedule IV controlled substance. The original prescribing physician had not authorized any refills of the prescription. Further investigation by the Tennessee Bureau of Investigation disclosed additional prescriptions for controlled substances which had been refilled without authorization of a physician, one prescription having been refilled on 32 occasions and another on 24 occasions.

In April, 1981, a search warrant was executed at the Medicine Shoppe by agents of the Tennessee Bureau of Investigation (TBI). Certain prescriptions were seized from the pharmacy files, and Mr. Dickson was questioned by agents after being advised of his rights. When Dickson was asked why he had refilled many of the above-cited controlled substance prescriptions, he indicated that it was neglect. When specifically told by a TBI Agent that the physician had not authorized a prescription, Mr. Dickson stated that he had been unable to contact the physician.

On April 8 and 9, 1981, investigators from the Tennessee Board of Pharmacy conducted an audit of controlled substances at the Medicine Shoppe. A verification of purchase invoices by the investigators revealed that Mr. Dickson had failed to provide all relevant invoices for the receipt of Schedule III and IV controlled substances. The wholesaler's records indicated that it had provided the Medicine Shoppe with a greater quantity of controlled substances than the pharmacy's records acknowledged. The audit results for a two year period showed shortages and overages of Schedule II, III, and IV controlled substances. Among these were a shortage of 14,945 tables of Valium 5 mg., being 13.4 percent of the amount of this drug for which the pharmacy was accountable; a shortage of 10,526 tablets of Valium 10 mg., being 22 percent of the total accountable; and

a shortage of 3,151 dosage units of propoxyphene compound 65 mg., being 28.6 percent of the total accountable. Several controlled substances showed overages, the records indicating that the pharmacy could account for more of a specific controlled substance than was available. The Administrator notes that while these audit results do not, in and of themselves, establish any illegal dispensing of distributing, they do, at the very least, establish Mr. Dickson's failure to adequately maintain the records required by law to be kept at the pharmacy.

The Administrator finds that Daniel C. Dickson was indicted by the Grand Jury of Davision County, Tennessee in July, 1981 of 92 counts of dispensing controlled substances without the authorization of a practitioner. In September, 1981, Dickson was convicted of four counts of feloniously dispensing controlled substances without authorization of a practitioner, after entering a plea of guilty to those charges. These are felony offenses relating to controlled substances. Mr. Dickson was sentenced to two years at hard labor in the State Penitentiary, but actually served no time and was placed on five years probation. Mr. Dickson also entered into a Consent Order with the Tennessee Board of Pharmacy which imposed three years of probation, community service and a fine. Dickson has successfully fulfilled the Tennessee Board's probationary requirements, and both he and the Medicine Shoppe are currently licensed and in good standing in Tennessee.

On December 21, 1981, December 13, 1982, December 19, 1983, and December 20, 1984, Daniel C. Dickson signed applications for renewal of the Medicine Shoppe's DEA Certificate of registration. The first of these was executed just three months after his conviction in 1981. There are a series of questions appearing on each application form. One question asks whether the applicant has been convicted of a felony in connection with controlled substances under state or Federal law. On each of the four applications for renewal of the pharmacy's DEA Certificate of Registration, the question was answered "no." Each application was signed by Daniel C. Dickson. Each application was materially incorrect. Each application was processed by DEA since there was no indicator on the application that the status of the pharmacy had changed. The pharmacy remained registered until the registration was revoked, effective August 26, 1985, by the Administrator of DEA. (Prior to the instant proceeding, an Order to Show Cause proposing to revoke the then-current DEA Certificate of Registration of the Respondent pharmacy was issued based on the same grounds as the current action. At that time, Daniel Dickson, on behalf of the pharmacy, specifically waived a hearing and submitted a written statement. After consideration of the entire investigative file and the written statement submitted by Mr. Dickson, the Administrator revoked the pharmacy's registration. See 50 FR 30533 (July 26, 1985).)

Evidence presented at the hearing indicated that Daniel Dickson is held in high regard in his community. Other pharmacists in the area who have known him and worked with him express high regard for his pharmacy skills. Other members of the medical community believe Daniel Dickson to be a competent pharmacist. A number of persons who know Daniel Dickson, his pharmacy and the community believe that he does not pose a risk to the public, but rather is a valuable asset to the community which he serves. Patients rely on Daniel Dickson as a pharmacist. He enjoys a reputation for honesty and truthfulness in his community. The evidence presented at the hearing indicated that since his conviction in 1981, Mr. Dickson has complied with all state and Federal regulations with regard to dispensing controlled substances, with the exception of the four erroneous applications which he filed with DEA. Mr. Dickson testified at the hearing that if the pharmacy is not granted a DEA registration, he may have to close the store or lose the franchise. His current inability to dispense controlled substances has caused his business to decline.

The Administrative Law Judge found that Daniel Dickson pled guilty to the crime of feloniously dispensing the controlled substance, phentermine. He also found that the audit of controlled substances conducted at the Respondent pharmacy revealed sizable shortages and overages of several such substances. The audit results demonstrate, at the very least, an extraordinary carelessness and sloppiness in recordkeeping. The Administrative Law Judge concluded that recordkeeping is a most serious matter in a pharmacy. Controlled substances are controlled because they are potentially dangerous. They must be kept in legitimate therapeutic channels. They cannot be permitted to become diverted into the hands of those who will abuse them to their own harm or the harm of others. It is obvious that Dickson was making little, if any, effort to keep track of the controlled substances audited by the Tennessee State Board of Pharmacy. The extent of the neglect of responsibility found by the audit increases the serious doubts raised as to Dickson's fitness to hold a DEA registration. Even after such recordkeeping failures had been brough to Mr. Dickson's attention, he continued to submit incorrectly filled-out applications for renewal of his DEA registration. The preponderance of the evidence is to the effect that Dickson himself did not prepare these forms incorrectly—this was done by others. This, however, does not relieve him of the responsibility for the contents of these applications since he signed and submitted them. Dickson says that he did not read the renewal applications prepared by others prior to signing them. He should have since he is responsible for their contents. Dickson's failure to examine these documents, at best, reveals neglect of responsibility that increases still further the serious doubts already existing as to his fitness to hold a DEA registration. Based upon his prior convictions, the autlit results, and his failure to properly complete the DEA registration applications, the Administrative Law Judge recommended that Respondent pharmacy, owned by Dickson, should not be entrusted with a DEA registration. The Administrator agrees with the recommendation of the Administrative Law Judge and adopts his findings of fact, conclusion of law and recommended decision in its entirety.

The Administrator concludes that the registration of Mr. Dickson's Medicine Shoppe would be inconsistent with the public interest, upon consideration of the applicant's experience in dispensing controlled substances, the applicant's conviction record, the applicant's record of noncompliance with applicable law relating to controlled substances, and the applicant's negligent conduct discussed above which threatens the public health.

Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b) orders that the application for DEA Certificate of Registration, executed by Daniel C. Dickson on behalf of the Medicing Shoppe in Donelson, Tennessee on August 13, 1985, and any other outstanding applications for registration executed by Mr. Dickson, be and are hereby denied.

This order is effective May 22, 1986.

Dated: May 16, 1986.

John C. Lawn,

Administrator.

BILLING CODE 4410-09-M

Federal Bureau of Investigation

Advisory Policy Board National Crime Information Center; Meeting

The Advisory Policy Board of the National Crime Information Center (NCIC) will meet on June 4-5, 1986, from 9 a.m. until 5 p.m. at the Raffles Hotel Denver, Southeast, 3200 South Parker Road, Aurora, Colorado 80014.

The major topics to be discussed include:

(1) Presentations of proposals recommended by state and local users of the NCIC System to enhance the quality and completeness of records in the System.

(2) Status report and future testing plans for the Interstate Identification Index.

(3) Status report on the contractor's methodology of conducting the NCIC 2000 Study.

The meeting will be open to the public with approximately 30 seats available for seating on a first-come-first-served basis. Any member of the public may file a written statement with the Advisory Policy Board before or after the meeting. Anyone wishing to address a session of the meeting should notify the Advisory Committee Management Officer, Mr. William A. Bayse, FBI, at least 24 hours prior to the start of the session. The notification may be by mail, telegram, cable, or hand-delivered note. It should contain the name, corporate designation, along with a capsulized version of the statement and an outline of the material to be offered. A person will be allowed not more than 15 minutes to present a topic, except with the special approval of the Chairman of the Board.

Inquiries may be addressed to Mr. David F. Nemecek, Committee Management Liaison Officer, NCIC Federal Bureau of Investigation, Washington, DC 20535, telephone number 202-324-2606.

William H. Webster,

Director.

BILLING CODE 4410-02-M

MERIT SYSTEMS PROTECTION BOARD

Federal Employees; Review of Effect of *Simmons* v. *Merit Systems Protection Board*, 768 F.2d 323 (Fed. Cir. 1985); Opportunity to File Amicus Briefs in Board Proceedings

AGENCY: Merit Systems Protection Board.

ACTION: Notice of opportunity to file amicus briefs addressing issue related to awards of attorney fees.

SUMMARY: The Merit Systems Protection Board is providing an opportunity for interested parties to file amicus briefs concerning the issue of whether the Board should give retroactive effect to a court decision holding that the Board may award attorney fees in retirement cases.

DATE: Amicus briefs submitted in response to this notice shall be filed with the Clerk of the Board on or before June 23, 1986.

ADDRESS: All briefs shall be captioned "Amicus Brief, Attorney Fee Awards." A signed original and ten (10) copies of each amicus brief submitted in response to this notice shall be filed with the Office of the Clerk of the Board and addressed to Robert E. Taylor, Clerk of the Board, Merit Systems Protection Board, Attention: Attorney Fee Awards, 1120 Vermont Avenue NW., Washington, DC 20419.

FOR FURTHER INFORMATION CONTACT: Robert E. Taylor, Clerk of the Board, Merit Systems Protection Board, (202) 653-7200.

SUPPLEMENTARY INFORMATION: In *Williams* v. *Office of Personnel Management*, 718 F.2d 1553 (1983), the U.S. Court of Appeals for the Federal Circuit held that the Board lacked authority to grant attorney fees under 5 U.S.C. § 7701(g)(1) in physical disability retirement cases. *Id.* at 1554. That holding was overruled by *Simmons* v. *Merit Systems Protection Board*, 768 F.2d 323 (Fed. Cir. 1985). Since the latter decision was issued, appellants whose cases were decided under *Williams* have requested that the Board apply *Simmons* retroactively and award attorney fees in their cases, even though the MSPB decisions in their cases became final before *Simmons* was issued. The Board has reopened these cases and is now offering, through this notice, to receive and consider amicus briefs from interested parties on whether it should apply *Simmons* to those cases.

Dated: May 19, 1986.

Robert E. Taylor,

Clerk of the Board.

NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements; Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission, new, revision or extension: Extension.

2. The title of the information collection: 10 CFR Part 34, "Licenses for Radiography and Radiation Safety Requirements for Radiographic Operations."

3. The form number if applicable: Not applicable.

4. How often the collection is required: Required reports are collected and evaluated on a continuing basis as events occur. Applications for new licenses or amendments may be submitted at any time. Applications for renewal of licenses are submitted every five years.

5. Who will be required or asked to report: Persons holding or applying for a license for the use of byproduct material for purposes of industrial radiography.

6. An estimate of the number of responses: 400.

7. An estimate of the total number of hours needed to complete the requirement or request: 54,482.

8. An indication of whether section 3504 (h), Pub. L. 96-511 applies: Not applicable.

9. Abstract: 10 CFR Part 34 establishes rules governing the domestic licensing of byproduct material for use in industrial radiography.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 1717 H Street, N.W., Washington, DC 20555.

Comments and questions should be directed to the OMB reviewer, Jefferson B. Hill, (202) 395-7340.

The NRC Clearance Officer is R. Stephen Scott, (301) 492-8585.

Dated at Bethesda, Maryland, this 19th day of May 1986.

For the Nuclear Regulatory Commission.

Documents Containing Reporting or Recordkeeping Requirements; Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission, new, revision or extension: New.

2. The title of the information collection: 10 CFR Part 61—Licensing Requirements for Land Disposal of Radioactive Waste.

3. The form number if applicable: Not applicable.

4. How often the collection is required: Applications for licenses are submitted once. Applications for renewal or amendment are submitted as needed. Other reports are submitted annually and as other events require.

5. Who will be required or asked to report: Applicants for and holders of an NRC license for land disposal of low-level radioactive waste.

6. An estimate of the number of responses: 350,015.

7. An estimate of the total number of hours needed to complete the requirement or request: 14,785.

8. An indication of whether section 3504 (h), Pub. L. 96-511 applies: Not applicable.

9. Abstract: 10 CFR Part 61 establishes the procedures, criteria, and license terms and conditions for the land disposal of low-level radioactive wastes.

Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 1717 H Street, NW., Washington, DC 20555.

Comments and questions should be directed to the OMB reviewer, Jefferson B. Hill, (202) 395-7340.

The NRC Clearance Officer is R. Stephen Scott, (301) 492-8585.

Dated at Bethesda, Maryland, this 19th day of May 1986.

For the Nuclear Regulatory Commission.

Patricia G. Norry,
Director, Office of Administration.

BILLING CODE 7590-01-M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-23241; File No. SR-NYSE-86-13]

Self Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by New York Stock Exchange, Inc., Relating to Listing Fees for Share Rights Plan Securities.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on May 1, 1986, the New York Stock Exchange, Inc. filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

(a) The text of the proposed rule change appears below. Paragraph 902.02 of the NYSE Listed Company Manual is amended for the purpose of adding the following:

Listing Fee for Share Rights

A minimum fee of $1,270 will be charged for share rights plans that become effective subsequent to May 1, 1986.

Upon the share rights becoming exercisable and tradable separately from the common stock:

- An initial fee would be charged on the share rights then outstanding and on additional issuances of rights.
- Share rights would be subject to the Exchange's continuing annual fee schedule.

Companies whose share rights plans became effective on or before May 1, 1986, must pay the full initial fee, but will not be subject to any additional fees until the rights become exercisable and tradable separately from the common stock, at which time there will be a fee for additional issuances of rights and the Exchange's continuing annual listing fee schedule will become applicable.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of and basis for the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections (A),(B) and (C) below, of the most significant aspects of such statements.

(A) *Purpose*—The purpose of this proposed rule change is to establish a separate fee applicable to share rights Better known as "poison pill" securities, (and also known as "warrant dividends") share rights typically are not exercisable until certain triggering events occur. These triggering events usually pertain to the announcement of a tender offer for the issuer's shares or the purchase of a specific percentage of the issuer's shares. Prior to the time the share rights are excercisable, they do not trade separately from the common stock, and they are evidenced by the transferable only with the common stock.

The Exchange has been listing share rights since August, 1984 and has been charging the currently applicable initial listing fees as set forth in paragraph 902.02 of the NYSE Listed Company Manual. The proposed fee would result in a one-time charge of $1,270 for share rights plans that have become effective subsequent to May 1, 1986. Should the rights subsequently become exercisable and tradable separate from the common stock, the Exchange's standard initial listing fee schedule would be applied as would its continuing annual fee schedule.

Companies whose share rights plans became effective on or before May 1, 1986, must pay the full initial fee, but will not be subject to any additional fees until the rights become exercisable and tradable separately from the common stock, at which time there will be a fee for additional issuances of rights and the Exchange's continuing annual listing fee schedule will become applicable.

Statutory Basis—The basis under the 1934 Act for this proposed rule change is the requirement under section 6(b)(4) that an exchange have rules that provide for the equitable allocation of reasonable dues, fees and other charges among its members and issuers and other persons using its facilities.

(B) Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes that this proposed rule change will not impose any burden on competition.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments regarding this proposed rule change. The Exchange has not received any unsolicited written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3) of the Securities Exchange Act of 1934 and subparagraph (e) of Securities Exchange Act Rule 19b-4. At any time within 60 days of the filing of such proposed rule change the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statement with respect to the proposed rule change are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the above mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by June 12, 1986.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: May 15, 1986.

Shirley E. Hollis,

Assistant Secretary.

BILLING CODE 8010-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Summary Notice No. PE-86-11]

Petition for Exemption; Summary of Petitions Received Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATE: Comments on petitions received must identify the petition docket number involved and must be received on or before: June 16, 1986.

ADDRESS: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Petition Docket No. ———, 800 Independence Avenue, SW., Washington, DC 20591.

FOR FURTHER INFORMATION: The petition, any comments received and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-204), Room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 426-3644.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, DC, on May 16, 1986.

John H. Cassady,

Assistant Chief Counsel, Regulations and Enforcement Division.

Petitions for Exemption

Docket No.	Petitioner	Regulations affected	Description of relief sought
24639	Experimental Aircraft Association	14 CFR 91.30	To allow petitioner to operate specified aircraft for which no master minimum equipment list exists, with certain inoperative items of equipment.
13639	Air Transport Association/Trans World Airline	14 CFR 121.361(a)	To amend Exemption No. 2081 to allow TWA to be included in the provisions which allows dispatch with a single HF on certain oceanic routes between the Northeastern United States and the San Juan ARTCC.
24548	United States Parachute Association	14 CFR 91.47	To permit the petitioner to carry a normal crew plus 40 passengers on Douglas DC-3/C-47 aircraft. Petitioner further requests this exemption for the period between June 20 and July 14, 1986, when the U.S. National Skydiving Championships are to be held in Muskogee, OK.
24688	John L. Gallo	14 CFR 135.293(a)(2), 135.293(b), 135.337(a)(2), 135.337(a)(3), and 135.337(a)(4).	To allow petitioner to serve as check airmen under certain limitations for "On-Demand" air carriers who operate under the provisions of part 135 of the Federal Aviation Regulations without meeting, in each case, all provisions of the FAR.
21015	Ransome Airlines	14 CFR 135.63(c)	To permit petitioner during scheduled passenger-carrying operations conducted under part 135, to takeoff with a load manifest lacking the identification of crewmembers and their crew position assignments, subject to certain conditions.
7908	TRW Aircraft Components Group	14 CFR 21.231	Amendment to Exemption No. 674 to allow petitioner to obtain delegation option authorization for Hartzell propellers manufactured for use on turbopropeller and reciprocating engines of not more than 1,500 brake horsepower. Exemption 674 currently allows 1,000 brake horsepower.
24684	Air Logistics	14 CFR 135.439	To allow petitioner to operate aircraft equipped with nine or less seating configurations when maintained in accordance with § 135.411(a)(2).
23771	Cessna Aircraft Co.	14 CFR 91.213 and 91.31	Extension of Exemption No. 4060 to allow the operation by one pilot without a second in command, of Cessna Models 560, S560, and 552, subject to certain conditions and limitations. Exemption 4060 as amended, expires July 31.
24608	Fairchild Aircraft Corp.	14 CFR 21.17	To permit certification of petitioner's Model SA227-400 under Special Federal Aviation Regulation 41. This would permit petitioner to extend its type certification program beyond the 3-year period ending in September 1986.
24674	Aspac, Inc.	14 CFR 121.309	To allow petitioner an extension of 90 days beyond the August 1 compliance date to install emergency medical kits.
24654	Seattle Jet Center	14 CFR 135.267	To allow petitioner to operate its fixed wing aircraft in Hospital Emergency Medical Transport Service without meeting the flight and duty time limitations.
24644	New Mexico Junior College	14 CFR 61.3 and 91.27	To allow foreign pilots and foreign built gliders to participate in the Second National Sports Class Soaring Championships sponsored by the National Soaring Foundation.
24641	The Perris Valley Skydiving Society, Inc.	14 CFR 105.43	To allow foreign parachutists to participate in parachute jumps without complying with the parachute equipment and packing requirements.
6429	Northern Air Cargo, Inc.	14 CFR 91.209(c) and 121.157	Extension and amendment of Exemption No. 770 to allow petitioner to carry outsize cargo on C-82 restricted category aircraft within the State of Alaska. To allow deletions of those provisions of Condition No. 2, which preclude operations with C-82 aircraft into airports within Alaska into which standard category aircraft can be operated with the same outsize cargo on board.
24657	Wackenhut Services, Inc.	14 CFR 61.161	To allow petitioner to apply for an airline transport pilot certificate with a rotorcraft category rating without meeting the requirement of at least 1,200 hours of flight time within the preceding 8 years.
24652	Millen Air, Inc.	14 CFR 91.303	To allow petitioner to operate one Stage 1 Boeing 707 until hush kits are installed.
24652	Albuquerque International Balloon Fiesta	14 CFR 91.209 and 91.27	To allow certain foreign balloon pilots and foreign balloons to participate in the 15th Annual Albuquerque International Balloon Fiesta, Albuquerque, NM, October 4-12, 1986, without complying with the pilot certification and airworthiness requirements.

Petitions for Exemption—Continued

Docket No.	Petitioner	Regulations affected	Description of relief sought
23653	The University of North Dakota	14 CFR Portions of part 41 appendixes A, C, D, F, and H.	To permit aviation students of the University of North Dakota to graduate from the appropriate courses when they have been trained to a specific performance level rather than the minimum flight time requirements including the minimum solo cross-country flight time requirements.
24306-2	Skyster	14 CFR 91.303	To allow petitioner to operate two Stage 1 Boeing 707 aircraft until hush kits are installed but not later than December 31, 1986.

Dispositions of Petitions for Exemption

Docket No.	Petitioner	Regulations affected	Description of relief sought disposition
24684	Lewis County, WA sheriff's office	14 CFR 91.79(c)	To allow petitioner to operate a public aircraft closer than 500 feet to persons, vessels, vehicles, or structures for the purposes of search and rescue operations. DENIED 4/14/86.
22635	Sierra Academy of Aeronautics	14 CFR portions of part 63, appendix C, section (a)(3)(vi)(a).	Extension of Exemption 3584 to allow petitioner to reduce the required 5 hours of flight training in an airplane to not less than 2 hours of intensive flight training in an airplane by incorporating the remaining time in a static airplane for applicants who do not possess a commercial flight certificate with an instrument rating, subject to certain conditions and limitations. DENIED 4/22/86.
23908	Piedmont Airlines	14 CFR 121.371 and 121.378	To allow petitioner to use engines, components, and spare parts on its Fokker F-28 aircraft that have been manufactured, repaired, overhauled, or inspected by persons outside of the United States who do not hold U.S. airman certificates. GRANTED 4/22/86.
22468	Western Airlines	14 CFR 61.157(e) and appendix H	To extend the March 31, 1986, termination date of Exemption 3713 and amend its conditions and limitations. The exemption would allow petitioner to use a Phase II B-727 simulator instead of an aircraft for certain pilot flight checks. PARTIAL GRANT 4/23/86.
24662	Terre A. Hultgren	14 CFR 121.311(b)	To allow petitioner to hold her daughter on her lap during takeoff and landing and when so requested by the pilot in lieu of her daughter sitting in a seat alone. GRANTED 4/25/86.
24684	Ramon Navarro	14 CFR 61.3(3)	To allow petitioner to act as a required pilot flight crewmember, without a current and valid medical certificate, for the purpose of acting as a safety pilot, during simulated instrument flight conditions, when instructing airplane instrument students, when the student holds a private or commercial pilot certificate with the appropriate category and class ratings, and is current and qualified in that aircraft. DENIED 4/24/86.
22286	Mid Pacific Airlines, Inc.	14 CFR 121.371(a) and 121.378	To allow petitioner to utilize all Nippon Airways Company, Ltd., Air Asia Company, Ltd., and Toa Domestic Airlines and its affiliate Nitto Maintenance Company for the inspection and overhaul of aircraft, including certain selected airframe accessories and appliances. GRANTED 4/24/86.
13199	American Airlines Training Corp. (AATC)	14 CFR 61.63(d) (2) and (3)	To allow petitioner to use an approved visual simulator for applicants for a Cessna 500 (CE-500) type rating who have completed AATC's Federal Aviation Administration (FAA)-approved training course, pursuant to § 121.424(d), even though AATC does not have an operating certificate issued under part 121. PARTIAL GRANT 4/25/86.
21780	Civil Air Patrol	14 CFR 91.116	Extension of Exemption 4042, to allow petitioner's members who hold private pilot certificates to be reimbursed for fuel, oil, and maintenance while serving on official CAP mission. GRANTED 4/24/86.
21168	Executive Air Fleet Corp.	14 CFR 135.297(d)	To allow petitioner to use pilots-in-command who have completed an instrument proficiency check within the preceding 12 calendar months if they have satisfactorily completed either an instrument proficiency check or training to proficiency in an approved aircraft simulator within the preceding 6 months. GRANTED 4/30/86.
20044	Air Transport Association of America	14 CFR 61.63 (b) and (c)	To allow pilots employed by part 121 certificate holders to be issued additional category and class ratings based on normal upgrade training to second-in command. GRANTED 4/30/86.
23453	Reader Flying Service, Inc.	14 CFR 43.3(g)	To amend the name on and extend Exemption 3749 to permit petitioner's certificated pilots to remove, check, and reinstall magnetic chip detector plugs installed on Allison 250 series turbine engines, aircraft transmissions, and tail rotor gearboxes of its Bell 206B helicopters, subject to certain conditions. GRANTED 4/28/86.
23804	Kenneth B. Sharman	14 CFR portions of part 63	To establish special rules for military flight navigators or former military flight navigators to permit the issuance of Federal Aviation Administration (FAA) flight navigator certificates based primarily on military flight navigator training and experience in a component of the Armed Forces of the United States. DENIED 4/28/86.
24186-1	Arrow Air, Inc.	14 CFR 91.303	To extend the January 1, 1985, noise level compliance date. AMENDED GRANT 4/25/86.
24048	Anglo Airlines	14 CFR 91.303	To allow petitioner operating a Boeing 707-338C, make one technical stop at Honolulu, Hawaii for fuel enroute to New Zealand without meeting the specified noise standards. Petitioner states that it has a hush kit contract with Comtran for this Aircraft. GRANTED 4/30/86.
24418	Aeroservicios Ecuatorianos, C.A.	14 CFR 91.303	To extend the January 1, 1985, noiselevel compliance date. AMENDED GRANT 5/2/86.
24972	Lone Star Industries	14 CFR 91.307	To allow operation in the United States, under a service to small communities exemption, of specified two-engine airplanes identified by registration and serial number, that have not been shown to comply with the applicable operating noise limits as follows: BAC-1-11; NSLC until January 1, 1988. GRANTED 4/23/86.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:50 a.m. on Monday, May 19, 1986, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session, by telephone conference call, to consider a recommendation regarding the Corporation's assistance agreement with an insured bank pursuant to section 13(c) of the Federal Deposit Insurance Act.

In calling the meeting, the Board determined, on motion of Chairman L. William Seidman, seconded by Director Robert L. Clarke (Comptroller of the Currency), that Corporation business required its consideration on the matter on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matter in a meeting open to public observation; and that the matter could be considered in a closed meeting pursuant to subsections (c)(9)(A)(i) and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(9)(A)(i) and (c)(9)(B)).

Dated: May 20, 1986.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

DEPARTMENT OF ENERGY

10 CFR Part 503

[Docket No. ERA-C&E 86-35]

Powerplant and Industrial Fuel Use Act; Cogeneration Exemption; New Facilities

AGENCY: Department of Energy.

ACTION: Interim rule with request for comments.

SUMMARY: Department of Energy (DOE) is amending its final rules governing the cogeneration exemption under the Powerplant and Industrial Fuel Use Act of 1978 ("FUA" or "the Act") (46 FR 59872, 59914, December 7, 1981, as amended at 47 FR 29208, July 6, 1982) ("final rules"). The amendment modifies § 503.13(b) of the final rules by adding the cogeneration exemption to the list of exemption types available using an environmental checklist in lieu of more detailed environmental documentation.

DATES: Effective May 22, 1986. Written comments are due on or before June 23, 1986.

ADDRESS: All comments should be addressed to Docket No. ERA-C&E-86-35, Department of Energy, Economic Regulatory Administration, Room GA-045, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585.

FOR FURTHER INFORMATION CONTACT:

Richard Ransom, Department of Energy, Economic Regulatory Administration, Coal and Electricity Division, Room GA-045, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone (202) 252-4811

Henry K. Garson, Esq., Department of Energy, Office of General Counsel, Room 6A-113, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, Telephone (202) 252-6947.

SUPPLEMENTARY INFORMATION: Pending final adoption or rejection this action will go into effect on an interim basis on May 22, 1986 in the Federal Register.

List of Subjects in 10 CFR Part 503

Business and industry, Electric power plants, Energy conservation, Natural gas, Petroleum, Reporting and recordkeeping requirements.

PART 503—[AMENDED]

10 CFR Part 503 is amended as follows:

1. The authority citation for Part 503 continues to read as follows:

Authority: Department of Energy Organization Act, Pub. L. 95-91, 91 Stat. 565 (42 U.S.C. 7101 et seq); Powerplant and Industrial Fuel Use Act of 1978, Pub. L. 95-620, 92 Stat. 3289 (42 U.S.C. 8301 et seq); Energy Security Act, Pub. L. 96-294, 94 Stat. 611 (42 U.S.C. 8701); E.O. 12009, 42 FR 46267, Sept. 15, 1977.

§ 503.13 [Amended]

2. Inserting "cogeneration," after "emergency purposes" in § 503.13(b) introductory text.

Issued in Washington, DC, on May 7, 1986.

Marshall A. Staunton,

Acting Administrator, Economic Regulatory Administration.

[FR Doc. 86-11517 Filed 5-21-86; 8:45 am]

BILLING CODE 6450-01-M

DEPARTMENT OF ENERGY

Compliance With the National Environmental Policy Act (NEPA); Amendments to the DOE NEPA Guidelines

AGENCY: Department of Energy.

ACTION: Notice of Proposed Amendments to the Department of Energy's NEPA Guidelines.

SUMMARY: The Department of Energy proposes to amend Section D of its NEPA guidelines by adding the permanent cogeneration exemption authorized under Title II of the Fuel Use Act to its list of categorical exclusions. A categorical exclusion is a class of DOE action which normally does not require the preparation of either an environmental impact statement (EIS) or environmental assessment (EA). Public comment is invited on this proposal. Pending final adoption or rejection of the proposed amendments, the Department of Energy will utilize the categorical exclusion process for permanent cogeneration exemptions.

DATE: Comments by June 23, 1986.

FOR FURTHER INFORMATION CONTACT:

Dr. Robert J. Stern, Director, Office of Environmental Compliance, U.S. Department of Energy, 1000 Independence Avenue, SW., Rm. 3G–092, Washington, DC 20585, (202) 252–4600

Henry Garson, Esq., Assistant General Counsel for Environmental, GC–11, U.S. Department of Energy, 1000 Independence Avenue, SW., Rm. 6A–113, Washington, DC 20585, (202) 252–6947.

SUPPLEMENTARY INFORMATION:

A. Background

On March 28, 1980, the Department of Energy (DOE) published in the **Federal Register** (45 FR 20695) final guidelines for implementing the procedural provisions of NEPA as required by the Council on Environmental Quality (CEQ) regulations (40 CFR 1500–1509). In accordance with these regulations Section D of the DOE guidelines lists three classes of agency action: (1) Those which normally require environmental impact statements (EIS); (2) those which normally require environmental assessments (EA) but not necessarily environmental impact statements and; (3) those which normally do not require either environmental assessments or environmental impact statements. This third class was identified pursuant to § 1507.3(b)(2)(ii) of the CEQ regulations referenced above and are termed "categorical exclusions." The CEQ regulations defines a categorical exclusion as a "category of actions which do not individually or cumulatively have a significant effect on the human environment and for which, therefore, neither an environmental assessment nor an environmental impact statement is required." The regulations permit agency discretion, in that "an agency may decide in its procedures or otherwise to prepare environmental assessments even though it is not required to do so. Any procedures under this section shall provide for extraordinary circumstances in which a normally excluded action may have a significant environmental effect."

The DOE NEPA guidelines state that "DOE may add actions to or remove actions from the categories in section D based on experience gained during the implementation of the CEQ regulations and these guidelines." Pursuant to the guidelines, substantive revisions are to be published in the **Federal Register** and adopted only after opportunity for public review. The last amendments to section D were published in the **Federal Register** on February 5, 1985.

B. Proposed Amendments

The Department proposes to further amend section D of its guidelines by adding to the list of categorical exclusions in section D, the grant or denial of a permanent exemption from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978 (Act) (Pub. L. 95–620) for any new cogeneration powerplant. This exemption is authorized by section 212(c) of the Act.

The listing of certain classes of actions which are categorically excluded from NEPA only raises a presumption that any such actions will not significantly affect the quality of the human environment. For those circumstances where DOE has reason to believe that a significant impact could arise from the grant or denial of a specific cogeneration exemption, DOE's NEPA guidelines provide that individual proposed actions will be reviewed to ascertain whether an environmental assessment or environmental impact statement would be required for any individual action which is listed in Subpart D of the guidelines as categorically excluded from NEPA. To assist DOE in making this determination, DOE is concurrently amending, in a document published elsewhere in this **Federal Register**, its regulations covering applications for cogeneration exemptions by requiring a petitioner for this exemption to (1) certify that he will comply with all applicable environmental permits and approvals prior to operating the facility; and (2) complete an environmental checklist designed to determine whether the facility in question will have an impact in certain areas regulated by specified laws which impose consultation requirements on DOE (10 CFR 503.13(b)(2)). This will allow DOE to verify that either no significant impact will result, or that the categorical exclusion does not apply.

Under section 500.2 of DOE's final rule as amended (47 FR 29209, July 6, 1982), a "cogeneration facility" is an electric powerplant or a major fuel burning installation that produces:

(1) Electric power; and

(2) Any other form of useful energy (such as steam, gas or heat) that is, or will be used, for industrial, commercial, or space heating purposes. In addition, for purposes of this definition, electricity generated by the cogeneration facility must constitute more than five (5) percent and less than ninety (90) percent of the useful energy output of the facility.

In its revised rulemaking of July 6, 1982 (47 FR 29209) (final rule) the DOE recognized the important role cogeneration technologies can play in assisting the nation to meet the energy goals of increased fuel efficiency and oil and natural gas savings. The final rule included a table by which potential cogeneration exemption applicants could determine the oil and gas savings that could be expected, on a regional basis, for electricity backed off the grid through cogeneration. The table displayed oil and gas savings, based on Btu/kWh for 11 regions. Examples of expected oil and gas savings by electric region, per Btu/kWh range from 300 in the Southeastern Electric Reliability Council (Virginia, N. Carolina, S. Carolina, etc.) a region in which the majority of the utility-generated electricity is from coal and nuclear, to 7,000 for the Western Systems Coordinating Council (California, Oregon, Washington, etc.), an area heavily dedicated to the use of oil and gas for electricity generation.

To date 94 cogeneration exemption requests have been submitted to the DOE (during 1985 alone, 38 petitions were accepted). Of this number, four were rejected for lack of sufficient information and three were terminated because the facilities did not require FUA exemptions. The remaining 86 facilities have either been granted cogeneration exemptions or the exemption requests are currently being acted upon by the DOE. Only 29 of these facilities have not been located in California.

BEST COPY AVAILABLE

Number of facilities	State
1	Alaska.
1	Arkansas.
3	Colorado.
3	Louisiana.
1	Massachusetts.
2	Michigan.
1	New Hampshire.
1	New Jersey.
1	Oklahoma.
14	Texas.
1	Washington.

These exemption petitions have effectively backed-out substantial quantities of electricity. In 1979, the first year after enactment of FUA, 185 megawatts of electricity were backed-off the grid. In 1985, 2926 megawatts were backed-off (the average unit size was 75 megawatts).

All cogeneration exemption petitions must be reviewed for compliance with NEPA requirements. In some, but not all approved cases, some added impact has been involved. Based on DOE's experience to date, the following generalities can be drawn in each of four main categories of impacts.

Air Quality

In general, natural gas or oil firing has resulted at worst in only very minor increases in air emissions. Often, the offsetting reduction in emissions resulting from the operation of a new cogeneration unit will cause a net decrease as compared to the preoperation condition. This has been achieved in many cases through the retirement of old units which the new cogenerator replaces. Even in those cases where no units are replaced, operation of a new cogeneration system will inherently result in the reduction of emissions from existing utility sources. Under the Fuel Use Act, a cogeneration exemption can be granted only if it will result in less oil and gas being consumed. Thus, cogeneration results in less fuel consumption for an equal amount of produced electricity and other useable energy. Although the offsetting utility emission reductions are not always equal to the emissions of the new cogenerator, because of pollution control requirements and relative system efficiencies, any net increases have been so minor that the threshhold levels necessary to qualify for New Source Review have not been exceeded.

Water Resources and Quality

Given the nature of cogeneration, the majority of cogeneration exemption petitions are for facilities to be constructed at existing industrial sites, and the systems for water supply and disposal are usually already in place. Even though water requirements of a cogeneration facility can be large, it generally represents an insignificant additional demand on supply.

Land Use

Land proposed for a new cogeneration facility is generally within an existing plant boundary on an already industrialized site. Usually little or no undeveloped land is affected. For a proposed facility sited outside of such areas, usually only a few acres of undeveloped land are affected.

Other Impacts

Cogeneration facilities have rarely been found to cause significant impacts on other environmental or socio-economic parameters such as solid waste, noise, cultural resources, threatened and endangered species, floodplains and wetlands, employment, industrial development, etc.

The granting of a cogeneration exemption generally results in no significant impact to the environment, while the denial of a cogeneration exemption results in no net change to the environment. The DOE, therefore, based on public comment on the above findings, proposes to add cogeneration to its list of Fuel Use Act exemptions subject to NEPA categorical exclusion.

Comments concerning the proposed amendments to Section D of the Department's NEPA guidelines should be submitted to Dr. Robert J. Stern at the above cited address.

Pending final adoption or rejection of the proposed action, the Department of Energy will effect the proposal on an interim basis.

Issued in Washington, DC, on May 7, 1986.

Mary L. Walker,

Assistant Secretary, Environment, Safety, & Health.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

Title 3—

The President

Proclamation 5496 of May 21, 1986

Better Hearing and Speech Month, 1986

By the President of the United States of America

A Proclamation

Sounds, whether we produce them or receive them, are an integral part of our lives. Musical sounds bring us a whole range of delight. Much of our knowledge of the world around us we learn through sounds: conversations allow us to gather and convey information, to question and to receive answers; ringing fire alarms warn us to clear a burning building. Sounds—both the ones we hear and the ones we make—help us to understand others and be understood.

More than fifteen million Americans strive daily to surmount the isolation that hearing impairment so often brings. Over ten million Americans endeavor to communicate despite speech disorders. We can help people with communicative disorders fulfill their potential by identifying and removing the man-made obstacles that limit their educational and occupational opportunities. Our efforts will enrich not only their lives, but our own.

Today, in medical institutions across the country, scientists supported by the National Institute of Neurological and Communicative Disorders and Stroke and by numerous voluntary health agencies are carrying out a wide range of research to find better ways to prevent, treat, and cure hearing and speech disorders. Investigators have discovered much about the structure and function of the systems involved in hearing and speech. They have developed new devices and medications that offer hope where before there was none. Still, much remains to be learned.

To heighten public awareness of hearing and speech disorders, the Congress, by Senate Joint Resolution 284, has designated the month of May 1986 as "Better Hearing and Speech Month" and has authorized and requested the President to issue a proclamation in observance of this month.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the month of May 1986 as Better Hearing and Speech Month, and I call upon the people of the United States to observe this month with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-first day of May, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Proclamation 5487 of May 21, 1986

National Tourism Week, 1986

By the President of the United States of America

A Proclamation

Tourism is vital to the United States. It contributes significantly to our economic prosperity. It creates jobs and helps out on our balance of payments. Most of all, it creates better understanding of this Nation's social and cultural realities, including our history.

People are central to the travel industry. It supports, directly or indirectly, almost 7 million jobs. Travel and tourism have grown substantially over the years. The industry now generates business receipts of approximately $260 billion annually. Payroll income alone is $60 billion, and tax revenue is $33 billion. Indeed, international tourism now ranks as this Nation's largest business "export" in the service industries.

This Nation is blessed with a magnificent and varied array of tourist attractions: our extraordinarily diversified landscape, and some of the world's most vibrant cities, cultural attractions, and natural wonders. Nowhere else but in America can you find such beautiful coastlines and beaches, majestic mountains, lush valleys, rugged woods, rolling plains, awesome canyons, scenic deserts, tropical islands, and Arctic snowscapes. No wonder the world wants to come and see where we live. Let us welcome them and treat them as honored guests.

In recognition of the many educational, economic, and recreational benefits of tourism to the people of this country, the Congress, by Public Law 99-96, has designated the week beginning May 18 through May 24, 1986, as "National Tourism Week" and authorized and requested the President to issue a proclamation in observance of this event.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week beginning May 18 through May 24, 1986, as National Tourism Week, and I call upon the people of the United States to observe such week with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-first day of May, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Proclamation 5488 of May 21, 1986

Older Americans Melanoma/Skin Cancer Detection and Prevention Week, 1986

By the President of the United States of America

A Proclamation

Skin cancer is the most common form of cancer, and its incidence is rising. Fortunately, it is also the most preventable form of cancer and the easiest to detect early and treat successfully. The risk of developing skin cancer increases throughout adult life, with the highest incidence occurring among people over 50.

There are two basic types of skin cancer: the common basal cell and squamous cell cancers, and the less common but far more serious type called melanoma. More than 400,000 new cases of nonmelanoma skin cancer are diagnosed in the United States each year. These cancers have a high cure rate, especially with early detection and prompt treatment. Most can be treated in the doctor's office.

Occurrence of nonmelanoma skin cancers varies directly with exposure to ultraviolet light from the sun (and "sun lamps" of various kinds), and indirectly with skin pigmentation. Older Americans can reduce their risk of skin cancer by avoiding excessive exposure to sunlight, particularly if they are fair-skinned; by avoiding exposure during the 10 a.m. to 2 p.m. hours; by wearing protective clothing; and by using sunscreen lotions and ointments. Prudent avoidance of too much sunlight is fully compatible with enjoyment of the great outdoors.

Older Americans may mistake the signs of skin cancer for normal skin changes due to aging, and they should be alert to these signs. Many skin growths are noncancerous, but any new growth on the skin, or a sore that does not heal, should promptly be brought to a doctor's attention. Skin cancer has many different appearances, but it occurs most frequently on sun-exposed areas of the body.

Melanoma is a far more serious health problem, but it also is highly curable when detected and treated early. About 23,000 new cases will be diagnosed this year. Melanoma is also related to exposure to ultraviolet light but not as directly as nonmelanoma skin cancers. Older Americans should be alert for changes in the size or color of a mole or rapid darkening, ulceration or scaliness or changes in the shape or outline of a mole, or development of a new pigmented lesion or bulge in a normal skin area. These are some of the most common signs that may signal melanoma, and a doctor should be consulted without delay.

The American Academy of Dermatology and other dermatologic organizations are committed to educating the public about all types of skin cancers. This year marks the Second Annual National Melanoma and Skin Cancer Detection and Prevention Program, a coordinated national effort of professional dermatologic organizations to reduce the increasing incidence of skin cancers and to better control these cancers by prompt diagnosis and appropriate treatment.

The Congress, by Senate Joint Resolution 267, has designated the week of May 26 through June 1, 1986, as "Older Americans Melanoma/Skin Cancer Detection and Prevention Week" and has authorized and requested the President to issue a proclamation in observance of this week.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week of May 26 through June 1, 1986, as Older Americans Melanoma/Skin Cancer Detection and Prevention Week, and I invite all Americans to observe the week with appropriate programs and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-first day of May, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

7 CFR Part 70

Voluntary Standards and Grades for Poultry

Correction

In FR Doc. 86–10334, beginning on page 17278, in the issue of Friday, May 9, 1986, make the following corrections:

1. On page 17280, in the first column, in the second complete paragraph, fourth line, "no" should read "not".

2. In the next paragraph, in the tenth line from the bottom of the paragraph, "note" should read "not".

3. On page 17281, in the third column, in § 70.221 (e), in the second line, "of" should read "on".

BILLING CODE 1505-01-M

7 CFR Part 908

[Valencia Orange Reg. 364]

Valencia Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: Regulation 364 establishes the quantity of such fruit that may be shipped to market during the period May 23–29, 1986. The regulation is needed to provide for orderly marketing of fresh Valencia oranges for the period specified due to the marketing situation confronting the orange industry.

EFFECTIVE DATE: Regulation 364 (§ 908.664) is effective for the period May 23–29, 1986.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone: 202/447–5697.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under Secretary's Memorandum 1512–1 and Executive Order 12291 and has been designated a "non-major" rule.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Agricultural Marketing Agreement Act and rules issued thereunder are unique in that they are brought about through group action of essentially small entities for their own benefit. Thus, both statutes have small entity orientation and compatibility.

It is estimated that approximately 123 handlers of Valencia oranges are subject to regulation under the marketing order and that the great majority of these handlers may be classified as small entities. While regulations issued may impose some costs on affected handlers and the number of such firms may be substantial, the added burden on small entities, if present at all, is not significant.

The regulation is issued under Marketing Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendation and information submitted by the Valencia Orange Administrative Committee (VOAC) and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the act.

The regulation is consistent with the marketing policy for 1985–86. The committee met publicly on May 20, 1986, to consider the current and prospective conditions of supply and demand and recommended the quantity of Valencia oranges deemed advisable to be handled during the specified week. The committee reports that the market for Valencia oranges is good.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), because there is insufficient time between the date when information upon which this regulation is based became available and the effective date necessary to effectuate the declared policy of the act. Interested persons were given opportunity to submit information and views on the regulation at an open meeting. To effectuate the declared policy of the act, it is necessary to make the regulatory provisions effective as specified, and handlers have been notified of the regulation and the effective date.

List of Subjects in 7 CFR Part 908

Agricultural Marketing Service, Marketing Agreements and Orders, California, Arizona, Oranges, Valencias.

PART 908—[AMENDED]

1. The authority citation for 7 CFR Part 908 continues to read:

Authority: (Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674).

2. Section 908.664 is added to read as follows:

§ 908.664 Valencia Orange Regulation 364.

The quantities of Valencia oranges grown in California and Arizona which may be handled during the period May 23, 1986, through May 29, 1986, are established as follows:

(a) District 1: 384,000 cartons;

(b) District 2: 416,000 cartons;

(c) District 3: Unlimited cartons.

Dated: May 21, 1986.

Joseph A. Gribbin,

Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 86–11627 Filed 5–22–86; 8:45 am]

BILLING CODE 3410-02-M

FEDERAL RESERVE SYSTEM

12 CFR Part 226

[Reg. Z; TIL-1]

Truth in Lending; Official Staff Commentary Update

Correction

In FR Doc. 86-6848, beginning on page 11432, in the issue of Thursday, April 3, 1986, make the following correction:

On page 11425, in the third column, following the ninth line, insert the following phrase: "Items which are not penalties include, for example:"

BILLING CODE 1505-01

12 CFR Part 265

[Docket No. R-0573]

Rules Regarding Delegation of Authority; Delegation of Authority to Secretary of the Board To Act on Certain Applications Requiring Prior Approval of the Board

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board is amending its Rules Regarding Delegation of Authority, 12 CFR Part 265, to delegate to the Secretary of the Board the authority to act on certain membership applications requiring prior approval of the Board. The amendment authorizes the Secretary to take action on a membership application when a Reserve Bank could take action on the application under delegated authority but a director or senior officer of any holding company, bank, or company involved in the transaction is a director of the Federal Reserve Bank or branch. It is expected that this delegation of authority will expedite processing of membership applications when such an interlock exists.

EFFECTIVE DATE: May 19, 1986.

FOR FURTHER INFORMATION CONTACT: Richard F. Fabrizio, Senior Financial Analyst (202/452-3423), Domestic Applications Section, Division of Banking Supervision and Regulation; John Harry Jorgenson, Senior Attorney (202/452-3778), Legal Division; or for users of Telecommunications Device for the Deaf (TDD) Earnestine Hill or Dorothea Thompson (202/452-3544); Board of Governors of the Federal Reserve System, Washington, DC 20551.

SUPPLEMENTARY INFORMATION: Section 9 of the Federal Reserve Act (12 U.S.C. 321, et seq.) provides that state-chartered banks may make application to the Board, under such rules and regulations as the Board may prescribe, for approval to become a member of the Federal Reserve. The Board's Regulation H, Membership of State Banking Institutions in the Federal Reserve System (12 CFR Part 208), prescribes eligibility requirements (§ 208.3), application requirements (§ 208.4), and matters to be considered by the Board before acting on such an application (§ 208.5). Under § 265.2(f)(28) of the Board's Rules Regarding Delegation of Authority (12 CFR Part 265), Reserve Banks have delegated authority to approve applications for membership provided specified criteria are met.

Section 265.2(a)(2) of the Board's Rules Regarding Delegation of Authority provides that the Secretary of the Board, rather than the Reserve Bank, may act on a bank holding company application that otherwise meets the criteria for delegated action unless a director or senior officer of a holding company, bank, or other company involved in the transaction is also a director of a Federal Reserve Bank or branch. The Rules, however, do not contain a similar provision applicable to membership applications that could be delegated. The Board is amending § 265.2(a)(2) to provide that the Secretary may act on membership applications with such a management interlock in the same manner as bank holding company applications with such an interlock may be delegated.

The amendment to the Board's Delegation Rules would expedite and simplify processing of membership applications and would decrease the number of cases considered directly by the Board that do not present significant issues, while ensuring that cases involving Reserve Bank management interlocks are not acted upon exclusively by the Reserve Bank.

Regulatory Flexibility Act Analysis

Pursuant to section 605(b) of the Regulatory Flexibility Act (Pub. L. No 96-354, 5 U.S.C. 601 et seq.), the Board certifies that the proposed amendment will not have a significant economic impact on a substantial number of small entities. The proposed amendment is a change to agency procedures and practice and does not have a particular effect on small entities.

Public Comment

The provisons of section 553 of Title 5, United States Code, relating to notice, public participation, and deferred effective date, have not been followed in connection with the adoption of this amendment because the change affects the Board's internal procedures and practices and does not constitute a substantive rule subject to the requirements of that section. The Board's expanded rulemaking procedures have not been followed for the same reason.

List of Subjects in 12 CFR Part 265

Authority, delegations (Government agencies), Banks, Banking, Federal Reserve System.

PART 265—[AMENDED]

Pursuant to its authority under sections 9(l) and 11(j) AND (k) of the Federal Reserve Act (12 U.S.C. 321, 248(j), and 248(k)) to exercise general supervision over Reserve Banks and to delegate functions to members and employees of the Board and to the Reserve Banks, the Board amends its Rules Regarding Delegation of Authority (12 CFR Part 265) as follows:

1. The authority citation for Part 265 its revised to read as follows:

Authority: Section 11(k); 38 Stat. 261 and 80 Stat. 1314; 12 U.S.C. 248(k).

2. Section 265.2 is amended by revising paragraph (a)(2) as follows:

§ 265.2 Specific Functions Delegated to Board Employees and to Federal Reserve Banks.

(a) * * *

(2) Under the provisons of sections 18(c) and 18(c)(4) of the Federal Deposit Insurance Act (12 U.S.C. 1828(c) and 1828(c)(4), sections 3(a), 4(c)(8), and 4(c)(14) of the Bank Holding Company Act (12 U.S.C. 1842(a), 1843(c)(8), and 1843(c)(14)), sections 5(a), 5(b), and 7(d) of the Bank Service Corporation Act (12 U.S.C. 1865(a), 1865(b), and 1867(d)), the Change in Bank Control Act (12 U.S.C. 1817(j)), and sections 9, 25, and 25(a) of the Federal Reserve Act (12 U.S.C. 321 et seq., 601-604a, and 611 et seq.), and § 225.14, 225.23, and 225.41-43 of Regulation Y (12 CFR 225.14, 225.23, and 225.41-43), and sections 211.3(a), 211.4(c), 211.5(c), and 211.34 of Regulation K (12 CFR 211.3(a), 211.4(c), 211.5(c), and 211.34), to furnish reports on competitive factors involved in a bank merger to the Comptroller of the Currency and the Federal Deposit Insurance Corporation and to take actions the Reserve Bank could take except for the fact that the Reserve Bank may not act because a director or senior officer of any holding company, bank, or company involved in the transaction is a director of a Federal Reserve Bank or branch.

* * * * *

By order of the Board of Governors of the Federal Reserve System, May 19, 1986.
William W. Wiles,
Secretary of the Board.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 97

[Docket No. 24994; Amdt. No. 1021]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: Effective: An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference—approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue SW., Washington, DC 20591;
2. The FAA regional Office of the region in which the affected airport is located; or
3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—

Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA-430), FAA Headquarters Building, 800 Independence Avenue SW., Washington, DC 20591; or
2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—

Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures Standards Branch (AFS-230), Air Transportation Division, Office of Flight Standards, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone (202) 426-8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260-3, 8260-4, and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the Federal Register expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number. This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 97

Approaches, Standard instrument, Incorporation by reference.

Issued in Washington, DC on May 16, 1986.
John S. Kern,
Director of Flight Standards.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 G.m.t. on the dates specified, as follows:

PART 97—[AMENDED]

1. The authority citation for Part 97 continues to read as follows:

Authority: 49 U.S.C. 1348, 1354(a), 1421, amd 1510; 49 U.S.C. 106(g) (revised, Pub. L. 97-449, January 12, 1983; and 14 CFR 11.49(b)(2)).

[§§ 97.23, 97.25, 97.27, 97.29, 97.31, 97.33, 97.35 [Amended]

2. By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB-DME; § 97.29 ILS ILS/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

BILLING CODE 4910-13-M

DEPARTMENT OF COMMERCE

Office of the Secretary

15 CFR Part 3

[Docket No. 60232-6032]

Rules of Procedure for Handling Contract Appeals

AGENCY: Office of the Secretary, Commerce.

ACTION: Revocation.

SUMMARY: The Appeals Board for the Department of Commerce was abolished on October 14, 1980 and its functions relating to adjudications under the Contract Disputes Act of 1978, 41 U.S.C. 601–613, are now being performed by the General Services Administration Board of Contract Appeals pursuant to interagency agreement. This Notice revokes 15 CFR Part 3, which contains

procedures governing contract appeals of the abolished Appeals Board.

DATE: May 23, 1986.

FOR FURTHER INFORMATION CONTACT: Bruce H. Segal, Attorney-Advisor; Office of the Assistant General Counsel for Finance and Litigation, Herbert C. Hoover Building, Room 5893, Washington, DC 20230, Telephone (202) 377-1122.

SUPPLEMENTARY INFORMATION: 15 CFR Part 3 prescribed procedures governing contract appeals to the Appeals Board for the Department of Commerce. The procedure applied to decisions of contracting officers arising under contracts which contained provisions requiring the determination of appeals by the Secretary of Commerce or his duly authorized representative or board. The Appeals Board, established under 40 FR 17771 (1975), was abolished on October 14, 1980 (See Revocation Notice of Department Organization Order 20-11). The contract appeals functions are now performed by the General Services Administration Board of Contract Appeals, which has its own procedures governing the adjudication of contact disputes. In addition, the Part 3 procedures are obsolete because they do not conform to current dispute resolution requirements of the Contract Disputes Act of 1978. This notice revokes Part 3.

Under Executive Order 12291, the Department must judge whether a regulation is "major" within the meaning of section 1 of the order and therefore subject to the requirement that a Regulatory Impact Analysis be prepared. This regulation is not major because it is not likely to result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Therefore, preparation of a Regulatory Impact Analysis is not required and no preliminary or final Regulatory Impact Analysis has been or will be prepared.

Section 553 of the Administrative Procedure Act does not require that notice and an opportunity for comment be given for this rule because it is a rule of agency procedure (5 U.S.C. 553(b)(A)). Since notice and opportunity for comment are not required under section 553 of the Administrative Procedure Act (5 U.S.C. 553) and since no other law requires that notice and an opportunity for comment be given for this rule, under sections 603(a) and 604(a) of the Regulatory Flexibility Act (5 U.S.C. 603(a) and 604(a)) no initial or final Regulatory Flexibility Analysis has to be or will be prepared.

Because this notice revokes a procedural rule rather than a substantive rule, under section 553(d) of the Administrative Procedure Act (5 U.S.C. 553(d)), the revocation may be made effective immediately.

This rule does not contain a collection of information requirement for purposes of the Paperwork Reduction Act.

List of Subjects in 15 CFR Part 3

Administrative practice and procedure, Government procurement.

Under the authority of the Secretary of Commerce contained in 5 U.S.C. 301, and Department Organization Order 10-5, as amended August 27, 1984, 15 CFR Part 3 is hereby revoked and reserved.

Dated: May 14, 1986.

Katharine M. Below,

Assistant Secretary for Administration.

BILLING CODE 3510-17-M

---

15 CFR Part 8a

[Docket No. 50695-6096]

Audit Requirements for State and Local Governments

AGENCY: Department of Commerce.

ACTION: Affirmation of interim rule.

SUMMARY: This document affirms as a final rule the interim rule relating to audit requirements for state and local governments.

EFFECTIVE DATE: May 23, 1986.

FOR FURTHER INFORMATION CONTACT: Robert M. McNamara, U.S. Department of Commerce, Office of Finance and Federal Assistance, 14th and Constitution Avenue, NW., Rm: 6204, Washington, DC 20230, Telephone No: (202) 377-5817.

SUPPLEMENTARY INFORMATION: On July 26, 1985, the Department of Commerce issued an interim rule known as Audit Requirements for State and Local Governments (50 FR 30418). The primary purpose of that interim rule was to implement the requirements for auditing State and local governments as required by the Single Audit Act of 1984, Pub. L. 98-502. The Act established audit requirements for State and local governments that receive Federal aid and defines Federal responsibilities for implementing and monitoring those requirements.

The interim rule invited written comments, however, none were received; therefore, this notice makes the interim rule final. As stated in the interim notice, this regulation is not a major rule as defined in Executive Order 12291.

Paperwork Reduction Act

This rule contains a collection of information for purposes of the Paperwork Reduction Act of 1980 (44 U.S.C. 2507). The collection of this information has been approved by the Office of Management and Budget under control number 0607-0518.

Lists of Subjects in 15 CFR Part 8a

Grants program, Grants administration, Loan programs, Intergovernmental relations.

Accordingly, the interim regulation establishing 15 CFR Part 8a which was published July 26, 1985 (50 FR 30418) is adopted as final without changes.

Dated: May 18, 1986.

Sonya G. Stewart,

Director, Office of Finance and Federal Assistance, U.S. Department of Commerce.

[FR Doc 86-11025 Filed 5-22-86; 8:45 am]

BILLING CODE 3510-FS-M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 148

Implementation of the Equal Access to Justice Act in Covered Adjudicatory Proceedings Before the Commission

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rules.

SUMMARY: The Commission is amending its rules governing the implementation of the Equal Access to Justice Act in Covered Adjudicatory Proceedings Before the Commission. These amendments will conform the rules to the Equal Access to Justice Act, as recently amended by the Equal Access to Justice Act Amendments, and will make certain minor clarifying changes.

EFFECTIVE DATE: The revisions shall take effect on June 23, 1986.

FOR FURTHER INFORMATION CONTACT: James T. Kelly, Assistant Chief, Opinions Section, Office of General Counsel, Commodity Futures Trading Commission, 2033 K Street, NW., Washington, DC 20581. Telephone (202) 254-7110.

SUPPLEMENTARY INFORMATION: The Commission recently proposed

amendments to its procedural rules to govern the processing of applications under the Equal Access to Justice Act ("EAJ") Act, Pub. L. No. 96-481, 94 Stat. 2325, as amended by the Equal Access to Justice Act Amendments, Pub. L. No. 99-80, 99 Stat. 183. *See* 5 U.S.C. 504 and 28 U.S.C. 2412. *See also* 51 FR 6262 (Feb. 21, 1986, reprinted in [Current Transfer Binder] Comm. Fut. L. Rep. (CCH) ¶ 22,923 and codified in 17 CFR Part 148. In addition, the Commission consulted with the Administrative Conference of the United States about the proposed changes. No comments were filed in response to the Federal Register notice of proposed rulemaking and the Commission has decided to adopt the proposed rules without modification.

The Commission notes that the provisions of the Regulatory Flexibility Act do not apply to these rule modifications. The rules are procedural in nature and have a potential beneficial, rather than adverse, impact on small businesses. Accordingly, the Chairman, on behalf of the Commission, certifies that the rules adopted in this notice will not have a significant economic impact on a substantial number of small entities. Moreover, the provisions of the Paperwork Reduction Act do not apply to these rule modifications. The rules do not call for the collection of information from the general public by the Commission, but simply implement statutory changes in the context of particular adjudicatory proceedings.

List of Subjects in 17 CFR Part 148

Claims, Equal access to justice, Lawyers.

PART 148—[AMENDED]

The Commission amends Part 148 of Chapter I of Title 17 of the Code of Federal Regulations, as specified below:

1. The authority citation for 17 CFR Part 148 is revised to read as follows:

Authority: Equal Access to Justice Act, 5 U.S.C. 504(c)(1) and sections 2(a)(11) and 8a(5) of the Commodity Exchange Act, 7 U.S.C. 4a(j) and 12a(5).

Subpart A—General Provisions

2. Section 148.1 is revised as follows:

§ 148.1 Purpose of these rules.

The Equal Access to Justice Act, 5 U.S.C. 504 (called "the Act" in this part), provides for the award of attorney fees and other expenses to eligible individuals and entities who are prevailing private parties in adjudicatory proceedings before the Commission. An eligible party may receive an award when it prevails over the Commission, unless the Commission's position was substantially justified or special circumstances make an award unjust. The rules in this Part describe the parties eligible for awards and the proceedings that are covered. They also explain how to apply for awards, and the procedures and standards that the Commission will use to make them.

3. Section 148.2 is revised as follows:

§ 148.2 When the Act applies.

The Act applies to any covered adjudicatory proceeding pending before the Commission on or after October 1, 1981. This includes proceedings begun before October 1, 1981, if final Commission action has not been taken before that date. Awards may be sought for fees and other expenses incurred before October 1, 1981, in any such covered proceeding.

4. Section 148.3, paragraphs (a) and (b), are revised as follows:

§ 148.3 Proceedings covered.

(a) The Act applies to adjudicatory proceedings conducted by the Commission. These are adjudications under 5 U.S.C. 554 in which the position of the Commission or any other agency of the United States, or any component of an agency, is presented by an attorney or other representative who enters an appearance and participates in the proceeding. Reparation proceedings under section 14 of the Commodity Exchange Act, 7 U.S.C. 18, Commission review of exchange disciplinary and access denial actions under section 8c of the Commodity Exchange Act, 7 U.S.C. 12c, and registered futures association disciplinary and membership denial actions under section 17 of the Commodity Exchange Act, 7 U.S.C. 21, are not covered by the Act. Proceedings brought to determine whether or not to grant or renew registrations pursuant to sections 8a or 17(*o*), of the Commodity Exchange Act, 7 U.S.C. 8, 12a and 21(*o*), or contract market designations pursuant to section 6 of the Commodity Exchange Act, 7 U.S.C. 8, are excluded, but proceedings brought to suspend or revoke registrations or contract market designations are covered if they are otherwise adjudicatory proceedings. For the Commission, the types of proceedings generally covered are adjudicatory proceedings as defined in § 10.2(b) of this Chapter; Part 14 proceedings, if they involve a hearing, are also covered.

(b) The Commission's decision not to identify a type of proceeding as an adversary adjudication shall not preclude the filing of an application by a party who believes the proceeding is covered by the Act; whether the proceeding is covered will then be an issue for resolution in the proceedings on the application.

5. Section 148.4 is amended by changing the dollar amounts in paragraphs (b) (1) and (2) to read "$2 million", and "$7 million", respectively, and by revising paragraphs (b)(5) and (e) to read as follows. Paragraph (b) introductory text is shown for user convenience only.

§ 148.4 Eligibility of applicants.

* * * * *

(b) The types of eligible applicants are as follows:

* * * * *

(5) Any other partnership, corporation, association, unit of local government, or public or private organization with a net worth of not more than $7 million and not more than 500 employees.

* * * * *

(e) The employees of an applicant include all persons who regularly perform services for compensation for the applicant, under the applicant's direction and control. The term "employee" also embraces all the agents of an applicant, by whatever title or label they may be known, for whose acts or omissions the applicant may be held liable under the Commodity Exchange Act. *See* 7 U.S.C. 4. Part-time employees shall be included on a proportional basis.

* * * * *

6. Section 148.5, paragraph (a), is revised as follows:

§ 148.5 Standards for awards.

(a) A prevailing applicant may receive an award for fees and expenses incurred in connection with an adjudicatory proceeding, or in a significant and discrete substantive portion of the proceeding, unless the position of the Commission was substantially justified. The position of the Commission includes, in addition to the position taken by the Commission in the adversary adjudication, the action or failure to act by the Commission upon which the adversary adjudication is based. The burden of proof that an award should not be made to an eligible prevailing applicant is on the Commission.

* * * * *

Subpart B—Information Required From Applicants

7. Section 148.11, paragraph (a) and the introductory text of paragraph (b), are revised as follows:

§ 148.11 Contents of application.

(a) An application for an award of fees and expenses under the Act shall identify the applicant and the adjudicatory proceeding for which an award is sought. The application shall show that the applicant has prevailed and identify the position of the Commission or other agency that the applicant alleges was not substantially justified. Unless the applicant is an individual, the application shall also state the number of employees of the applicant and describe briefly the type and purpose of its organization or business.

(b) The application shall also include a statement that the applicant's net worth does not exceed $2 million (if an individual) or $7 million (for all other applicants, including their affiliates). However, an applicant may omit this statement if:

* * * * *

Subpart C—Procedures for Considering Applications

* * * * *

8. Section 148.26, paragraph (a), is revised as follows:

§ 148.26 Further Proceedings.

(a) Ordinarily, the determination of an award will be made on the basis of the written record. However, on request of either the applicant or counsel for the Commission or for another relevant agency, or on his or her own initiative, the Presiding Officer may order further proceedings, such as an informal conference, oral argument, additional written submissions or an evidentiary hearing. Such further proceedings shall be held only when necessary for full and fair resolution of the issues arising from the application, and shall be conducted as promptly as possible. Whether or not the position of the Commission was substantially justified shall be determined on the basis of the administrative record, as a whole, which is made in the adversary adjudication for which fees and other expenses are sought. No discovery and/or evidentiary proceedings shall be permitted into the question of whether the agency's position was substantially justified.

* * * * *

9. Section 148.28 is revised as follows:

§ 148.28 Appeal to the Commission.

(a) Either the applicant or counsel for the Commission or for another relevant agency may appeal the initial decision on the fee application by complying with the requirements of this section. An appealing party shall serve upon opposing parties and shall file with the Proceedings Clerk a notice of appeal within fifteen (15) days after service of the initial decision. The notice need consist only of a brief statement indicating the filing party's intent to appeal the initial decision, and shall include the date upon which the initial decision was rendered, the name of the proceeding, and the docket number of the proceeding. The failure of a party timely to file and serve a notice of appeal in accordance with this paragraph, or to perfect the appeal in accordance with paragraph (b) of this section, shall constitute a voluntary waiver of any objection to the initial decision, and of all further administrative or judicial review under these rules and the Equal Access to Justice Act.

(b) An appeal shall be perfected by the appealing party by timely filing with the Proceedings Clerk an appeal brief which meets the requirements of paragraphs (b) and (d) of this section. An original and one copy of the appeal brief shall be filed within thirty (30) days after filing of the notice of appeal. By motion of the appealing party, the Commission may, for good cause shown, extend the time for filing the appeal brief. If the appeal brief is not filed within the time prescribed in this subparagraph, the Commission may, upon its own motion or upon motion by a party, dismiss the appeal, in which event the initial decision shall become the final decision and order of the Commission, effective upon service of the order of dismissal.

(c) The opposing party may, within thirty (30) days after service of the appeal brief, file an original and one copy of an answering brief, and serve one copy thereof, unless the time limit is extended by the Commission upon motion of the party and for good cause shown.

(d) Parties filing an appeal brief or answering brief shall meet the requirements of § 10.12 of this Chapter as to form. The content of briefs shall satisfy the requirements of § 10.102(d) of this Chapter, except that any party, with leave of the Commission, may file an informal document in lieu of a brief. No brief shall exceed thirty-five (35) pages in length without advance leave of the Commission.

(e) On review, the Commission may, in its discretion, consider *sua sponte* any issues arising from the record and may base its determination thereon, or limit the issues to those presented in the statement of issues in the briefs, treating those issues not raised as waived.

Dated: May 19, 1986.

Jean A. Webb,

Secretary to the Commission, Commodity Futures Trading Commission.

BILLING CODE 6351-01-M

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 200

[Release No. 33-6844]

Delegations of Authority to Director of Division of Corporation Finance and Regional Administrators

AGENCY: Securities and Exchange Commission.

ACTION: Final rule amendment.

SUMMARY: The Commission is amending its rules relating to general organization to delegate to the Director of the Division of Corporation Finance authority to waive the disqualification provisions of Regulation D under the Securities Act of 1933 (the "Securities Act"). In addition, the Commission is amending the extent of the delegation of authority to its Regional Administrators with respect to confidential treatment applications filed under the Securities Act. The changes will enable the Commission and its staff to process the waiver requests and confidential treatment applications expeditiously and result in savings of time for the Commission and the public.

EFFECTIVE DATE: May 19, 1986.

FOR FURTHER INFORMATION CONTACT: Richard K. Wulff, (202) 272-2644, Division of Corporation Finance, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The exemption provided by Rule 505 of Regulation D (17 CFR 230.501—230.506) under the Securities Act governing limited offers and sales of securities not exceeding five million dollars is not available if any persons identified in Rule 252 (c), (d), (e) and (f) of Regulation A (17 CFR 230.251—230.264) are involved in the offering. The Commission may determine not to apply such disqualification provision upon a showing of good cause that under the circumstances the Rule 505 exemption should not be denied.

In order to facilitate the processing of waiver requests under Regulation D, as described above, the Commission is amending its delegation of authority rules to indicate that the Director of the

Division of Corporation Finance may grant such applications under Regulation D by specifically referring to Rule 505.

Rule 242 (17 CFR 230.242) under the Securities Act provided an exemption from the registration provisions of such Act for certain limited offers and sales by qualified issuers. That rule was a predecessor and model for Rule 505 of Regulation D. The Director of the Division of Corporation Finance was given the delegated authority to grant applications for relief from the issuer disqualification provisions of Rule 242. These provisions, as with Rule 505, tie into Regulation A, Rule 252 (c), (d), (e) and (f) [17 CFR 230.252 (c), (d), (e) and (f)] under the Securities Act. In view of the delegation of authority relative to Rule 505 and the removal of Rule 242 [Release No. 33-6389 (March 8, 1982) [47 FR 11251]], it is apparent that the delegation of authority to the Director of the Division of Corporation Finance, relative to Rule 242 may be deleted.

Rule 406 (17 CFR 230.406) under the Securities Act provides a method whereby provisions of material contracts may be accorded confidential treatment where it is shown and the Commission determines that disclosure would impair the contract's value and is not necessary for the protection of investors. Pursuant to delegated authority, both the Director of the Division of Corporation Finance and the Commission's Regional Administrators have the power to grant such applications for confidential treatment (17 CFR 200.30-1(a)(3), 200.30-6(a)(3)). The Director of the Division of Corporation Finance, but not the Regional Administrators, now has the power to deny certain confidential treatment applications or schedule hearings with regard to possible denial of such applications (17 CFR 200.30-1(a)(3)). The Commission finds it to be appropriate that the Regional Administrators have parallel authority to the Director of the Division of Corporation Finance with respect to confidential treatment applications made under the Securities Act.

The Commission also finds, in accordance with section 553(b) of the Administrative Procedure Act (5 U.S.C. 553(b)) that the foregoing action relates solely to agency organization, procedure or practice, and that such section makes unnecessary the notice and prior publication required by the Act (5 U.S.C. 553). In view of the foregoing, and the expeditious processing which will result in time savings to both the Commission and the public, good cause exists for dispensing with the normal thirty day delay in effectiveness. Accordingly, the amendments to Rules 30-1 and 30-6 are effective immediately.

List of Subjects in 17 CFR Part 200

Administrative practice and procedure, Freedom of information, Privacy, Securities.

Text of Amendment

Accordingly, Part 200 of Chapter II of Title 17 of the Code of Federal Regulations is hereby amended as follows:

PART 200—ORGANIZATION; CONDUCT AND ETHICS; AND INFORMATION REQUESTS

1. The authority citation for Part 200 continues to read as follows:

Authority: Secs. 19, 23, 48 Stat. 85, 901, as amended, sec. 20, 49 Stat. 833, sec. 319, 53 Stat. 1173, secs. 38, 211, 54 Stat. 841, 855; 15 U.S.C. 77s, 78w, 791, 77sss, 80a-37, 80b-11, unless otherwise noted. § 200.30-1 is also issued under secs. 6, 7, 8, 10, 19(a), 48 Stat. 78, 79, 81, 85; secs. 205, 209, 48 Stat. 906, 908; sec. 301, 54 Stat. 857; sec. 8, 68 Stat. 685; sec. 308(a)(2), 90 Stat. 57; secs. 3(b), 12, 13, 14, 15(d), 23(a), 48 Stat. 882, 892, 894, 895, 901; secs. 209(a), 1, 3, 8, 49 Stat. 704, 1375, 1377, 1379; secs. 202, 68 Stat. 683; secs. 4, 5, 6(d), 78 Stat. 569, 570-574; secs. 1, 2, 3, 82 Stat. 454, 455; secs. 28(c), 1, 2, 3, 4, 5, 84 Stat. 1435, 1497; sec. 105(b), 88 Stat. 1503; secs. 8, 9, 10, 89 Stat. 117, 118, 119; sec. 308(b), 90 Stat. 57; sec. 18, 89 Stat. 155; secs. 202, 203, 204, 91 Stat. 1494, 1498-1500; sec. 20(a), 49 Stat. 833; sec. 319, 53 Stat. 1173; sec. 38, 54 Stat. 841; 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a), 78c(b), 78l, 78m, 78n, 78o(d), 78w(a), 79t(a), 77sss(a), 80a-37; Pub. L. 87-592, 76 Stat. 394, 15 U.S.C. 78d-1, 78d-2. § 200.30-3 is also issued under secs. 3(b), 19(a), 48 Stat. 75, 85; sec. 209, 48 Stat. 908; c. 122, 59 Stat. 167; Pub. L. 91-565, 84 Stat. 1480; 15 U.S.C. 77c(b), 77s(a) 78d-1, 78n, 80a-37; secs. 2, 17 and 23 thereof (15 U.S.C. 78b, 78q and 78w).

2. Section 200.30-1 is amended by revising paragraph (d) as follows:

§ 200.30-1 Delegation of authority to Director of Division of Corporation Finance.

* * * * *

(d) With respect to the Securities Act of 1933 (15 U.S.C. 77a et seq.) and Regulation D thereunder (§ 230.501, et seq. of this chapter), to authorize the granting of applications under Rule 505(b)(2)(iii)(C), (§ 230.505(b)(2)(iii)(C) of this chapter) upon a showing of good cause that it is not necessary under the circumstances that the exemption under Regulation D be denied.

3. Section 200.30-6 is amended by revising paragraph (a)(3) as follows:

§ 200.30-6 Delegation of authority to Regional Administrators.

(a) * * *

(3) To grant applications for confidential treatment of contract provisions pursuant to Rule 406 (§ 230.406 of this chapter) under the Act; to issue orders scheduling hearings on such application and to deny any such application as to which the applicant waives his right to a hearing, provided such applicant is advised of his right to have such denial reviewed by the Commission.

By the Commission.

Shirley E. Hollis,
Assistant Secretary.
May 19, 1986.

BILLING CODE 8010-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Parts 74 and 82

[Docket Nos. 83C-0012 and 84C-0426]

Confirmation of Effective Date for D&C Green No. 6 as a Color Additive for Coloring Absorbable Sutures

AGENCY: Food and Drug Administration.

ACTION: Final rule; confirmation of effective date.

SUMMARY: The Food and Drug Administration (FDA) is confirming the effective date of April 22, 1986, for the final rule that amended the color additive regulations to provided for an increase in the level at which D&C Green No. 6 can be used to color certain polyglycolic acid surgical sutures and to provide for its use for coloring poly(glycolic acid-*co*-trimethylene carbonate) absorable sutures for general surgical use. These actions responded to two petitions filed by American Cyanamid Co.

EFFECTIVE DATE: Effective date confirmed: April 22, 1986.

FOR FURTHER INFORMATION CONTACT: Rudolph Harris, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In the Federal Register of March 21, 1986 (51 FR 9780), FDA amended the color additive regulations to provide for an increase in the level at which D&C Green No. 6 can be used to color certain surgical sutures.

FDA gave interested persons until April 21, 1986, to file objections or requests for a hearing. The agency received no objections or requests for a hearing on the final rule. Therefore, FDA has concluded that the final rule

published in the Federal Register of March 21, 1986, should be confirmed.

List of Subjects

21 CFR Part 74

Color additives, Cosmetics, Drugs, Medical devices.

21 CFR Part 82

Color additives, Cosmetics, Drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 701, 706, 52 Stat. 1055–1056 as amended, 74 Stat. 399–407 as amended (21 U.S.C. 371, 376)) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.10), notice is given that no objections or requests for a hearing were filed in response to the March 21, 1986, final rule. Accordingly, the amendments promulgated thereby became effective April 22, 1986.

Dated: May 19, 1986.

John M. Taylor,

Acting Associate Commissioner for Regulatory Affairs.

BILLING CODE 4160-01-M

21 CFR Part 510

Animal Drugs, Feeds, and Related Products; Change of Sponsor Name

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect a change of sponsor name for a new animal drug application (NADA) from Diagnostic Data, Inc., to DDI Pharmaceuticals, Inc.

EFFECTIVE DATE: May 23, 1986.

FOR FURTHER INFORMATION CONTACT: David L. Gordon, Center for Veterinary Medicine (HFV–238), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–6243.

SUPPLEMENTARY INFORMATION: DDI Pharmaceuticals, Inc., formerly Diagnostic Data, Inc., 518 Logue Ave., Mountain View, CA 94043, has filed a supplemental NADA informing FDA of the change in sponsor name for NADA 45–863 (orgotein for injection). The NADA is amended to reflect the change. The regulations in 21 CFR 510.600 are amended accordingly.

List of Subjects in 21 CFR Part 510

Administrative practice and procedure, Animal drugs, Labeling, Reporting and recordkeeping requirements.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Part 510 is amended as follows:

PART 510—NEW ANIMAL DRUGS

1. The authority citation for 21 CFR Part 510 continues to read as follows:

Authority: Secs. 512, 701(a), 52 Stat. 1055, 82 Stat. 343–351 (21 U.S.C. 360b, 371(a)); 21 CFR 5.10 and 5.83.

2. Section 510.600 is amended in paragraph (c)(1) by revising the entry for "Diagnostic Data, Inc.," and in paragraph (c)(2) by revising the entry for "024991" to read as follows:

§ 510.600 Names, addresses, and drug labeler codes of sponsors of approved applications.

* * * * *

(c) * * *

(1) * * *

Firm name and address	Drug labeler code
DDI Pharmaceuticals, Inc., 518 Logue Ave., Mountain View, CA 94043	024991

(2) * * *

Drug labeler code	Firm name and address
024991	DDI Pharmaceuticals, Inc., 518 Logue Ave., Mountain View, CA 94043.

Dated: May 16, 1986.

BILLING CODE 4160-01-M

21 CFR Parts 556 and 558

Animal Drugs, Feeds, and Related Products; Sulfadimethoxine, Ormetoprim

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) filed by Hoffmann-La Roche, Inc. The supplemental NADA provides for the use of an approved Type A medicated article containing 113.5 grams of sulfadimethoxine and 22.7 grams of ormetoprim per pound to manufacture Type C medicated feed for control of enteric septicemia of catfish caused by *Edwardsiella ictaluri* strains susceptible to sulfadimethoxine and ormetoprim combination.

EFFECTIVE DATE: May 23, 1986.

FOR FURTHER INFORMATION CONTACT: Charles E. Haines, Center for Veterinary Medicine (HFV–133), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3410.

SUPPLEMENTARY INFORMATION: Hoffmann-La Roche, Inc., Nutley, NJ 07110, is the sponsor of NADA 125–933 for Romet™ –30 (sulfadimethoxine 113.5 grams (25 percent) and ormetoprim 22.7 grams (5 percent) per pound). The product is a Type A medicated article currently approved for manufacture of a Type C medicated feed intended for control of the bacterial infection furunculosis in salmonids (trout and salmon) caused by *Aeromonas salmonicida*. The supplemental NADA extends use of the product to manufacture a Type C medicated feed intended for control of enteric septicemia of catfish caused by *Edwardsiella ictaluri*. The supplemental NADA is approved and the regulations are amended to reflect the approval. The basis for approval is discussed in the freedom of information summary. Additionally, the regulations are amended to establish a tolerance for sulfadimethoxine and ormetoprim in catfish.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has carefully considered the potential environmental effects of this action and has concluded that the

BEST COPY AVAILABLE

action will not have a significant impact on the human environment and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday. FDA's regulations implementing the National Environmental Policy Act (21 CFR Part 25) have been replaced by a rule published in the Federal Register of April 26, 1985 (50 FR 16636, effective July 25, 1985). Under the new rule, an action of this type would require an environmental assessment under 21 CFR 25.31a(a).

List of Subjects

21 CFR Part 556

Animal drugs, Foods.

21 CFR Part 558

Animal drugs, Animal feeds.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Parts 556 and 558 are amended as follows:

PART 556—TOLERANCES FOR RESIDUES OF NEW ANIMAL DRUGS IN FOOD

1. The authority citation for 21 CFR Part 556 continues to read as follows:

Authority: Sec. 512, 82 Stat. 343–351 (21 U.S.C. 360b); 21 CFR 5.10 and 5.83.

2. By revising § 556.490 to read as follows:

§ 556.490 Ormetoprim.

A tolerance of 0.1 part per million is established for negligible residues of ormetoprim in the edible tissues of chickens, turkeys, ducks, salmonids, and catfish.

3. Section 556.640 is amended by revising paragraph (a) to read as follows:

§ 556.640 Sulfadimethoxine.

* * * * *

(a) In the uncooked edible tissues of chickens, turkeys, cattle, ducks, salmonids, and catfish at 0.1 part per million (negligible residue).

* * * * *

PART 558—NEW ANIMAL DRUGS FOR USE IN ANIMAL FEEDS

4. The authority citation for 21 CFR Part 558 continues to read as follows:

Authority: Sec. 512, 82 Stat. 343–351 (21 U.S.C. 360b); 21 CFR 5.10 and 5.83.

5. Section 558.575 is amended by adding new paragraph (c)(6) to read as follows:

§ 558.575 Sulfadimethoxine, ormetoprim.

* * * * *

(c) * * *

(6) *Catfish*—(i) *Amount.* 50 milligrams of active ingredients per kilogram of body weight per day.

(ii) *Indications for use.* For control of enteric septicemia of catfish caused by *Edwardsiella ictaluri* strains susceptible to sulfadimethoxine and ormetoprim combination.

(iii) *Limitations.* Administer for 5 consecutive days; withdraw 3 days before slaughter or release as stocker fish.

Dated: May 19, 1986.

Robert C. Bruce (202) 343–6735

SUPPLEMENTARY INFORMATION: This final rulemaking combines two proposed rulemakings that would make amendments to the Federal coal leasing program and reflects the decisions of the Secretary of the Interior of February 21, 1986, on modifications of the coal leasing program. The first proposed rulemaking implemented certain recommendations of the Commission on Fair Market Value for Federal Coal Leasing and was published in the Federal Register on November 5, 1984 (49 FR 44221) with a 60-day comment period. The comment period was reopened on March 15, 1985, and extended to May 9, 1985, to coincide with the publication of the comment period on the Federal coal management program environmental impact statement supplement. The first proposed rulemaking was sent to State Governors and major interest groups at their request in July 1984. Following this distribution, informational briefings were held in July and December 1984 and January 1985.

The second proposed rulemaking implemented certain policy options suggested by the Office of Technology Assessment and was published in the Federal Register on March 15, 1985 (50 FR 10508) with a 30-day comment period, which was later extended to May 9, 1985. This second proposed rulemaking was sent to State Governors and interest groups in November 1984 and was available for comment at the December 1984 and January 1985 informational briefings.

The two proposed rulemakings were the subject of 16 comments, 10 on the proposed rulemaking implementing certain recommendations of the Commission on Fair Market Value for Federal Coal Leasing and 6 on the policy options suggested by the Office of Technology Assessment. The comments came from the following sources: three from energy companies; two from industry trade associations; two from conservation groups; one from a State government; one from a Federal agency; and one from an individual. The comments dealt with three of the recommendations of the Commission on Fair Market Value for Federal Coal Leasing and four on the options suggested by the Office of Technology Assessment and each comment is discussed in connection with the section covered.

No comment opposed the amendment made to § 3400.4 by the proposed rulemaking implementing certain policy options suggested by the Office of Technology Assessment which would make regional coal team recommendations rebuttable presumptions. Two of the comments did, however, state that the public must be allowed sufficient time to comment on all regional coal team meetings and the recommendations made at the meetings and the regional coal team must respond to all public comments. The comments also expressed the view that those making comments should be informed of the action taken on those comments. The instructions provided regional coal teams will emphasize that all regional coal team meetings are public meetings, that a comment period of sufficient length to give the public adequate opportunity to comment on the actions of the regional coal team must be provided and that public comments should be addressed in the recommendations of the regional coal team. The final rulemaking has adopted the change made to § 3400.4 without change. The final rulemaking also changes the language of § 3400.4(d) to bring it into agreement with the Secretary of the Interior's coal program decisions of February 21, 1986.

In connection with the revision made by the proposed rulemaking implementing certain policy options suggested by the Office of Technology Assessment which added § 3400.6, one comment suggested a review of all existing coal management regulations for the purpose of inserting at each point where public comment is required a minimum time period for such comment. The purpose of this comment is answered by the requirement added by § 3400.6 that the minimum period for public comment will be 30 days unless otherwise specified. The final rulemaking has adopted § 3400.6 without change.

The reinstatement of the threshold concept in § 3420.1–4 of the proposed rulemaking, which implemented the policy options of the Office of Technology Assessment, received six comments. The comments argued either that not enough of a change was being proposed or that too much change was being proposed. The comments from the conservation groups wanted to see the threshold levels applied twice, once during land use planning and a second time during the preparation of individual coal lease sale environmental impact statements. On the other hand, comments from industry groups, while supporting environmental protection, expressed the view that the provisions of the existing regulations, if fully implemented, would provide sufficient safeguards for environmental values.

One of the comments on the threshold issue expressed concerns about the overall land use planning and regional leasing process. In a lengthy discussion, the comment expressed the concern that the whole effort of land use and activity planning was to reduce the number of coal-bearing lands available for leasing, with no opportunity for reinstatement of those lands that were perceived to have defects. The comment went on to state that the effect of applying all the coal screens and then the threshold analysis during the land use planning process would be to force decisions that should not be made until the mining permit stage. The comment expressed the view that if a coal lease met all of the regulatory requirements, then a coal lessee should have a guaranteed right of development.

This comment directly relates to the issue of data adequacy, i.e., at what stage are data adequate for the purposes intended. The purpose of applying coal screens and threshold analyses to lands whose resources and other values are being considered during land use planning is to eliminate those coal-bearing lands with significant resource conflicts or those with resources protected by statute or regulation. For instance, surface mining methods could not be used on coal-bearing lands supporting critical habitat for an endangered species of plant or animal. This would be true whether or not the endangered species unsuitability criteria existed, since the critical habitats of endangered species are protected by statute. Leasing those lands for coal development would be useless, since the lessee could not mine the coal in those lands using surface mining methods.

Not all resource conflicts can properly be determined during land use and activity planning. One unsuitability criterion that generally is not applied at the land use planning stage is whether or not the lands being studied are located in an alluvial valley floor chiefly valuable for farming. In addition, the final judgment on whether the lands could be reclaimed to the standards of the Surface Mining Control and Reclamation Act of 1977 is best made at a later point in the process. The Secretary of the Interior determined in

1979 that reclamation feasibility is most efficiently determined at the mine permit stage.

For the reasons set out above, lessees cannot have a guaranteed right of development. Lessees assume certain risks when they obtain a Federal coal lease, or any lease for that matter, and all circumstances which might hinder or prevent coal development cannot be known years before development will occur. However, careful application of coal screens and thresholds during land use planning should minimize the possibility that a coal lease could not be mined because of resource conflicts.

After a careful review of the comments on the amendments made by the proposed rulemaking implementing policy options suggested by the Office of Technology Assessment to § 3420.1–4, the final rulemaking reinstates the threshold concept in the Coal Management regulations. In response to one comment that suggested that the language was ambiguous, the final rulemaking has adopted a clarifying amendment to § 3240.1–4(f).

There were four comments on the amendment to § 3420.3–4(b)(1) made by the proposed rulemaking implementing certain recommendations of the Commission on Fair Market Value for Federal Coal Leasing recommending a change in what was studied in the regional coal leasing environmental impact statements from "preferred alternative" to "proposed action." Three of the comments supported the change, viewing it as merely a change in semantics.

The fourth comment opposed the change on the basis it was contrary to the National Environmental Policy Act of 1969 and its implementing regulations. The comment noted that the designation of a "preferred alternative" by an agency need not indicate to the public that a final decision had been made prematurely. In fact, some of the regional coal leasing environmental impact statements contained explicit language noting that the preferred alternative did not bind the Secretary of the Interior in any way in reaching a final coal leasing decision. Despite these statements, certain groups continued to accuse the Department of the Interior of writing regional coal leasing environmental impact statements that supported already-made decisions. Therefore, the change of wording from "preferred alternative" to "proposed action," while not a comprehensive solution to the public perception problem, was put forward in the proposed rulemaking as a remedy. The change is consistent with the regulations of the Council on Environmental Quality because it is based on Chapter 516 of the Department of the Interior's Manual which implements the Council on Environmental Quality regulations and which was approved by the Council after public review and comment. The final rulemaking has adopted the amendment to § 3420.3–4(b)(1) without change.

Seven comments were directed to the amendment made to § 3422.1(c)(2) by the proposed rulemaking implementing certain recommendations of the Commission on Fair Market Value for Federal Coal Leasing. The Commission recommended changing the basis for calculating minimum bids. The majority of the comments opposed the establishment of minimum bids on a regional basis and the expression of those bids in cents-per-ton. The comments that supported the regional minimum bid concept expressed the view that regional minimum bids made sense and are justified by regional differences in coal quality and quantity. Those that opposed the change argued that intraregional differences may be as great as interregional differences. Those in opposition to the change supported the status quo or the establishment of minimum bids on a tract-by-tract basis. Two of the comments made the point that, if the purpose of minimum bids is to screen out nuisance bids, then elaborate regional minimum bids are unnecessary. Finally, two of the comments were extremely wary of the Department of the Interior's intentions in proposing a minimum bid system on a regional basis, viewing it as an attempt to eliminate minimum bids altogether and to sell Federal coal for less than it is worth.

In an effort to analyze the available options concerning minimum bids for coal, the Department of the Interior studied the development of the concept of minimum bids and the objectives which minimum bids might serve. The study revealed that historically minimum bids, which were initially termed "minimum acceptable bids," have served several purposes. These purposes were not all enunciated at the same time, but became blurred and intermingled as time passed. The purposes are not mutually exclusive, although certain objectives may be better expressed regionally or nationally, in dollars-per-acre or cents-per-ton, or as fees rather than as minimum bids.

Initially, in the offshore oil and gas leasing program, where the concept of minimum bids originated, minimum bids were designed to recover the costs of bringing lease tracts to sale. The July 19, 1979, regulations on Federal Coal Management stated the following objectives for minimum bids for Federal coal lease tracts: to dissuade non-serious bidders from disrupting coal lease sales; to recover the costs of bringing Federal coal lease tracts to offering at Federal coal lease sales; and to set a floor below which Federal coal would not be leased.

After careful consideration of the comments and of the objectives to be served by minimum bids, the final rulemaking retains a minimum bid of at least $100 per acre or its equivalent in cents-per-ton and allows the minimum bid to be expressed either regionally or nationally. The minimum bid may be set at more than $100 per acre in a region when analyses by a regional coal team indicates that a higher amount is appropriate. The minimum bid is not intended to represent fair market value for any tract. Fair market value is not established until after the sale is held.

Five comments were directed to the elimination of the requirement to announce the amounts bid at Federal coal lease sales made in the proposed rulemaking implementing certain recommendations of the Commission on Fair Market Value for Federal Coal Leasing. Two of the comments expressed support for the change without further comment; three opposed the change, with two of those comments strongly opposing it.

The change was made in response to two situations, one being when there is a lease sale in which both multiple-bid and single-bid tracts occurred and the other when intertract bidding is used as the bidding method.

In sales where there were both multiple-bid and single-bid tracts, the Commission on Fair Market Value for Federal Coal Leasing expressed the view that bids received on multiple-bid tracts would be an important information source for the sale panel in determining whether or not the single-bids constituted fair market value for those tracts. Withholding the amounts bid on single-bid tracts from the sale panel was suggested as a means of not unduly influencing its fair market value determinations. Sequestering the sale panel for the length of the post-sale review was suggested as a means of witholding these amounts. Because such sequestering is impractical, opening the bids but delaying bid announcements on single-bid tracts was then suggested as a means of implementing this recommendation of the Commission.

The second situation involves intertract bidding. One of the principles of intertract bidding is that not all coal lease tracts offered through intertract

bidding will be leased. Some tracts for which bids would be received would not be leased. If these bids represented the bidder's best estimate of the value of the tract, revealing the bid amounts might provide the bidder's competitors with valuable information about the bidder's financial situation and position in the industry in the area. In this case, the bid amount would be protected from disclosure under the provisions of the Freedom of Information Act.

Those comments opposing this change expressed the view that the public had a right to know all amounts bid and would file requests under the Freedom of Information Act to obtain the amounts. These comments termed the change a "gag rule" and feared the change would create the possibility of collusion between the personnel of the Department of the Interior and the bidders.

This proposed change was specifically discussed and was the subject of strenuous objections at the January 1985 informational briefing. It was pointed out in that briefing that the Commission on Fair Market Value for Federal Coal Leasing did not discuss or consider the change in any of its meetings. Further, the Commission's report mentioned it only briefly and did not strongly emphasize or consider it.

After careful consideration of the comments and a review of the analysis of this issue prepared by the Department of the Interior, the change made by the proposed rulemaking has not been adopted by the final rulemaking, leaving the existing regulation unchanged.

In order to implement the recommendation of the Commission on Fair Market Value Policy for Federal Coal Leasing on withholding bid amounts from the sale panel discussed earlier, the Department of the Interior is currently developing an administrative procedure for a two-stage lease sale process which will not require a regulatory change. If a sale involves several lease tracts and some of them receive multiple bids and the other receive single bids, then only the bids on the multiple tracts would be opened and announced at the first stage of the sale. The single bids would not be opened or announced at that time. The sale panel would use the amounts bid on the tracts receiving multiple bids in a postsale appraisal. The results of the postsale appraisal would then be used to reappraise the single-bid tracts. After this, a second stage of the sale would occur at which the single bids would be opened and announced.

Editorial and grammatical changes as needed have been made.

The principal author of this final rulemaking is Carole Smith, Division of Solid Mineral Leasing, Bureau of Land Management, assisted by the staff of the Office of Legislation and Regulatory Management, Bureau of Land Management.

The Department of the Interior has determined that this document is not a major rule under Executive Order 12291 and that it will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.).

The changes made by this final rulemaking should not affect small businesses in the coal mining industry to any greater degree than they should affect all coal mining businesses. Studying "proposed actions" rather than "preferred alternatives" in regional coal leasing environmental impact statements, establishing minimum periods for public comments, making regional coal team recommendations rebuttable presumptions, and allowing public comment on the application of the unsuitability criteria should not affect the number or frequency of small business set-aside coal leases offered for sale at regional coal lease sales. Retaining a minimum bid of at least $100 per acre, whether expressed nationally or regionally or in dollars-per-acre or cents-per-ton, should retain the status quo and not affect small business bidding opportunities at Federal coal lease sales to any greater or lesser extent than those opportunities are now affected.

There are no additional information collection requirements in this final rulemaking requiring the approval of the Office of Management and Budget under 44 U.S.C. 3507.

Under the authority of the Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 et seq.), the Mineral Leasing Act for Acquired Lands of 1947, as amended (30 U.S.C. 351—359), the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.), the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 et seq.), the Multiple Mineral Development Act (30 U.S.C. 521–531), the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.), the Federal Coal Leasing Amendments Act of 1976, as amended (90 Stat. 1083–2075), and the Small Business Act of 1953, as amended (15 U.S.C. 631 et seq.), Group 3400, Subchapter C, Chapter II of Title 43 of the Code of Federal Regulations is amended as set out below.

May 1, 1986.

J. Steven Griles,
Assistant Secretary of the Interior.

PART 3400—[AMENDED]

1. The authority citation for Part 3400 is revised to read:

Authority: The Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 et seq.), the Mineral Leasing Act for Acquired Lands of 1947, as amended (30 U.S.C. 351–359), the Multiple Mineral Development Act of 1954 (30 U.S.C. 521–531 et seq.), the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 et seq.), the Department of Energy Organization Act of 1977 (42 U.S.C. 7101 et seq.) and the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.).

2. Section 3400.4 is amended by:

a. Redesignating paragraphs (d), (e) and (f) as paragraphs (e), (f) and (g) respectively; and

b. Adding a new paragraph (d) to read:

* * * * *

§ 3400.4 Federal/state government cooperation.

* * * * *

(d) The regional coal team recommendations on leasing levels under § 3420.2(a)(4) of this title and on regional lease sales under § 3420.3–4(g) shall be accepted except: (1) In the case of an overriding national interest; or (2) in the case the advice of the Governor(s) which is contrary to the recommendations of the regional coal team is accepted pursuant to § 3420.4–3(c) of this title. In cases where the regional coal team's advice is not accepted, a written explanation of the reasons for not accepting the advice shall be provided to the regional coal team and made available for public review.

* * * * *

3. A new § 3400.6 is added to read:

§ 3400.6 Minimum comment period.

Unless otherwise required in group 3400 of this title, a minimum period of 30

days shall be allowed for public review and comment where such review is required for Federal coal management program activities under group 3400 of this title.

PART 3420—[AMENDED]

4. The authority citation for Part 3420 is revised to read:

Authority: The Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 et seq.), the Mineral Leasing Act for Acquired Lands of 1947, as amended (30 U.S.C. 351–359), the Multiple Mineral Development Act of 1954 (30 U.S.C. 521–531 et seq.), the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 et seq.), the Department of Energy Organization Act of 1977 (42 U.S.C. 7101 et seq.), the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.) and the Small Business Act of 1953, as amended (15 U.S.C. 631 et seq.).

§ 3420.1–2 [Amended]

5. Section 3420.1–2 is amended by:

a. Revising the heading to read:

§ 3240.1–2 Call for coal resource and other resource information.

b. Amending paragraph (a) by removing the phrase "Call for Coal Resource Information "where it appears and replacing it with the phrase "Call for Coal and Other Resource Information" and by removing the phrase "coal resource development potential" where it appears and replacing it with the phrase "coal resource development potential and on other resources which may be affected by coal development";

c. Amending paragraph (b) by removing the phrase "Call for Coal Resource Information" where it appears and replacing it with the phrase "Call for Coal and Other Resource Information"; and

d. Amending paragraph (c) by removing the phrase "Call for Coal Resource Information" in the two places it appears and replacing it with the phrase "Call for Coal and Other Resource Information".

§ 3420.1–4 [Amended]

6. Section 3420.1–4 is amended by adding a new paragraph (f) to read:

* * * * *

(f) In its review of cumulative impacts of coal development, the regional coal team shall consider any threshold analysis performed during land-use planning as required by § 1610.4–4 of this title and shall apply this analysis, where appropriate, to the region as a whole.

§ 3420.1–6 [Amended]

7. Section 3420.1–6 is amended by:

a. Adding the figure "(a)" at the beginning of the existing text; and

b. Adding a new paragraph (b) to read:

* * * * *

(b) Activity planning shall begin with a regional coal team meeting to review market analyses and land-use planning summaries. The market analyses and land-use planning summaries shall be available at least 45 days prior to such meeting.

§ 3420.3–4 [Amended]

8. Section 3420.3–4(b)(1) is amended by inserting after the first sentence of the section the sentence "One combination of tracts within the regional leasing level shall be identified as the proposed action for study in the environmental impact statement." and by removing from the second sentence the phrase "and shall identify the preferred alternative in the environmental impact statement".

9. Section 342.21(c)(2) is revised to read:

§ 3422.1 Fair market value and maximum economic recovery.

* * * * *

(c)(1) * * *

(2) Minimum bids shall be set on a regional basis and may be expressed in either dollars-per-acre or cents-per-ton. In no case shall the minimum bid be less than $100 per acre or its equivalent in cents-per-ton.

§ 3422.1–1 [Removed]

10. Section 3422.1–1 is removed in its entirety.

PART 3460—[AMENDED]

11. The authority citation for Part 3460 is revised to read:

Authority: The Mineral Leasing Act of 1920, as amended and supplemented (30 U.S.C. 181 et seq.), the Mineral Leasing Act for Acquired Lands of 1947, as amended (30 U.S.C. 351–359), the Multiple Mineral Development Act of 1954 (30 U.S.C. 521– 531 et seq.), the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1201 et seq.) and the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701 et seq.).

12. Section 3461.3–1(a) is amended by:

a. Redesignating paragraph (a)(2) as paragraph (a)(3); and

b. Adding a new paragraph (a)(2) to read:

(a) * * *

(2) Public comments on the application of the unsuitability criteria shall be solicited by a notice published in the Federal Register. This call for comments may be part of the call for public comments on the draft land-use plan or land-use analysis. This notice shall announce the availability of maps and other information describing the results of the application and the application process used.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Social Security Administration

45 CFR Part 205

General Administration of Public Assistance Programs; Federal Financial Participation in the Cost of a Statewide Mechanized Claims Processing and Information Retrieval System in the Aid to Families With Dependent Children Program

Correction

In FR Doc. 86–8419 beginning on page 13001 in the issue of Thursday, April 17, 1986, make the following corrections:

1. On page 13001, in the second column, in the **SUMMARY** paragraph, in the eighth line, "96–264" should read "96–265".

2. On page 13002, in the first column, in the first paragraph, in the fourteenth line, "percent on" should read "percent FFP on".

3. On page 13004, in the second column, in the *Response* paragraph under "*Issue: Annually Updated APD.*", in the second line, "updates" should read "updated" and in the fourth line, "updated" should read "updates".

4. On page 13004, in the third column, in the *Response* paragraph under "*Issue: Facilitation of Integrated Systems.*", in the third line, "or" should read "of".

5. On page 13005, in the second column, in the third complete paragraph, in the twelfth line, "ADP" should read "APD".

6. On page 13008, in the first column, in § 205.35(b), in the definition "*Hardware*", in the first line, "produced" should read "produces".

BILLING CODE 1505–01–M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[Gen. Docket No. 79-163]

Environmental Rules in Response to New Regulations Issued by the Council on Environmental Quality

AGENCY: Federal Communications Commission.

ACTION: Final rule; Correction.

SUMMARY: This action corrects errors in Note 3 of § 1.1306, §§ 1.1308(d) and 1.1311(b) in the Report and Order regarding the Amendment of Environmental Rules in Response to New Regulations Issued by the Counsel on Environmental Quality, 51 FR 14999 (April 22, 1986).

FOR FURTHER INFORMATION CONTACT: Holly Kaufman, Office of General Counsel, (202) 632-6990.

SUPPLEMENTARY INFORMATION:

Correction

Released: May 15, 1986.

On April 22, 1986 (51 FR 14999), the Commission published a final rule in this proceeding concerning amendment of environmental rules. This document corrects errors in that final rule.

1. In § 1.1306, Note 3 is correctly added to read as follows:

§ 1.1306 Actions which are Categorically Excluded from Environmental Processing.

* * * * *

Note.—The construction of an antenna tower or supporting structure in an established "antenna farm": (i.e., an area in which similar antenna towers are clustered, whether or not such area has been officially designated as an antenna farm), will be categorically excluded unless *one or more of the antennas to be mounted on the tower or structure are subject to the provisions of § 1.1307(b) and the additional radiofrequency radiation from the antenna(s) on the new tower or structure* would cause human exposure in excess of the applicable health and safety *guidelines* cited in § 1.1307(b).

§ 1.1308 [Corrected]

2. In § 1.1308(d), the reference to the CEQ regulation is corrected to read "40 CFR 1501.4 and 1506.6".

3. Section 1.1311(b) is correctly revised to read as follows:

§ 1.1311 Environmental information to be included in the Environmental Assessment (EA).

* * * * *

(b) The information submitted in the EA shall be factual (not argumentative or conclusory) and concise with sufficient detail to explain the environmental consequences and to enable the Commission or Bureau, after an independent review of the EA, to reach a determination concerning the proposal's environmental impact, if any. The EA shall deal specifically with any feature of the site which has special environmental significance (*e.g.*, wilderness areas, wildlife preserves, natural migration paths for birds and other wildlife, and sites of historic, architectural, or archeological value). In the case of historically significant sites, it shall specify the effect of the facilities on any district, site, building, structure or object listed, or eligible for listing, in the National Register of Historic Places. It shall also detail any substantial change in the character of the land utilized (*e.g.*, deforestation, water diversion, wetland fill, or other extensive change of surface features). In the case of wilderness areas, wildlife preserves, or other like areas, the statement shall discuss the effect of any continuing pattern of human intrusion into the area (*e.g.*, necessitated by the operation and maintenance of the facilities).

Proposed Rules

Federal Register
Vol. 51, No. 100
Friday, May 23, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 966

[Docket No. AO-265-A5]

Tomatoes Grown in Florida; Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice invites written exceptions on a proposed amendment of the marketing agreement and Marketing Order 966 (7 CFR Part 966), covering tomatoes grown in Florida. The proposal would provide authority for production research and promotion including paid advertising, to accept assessments in advance, to borrow money or to accept voluntary contributions, to allow for interchangeable alternates within districts, to limit committee tenure, and to require periodic referenda on the order.

DATE: Written exceptions to this recommended decision must be received by June 9, 1986.

ADDRESS: Interested persons may file written exceptions to this decision with the Hearing Clerk, U.S. Department of Agriculture, Room 1077, South Building, Washington, DC 20250. Four copies of all written exceptions should be submitted, and they will be made available for public inspection during regular business hours.

FOR FURTHER INFORMATION CONTACT: Ronald L. Cioffi, Chief, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, Washington, DC 20250, telephone 202-447-5697.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding: Notice of Hearing on proposed rule—Issued December 16, 1985, and published December 20, 1985 (50 FR 51872).

This administrative action is governed by the provisions of sections 556 and 557 of Title 5 of the United States Code and therefore is excluded from the requirements of Executive Order 12291.

Small businesses. The Administrator has determined that this action would not have a significant economic impact on a substantial number of small entities as defined by the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*). As stated in the notice of hearing, interested persons were invited to present evidence at a hearing on the probable regulatory and information impact of the proposed rule on small businesses for purposes of the RFA.

During the fiscal year ending July 31, 1985, 103 handlers regulated under M.O. 966 handled tomatoes with an estimated crop value of approximately $314.4 million. The average value per handler was approximately $3,052,000. Given an appropriate definition of a small business concern (i.e., for purposes of review pursuant to the Regulatory Flexibility Act, an agricultural services firm with average annual receipts not exceeding $3,500,000) almost all of the handlers of tomatoes would fall within that definition. Thus, few handlers, if any, can be considered large or predominant in a relative or absolute sense.

The proposed amendments to the order include provisions which will provide more frequent opportunity for producer votes, opportunity for broad base representation on the committee, and greater flexibility for the committee in accepting contributions and advance assessments. The proposed amendment to order § 966.48 makes it possible for the committee to fund production research and paid advertising to promote consumer awareness and sales of Florida tomatoes. The present § 966.48 provides for market research and development projects but makes no provision for paid advertising and promotion, and production research. In the past, these activities have been sponsored by the Florida Tomato Exchange—a nonprofit voluntary cooperative association of first handlers of fresh tomatoes produced in Florida. Most handlers regulated under Marketing Order 966 are members of the Exchange. The Exchange establishes and finances projects involving production research, marketing research and development projects, and marketing promotion and paid advertising projects to assist Florida tomato produces and promote the consumption of Florida tomatoes.

Active members of the Tomato Exchange handle a substantial amount of the tomatoes produced in the production area. These handlers pay assessments directly to the Exchange which are used to finance the costs of such projects. The small percentage of handlers who contribute no funds to the Exchange get all of the benefits from the results of these research projects without incurring any of the costs. If authority is added to the marketing order for production research and marketing promotion including paid advertising, all handlers would pay assessments through the existing order assessment provisions to finance such projects. This would result in everyone paying their fair share of the expenses for these research and promotion projects. This action would not impose substantial costs on affected small businesses because a substantial number of small businesses are already voluntarily funding such projects, and research, promotion and advertising projects could be greatly expanded without substantial increases to individual handler costs.

Based on the foregoing, it is hereby determined that this action will not have a significant economic impact on a substantial number of small entities.

The Florida Tomato Committee has requested a mid-June referendum. Growers and handlers in the production area will be shutting down their operations for the current season and leaving the area for the summer. In order to determine producer support for the proposed amendment of M.O. 966, as many producers as possible should be in the area to participate in the referendum. By allowing a 15-day comment period, thus expediting the formal rulemaking process, we may be able to conduct a mid-June referendum.

A comment period of 15 days is provided. A longer period would unnecessarily delay the amendatory process and possibly prevent the proposed changes from being implemented by the industry in time for the beginning of the 1986-87 marketing season.

Preliminary statement. Notice is hereby given of the filing with the Hearing Clerk of this recommended decision with respect to the proposed further amendment of marketing agreement and Order No. 966 regulating the handling of tomatoes grown in Florida and the opportunity to file written exceptions thereto. Copies of this decision may be obtained from Ronald L. Cioffi whose address is listed above.

This notice is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), hereinafter referred to as the "Act," and the applicable rules of practice and procedure governing the formulation of marketing agreements and orders (7 CFR Part 900).

On January 14, 1986, a public hearing was held on proposed further amendment of the marketing agreement, as amended, and Order No. 966, as amended. The hearing was held in Orlando, Florida, pursuant to the provisions of the Act and the applicable rules of practice. Notice of this hearing was published in the Federal Register on December 20, 1985 (50 FR 51872). The notice of hearing contained a proposal by the Florida Tomato Committee, which operates under the order, to amend the order to authorize production research and promotion including paid advertisting, allow the committee to accept voluntary contributions for research and promotion projects, accept assessments in advance or to borrow money, limit the tenure of committee members and alternates, allow for interchange of alternates within districts at meetings, and provide for periodic referenda. The notice included a proposal by the Fruit and Vegetable Division, Agricultural Marketing Service, USDA, authorizing it to make any necessary conforming changes.

Material issues: The material issues presented on the record of the hearing are: (1) Whether the committee should be authorized under the order to engage in production research and marketing promotion including paid advertising to promote the marketing, distribution and consumption of tomatoes; (2) whether the committee should be provided the authority to accept assessments in advance or ot borrow money; (3) whether the committee should be provided the authority to accept voluntary contributions for research and promotion projects; (4) whether a limit should be established on the tenure of committee members and alternates; (5) whether the order should allow for interchange of alternates within districts at meeting; (6) whether periodic continuance referenda should be held on the order; and (7) whether certain minor administrative changes and conforming changes should be made to the order.

Findings and conclusions. The findings and conclusions on the material issues, all of which are based on the evidence presented at the hearing and the record thereof, are as follows:

(1) Currently, § 966.48 of the marketing order for Florida tomates provides that the committee, with the approval of the Secretary, may establish or provide for the establishment of marketing research and development projects designed to assist, improve, or promote the marketing, distribution, and consumption of tomatoes. Puruant to this authority, the tomato industry has conducted several market research and development projects to solve some of its marketing problems and expand sales.

The Agricultural Marketing Agreement Act of 1937, the authority for the marketing order, also provides authority for the conduct of production research projects to help producers more efficiently produce tomatoes, and for the conduct of marketing promotion including paid advertising projects to assist, imporve, or promote the marketing, distribution, and consumption of tomatoes. The authority for production research projects was added to the Act in 1970 and the authority for marketing promotion, including paid advertising projects for tomatoes was added in 1971.

The evidence of record is that § 966.48 should be amended to enable the Florida tomato industry to take advantage of these authorities in solving its production and marketing problems. This would enable the tomato industry to engage in any form of research and market development and market promotion including paid advertising.

Testimony indicates that tomatoes compete with many other fresh and processed fruits and vegetables for their space in supermarkets and in smaller retail grocery stores throughout the country. Many of these competing commodities are nationally advertised and promoted. In competition for display space and local advertising, Florida tomatoes have been at a disadvantage since no vehicle has existed to require mandatory assessments for industry-wide advertisement and promotion. The industry has been similarly disadvantaged in solving its production problems.

Testimony at the hearing also revealed that the industry has attempted to solve its production problems and to conduct promotion, including paid advertising, with voluntary programs conducted by the Florida Tomato Exchange. The Exchange is a nonprofit cooperative association composed of first handlers of fresh tomatoes in Florida and is incorporated under Chapter 619, Florida Statutes. The Exchange was incorporated in December 1974 to complement activities of the Florida Tomato Committee. One of the major objectives is to provide collective action with respect to the orderly marketing and distribution of fresh Florida tomatoes.

The financial structure of the Exchange is separate from the Florida Tomato Committee and Exchange members are billed directly for assessments payable to the Exchange. Active members of the Exchange handle a substantial quantity of the volume of tomatoes produced each year from the production area as defined under M.O. 966. Growers and handlers who are not members of the Exchange get all of the benefits from the results of the Exchange's efforts including production research and marketing promotion including paid advertising without incurring any of the costs. Experience has shown that voluntary programs like this have not always been successful in the long run when only part of the industry funds the programs and all of the industry benefits from the program.

The addition of authority to the tomato marketing order for these types of projects and mandatory assessments for industry-wide participation will be more equitable than the voluntary programs. Under the added marketing order authority all handlers will be required to participate in the funding and that should help the industry greatly expand such programs without big increases in the handlers' costs.

As indicated earlier, the tomato industry is faced with several production problems and should have the means of funding such projects to help solve those problems under the marketing order program. Some of the objective of production research would be to help growers develop more efficient methods to lower their costs, and to produce better quality tomatoes and higher yielding varieties.

The ability of the tomato industry to conduct industry-wide promotion programs including paid advertising, should also be of benefit to the industry as a whole. The objective of promotional and advertising programs for tomatoes would be to increase the demand for tomatoes and thereby contribute to improved returns to producers.

The types of advertising and promotion activities which may be required to meet the needs of the Florida tomato industry cannot be foreseen with certainty. Therefore, the authority for the committee to undertake, with the approval of the Secretary, such paid advertising and promotion activities as are authorized by the Act should be broad and flexible.

Proponents stated that public relation and publicity-type activities directed toward food editors would be most practical. This method would be relatively inexpensive but should be effective for disseminating information on the nutritional value of tomatoes, their availability, method of preparation, receipes and serving suggestions.

Testimony also indicates that another effective method of promoting Florida tomatoes would be through merchandising and point of sale material. Many fruit and vegetable organizations employ field service representatives to work with fresh produce merchandisers in major consuming areas where promotional activities are scheduled. Such field service persons for tomatoes could provide a variety of services, including distribution and display of point of sale material and merchandising aids, informing the trade of advertising programs, and helping with special promotions. They could also furnish the committee valuable information on arrival condition of tomatoes and attitudes of the trade and of consumers regarding tomatoes.

Other possibilities noted in the record would be for the committee to tie in with other allied trade factors for use of more expensive advertising media which might be impractical without this cooperative effort.

Many marketing order committees formulate subcommittees to study carefully and plan advertising and research and promotion programs. A subcommittee on production and market research and promotion and paid advertising should be appointed to plan and propose programs to be approved by the Florida Tomato Committee. Such programs would also require approval be the Secretary before being adopted.

If the committee engages the services of a research or advertising agency for performance of a specific program, the progress and such activity will be reviewed and a separate written report submitted at least annually, and the contracting agency is required to maintain record of funds received from the committee and the expenditures made. Copies of such reports should also be furnished to the Secretary.

In addition, the funds to cover the costs of any research, promotion and advertising activities will be obtained from assessments on shipments; the same as for other committee expenses, or, if approved in this proceeding, any voluntary contributions as discussed in material issue (3). Such research, promotion and advertising expenses must be included in the committee's annual budget of expenses, or in amended budgets of expenses, submitted to the Secretary for approved.

Since the Act authorizes production research and advertising and promotion for tomatoes under the Federal marketing order, and since Florida tomato producers have requested that such authority be added to the marketing order, and the record has demonstrated the need for such authority in order to effectuate the declared purpose of the Act, it is concluded that § 966.48, Research and development, of the order should be amended, as hereinafter set forth, to authorize the establishment of production research, marketing research and development projects and marketing promotion, including paid advertising, designed to assist, improve, or promote the marketing, distribution, and consumption or efficient production of tomatoes.

(2) The order should be amended, as hereinafter set forth, to authorize the committee to accept the payment of assessments in advance, and to borrow money on a short-term basis to meet current obligations.

There may be time when the committee has insufficient funds at the beginning of a marketing year to enable it to operate. For example, this could occur prior to the collection of sufficient funds to meet the committee's expenses.

Hearing testimony indicates that the shipping season for Florida tomatoes begins in early October and continues until early June. The actual shipping dates will vary slightly from season to season, depending on weather conditons; but historically, tomato shipments leaving the southern part of the production area will be light in October, and early November, and heavier in late November, December, and January. This represents the winter tomato crop. February and March represent a transition period between the winter crop and the spring tomato crop. Thus, shipments in February and March are light, with the majority of the spring crop being harvested in April, May, and June from the northern section of the production area. More than half of the assessment income is collected from March through June. However, bills and projects dealing with production research and marketing promotion including paid advertising will be ongoing throughout the year.

In order to pay financial obligations as they occur, it may be necessary from time to time for the Florida Tomato Committee to accept the payment of the assessments in advance or to borrow money on a short-term basis to meet current obligations.

The proposed borrowing authority does not allow the Florida Tomato Committee to obligate itself now or bind future tomato committees to repay large sums of money over extended periods of time. Borrowing authority will be used sparingly to meet obligations as they occur and allow the committee a season to adjust its reserve needs to meet current obligations. The Committee should rely primarily on assessment funds to meet its obligations. The Secretary of Agriculture must approve the tomato committee's annual budget at the beginning of each season. In authorizing this borrowing authority, the Secretary will assure that extended indebtedness does not occur by requiring the committee to settle all obligations at the end of each marketing order fiscal period. Thus, it is not contemplated that the committee will carry debts forward from one season to another. It is, of course, the responsibility of the committee to adhere to the conditions of this provision. Therefore, the proposed amendment gives the committee authority to accept assessments in advance or to borrow funds on a short-term basis under these conditions.

(3) The order should be amended, as hereinafter set forth, to provide for the receipt of voluntary contributions to be used only for production research projects and market research and development projects and marketing promotion including paid advertising (§ 966.48). Record evidence indicates that research, market development, and marketing promotion including paid advertising projects for Florida tomatoes should directly benefit growers of that commodity and secondarily benefit other groups and businesses whose interests are allied with the production and marketing of tomatoes. These groups frequently desire to make contributions or donations to help defray the costs of such projects. This is particularly true when research projects are designed to evaluate the effectiveness of certain products. Testimony indicates that voluntary contributions could include money, chemical compounds, mulch applications, containers, machinery, equipment, or any other components

used in the production, harvesting, packing, or marketing of fresh market tomatoes. It is important, however, that the committee have complete control over the use of any contributions, and that the acceptance of contributions by the committee not give rise to allegations of discrimination or undue influence. In order to insulate the committee from undue influence, the committee shall not accept contributions from regulated handlers or any persons who could reasonably be assumed to be in a position to benefit from favorable committee action or any person whose contribution would constitute a conflict of interest.

(4) The order should be amended, as hereinafter set forth, to establish a limit of six years on the tenure of committee members and alternates.

The Secretary's 1982 "Guidelines For Fruit, Vegetable, and Specialty Crop Marketing Orders" provide for limiting committee tenure of members and alternates. The Department's policy pursuant to the guidelines is that committee members only may serve a total of six consecutive years. The marketing orders for California kiwifruit and California-Arizona navel oranges have been changed to limit the term of office for committee members and alternates in compliance with the guidelines. It is the Department's view that a limit on tenure improves representation on marketing order committees by allowing for different and more contemporary ideas, and will be benefical to the committee's operation. The tomato committee was advised by the Department prior to the initiation of this proceeding that limiting committee members' tenure to six full consecutive terms is required by Departmental policy and that such limitation would better effectuate the proposes of the Act.

The tenure proposal made by the Florida Tomato Committee was to limit tenure to ten years rather than six years. However, during the hearing witnesses who also served as members of the committee testified in opposition to any tenure limitation. There was considerable testimony that it is unnecessary to limit tenure of members and alternates because not everyone is willing to serve on the tomato committee and growers should have the right to nominate and vote for whomever they want to represent them and not be restricted by limiting the number of terms a person can serve.

Although the record contains considerable testimony in opposition to a tenure requirement, the adoption of this position would be inconsistent with established Department guidelines. Furthermore, a six year tenure limitation is not an undue or unreasonable restriction on grower participation in the nomination and selection process. The Department's goal is to encourage and foster to the maximum extent possible broad based participation by all members of the regulated community in the administration of the marketing order. This objective is best met by such a tenure limitation.

Therefore, in accordance with the Secretary's Guidelines for Fruit, Vegetable and Specialty Crop Marketing Orders and to effectuate the declared policy of the Act, the order should be ameded to limit tenure of members and alternates to six full consecutive terms. Any member or alternate member becomes ineligible to serve on the committee after having served six full consecutive terms. Such members and alternate members can again become eligible to serve on the committee by not serving on the committee for one full term as either a member or alternate member. For example, if a person serves three full consecutive terms as a member on the committee and then two full consecutive terms as an alternate, that person would only have one additional year of eligibility to serve on the committee as either a member or alternate before becoming ineligible.

The hearing record also indicates that the Secretary should retain the authority to exempt an individual from the tenure limitation if the position would otherwise remain vacant for lack of eligible nominees or eligible persons willing to serve. Nevertheless, it would seem clear that such an exception would be made only in special and unusual circumstances and should not be expected as a matter of course.

(5) The order should be amended, as hereinafter set forth, to provide authority for interchange of alternates within districts at Florida Tomato Committee meetings. The committee is composed of 12 producer members. Currently there are four producer districts established in the production area. Meetings of the committee are rotated between districts so it is possible for a member or his alternate to travel 200 miles one way to attend a meeting. If both the member and alternate are absent, the possible attendance of voting members is reduced and in some cases it is difficult to assemble eight members or alternates, the necessary members required for a quorum. This amendment would allow an alternate to serve in a voting capacity if both a member and his designated alternate were absent, and he was an alternate from the same district as the absent member and alternate. This action would permit better representation at all Florida Tomato Committee meetings and tend to better effectuate the declared policy of the Act.

(6) The order should be amended, as hereinafter set forth, to require referenda to be held relative to continuance of the order every six years.

Currently the order and the Act provide that the Secretary shall terminate the program if a majority of all producers favor termination and such majority produced more than 50 percent of the commodity for market. Since past experience demonstrates that less than 50 percent of all producers usually participate in a referendum, it is difficult to determine producer support for termination of an order. Thus, in order to provide a basis for determining whether producers favor continuance of the order, a new paragraph (d) should be added to § 966.84 to authorize continuance referenda. Current paragraph (d) should be redesignated as paragraph (e). The results of such referenda should be based upon the same percentage of support required in section 8c(8) of the Act with respect to voter approval of the issuance of a marketing agreement and order, 7 U.S.C. 608c(8), 608c(19). A vote approving continuation of the order would require approval by two-thirds of the producers voting in the referendum or by producers who have produced two-thirds of the volume of production voted during a representative period.

The Secretary of Agriculture has determined that continuation referenda are an effective means for ascertaining whether growers favor continuation of marketing order programs. In the event that the requisite majority of producers, by number or volume of production represented in the referendum, do not approve continuation of an order, the Secretary should consider termination of the order but would not be required to terminate.

In evaluating the merits of termination, the Secretary should not only consider the results of the continuance referendum but also should consider all other relevant information concerning the operation of the order and the relative benefits and disadvantages to producers, handlers, and consumers in order to determine whether continued operation of the order would tend to effectuate the declared policy of the Act. In this regard, in the event of an adverse vote of producers in a continuance referendum, the Secretary may solicit input from the public through meetings, press releases, or any other means. In any event, section 8c(16)(B) of the Act

requires the Secretary to terminate the order whenever the Secretary finds that a majority of all producers favor termination, and such majority produced more than 50 percent of the commodity for market. To be effective, termination of the order should be announced on or before the last day of the then current fiscal period. This date precedes the beginning of the committee's operation for a new fiscal period and is considered to be an appropriate time to wind down the operations of the order.

The Florida Tomato Committee was advised by the Department prior to the initiation of the proceeding that periodic referenda every six years are consistent with the Secretary's Guidelines and the policy of USDA. The tomato committee proposed an amendment to provide for periodic referenda every 10 years. There was opposition testimony at the hearing which indicated that referenda are expensive, time-consuming, and wasteful. Testimony also supports that current provisions in the order are adequate to allow the tomato industry to ask for referenda whenever the need arises. Although the record contains considerable testimony in opposition to the period referenda requirement, the adoption of this position is inconsistent with Department guidelines. The Secretary's 1982 "Guidelines for Fruit, Vegetable, and Speciality Crop Marketing Orders" provide for periodic referenda to allow producers the opportunity periodically to indicate their support for or rejection of the order. It is the position of the Department that periodic referenda ensure that the program continues to be accountable to the producers and obligates producers to evaluate their program periodically and so involve them more closely in its operations.

It is the Department's policy pursuant to the Secretary's Guidelines of 1982 that periodic referenda be held every six years. The proposed amendment for referenda every ten years is felt to be too great a length of time to insure that the referenda will reflect producer support or opposition in the face of potentially rapid market changes. A referendum every six years will allow producers an opportunity to vote in favor of or in opposition to the order as changes occur in the industry yet will not be wasteful of the committee's resources. For these reasons, the order should be amended to provide for periodic referenda every six years.

(7) In the December 20, 1985, Notice of Hearing, the Department of Agriculture made a proposal to authorize it to make such other changes as may be necessary to make the entire order conform with any amendments that may have resulted from the hearing. None were necessary.

Rulings on briefs of interested persons. The presiding officer at the hearing set March 3, 1986, as the final date for filing briefs with respect to the evidence presented at the hearing and the conclusions which should be drawn therefrom. Within the time prescribed, one substantive brief and many form letter-type briefs were filed. These briefs and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested persons are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or to reach such conclusions are denied.

General findings. Upon the basis of the evidence presented at the hearing and the record thereof it is found that:

(1) The findings hereinafter set forth are supplementary, and in addition to the previous findings and determinations which were made in connection with the issuance of the marketing agreement and order. Except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein, all of said prior findings and determinations are hereby ratified and affirmed;

(2) The amended marketing agreement and order, as both are hereby proposed to be further amended, regulate the handling of tomatoes grown in the production area in the same manner as, and are applicable only to persons in the respective classes of industrial and commercial activity specified in the marketing order upon which a hearing has been held;

(3) The amended marketing agreement and order, as both are hereby proposed to be further amended, are limited in application to the smallest regional production area which is practicable, consistent with carrying out the declared policy of the Act; and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the Act;

(4) The amended agreement and order, as both are hereby proposed to be further amended, prescribe, so far as practicable, such different terms applicable to different parts of the production area, as are necessary to give due recognition to the differences in the production and marketing of tomatoes grown in different parts of the production area; and

(5) All handling of tomatoes grown in the production area, as defined in the amended marketing agreement and order, as hereby proposed to be further amended, is in the current of interstate or foreign commerce, or directly burdens, obstructs, or affects such commerce.

List of Subjects in 7 CFR Part 966

Marketing agreements and orders, Tomatoes, Florida.

PART 966—[AMENDED]

1. The authority citation for 7 CFR Part 966 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

Recommended further amendment of the marketing agreement and order. The following amendment of the said marketing agreement and order is recommended as the detailed means by which the aforesaid conclusions may be carried out:

Proposal No. 1 *Committee tenure.*

1. Revise § 966.23 to read as follows:

§ 966.23 Term of office.

* * * * *

(b) Committee members and alternates shall serve during the term of office for which they are selected and have qualified, or during that portion thereof beginning on the date on which they qualify during such term of office and continuing until the end thereof, and until their successors are selected and have qualified: *Provided*, that from the date this amended section becomes effective, no member or alternate shall serve more than six full consecutive terms without approval of the Secretary.

Proposal No. 2 *Alternate members.*

2. Section 966.322 is amended by redesignating paragraph (b) as paragraph (c) and adding a new paragraph (b to read as follows:

§ 966.22 Procedure.

* * * * *

(b) If both a member and respective alternate are unable to attend a committee meeting, the committee may designate any other alternate present from the same district to serve in place of the absent member.

* * * * *

Proposal No. 3 *Borrowing money.*

3. Section 966.42 is revised by adding a new paragraph (e) as follows:

§ 966.42 Assessments.

* * * * *

(e) In order to provide funds for the administration of the provisions of this part, the committee may accept the payment of assessments in advance, or may borrow money on a short-term

basis not to exceed one full year coinciding with the existing committee's term of office. The authority of the committee to borrow money may be used only to meet financial obligations as they occur and to allow the committee a season to adjust its reserve funds to meet any additional obligations.

Proposal No. 4 *Accepting gifts.*

4. Add new § 966.45 as follows:

§ 966.45 Contributions.

The committee may accept voluntary contributions but these shall only be used for production research, market research and development and marketing and promotion including paid advertising pursuant to § 966.48. Furthermore, such contributions shall be free from any encumbrances by the donor and the committee shall retain complete control of their use. The committee is prohibited from accepting contributions from handlers subject to the order, or any person whose contributions would constitute a conflict of interest.

Proposal No. 5.

5. Revise § 966.48 to read as follows:

§ 966.48 Research and promotion.

The committee may, with the approval of the Secretary, establish, or provide for the establishment of projects including production research, marketing research and development projects, and marketing promotion including paid advertising, designed to assist, improve or promote the marketing, distribution and consumption or efficient production of tomatoes. The expense of such projects shall be paid by funds collected pursuant to §§ 966.42 and 966.45. Upon conclusion of each project, but at least annually, the committee shall summarize the program status and accomplishments, to its members and the Secretary. A similar report to the committee shall be required of any contracting party on any project carried out under this section. Also, for each project the contracting party shall be required to maintain records of money received and expenditures and such shall be available to the committee and the Secretary.

Proposal No. 6 *Periodic referenda.*

6. Section 966.64 is amended by redesignating paragraph (d) as paragraph (e) and adding a new paragraph (d) as follows:

§ 966.64 Termination.

* * * * *

(d) The Secretary shall conduct a referendum as soon as practicable beginning on the effective date hereof and every sixth year thereafter, to ascertain whether continuance of this order is favored by tomato producers. The Secretary may terminate the provisions of this order at the end of any fiscal period in which the Secretary has found that continuance of this order is not favored by producers who, during as representative period determined by the Secretary, have been engaged in the production for market of tomatoes in the production area: Except that termination of the order shall be effective only if announced on or before the last day of the current fiscal period. In any event, section 8c(16)(B) of the Act requires the Secretary to terminate the order whenever the Secretary finds that a majority of all producers favor termination and such majority produced more than 50 percent of the tomatoes for market.

* * * * *

Proposal No. 7 *Conforming changes.*

Make such other changes as may be necessary to make the entire order conform with any amendments thereto that may result from this hearing. No such changes were necessary.

Signed at Washington, DC, on May 20, 1986.

James C. Handley,

Administrator.

BILLING CODE 3410-02-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 86-ASO-10]

Proposed Alteration of VOR Federal Airway V-512

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to revoke that portion of V-512 which is aligned from Lexington, KY, to Elkins, WV. This airway is not utilized and except for one segment is identical to existing airways.

DATES: Comments must be received on or before July 7, 1986.

ADDRESS: Send comments on the proposal in triplicate to: Director, FAA, Southern Region, Attention: Manager, Air Traffic Division, Docket No. 86-ASO-10, Federal Aviation Administration, P.O. Box 20636, Atlanta, GA 30320.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Peter DiVenere, Airspace and Air Traffic Rules Branch (ATO-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 86-ASO-10." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposed contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 426-8058. Communications must

identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to revoke that portion of V-512 which is aligned from Lexington, KY, to Elkins, WV, via Newcombe, KY, and Charleston, WV. The airway is not utilized and except for one segment is identical to other existing airways. Revocation will preclude dual numbering and will resolve current boundary as well as air traffic control computer problems being experienced between Charleston and Elkins. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant prepartion of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, VOR Federal airways.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority. 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

2. V-512—[Amended]

By removing the words "Lexington; Newcombe, KY; Charleston, WV; INT Charleston 083° and Elkins, WV, 225° radials; to Elkins" and by substituting the words "to Lexington."

Issued in Washington, DC, on May 16, 1986.

Daniel J. Peterson,

Manager, Airspace-Rules and Aeronautical Information Division.

[FR Doc. 86-11600 Filed 5-22-86; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 86-AWA-16]

Proposed Alteration of VOR Federal Airways; Southeastern United States

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to remove the alternate airway designations for three Federal Airways in the southeastern United States and renumber those segments with the designators of existing overlapping airways. This action is in concert with the national program to simplify airway designations by eliminating alternate Federal airways.

DATES: Comments must be received on or before July 7, 1986.

ADDRESS: Send comments on the proposal in triplicate to: Director, FAA, Southern Region, Attention: Manager, Air Traffic Division, Docket No. 86-AWA-16, Federal Aviation Administration, P.O. Box 20636, Atlanta, GA 30320.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue SW., Washington, DC.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: William Davis, Airspace and Air Traffic Rules Branch (ATO-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Operations Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone: (202) 426-8783.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 86-AWA-16." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to remove the alternate airway designations for VOR Federal Airways V-51W, V-54N, and V-115E. The V-51W segment between Corce, GA, and Hinch Mountain, SC, would be renamed as V-311 by extending V-311 from Corce to Hinch Mountain. The V-54N segment between Texarkana and Little Rock, AR, is identical to the overlapping segment of V-573; therefore, redesignation is not required. The V-54N segment between Muscle Shoals, AL, and Chattanooga, TN, would be revoked. The V-115E

segment between Trust, AL, over Chattanooga, TN, would be redesignated as V-209 by extending V-209 from Vulcan, AL, to Chattanooga, TN, via the track of segment of V-115E which is being revoked. Section 71.123 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, VOR federal airways.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority. 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g); (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

2. Section 71.123 is amended as follows:

§ 71.123 [Amended]

V-51—[Amended]

By removing the words "Hinch Mountain, TN, including a west alternate from the INT Anderson, SC, 274° and Athens 340° radials to Hinch Mountain via INT Anderson 274° and Hinch Mountain 160° radials;" and by substituting the words "Hinch Mountain, TN;"

V-211—[Amended]

By removing the words "From INT Toccoa, GA, 222° and Electric City, SC, 274° radials; Electric City," and by substituting the words "From Hinch Mountain, TN; INT Hinch Mountain 160°T(162°M) and Electric City, SC, 274°T(274°M) radials; Electric City;"

V-54—[Amended]

By removing the words "Little Rock, including a N alternate via INT Texarkana 037° and Hot Springs, AR, 225° radials and Hot Springs;" and by substituting the words "Little Rock;" and also by removing the words "Rocket, AL, including a N alternate via INT Muscle Shoals 067° and Rocket 282° radials; Chattanooga, TN, including alternate;" and by substituting the words "Rocket, AL; Chattanooga, TN;"

V-115—[Amended]

By removing the words "Chattanooga, TN, including an E alternate via INT Vulcan 097° and Gadsden, AL, 233° radials, Gadsden and INT Gadsden 042° and Chattanooga 214° radials;" and by substituting the words "Chattanooga, TN;"

V-209—[Amended]

By removing the words "Vulcan, AL" and by substituting the words "Vulcan, AL, INT Vulcan 097°T(095°M) and Gadsden, AL, 233°T(231°M) radials, Gadsden; and INT Gadsden 042°T(040°M) and Chattanooga, TN, 214°T(213°M) radials; Chattanooga".

Issued in Washington, DC, on May 16, 1986.

Daniel J. Peterson,

Manager, Airspace-Rules and Aeronautical Information Division.

BILLING CODE 4910-13-M

FEDERAL TRADE COMMISSION

16 CFR Part 13

[Docket No. 9178]

Bass Brothers Enterprises, Inc., et al.; Proposed Consent Agreement With Analysis To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent agreement, accepted subject to final Commission approval, would require, among other things, a Fort Worth, Texas, producer of carbon black to obtain prior FTC approval for the acquisition of securities or assets of any company over a certain size in the U.S. carbon black business.

DATE: Comments must be received on or before July 22, 1986.

ADDRESS: Comments should be addressed to: FTC/Office of the Secretary, Room 136, 6th Street and Pennsylvania Avenue NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: FTC/L-502, Edward F. Glynn, Jr., Washington, DC 20580. (202) 634-6608.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 3.25(f) of the Commission's Rules of Practice (16 CFR 3.25(f)), notice is hereby given that the following consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of sixty (60) days. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(14) of the Commission's Rules of Practice (16 CFR 4.9(b)(14)).

Carbon black, Trade practices.

Before Federal Trade Commission

[Docket No. 9178]

Agreement Containing Consent Order

In the matter of Bass Brothers Enterprises, Inc. et al.

The agreement herein, by and between the corporations Bass Brothers Enterprises, Inc. and Sid Richardson Carbon & Gasoline Co. by their duly authorized officers, and counsel for the Federal Trade Commission, is entered into in accordance with the Commission's Rules governing consent order procedures. In accordance with those rules the parties hereby agree that:

1. Respondent Bass Brothers Enterprises, Inc. is a corporation organized and existing under the laws of the State of Texas with its corporate headquarters at 2700 First City Bank Tower, 201 Main Street, Fort Worth, Texas.

2. Respondent Sid Richardson Carbon & Gasoline Co. is a corporation organized and existing under the laws of the State of Texas with its corporate headquarters at 2700 First City Bank Tower, 201 Main Street, Fort Worth, Texas.

3. Respondents have been served with copies of the complaint issued by the Federal Trade Commission (the "Commission") charging them, with violation of section 7 of the Clayton Act, as amended (15 U.S.C. 18), and section 5 of the Federal Trade Commission Act, as amended (15 U.S.C. 45), and have filed an answer to said complaint denying said charges.

4. Respondents admit all the jurisdictional facts set forth in the Commission's complaint in this proceeding.

5. Respondents waive:

(a) Any further procedural steps;

(b) The requirement that the Commission's decision contain a

statement of findings of fact and conclusions of law;

(c) All rights to seek judicial review or otherwise to challenge or contest the validity of the order entered pursuant to this agreement; and

(d) Any claim under the Equal Access to Justice Act.

6. This agreement shall not become a part of the public record of the proceeding unless and until it is accepted by the Commission. If this agreement is accepted by the Commission, it will be placed on the public record for a period of sixty (60) days and information in respect thereto publicly released. The Commission thereafter may either withdraw its acceptance of this agreement and so notify the respondents, in which event it will take such action as it may consider appropriate, or issue and serve its decision in accordance with the terms of this agreement in disposition of the proceeding.

7. This agreement is for settlement purposes only and does not constitute an admission by respondents that the law has been violated as alleged in the complaint issued by the Commission.

8. This agreement contemplates that, if it is accepted by the Commission, and if such acceptance is not subsequently withdrawn by the Commission pursuant to the provisions of § 3.25(f) of the Commission's Rules, the Commission may without further notice to respondents, (1) issue its decision containing the following order to cease and desist in disposition of the proceeding, and (2) make information public in respect thereto. When so entered, the order shall have the same force and effect and may be altered, modified or set aside in the same manner and within the same time provided by statute for other orders. The order shall become final upon service. Delivery by the U.S. Postal Service of the decision containing the agreed-to order to respondents' addresses as stated in this agreement shall constitute service. Respondents waive any right they might have to any other manner of service. The complaint may be used in construing the terms of the order, and no agreement, understanding, representation, or interpretation not contained in the order or in the agreement may be used to vary or to contradict the terms of the order.

9. Respondents have read the complaint and the order contemplated hereby. They understand that once the order has been issued, they will be required to file one or more compliance reports showing that they have fully complied with the order. Respondents further understand that they may be liable for civil penalties in the amount provided by law for each violation of the order after it becomes final.

Order

Definitions

For the purposes of this order the following definitions shall apply:

"Carbon black" means furnace-process and thermal-process carbon black, whether used for rubber or other applications.

"Bass Brothers" means Bass Brothers Enterprises, Inc., as well as its officers, employees, agents, its parents, divisions, subsidiaries, successors, assigns, and the officers, employees or agents of its parents, divisions, subsidiaries, successors and assigns.

"SRCG" means Sid Richardson Carbon & Gasoline Co., as well as its officers, employees, agents, its parents, divisions, subsidiaries, successors, assigns, and the officers, employees or agents of its parents, divisions, subsidiaries, successors and assigns.

"Ashland" means Ashland Oil, Inc., as well as its officers, employees, agents, its parents, divisions, subsidiaries, successors, assigns, and the officers, employees or agents of its parents, divisions, subsidiaries, successors and assigns.

"Production capacity" means the practical annual productive capacity of all units, including units currently in operation and units that could be put into operation with or without time delay or additional investment.

I

It is ordered, That, unless Bass Brothers and SRCG have already done so, they will, not later than fourteen (14) days after this Order becomes final, terminate any agreement that provides for or contemplates the acquisition of Ashland's carbon black business by Bass Brothers or SRCG, including but not limited to the letter of intent signed on or about November 15, 1983, withdraw the premerger notification filing submitted to the Federal Trade Commission with respect to that letter of intent, return or destroy all documents containing or recording confidential information provided to Bass Brothers or SRCG by Ashland, and recover from Ashland all documents containing or recording confidential information provided to Ashland by Bass Brothers and SRCG, in connection with acquisition negotiations or agreements. Nothing herein contained shall relieve Bass Brothers or SRCG from any obligation of confidentiality imposed by agreement among Bass Brothers, SRCG and Ashland.

II

It is further ordered, That for a period of five (5) years from the date this Order becomes final, neither Bass Brothers nor SRCG shall acquire, directly or indirectly, without the prior approval of the Commission, any part of the United States carbon black business of any other person or corporation, whether represented by securities or assets, other than products or securities obtained in the regular course of business, if as a result of such acquisition Bass Brothers or SRCG would cumulatively increase its United States carbon black production capacity by more than 130 million pounds.

III

It is further ordered, That while Paragraph II of this Order is effective, Bass Brothers or SRCG shall notify the Commission at least thirty (30) days prior to any proposed corporate change such as dissolution, assignment of substantially all assets, sale resulting in the emergence of a successor corporation, or the creation or dissolution of subsidiaries in the United States, that may affect compliance obligations arising out of this Order.

IV

It is further ordered, That Bass Brothers or SRCG shall, within thirty (30) days after making an acquisition of United States carbon black production capacity permitted under this Order while Paragraph II of this Order is effective, file with the Commission a written report describing such acquisition.

V

It is further ordered, That Bass Brothers and SRCG shall, within sixty (60) days after service upon them of this Order, file with the Commission a written report setting forth in detail the manner and form in which they have complied with this Order.

Analysis of Proposed Consent Order To Aid Public Comment

The Federal Trade Commission has accepted an agreement to a proposed consent order from Bass Brothers Enterprises, Inc., and Sid Richardson Carbon & Gasoline Co. (together "BBE").

The proposed consent order has been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreement and the comments received and will decide whether it should

withdraw from the agreement or make final the agreement's proposed order.

The complaint, which was issued May 8, 1984, challenges, as violations of Section 7 of the Clayton Act, 15 U.S.C. 18, and section 5 of the Federal Trade Commission Act, 15 U.S.C. 45, the proposed acquisition by BBE of assets of Ashland Chemical Co., a division of Ashland Oil, Inc. ("Ashland"). The complaint alleges that both BBE and Ashland are substantial competitors in the United States carbon black market; that the United States carbon black market is highly concentrated, and that barriers to entry into the production and distribution of carbon black are substantial. The complaint alleges that the effects of the proposed acquisition would be to eliminate substantial actual competition between BBE and Ashland, and eliminate Ashland as a substantial competitor in the carbon black market; to substantially increase concentration in an already highly concentrated market and encourage additional mergers or acquisitions in that market, thus increasing the likelihood of collusion; to tend to reduce the degree of price competition and to reduce the volume of production below competitive levels; and to tend to reduce the actual competition among other companies engaged in the production and distribution of carbon black. The complaint charges that the proposed acquisition constitutes a violation of section 5 of the Federal Trade Commission Act, and if consummated, would constitute a violation of Section 7 of the Clayton Act.

The proposed order requires BBE to obtain prior Commission approval for a period of five years for acquisition of securities or assets of a competitor in the United States carbon black business. The order covers acquisitions in both the rubber carbon black and the "industrial," non-rubber carbon black businesses. No prior approval is required if the cumulative total capacity added through acquisitions is less than 130 million pounds. BBE is required to notify the Commission within 30 days after making any carbon black acquisitions for which prior approval is not required.

The order's terms are substantively identical to those contained in the final order against Columbian Enterprises, Inc. in the litigation involving another acquisition in the carbon black business, Docket No. 9176.

The agreement is for purposes of settlement only; it does not constitute an admission by BBE that the law has been violated as alleged in the Complaint.

The purpose of this analysis is to facilitate public comment on the proposed order and it is not intended to constitute an official interpretation of the agreement and proposed order or to modify in any way their terms.

Emily H. Rock,

Secretary.

[FR Doc. 86-11618 Filed 5-22-86; 8:45 am]

BILLING CODE 6750-01-M

DEPARTMENT OF LABOR

Mine Safety and Health Administration

30 CFR Part 75

Safety Standards for Underground Coal Mines; Electricity

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice of availability of preproposal draft.

SUMMARY: The Mine Safety and Health Administration (MSHA) has developed a preproposal draft of revisions to existing electrical standards for underground coal mines. This review is consistent with the goals of Executive Order 12291, the Regulatory Flexibility Act, the Paperwork Reduction Act, and the Department of Labor's initiatives with respect to improving regulations. MSHA seeks written comments on this preproposal draft from all interested parties.

DATES: Written comments on the preproposal draft must be received on or before July 22, 1986.

ADDRESSES: Please send requests for and written comments on the preproposal draft to the Office of Standards, Regulations and Variances, MSHA Room 631, Ballston Tower #3, 4015 Wilson Boulevard, Arlington, Virginia 22203, telephone (703) 235-1910.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey, Director, Office of Standards, Regulations and Variances, MSHA, (703) 235-1910.

SUPPLEMENTARY INFORMATION: On July 9, 1982, MSHA published an Advance Notice of Proposed Rulemaking in the **Federal Register** (47 FR 30025) announcing a comprehensive review of the underground coal mining standards in 30 CFR Part 75. The Agency is reviewing the standards to eliminate unnecessary reporting and recordkeeping requirements, minimize conflicting provisions, delete irrelevent standards, simplify and consolidate existing standards, update standards to conform to state-of-the-art technology, and to clarify and reorganize standards, where necessary.

This review is consistent with the goals of Executive Order 12291, the Regulatory Flexibility Act, the Paperwork Reduction Act, and the Department of Labor's initiatives with respect to improving regulations. MSHA considers early public participation in this standards review process to be particularly important.

MSHA has now completed development of a preproposal draft for underground coal mine electrical standards. The Agency requests comments on the substance of the preproposal standards, as well as on the reorganization of the standards. The Agency is also interested in receiving comments from coal mining State agencies, particularly on the provisions related to electrical and cable splice qualification. In addition, the Agency is interested in economic data and other regulatory impact information.

Copies of the preproposal draft have been mailed to persons and organizations known to be interested. Other interested persons and organizations may obtain a copy of the draft by either oral or written request to the address provided above. The document contains the Agency's intended revisions, a comparison with existing provisions, and brief explanations of the draft changes.

MSHA welcomes written comments relevant to issues concerning the preproposal draft. Upon close of the comment period, review of the comments, and any economic data and other regulatory impact information received, MSHA will develop revised standards which will be published as a proposed rule in the **Federal Register**. The proposal will be followed by a comment period and public hearings. In issuing its final rule, MSHA will make every effort to be responsive to the concerns of the coal mining community and to advance the goals of regulatory reform and improved miner safety and health.

Dated: May 20, 1986.

David A. Zegeer,

Assistant Secretary for Mine Safety and Health.

[FR Doc. 86-11720 Filed 5-22-86; 8:45 am]

BILLING CODE 4510-43-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Ch. I

[CGD 84-099A]

Operation of a Vessel While Intoxicated; Advance Notice of Proposed Rulemaking

AGENCY: Coast Guard, DOT.

ACTION: Advance Notice of Proposed Rulemaking.

SUMMARY: The Coast Guard invites comments on the problem of drug and alcohol use by individuals operating recreational vessels and the options available for regulatory or other action. Recent legislation provides civil and criminal penalties for an individual who is intoxicated while operating a vessel as determined under standards prescribed by the Secretary. The Coast Guard is considering various approaches to promulgating a standard applicable to the operation of a recreational vessel. After evaluation of the responses to this Advance Notice, proposed regulations would be published in the Federal Register and additional comments invited.

DATE: Comments must be received on or before August 21, 1986.

ADDRESSES: Comment should be submitted to Commandant (G-CMC/21), (CGD 84-099), U.S. Coast Guard, Washington, DC 20593. Comments will be available for examination at the Marine Safety Council (G-CMC/21), Room 2110, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593, between 8 a.m. and 4 p.m. Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: Mr. Carlton Perry, Boating Safety Division (G-BBS/43), Office of Boating, Public, and Consumer Affairs, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593 (202) 426-1060 (after July 14, 1986, 267-0992), between 9 a.m. and 3 p.m. Monday through Friday, except holidays.

SUPPLEMENTARY INFORMATION: The purpose of this Advance Notice is to solicit information and views on the problem of intoxicant use by individuals operating recreational vessels and the appropriate means of prescribing a standard for determining intoxication, as required by statute. Interested persons are invited to submit written views, data or arguments. Persons submitting comments should include their names and addresses. Persons desiring acknowledgement that their comment has been received should enclose a stamped self-addressed postcard or envelope.

The Coast Guard is required by the provisions of the Coast Guard Authorization Act of 1984 (Pub. L. 98-557) to establish appropriate standards for determining whether an individual is intoxicated while operating a vessel. This Act amended Title 46 United States Code 2302(c) to provide that "An individual who is intoxicated when operating a vessel, as determined under standards prescribed by the Secretary by regulation, shall be—(1) liable to the United States Government for a civil penalty of not more than $1,000; or (2) fined not more than $5,000, imprisoned for not more than one year, or both." The Act also amended Section 6101 and 6102 of title 46 United States Code to require that marine casualty reports include information as to whether the use of alcohol contributed to the casualty.

Comments are requested on all or any portion of this Advance Notice, including the portions of the Advance Notice that are directed at the extent and seriousness of the alcohol problem, and on any additional options or issues that affect maritime safety.

This Advance Notice sets forth in summary form available information concerning the extent of this problem, the status of State efforts to address this problem, some options available for Federal regulatory action, and some of the various legal and practical issues presented by the options.

This Advance Notice addresses implementation of the provisions of Title 46 U.S.C. 2302 as it applies to individuals who operate recreational vessels.

The Coast Guard is proposing regulations in regard to alcohol and drug use by licensed individuals and other members of the crew of commercial vessels. The proposed rules affecting commercial vessel personnel are contained in a separate rulemaking (CG 84-099) published elsewhere in this issue of the Federal Register. The proposed regulations also include changes to the reporting of marine casualties, including those involving recreational vessels, to carry out the mandate of Pub. L. 98-557, and would allow Coast Guard Boarding Officers to take immediate and reasonable steps including terminating further use of the vessel based upon obvious operator intoxication.

Background

Data on recreational boating accidents compiled by the Coast Guard indicates that alcohol consumption is a causal or contributing factor in approximately ten percent of the more than 1200 fatalities which result from boating accidents each year. Accident reports submitted to the Coast Guard under the provisions of 33 CFR Part 173 and 174 currently understate the extent of alcohol involvement. The procedures and requirements for investigations vary from State to State and locality to locality. Accident reports are submitted by individuals and by State or local authorities. Some of these reported accidents have undergone extensive investigation while other have had only cursory examination. Furthermore, individuals submitting reports may have strong reasons not to volunteer information about alcohol involvement.

Not all States require that toxicological tests be taken in accidental deaths. Based upon toxicological testing by States which have a mandatory requirement for these tests in cases of accidental deaths, and studies conducted by the Coast Guard and the National Transportation Safety Board, the Coast Guard believes that the involvement of alcohol is much greater than indicated by current reports and that some degree of impairment by alcohol may be involved in as many as fifty percent of recreational boating fatalities.

The Coast Guard has not maintained separate data on the involvement of drugs in recreational boating accidents; however, it seems reasonable that the use of drugs by boaters is similar to that of persons driving automobiles. According to preliminary data on fatal motor vehicle accidents compiled by the National Highway Traffic Safety Administration, in 5% to 15% of accidents resulting in driver fatalities and approximately 10% of accidents causing driver injuries, there was evidence of drug use by the driver.

In the recreational boating area, the Coast Guard has concentrated on educational efforts to combat the problem. The Coast Guard and State enforcement officials have recognized that the consumption of alcoholic beverages among recreational boaters is widespread. Drinking is facilitated because there are no laws prohibiting the consumption of alcoholic beverages while underway in a boat; picnic coolers or galley facilities are frequently available to store and serve alcoholic beverages; and, whether fishing, cruising, or sailing, there are lengthy periods of time when the boaters, including the operator, are not fully occupied. The slow speed of most boating activity, compared to operation of an automobile, and the relatively unconfined nature of most waterways

have contributed to a lack of awareness of the risks involved. The educational effort has concentrated on making boaters aware that "Boating and alcohol don't mix."

The Coast Guard and National Transportation Safety Board have worked in concert with the various States and boating organizations to address the alcohol problem. The National Safe Boating Council, Inc. with a volunteer membership of 39 organizations including the Coast Guard Auxiliary, U.S. Power Squadrons, American Red Cross, Boy Scouts, Girl Scouts, YMCA, other Federal agencies concerned with boating safety, and numerous manufacturer and boating organizations, sponsors National Safe Boating Week. For the past two years the theme of National Safe Boating Week has been "Be a responsible boat operator." The slogan used was "Think before you drink."

The Coast Guard has emphasized and will continue to emphasize the alcohol problem in its educational efforts. Under the provision of 46 U.S.C. 13102(c)(4), States are now required to have an alcohol awareness educational program in order to receive Federal financial assistance.

In addition to the educational efforts, the Coast Guard and the States have coordinated law enforcement efforts and have recommended improvements in boating safety laws, including laws directed towards intoxicated operators. At its meeting on October 3, 1984, the National Association of State Boating Law Administrators issued guidelines for State programs to attack the problem. These guidelines included suggestions for State laws.

In one form or another, all of the States have passed laws which prohibit the operation of vessels while intoxicated. Within the past several years there has been an increasing awareness of the problem by State legislatures and several States have strengthened their laws. Twenty-one states have specified an intoxication level for individuals operating vessels. One State has a blood alcohol content (BAC) level of .08 percent. One State has a BAC level of .06 percent as prima facie evidence of operating under the influence, and a .13 percent BAC level as prima facie evidence for operating while intoxicated. The other 19 States have a .10 percent BAC level for intoxication.

Recent studies have shown that impairment may occur at lower BAC levels. These studies are addressed in the rulemaking concerning standards for commercial operation (CGD 84-099) published elsewhere in this issue of the Federal Register.

Approach

The Coast Guard is in the process of determining its proper regulatory role. There are at least three different regulatory approaches which the Coast Guard is considering: (1) The Coast Guard could adopt a mandatory Federal standard; (2) the Coast Guard could prescribe a standard that would apply only in the absence of a State standard; or (3) the Coast Guard could adopt State standards. Under each of these approaches several questions need to be answered.

Federal vs. State Standards for Recreational Vessels

Incorporating State law standards would be less intrusive than setting Federal standards. This seems reasonable with law enforcement conducted primarily by State and local officials. However, it also means the Coast Guard would be enforcing different standards, dependent on which State's waters were involved. The Coast Guard also exercises jurisdiction in waters outside the jurisdiction of any State. Recreational boaters and law enforcement personnel alike, operating in the vicinity of adjoining States' seaward boundary or three mile limit, may have difficulty determining which standard applies. Setting a Federal standard would give the Coast Guard a tool to use during routine boarding when an intoxicated operator is encountered. It would not preempt any equivalent or stricter State standard.

Questions

1. Should the Federal Regulations promulgate a national standard for operating a vessel while intoxicated?
2. Should the Federal Regulations adopt State laws by reference, so that where a State has prescribed a standard for intoxication, Federal law would not conflict?
3. If State laws are adopted by reference, what Federal standard should apply on the high seas (33 CFR 2.05.1(a)) and on waters subject to the jurisdiction of the United States (33 CFR 2.05.30) but not of any state (i.e., Federal enclaves) or on waters located within National Parks (16 U.S.C. 1a.2(h)?

Definition of "Intoxication" For Recreational Vessels

State laws range from general prohibition of operating a vessel while intoxicated to application of the State motor vehicle laws to vessels, and include BAC levels, behavioral standards, both or neither. The Coast Guard is required to establish the criteria by which a person may be determined to have violated the Federal law.

Questions

1. Should any Federal rule specify a blood alcohol concentration (BAC) that would constitute presumptive evidence of intoxication? What level is appropriate? Should the Coast Guard adopt the BAC level adopted by a majority of the States for motor vehicle operation (i.e., .10 percent)?
2. Should a Federal rule be developed which would define a behavioral definition of intoxication? For example, "An individual may not operate or be in actual physical control of the movement of a vessel while under the influence of drugs or alcohol to a degree which impairs his or her physical or mental responses and activities."
3. Should a Federal rule include both a behavioral definition and BAC level?
4. For a State that has only a behavioral definition, should there be a Federal BAC standad to supplement State law.
5. Should a Federal standard include drugs?

Enforcement for Recreational Vessels

The Coast Guard anticipates that the primary enforcement of laws or regulations concerning the operation of recreational vessels by persons who are intoxicated will be by State and local officials. While the Coast Guard will be encouraging an aggressive enforcement program against intoxicated operation of recreational vessels, no additional Federal resources are anticipated. However, because the Coast Guard is concerned about the injuries and deaths caused by intoxicated individuals operating recreational vesseal, at a minimum, Coast Guard Boarding Officers would enforce these standards when an intoxicated operator is encountered during routine boardings.

Questions

1. Since the primary enforcement of boating laws is conducted by State and local agencies, what is the proper Coast Guard enforcement role? A determination must be made on the extent it is practical to combine this role with other Coast Guard law enforcement functions.
2. If testing for blood alcohol concentration (BAC) is adopted, how and under what circumstances should concentrations be measured? Who should administer the tests?
3. In a separate rulemaking, the Coast Guard is proposing that if a person

operating a commercial vessel refuses to take a test for intoxication, the individual will be presumed to have been intoxicated for the purposes of any subsequent administrative proceeding. Should refusal of the operator of a recreational vessel to take a test be a separate violation or admission of intoxication?

4. Should testing for drug intoxication be conducted in the field? If so, how and under what circumstances should the drug presence and concentration be measured? Who should administer the tests?

Regulating the use of alcohol by recreational boaters is a new program for the Coast Guard. The Coast Guard has solicited the views of other Federal agencies, State and local agencies, and the National Transportation Safety Board. The National Boating Safety Advisory Council has been alerted to the existence of the new law and that this Advance Notice would be available for its consideration. Although this Advance Notice raises various options and approaches, additional approaches and combinations of approaches may warrant consideration. The Coast Guard is interested in improving the data available on the scope and extent of the problem of persons operating a vessel while intoxicated. Therefore, public comment is requested on all measures that could be taken to alleviate the drug and alcohol problem as it affects recreational boating. Copies of accident data or research studies conducted would be particularly helpful. Your participation will assist the Coast Guard in the development of any proposed regulations resulting from this Advance Notice.

Regulatory Evaluation

This proposal has been determined to be non-major under Executive Order 12291. However, this proposal is considered significant under the DOT rgulatory policies and procedures (44 FR 11034) because it would initiate a substantial regulatory program. In issuing the Advance Notice, the Coast Guard is seeking public reaction to a wide range of regulatory options, which could, depending on the option selected, range in impact from negligible to one significantly affecting the recreational boating public.

The Coast Guard anticipates that responses to the ANPRM will help it determine appropriate approaches to take in regulating intoxicated operation of recreational vessels. Accordingly, no detailed regulatory evaluation has been attempted at this stage. However, the Coast Guard is aware of the potential for significant impacts from this proposed rulemaking should various regulatory options eventually be chosen. Information collection and reporting associated with the proposal is expected to be minimal.

Dated: May 19, 1986.

J.S. Gracey,

Admiral, U.S. Coast Guard, Commandant.

[CGD 84-099]

Boating Safety; Operating a Vessel While Intoxicated

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This Notice proposes regulations designed to monitor, control and reduce alcohol and drug use in both recreational vessel operation and commercial marine operations including operations of the Outer Continental shelf and at deepwater ports. Recent legislations provides civil and criminal penalties for an individual who is intoxicated while operating a vessel, as determined under standards prescribed by the Secretary. This Notice proposes standards applicable to commercial vessels and vessels subject to a statutory manning requirement for determined intoxication caused by alcohol or drugs, either based on a percentage of alcohol in the blood or on observations of the individual's demeanor or performance. Standards applicable to recreational operations are being addressed in a separate rulemaking [CGD 84-099A] appearing elsewhere in this issue of the Federal Register. In addition the Coast Guard proposes: (1) To prohibit crewmembers on vessel subject to inspection from performing any duties while intoxicated or within four hours of consuming any alcohol; (2) civil penalties for owners, charterers, managing operators, agents, masters or individuals in charge of vessels subject to inspection that allow crewmembers to perform any duties while intoxicated; (3) to allow personnel licensed, documented or certificated by the Coast Guard to seek rehabilitation prior to being subject to a proceeding to suspend or revoke the license, certificate, or document; (4) to allow Coast Guard personnel to terminate the use of certain vessels when the operator is under the influence of an intoxicant to the extent that further operation of the vessel creates an unsafe condition; and (5) to amend the regulations requiring reports of all marine casualties to include specific information on the role of alcohol or drugs in the casualty. These proposals are based on the belief by the Coast Guard and alcohol and/or drugs are involved in a substantial number of recreational boating casualties and contribute to numerous commercial marine casualties. The proposals are intended to reduce recreational and commercial marine casualties caused by intoxication.

DATES: Comments must be received on or before August 21, 1986.

ADDRESSES: Comments should be submitted to Commandant (G-CMC/21), (CGD 84-099), U.S. Coast Guard, Washington, DC 20593. Comments will be available for examination at the Marine Safety Council; (G-CMC/21), Room 2110, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593, between 8 a.m. and 4 p.m., Monday through Friday, except holidays.

FOR FURTHER INFORMATION CONTACT: CDR George Naccara or LCDR Joseph Steen, Merchant Vessel Personnal Division (G-MVP/12), (202) 426-2240 (after July 14, 1986 (202) 267-0225), for information on commercial vessel operating requirements.

LCDR David Wallace, Marine Investigation Division (G-MMI/24), (202) 426-2215 (after July 14, 1986 (202) 267-1420), for information on commercial vessel casualty reporting and the rehabilitation program.

Mr. Carlton Perry, Boating Safety Division (G-BBS-3/43), (202) 426-1060 (after July 14, 1986 (202) 267-0982, for information on recreational boating casualty reporting and the terminations of unsafe use.

The above persons can be contacted at U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593, between 9 a.m. and 4 p.m. Monday through Friday, except holidays.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to propose regulations concerning intoxicant use by individuals operating vessels. Interested persons are invited to submit written views, data or arguments. Persons submitting comments should include their names and addresses, identify this Notice (CGD 84-099) and the specific section of the proposal to which their comments apply, and give reasons for each comment. Persons desiring acknowledgment that their comments

have been received should include a stamped, self-addressed postcard or envelope.

No public hearing has been scheduled but one may be held if requested by persons raising a genuine issue and it is determined that the rulemaking will benefit from oral presentations.

Background

The Coast Guard has the authority to investigate marine casualties and take appropriate action against the responsible person. The Coast Guard has dealt with the problem of alcohol and drug use on vessels through civil penalty or criminal enforcement action for negligent operation of a vessel under 46 U.S.C. 2302 and its predecessor statutes. Also, the Coast Guard may suspend or revoke the license, certificate or document of maritime personnel under 46 U.S.C. 7701 and its predecessor statutes, if they use dangerous drugs or are intoxicated when performing duties.

To assist in determining the causes of marine casualties, the Coast Guard maintains two casualty reporting systems: One addressing recreational vessel casualties (33 CFR Parts 173 and 174); and one addressing commercial marine casualties, including commercial vessels (46 CFR Part 4), commercial operations on the Outer Continental Shelf (33 CFR Part 146), deepwater ports (33 CFR Part 150), and commercial diving operations (46 CFR Part 197).

Data on recreational boating accidents compiled by the Coast Guard indicates that alcohol consumption is a causal or contributing factor in approximately ten percent of the more than 1200 fatalities which result from boating accidents each year. Accident reports submitted to the Coast Guard under the provisions of 33 CFR Parts 173 and 174 currently understate the extent of alcohol involvement. The procedures and requirements for investigations vary from State to State and locality to locality. Accident reports are submitted by individuals and by State or local authorities. Some of these reported accidents have undergone extensive investigation while others have had only cursory examination. Furthermore, individuals submitting reports may have strong reasons not to volunteer information about alcohol involvement.

Not all States require that toxicological tests be taken in accidental deaths. Based upon toxicological testing by States which have a mandatory requirement for these tests in cases of accidental deaths, and studies conducted by the Coast Guard and the National Transportation Safety Board, the Coast Guard believes that the involvement of alcohol is much greater than indicated by current reports and that some degree of impairment by alcohol may be involved in as many as fifty percent of recreational boating fatalities.

The Coast Guard has not maintained separate data on the involvement of drugs in recreational boating accidents. Since recreational boaters come from the same general population that owns and operates motor vehicles, it may be assumed that the use of drugs by boaters is similar to that of persons driving automobiles. According to preliminary data on fatal motor vehicle accidents compiled by the National Highway Traffic Traffic Safety Administration, in 5% to 15% of accidents resulting in driver fatalities and approximately 10% of accidents causing driver injuries, there was evidence of drug use by the driver.

Although not specifically identified previously as a major causal factor in commercial vessel losses or casualty damage, the use of alcohol has had an impact on marine safety. From 1981 to the present, vessel casualty records reveal 44 deaths, 3 persons missing, and 33 injuries attributable to the use of alcohol. During the period 1982 through 1984 the Coast Guard took suspension or revocation action against 72 seamen for alcohol-related incidents.

The present casualty reporting program does not identify drug-related casualties; however, during the period 1982 through 1984, 101 hearings on the suspension or revocation of licenses, certificates, or documents resulted in findings of use of drugs or association with drugs. Reports have been received indicating that some shipping companies which have been screening their crews for drug usage have found that a significant number of their employees were users of drugs. An advance Notice of Proposed Rulemaking regarding the Certification of Seamen, (CGD 84-068) 50 FR 4875, February 4, 1985, solicited comments on drug and alcohol screening for all professional seamen. The comments received indicate drug use is significant.

In this rulemaking, the Coast Guard is proposing changes to the reporting system for recreational boating accidents and to the reports required for marine casualties involving commercial vessels to obtain better data on the involvement of alcohol and/or drugs in these areas.

For many years the Coast Guard has been enforcing statutes which prohibit the operation of a vessel in a negligent manner. The Motorboat Act of 1940 provided that no person shall operate a vessel in a reckless or negligent manner so as to endanger the life, limb, or property of any person. Under this section the word "negligent" has been held to mean failure to use that care which a reasonable person would exercise under similar circumstances. (U.S. v. Meckling, 141 F. Supp. 906, D. Md. 1956). The provisions were amended with the passage of the Federal Boat Safety Act of 1971 and criminal penalties were prescribed for a person who willfully violates the statute.

The prohibition against negligent operation was continued with the codification of Subtitle II of Title 46, United States Code, Shipping (Pub. L. 98-89, August 26, 1983). The prohibition against negligent operation is now contained in 46 U.S.C. 2302.

The instructions to Coast Guard Boarding Officers concerning enforcement procedures with respect to negligent operation of a vessel have contained provisions with respect to operating a vessel while intoxicated. The "Boarding Manual" issued on September 14, 1977 contained examples of situations which were considered negligent operation, including operating erratically under the influence of intoxicants or drugs.

Under the general authority contained in Parts E and F of Title 46, United States Code, the Coast Guard has been delegated the responsibility by the Secretary of Transportation to issue licenses, certificates, and documents to qualified individuals, and to determine the necessary complement of licensed individuals and crew for safe operation of certain vessels. The Coast Guard has promulgated regulations to implement the statutes in Title 46 of the Code of Federal Regulations, primarily in Parts 10, 12, 157, 186 and 187. The regulations apply to Coast Guard inspected vessels, uninspected commercial vessels and other vessels subject to a manning requirement under Part F of Title 46 U.S. Code which range in size and type from small charter fishing boats and towing vessels to drilling units and large tank ships.

Under Chapter 77, Title 46, United States Code, the Coast Guard has the authority to suspend or revoke any license, certificate or document issued to a person if that person is found to be incompetent, or to have committed acts of misconduct or negligence. Intoxication while performing duties under the authority of a license, certificate, or document has been long considered an act of misconduct. The administrative actions against a license, certificate, or document are remedial, to help maintain standards of competence and conduct essential to the promotion of safety at sea.

BEST COPY AVAILABLE

Section 7 of the Coast Guard Authorization Act of 1984 (CGAA), (Pub. L. 98-447 October 30, 1984), added emphasis to the existing statutes under which the Coast Guard addressed intoxication while operating a vessel by adding paragraph (c) to 46 U.S.C. 2302 which provides that:

"An individual who is intoxicated when operating a vessel, as determined under standards prescribed by the Secretary by regulation, shall be—

(1) Liable to the United States Government for a civil penalty of not more than $1,000; or

(2) Fined not more than $5,000, imprisoned for not more than one year, or both."

Section 7(b) amended 46 U.S.C. 6101(b), to require that reports of marine casualties include information as to whether the use of alcohol contributed to the casualty. It also amended the provisions of the State marine casualty reporting system (46 U.S.C. 6102) to require that States submitting reports include information and statistics concerning the number of casualties in which the use of alcohol contributed to the casualty.

The CGAA also amended 46 U.S.C. 13102(c)(4), to require States to have an alcohol awareness educational program in order to receive Federal financial assistance.

This rulemaking proposes rules to define "intoxicated" to implement 46 U.S.C 2302(c) as it pertains to commercial vessel operations and individuals licenses certificates documented by the Coast Guard that are serving under the authority of their license certificate or document. It also proposes rules which will emphasize the responsibility of the owner, operator, master, or person in charge of a vessel to prevent intoxicated persons from operating a vessel, and proposes limitations on the consumption of alcohol by crewmembers of vessels subject to Coast Guard manning requirements.

As previously indicated, this rulemaking addresses improved casualty reporting, including implementing the amendments to 46 U.S.C. 6101(b) and 46 U.S.C. 6102. No additional action is required to implement 46 U.S.C. 13102(c)(4), since each year the Coast Guard enters into contractual agreement with each State that desires to participate in the financial assistance program. In these agreements each State assures the Coast Guard that it includes alcohol awareness in its educational program.

The Coast Guard has examined the problems associated with toxicological testing for blood alcohol concentration levels and drug ingestion. A primary problem is to prevent refusal to submit to testing from being to the individual's advantage in civil proceedings. The prevailing reason for refusal of testing is believed to be the individual's concern that the test results will be adverse—that he or she will "fail' the test and that subsequently the test results will be used to support a determination that the individual was, in fact, intoxicated.

To encourage cooperation most States have have, by statute, created an "implied consent" to testing by licensed drivers—failure to submit to or cooperate in testing is a basis for withdrawal of driving privileges. This approach is not available for the majority of commercial vessel operations because many personnel involved in commercial operations such as those in the fishing industry and most crewmembers on inspected small passenger vessels and uninspected towing and passenger vessels are not required to have a license under Federal law. For those crewmembers who are required to have a license, the statutory grounds for revocation do not include refusal to submit to testing. To prevent refusal of testing from being to the individual's advantage, the Coast Guard is proposing that refusal to submit to or cooperate in testing will be admissible in evidence at administrative proceedings and, under certain circumstances, will support a presumption that the individual was intoxicated. In other words, proof of intoxication may be established solely by the refusal to submit to testing.

The Coast Guard is sensitive to unwarranted infringement of an individual's right to refuse to submit to testing. The presumption of intoxication would be applied only when a timely test was directed by a law enforcement officer or investigating officer who had reasonable belief that the individual to be subjected to testing was intoxicated. In view of the variety of circumstances under which tests may be administered, and the different types of current tests and others under development, the Coast Guard is not proposing a time limit on testing. Timeliness would be determined on a case by case basis by the hearing officer or Administrative Law Judge. Law enforcement officers and investigating officers have training in observing and dealing with persons who may be intoxicated and do not have a personal interest in the outcome of testing. They may be expected to direct testing only in appropriate instances, where there is logical basis for the presumption of intoxication if the individual refuses. Where an untrained, and perhaps not impartial master or person in charge directs testing of a crew member, no presumption would arise out of refusal. The fact of refusal would be admissible in an administrative proceeding, but the weight to be given that fact would depend on the total circumstances.

The penalties for operating a vessel while intoxicated include civil or criminal penalities and suspension or revocation of merchant mariners' licenses, documents or certificates. It is emphasized that nothing in the proposed regulations authorizes the non-consensual testing of an individual, but this does not affect the authority of law enforcement officers to compel testing when there exists probable cause to believe that evidence of a crime will be found. Also these proposed regulations do not address whether a refusal to voluntarily submit to testing would be admissible in a criminal proceeding.

Defining Intoxication

It is necessary to set a standard before any enforcement of 46 U.S.C. 2302(c) can take place. Implementation of 46 U.S.C. 2302 and its predecessor statutes has been delegated to the Coast Guard. The statute applies to all vessels operated on waters subject to the jurisdiction of the United States (including foreign and domestic vessels used for recreation or in commercial service) and to all vessels that are owned in the United States while the vessel is on the high seas. However, the standard proposed in this rulemaking applies only to commercial vessels and other vessels subject to statutory manning requirements. It is noted that the penalties provided by this statute do not apply while a vessel is in the territorial waters of another country.

As mentioned above, prior to the enactment of 46 U.S.C. 2302(c), the Coast Guard has, under the authority of 46 U.S.C. 7701–7705 and its predecessors, suspended or revoked the licenses, documents or certificates of merchant marine personnel for incidents involving intoxication. The Coast Guard also has operational requirements that prohibit intoxicated persons serving on a vessel carrying hazardous liquid cargo in bulk (46 CFR 35.05–25). These actions were taken without a standard of intoxication prescribed by regulation. The evidence used to establish violations typically consists of observations of the individual's behavior or demeanor by other crewmembers. Testing equipment has not been and is not currently available on commercial vessels. The standards proposed in this Notice would become applicable to suspension and

revocation proceedings and operational requirements addressing intoxication.

The Coast Guard is proposing a blood alcohol concentration (BAC) level of .10 percent for vessels which are not subject to manning requirements under Part F of Title 46 United States Code (46 U.S.C. 8101–8307) (hereinafter Part F). A BAC of .10 percent is the level adopted by 19 of the 21 States who have adopted BAC standards. This is the level which has been almost universally adopted by the States in their motor vehicle statutes.

The Coast Guard proposes to prohibit a person from serving as a crewmember on a vessel subject to the manning requirements of Part F while having a BAC level of .04 percent or higher. The .04 percent alcohol content standard for crewmembers is designed to ensure that the persons operating the majority of commercial vessels, both foreign and domestic, are not impaired by alcohol. The reasons for this are simple. Commercial vessels subject to the manning requirements of Part F will normally be carrying a larger number of persons on board than other commercial vessels, and frequently carry hazardous cargo or oil. In the event of an accident, there is greater risk of loss of life or damage to property or the environment. In addition, persons who are employed to perform duties aboard these ships should have an obligation to ensure that their capacity to perform those duties is not even slightly impaired by the voluntary consumption of alcohol.

Considerable data from experimental or clinical settings support the proposition that low levels of alcohol can, and regularly do, have detrimental effects on human performance, including divided attention skills and information processing. Although detrimental effects are reported at lower levels, and even after alcohol is eliminated from the body (the so-called "hangover effect"), the consensus of scientific and professional opinion appears to be that material detrimental effects on human performance begin at least in the range of .04 percent. See, *e.g.*, American Medical Association, *Alcohol and the Impaired Driver* at 58–59 and research summarized at 56–57 (1970, reprinted by National Safety Council 1976); Bjerver, B.M., and Goldberg, L., "Effect of Alcohol Ingestion on Driving Ability," *Quarterly Journal of Alcohol Studies*, 11:1–30, 1950; Billings, C.E. *et al.*, "Effects of Alcohol Ingestion on Driving Ability," *Aerospace Medicine*, 44:379–382, 1973; Laurell, Hans, "Effects of Small Doses of Alcohol on Driver Performance in Emergency Traffic Situations," *Accident Analysis and Prevention*, 9:191–201, 1977; *Alcohol and Highway Safety, 1984*, at 16–23 (National Highway Traffic Safety Administration); *Alcohol and Highway Safety, 1978*, at 15–19 (National Highway Traffic Safety Administration).

Although low levels of alcohol may not appreciably affect simple reaction time in most persons, they may appreciably affect choice reaction time (response in divided attention situations, of the kind experienced by operators of transportation vehicles). See, *e.g.*, Huntley, M.S., Jr., "Effects of Alcohol and Fixation Task Difficulty on Choice Reaction Time to Extrafoveal Stimulation," *Quarterly Journal of Studies on Alcohol*, 34(1):89–103, 1973. Indeed, some studies suggest that significant decreased performance may be measurable at BAC's below .04 percent. See, *e.g.*, Moskowitz, H., "Skills Performance at Low Blood Alcohol Concentrations" (Southern California Research Institute, May 1984; unpublished); Flanagan, N.G., "The Effects of Low Doses of Alcohol on Driving Performance," *Medical Science Law*, 23(3): 203–209, 1983. It is noted that the .04 percent BAC standard has been adopted by the Federal Railroad Administration and the Federal Aviation Administration as the limit for crews involved in commercial operations.

Although marine-specific studies are not available, persons operating vessels perform tasks similar to many of those performed by subjects of the above alcohol studies, requiring that they be free from the known physiological effects of even low levels of alcohol.

In addition to proposing a blood alcohol concentration standard, the Coast Guard is proposing to define intoxication in terms of observed behavior and appearance of an individual, thereby formalizing past practices. A behavioral standard, although less precise than a BAC standard, is essential for several reasons. First, in many instances testing for blood alcohol level may not be available within an acceptable time frame or the person may refuse to consent to the test. Second, intoxication may be caused by drugs, or a combination of drugs and alcohol where the BAC standard is not exceeded. In addition, while the proposed BAC levels are statistically sound, there may be individuals with a susceptibility to alcohol or drug/alcohol combinations such that they are seriously impaired at levels lower than the proposed BAC standards. The behavioral standard may also be used as a measure of what constitutes reasonable cause to test a person for drugs or alcohol.

There are many variations in the statutes defining intoxication in terms of observed behavior. The Coast Guard in proposing that a person is intoxicated when "under the influence of an intoxicant to the degree that the effect of the intoxicant on the person's manner, disposition, speech, muscular movement, general appearance or behavior is apparent to observation." This is based on the definition in section 4–2(14), Code of Virginia. This particular definition has been upheld by both the Virginia courts and Federal courts, which have also recognized that a behavioral definition and a BAC standard can co-exist. See: United States v. Gholson, (319 F. Supp. 499, E.D. Va. 1970).

It must be stressed that the behavioral standard is independent of the BAC standard. A person may be tested and may not reach the thresholds of .10 percent or .04 percent, or test results may not be available, yet the person may be found to have been intoxicated under the behavioral standard. Intoxication can occur without exceeding the BAC standards when the individual has a low tolerance for alcohol or when it is due to a combination of drugs, including lawfully prescribed drugs, and alcohol. Thus, the standards take into account a person's ability to "mask" intoxication or a person's susceptibility to intoxication. However, evidence that the BAC standard was not exceeded would be considered in determining whether intoxication has been established.

Defining "Operating a Vessel"

Defining who is "operating a vessel" under 46 U.S.C. 2302, by regulation, is not feasible. For small commercial vessels whose power and steering are controllable by a single person at a central location, that person is clearly the person operating the vessel. However, for larger commercial vessels, where persons are on deck and engineering watches, and the entire crew is available for emergency duty, the difference between operators and non-operators is difficult to distinguish. The same can also be said of sailing vessels, which may have several persons assisting with the sails. Thus, for vessels which are not subject to the manning requirements under Part F, the determination of whether an individual is "operating a vessel" must be conducted on a case by case basis. For the majority of commercial vessels not subject to manning requirements, all the persons in the crew on duty or watch will normally be considered to be operating the vessel. For vessels subject

to manning requirements, all members of the crew required to be on board for routine or emergency duties will normally be considered to be operating the vessel. The Coast Guard intends to interpret this as including those members of the crew who are not listed on the Certificate of Inspection, such as bartenders, waiters, etc. These crewmembers may be assigned emergency duties, and passengers will look to them for assistance and guidance during an emergency.

The requirement to be "operating a vessel" is essential only for the imposition of civil or criminal penalties under 46 U.S.C. 2302(c). As noted above, the standard for intoxication applies to suspension and revocation proceedings and to the ability to serve as a required member of the crew.

Additional Rules and Requirements

The Coast Guard has additional authority to set restrictions on crewmembers of certain vessels. There is authority for setting operating requirements for vessels subject to inspection in 46 U.S.C. 3306. Regulations issued under this statute can not apply to any uninspected vessels which include, among others; the majority of commercial fishing vessels, towboats, and vessels carrying six passengers or less.

All inspected vessels and many uninspected vessels are also subject to manning requirements under Part F. Under 46 U.S.C. 8105 there is broad authority for regulations to carry out Part F. The Coast Guard considers that this authority, coupled with our authority to set qualifying requirements for licensed and certificated personnel under 46 U.S.C. 7101, and our authority to prescribe regulations regarding qualifications for documented personnel under 46 U.S.C. Chapter 73, provide sufficient authority for the Coast Guard to specify that a person required to be present under Part F is unavailable for service when intoxicated.

The Coast Guard is thus proposing requirements for inspected vessels and regulations concerning compliance with the manning requirements under Part F. These regulations are considered necessary for the same reasons as the proposed .04 percent BAC standard. Personnel on a vessel subject to the manning requirement of Part F must be held to a higher degree of responsibility, since such operations usually involve a larger risk to both passengers and crew and greater hazards to property or the environment. In addition, the manning requirements under Part F would be ineffective if intoxicated persons could fill required positions.

Crewmembers of inspected vessels will not be allowed to consume alcohol within four (4) hours of scheduled watch or duties, or while on watch or duty. These rules define readily observable actions, and are designed to facilitate compliance with the strict intoxication standard for personnel on commercial vessels, without completely prohibiting the consumption of alcoholic beverages.

The Coast Guard proposes a rule that, if a person is intoxicated, that person may not be counted towards meeting the vessel's complement under the manning requirements of Part F. The owner, operator, master, person in charge, person in command of a watch, and possibly others, may be subject to civil penalties, as well as suspension or revocation of licenses, certificates, or merchant mariner's documents, if they knowingly allow an intoxicated person to assume a watch or perform duty. It will always be the responsibility of the owner, operator, master, or person in charge of a vessel to prevent an intoxicated person from operating a vessel. It may also be an act of misconduct by other crewmembers if they fail to report persons who they know are intoxicated to the owner, charterer, operator, agent, master, or person in charge.

If an inspected vessel is deprived of a crewmember's services due to intoxication, the vessel may not meet the manning requirements in Part F. If this occurs prior to sailing, 46 U.S.C. 8101 requires a replacement to be obtained if available. If the master finds the vessel sufficiently manned for the voyage, and replacements are not available, the vessel may proceed on its voyage but the master must report the decision to sail "short" to the Coast Guard. When authorized by 46 U.S.C. 8101, there is no penalty for sailing short but the decision is subject to review by the Coast Guard and the master, owner, or operator would be responsible for the consequences of an inappropriate decision. In addition, there is a penalty for failing to report sailing "short".

These rules should encourage all owners to implement screening of employees to prevent intoxicated individuals from assuming watches or duties. Owners are further encouraged to post information concerning the possible penalties that could come from operating a vessel while intoxicated, the effect on the safety of the vessel, and the obligations of all crewmembers to ensure that the standards are complied with. Owners are also encouraged to implement a total ban on the use of intoxicants on their vessels, with the exception of prescription drugs.

Nothing in this proposal should be construed as banning the employment of individuals using prescription drugs, or the proper use or possession of validly procured prescription drugs, if the medical practitioner dispensing the drugs has made a good faith determination that the drugs will not interfere with the crewmember's ability to perform assigned duties. Each crewmember should inform the master or person in charge of the vessel of his or her use of prescription drugs, and the possible side effects, at the beginning of each voyage or on change of command of the vessel.

Casualty Reporting

The current reporting system contained in the regulations is not an effective tool for measuring the contributing role of alcohol or drugs in vessel casualties. The Coast Guard is proposing to amend Part 173 of Title 33 Code of Federal Regulations and Part 4 of Title 46 Code of Federal Regulations to require all marine casualty reports, including State casualty reporting systems, to include information as to whether or not alcohol or drugs was a cause or contributed to the cause of a casualty, and to encourage post-casualty testing for intoxicants.

To provide the information on alcohol or drug involvement that is required be reported to the Coast Guard, this proposal provides for post-casualty tests for the presence of alcohol or drugs. These tests would be administered at the direction of a Coast Guard law enforcement officer or investigating officer or any law enforcement officer authorized to obtain a test under State or local law.

The Coast Guard is also proposing that refusal of a crewmember of a commercial vessel to submit to testing to determine the presence of alcohol or drugs will be admissible as evidence of intoxication at any administrative proceeding. This provisions would apply to post-casualty testing and testing on reasonable belief of observed intoxication. The weight to be given this evidence would be at the discretion of the hearing officer and would depend on the circumstances surrounding the refusal. In the Advance NPRM for recreational vessels, comments are requested as to whether similar provisions should be considered for the operation of recreational vessels.

The investigation of commercial marine casualties is handled by the Coast Guard; however, since most casualties occur far from a Coast Guard facility, Coast Guard investigating officers or other law enforcement

personnel are rarely available to determine if alcohol or drugs contributed to the casualty. For this reason, the proposal requires the owner, charterer, managing operator, agent, master or person in charge of the vessel to determine whether any person directly involved in the casualty was under the influence of alcohol or drugs. The proposal provides for the master or person in charge of a commercial vessel to direct a member of the crew to undergo testing to determine the presence of alcohol or drugs.

The following guidelines are given for determining the persons typically directly involved in a casualty.

(1) For a vessel casualty such as a collision, ramming, or grounding; the master, person in charge of the vessel, pilot, deck or engineroom watchstanders, lookouts, or any other person who may have been performing duties involved with the operation of the vessel, as appropriate, may be directly involved.

(2) For a vessel equipment casualty, such as a failure of propulsion, steering equipment, or auxiliary machinery; the chief engineer, engineroom watchstanders, and any other person involved in causing the casualty, may be directly involved.

(3) For fires and explosions; the master, chief engineer, and any other person involved in causing the casualty, may be directly involved.

(4) For injuries or death; the injured or deceased person(s), the person's supervisor, if the person was performing duties when the injury or death occurred, and any other person involved in the accident, may be directly involved.

The Coast Guard desires as much information relating to alcohol and drug use as can reasonably be obtained. Determinations of alcohol and drug involvement may be made by:

(1) Personal or reported observation of alcohol or drug use;

(2) Personal or reported observation of a person's manner, disposition, speech, muscular movement, bodily odors, general appearance or behavior; or

(3) Toxicological methods including breath analysis, urine or blood sample testing.

For accidents involving the use of alcohol, it is important that blood and urine sampling be conducted as soon as possible. If the use of a blood test or a urine test is not possible, as will normally be the case if the vessel is not in reasonable proximity to a port, a breath analysis test may be used. Since the cost of breath analysis equipment is not prohibitive and this equipment requires only minimal training to operate, vessel owners are encouraged to provide these devices and training in their use. The known availability of breath analysis equipment would further reinforce alcohol abstinence during or prior to duty hours.

When an individual is apparently intoxicated and there is no indication of alcohol use, drug use should be considered. Where use of drugs is suspected, blood or urine tests should be conducted as soon as reasonably possible. Blood sampling for either alcohol or drug testing must be conducted by qualified medical personnel. To establish proper identification, a proper chain of custody of all blood and urine samples should be maintained from the time of sampling through completion of legal proceedings.

The Coast Guard is also proposing to change the Report of Marine Accident, Injury or Death, Form CG–2692, by adding blocks for alcohol involvement and drug involvement in item 21, and by adding the following instuctions in item 41:

"List all persons directly involved in the casualty who used or were under the influence of alcohol or drugs. Explain how the determination was made, including observable behavior. If toxicological testing was directed, include results."

Enforcement

The actions available to enforce the proposed regulations can be broken down into four categories. First, there are the civil and criminal penalties specified in 46 U.S.C. 2302(c) that can be imposed against the person who is intoxicated while operating a vessel.

The second enforcement method is suspension and revocation proceedings against a licensed, certificated, or documented person who is intoxicated. Suspension or revocation of a license, certificate, or document will prevent a person who has demonstrated a lack of responsibility by being intoxicated while serving on a commercial vessel from continuing to serve. This action is also possible against the license, certificate, or document of the master, or any person supervising other crewmembers, if they knowingly allow a person to operate a vessel while intoxicated, and against other crewmembers who fail to report known intoxication. The intent is to make the entire crew responsible for the safe operation of the vessel. Suspension or revocation action could also be brought against the master or person in charge of a vessel for failure to submit Form CG–2692 and the required information concerning drug and alcohol involvement.

Penalties can be brought against a vessel, or the vessel's owner, operator, master, or person in charge, if a person operates a vessel while intoxicated or if a required crewmember performs duties while intoxicated. Civil penalties can also be brought against the vessel's owner, charterer, managing operator, agent, master, or person in charge of the vessel for failing to submit a Form CG–2692 for marine casualties; for failing to determine whether there is any alcohol or drug involvement by those directly involved in the casualty; or for failing to provide information concerning these determinations. These penalties are designed to ensure that the owners and management officials are involved in eliminating the use of intoxicants on their vessels.

Finally, the Coast Guard is proposing to amend Part 177 of Title 33 Code of Federal Regulations. This Part, titled "Correction of Especially Hazardous Conditions" applies to recreational vessels and uninspected passenger vessels. Under this Part, a Coast Guard Boarding Officer may suspend further use of a vessel until an especially hazardous condition is corrected. The Coast Guard is proposing to include as an especially hazardous condition, operating a vessel while under the influence of alcohol or drugs to the extent that further operation of the vessel is unsafe. Under this provision, the Coast Guard Boarding Officer could take immediate and reasonable steps including terminating further use of the vessel based upon observed operator intoxication.

Alcohol and Drug Rehabilitation

The Coast Guard believes that the voluntary and successful rehabilitation of seaman who abuse alcohol and drugs will result in a safer marine industry. For that reason, the Coast Guard is proposing amendments to 46 CFR Part 5 to permit a seamen to voluntarily deposit his or her license, certificate, or document while undergoing drug or alcohol rehabilitation. The Coast Guard anticipates that these proposals will encourage alcohol and drug abusers to come forward voluntarily, and will provide an opportunity for other persons to identify drug and alcohol abusers with minimal consequences to the reported on individual.

Under 46 U.S.C. 7704, if it is shown at a hearing that a person has been convicted of a drug offense, the person's license, certificate, or document must be revoked. If the person is shown to be a user of or addicted to drugs, the license, certificate, or document must also be revoked unless the holder provides

satisfactory proof that the holder is cured. There are no similar statutory restraints on the action to be taken when only alcohol is involved.

The Coast Guard is proposing to hold suspension and revocation proceedings in abeyance for persons voluntarily depositing their license, certificate, or document while undergoing a rehabilitation program. Since the voluntary deposit prevents the holder from serving aboard vessels under the authority of the license, certificate, or document, safety is not affected by holding the hearing in abeyance. To further ensure that the program is not abused, it will not be available if: (1) The holder caused or contributed to a casualty; (2) the holder's use of drugs or alcohol was discovered pursuant to an investigation; or (3) the holder has previously voluntarily deposited his or her license, certificate, or document for drug use. The limitation on prior voluntary surrender would not apply to alcohol use.

Under the proposal, the license, certificate, or document would not be returned until the holder demonstrates satisfactory completion of a rehabilitation program and meets the physical and professional requirements for issuance of the license, certificate or document. In cases of drug use, the holder would also be required to demonstrate complete non-association with drugs for six months after completion of the rehabilitation program. For both alcohol and drug involvement, the holder would be required to be participating in a monitoring program.

The Coast Guard also proposes amendments to the regulations concerning the issuance of new licenses. Under current regulations, if a license, certificate, or document is revoked or surrended in lieu of a hearing for simple use or possession of drugs or addiction to alcohol, a new license, certificate, or document will not be reissued in less than three years. The Coast Guard is proposing a waiver of this waiting period upon completion of a rehabilitation program and participation in a monitoring program. For drug offenses, the holder would also be required to demonstrate complete non-association with dangerous drugs for a period of one year after completion of a rehabilitation program.

The Coast Guard is also considering whether to hold suspension and revocation proceedings in abeyance when the holder of a license, certificate or document has been convicted of a simple minor offense involving the use or possession of drugs. If this is adopted, the holder would have to demonstrate complete non-association with drugs for an extended period of time—probably in excess of three years. Under no circumstances would suspension or revocation proceedings be held in abeyance when the conviction involved the sale or transfer of drugs. The Coast Guard is particularly interest in comments on whether the program would be adopted in the final rule and, if so, what conditions or limitations should apply.

Miscellaneous Amendments

In conjunction with the amendments in this proposal the Coast Guard is correcting statutory references and eliminating duplicative provisions contained elsewhere in Titles 33 and 46, Code of Federal Regulations

The codification of Title 46, United States Code, made certain regulations, which this rulemaking is otherwise amending, inconsistent with the statutory citation or requirements. These inconsistencies are being corrected in this rulemaking. They include requirements that casualty reports be submitted within 5 days and that the owner, charterer, managing operator, agent, master, or person in charge of a vessel submit the casualty report.

Regulatory Evaluation

It has been determined that this rulemaking is not a major regulation under Executive Order 12291, however, this rule is considered significant under the Department of Transporation Regulatory Policies and Procedures (44 FR 11034: Feb. 26, 1979). It is expected that the establishment of an intoxication standard, restrictions on alcohol use by crewmembers on commerical vessels and other vessels subject to manning requirements and the provision for terminating the use of certain vessels if the operator is under the influence of an intoxicant will deter a person from operating any vessel, and from acting or attempting to act as crew member on board a commerical vessel while intoxicated. This should prevent some accidents that might otherwise occur. The exact number of accidents prevented is impossible to calculate. The amendments to the casualty reporting system should provide the Coast Guard with better data with which to evaluate the role of alcohol and drugs in vessel casualties and to develop effective information, education and enforcement programs to deal with the problem. These proposed rules do not increase the number of casualty reports and boating accident reports required to be submitted. While there will be some minor costs incurred in obtaining the required information concerning alcohol or drug involvement and reporting this to the Coast Guard, if even one death is prevented, the benefits are greater than the relatively small costs involved. Compliance with these proposed rules will not impose any other cost or burden or seamen or persons operating a vessel. Since these amendments have a minor cost impact and primarily apply to individuals rather than businesses or other small entities, the Coast Guard certifies under the Regulatory Flexibility Act (Pub. L. 96-354) that these amendments will not have a significant impact on a substantial number of small entities. A regulatory evaulation has been prepared for this action, and is contained in the regulatory docket. A copy may be obtained by contacting the Commandant (G-CMC/21) as indicated under "ADDRESSES."

Paperwork Reduction Act

The rules proposed in this document revised information collection requirements in 46 CFR Part 4 and 33 CFR Part 173. The Office of Management and Budget (OMB) has approved the information collection currently required. Control number OMB-2115-0003 has been assigned for casualty reports and control number OMB-2115-0010 has been assigned for boating accident reports. Although the report forms are being changed to reflect specific alcohol or drug involvement in casualties, this is considered merely a clarification of existing reporting requirements and a minor change to the reporting burden.

List of Subjects

33 CFR Part 95

Marine safety, Vessels, Alcohol and alcoholic beverages, Drugs.

33 CFR Part 146

Continental shelf, Marine safety, Occupational safety and Health, Reporting and recordkeeping, Alcohol and alcoholic beverages, Drugs.

33 CFR Part 150

Deepwater ports, Marine safety, Reporting and recordkeeping, Alcohol and alcoholic beverages, Drugs.

33 CFR Part 173

Marine safety, Reporting and recordkeeping, Alcohol and alcoholic beverages, Drugs.

33 CFR Part 177

Marine safety, Recreational vessels, Unsafe conditions, Alcohol and alcoholic beverages, Drugs.

46 CFR Part 4

Administrative practice and procedures, Investigations, Accidents, Marine safety, National Transportation Safety Board, Reporting requirements, Alcohol and alcoholic beverages, Drugs.

46 CFR Part 5

Administrative practice and procedures, Investigations, Administrative law judge, Investigating officer, Seaman, License certificate, Document, Rehabilitation, Administrative hearings, Suspension and revocation, Alcohol and alcoholic beverages, Drugs.

46 CFR Part 26

Marine safety, Penalties, Reporting requirements, Vessels, Naviation (water), Passenger vessels, Fishing vessels, Alcohol and alcoholic beverages, Drugs.

46 CFR Part 35

Cargo vessels, Marine safety, Seaman, Occupational safety and health, Reporting and recordkeeping requirements.

46 CFR Part 78

Marine safety, Passenger vessels, Penalties, Reporting requirements, Navigation (water), Alcohol and alcoholic beverages, Drugs.

46 CFR Part 97

Cargo vessels, Marine safety, Reporting requirements, Navigation (water), Penalties, Alcohol and alcoholic beverages, Drugs.

46 CFR Part 109

Continental shelf, Oil and gas exploration, Marine safety, Marine resources, Reporting requirements, Vessels, Alcohol and alcoholic beverages, Drugs.

46 CFR Part 167

Fire prevention, Reporting requirements, Marine safety, Alcohol and alcoholic beverages, Drugs.

46 CFR Part 185

Marine safety, Passenger Vessel, Reporting requirements, Navigation (water), Alcohol and alcoholic beverages, Drugs.

46 CFR Part 196

Marine safety, Oceanographic vessel, Reporting requirements, Navigation (water), Penalties, Alcohol and alcoholic beverages, Drugs.

46 CFR Part 197

Diving, Marine safety, Occupational safety and health, Vessels, Alcohol and alcoholic beverages, Drugs.

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Chapter I of Title 33, Code of Federal Regulations and Chapter 1 of Title 46, Code of Federal Regulations as set forth below:

CHAPTER I—[AMENDED]

1. By adding a new Subchapter F—Vessel Operating Regulations to read as follows:

SUBCHAPTER F—VESSEL OPERATING REGULATIONS

PART 95—OPERATING A VESSEL WHILE INTOXICATED

Sec.

95.001 Purpose.
95.005 Applicability.
95.010 Definition of terms used in this part.
95.015 Standard of intoxication.
95.017 Determination of intoxication.
95.020 General Operating rules for vessels subject to inspection under Chapter 33 of Title 46, United States Code.
95.022 Prohibition for vessels subject to manning requirements of Part F of Title 46, United States Code.
95.025 Responsibility for compliance.
95.030 Penalties.

Authority: 46 U.S.C. 2302, 3306, 7101, 7301, 77011 and 8105; 49 CFR 1.46(b).

§ 95.001 Purpose.

The purpose of this part is to establish intoxication standards under 46 U.S.C. 2302, which prohibits operation of a vessel while intoxicated, and to prescribe restrictions and responsibilities for personnel serving on vessels required to be manned by licensed, certificated, or documented personnel. This part does not pre-empt enforcement of state laws and regulations concerning operation of a vessel while intoxicated.

§ 95.005 Applicability.

(a) This part is applicable to all commercial vessels operating on waters subject to the jurisdiction of the United States and vessels owned in the United States on the high seas. This includes foreign commercial vessels operating on waters subject to the jurisdiction of the United States.

(b) This part is also applicable to all vessels required by Part F of Subtitle II of Title 46, United States Code to be manned by licensed, or certificated, or documented personnel, whenever a deck and/or engineering watch is being maintained.

§ 95.010 Definition of terms used in this part.

"Alcohol" means any form or derivative of ethyl alcohol (ethanol).

"Controlled substance" has the meaning assigned by 21 U.S.C. 802 and includes all substances listed on Schedules I through V as they may be revised from time to time (CFR Part 1308).

"Drug" means any substance (other than alcohol) that has known mind or function-altering effects on a human subject, specifically including any psychoactive substance, and including, but not limited to, controlled substances.

"Intoxicant" means any form of alcohol or drug or combination thereof.

"Vessel owned in the United States" means any vessel documented or numbered under the laws of the United States; and, any vessel (owned by a citizen of the United States) that is not documented or numbered by any nation.

§ 95.015 Standard of intoxication.

An individual is intoxicated when operating a vessel subject to this part when—

(a) The individual has an essential role in the operation of a vessel not subject to the manning requirements of Part F of Subtitle II of Title 46, United States Code including, but not limited to, navigation of the vessel and functioning of the vessel's propulsion system, and is under the influence of an intoxicant to the degree that:

(1) The individual has .10 percent by weight or more alcohol in the blood; or,

(2) The effect of the intoxicant on the person's manner, disposition, speech muscular movement, general appearance or behavior is apparent to observation.

(b) The individual is a crewmember, pilot, or watchstander not a regular member of the crew, of a vessel subject to any manning requirement under Part F of Subtitle II of Title 46, United States Code and is under the influence of an intoxicant to the degree that:

(1) The individual has .04 percent by weight or more alcohol in the blood; or,

(2) The effect of the intoxicant on the person's manner, disposition, speech, muscular movement, general appearance or behavior is apparent to observation.

§ 95.017 Determination of intoxication.

(a) A determination of intoxication may be made by the following:

(1) Personal or reported observation of alcohol or drug use;

(2) Personal or reported observation of a person's manner, disposition, speech,

muscular movement, general appearance or behavior; or,

(3) Toxicological methods including breath analysis, urine, or blood sample testing.

(b) Testing may be directed by a Coast Guard law enforcement officer, investigating officer, or any law enforcement officer authorized to obtain a test under State or local law. If an individual refuses to submit to or cooperate in the administration of a timely toxicological test, when directed by a law enforcement officer or investigating officer having reasonable basis for believing the individual to be intoxicated, evidence of the refusal is admissible in any administrative proceeding and the individual will be presumed to have been intoxicated.

(c) The master or person in charge, in addition to those persons identified in paragraph (b) of this section, may direct such testing. Evidence of refusal to submit to or cooperate in the administration of a timely toxicological test is admissible in evidence in any administrative proceeding.

§ 95.020 General operating rules for vessels subject to inspection under Chapter 33 of Title 46 United States Code.

(a) A person may not perform or attempt to perform any scheduled duties as a crewmember within four hours of consuming any alcohol.

(b) Crewmembers on board the vessel shall not be intoxicated at any time while the vessel is operating.

(c) Crewmembers may not consume any intoxicant while on watch or duty except a drug prescribed or authorized by a medical practitioner used at the specified dosage. The prescription or authorization must be based on a good faith judgment, with knowledge of the person's duties, that use of the drug at the specified dosage is consistent with the safe performance of those duties.

(d) If any crewmember cannot perform duties due to compliance with paragraph (a) of this section or is not in compliance with paragraph (b) of this section, the vessel is considered, for purposes of 46 U.S.C. 8101(e), to be deprived of the services of a member of its complement. If the inability or failure to comply is without the consent, fault, or collision of the owner, chartered, managing operator, agent, master, or person in charge of the vessel, the master shall take the action required by 46 U.S.C. 8101(e).

§ 95.022 Prohibitions for vessels subject to manning requirements of Part F of Subtitle II of Title 46, United States Code.

Crewmembers, pilots, or watchstanders not a regular member of the crew on board a vessel subject to any manning requirement under Part F of Subtitle II of Title 46, United States Code shall not be intoxicated while the vessel is operating.

§ 95.025 Responsibility for compliance.

The owner, charterer, managing operator, agent, master or person in charge of a vessel to which Part F of Subtitle II of Title 46, United States Code applies, shall execise due diligence to assure compliance with the applicable provisions of this part.

§ 95.030 Penalties.

(a) An individual who is intoxicated when operating a vessel in violation of 46 U.S.C. 2302(c), shall be—

(1) Liable to the United States Government for a civil penalty of not more than $1,000; or,

(2) Fined not more than $5,000, imprisoned for not more than one year, or both.

(b) When an owner, charterer, managing operator, agent, master, or person in charge of a vessel to which Part F of Subtitle II of Title 46, United States Code applies, having actual knowledge, requires or permits an individual to commence service or remain in service if that individual is intoxicated or in violation of §§ 95.002(a), the vessel is considered to be without the services of such an individual. The owner, charterer, managing operator, agent, master or person in charge of the vessel is liable for the appropriate penalties prescribed by Part F due to the deficiency of personnel.

PART 146—[AMENDED]

2. The authority citation for Part 146 continues to read as follows:

Authority: 43 U.S.C. 1333(d)(1), 1347, 1348; 49 CFR 1.46(z).

3. Section 146.35 is amended by adding a new paragraph (a)(7) to read as follows:

§ 146.35 Written report of casualty.

(a) * * *

(7) Includes information relating to alcohol or drug involvement as specified in the vessel casualty reporting requirements of 46 CFR 4.05–12.

* * * * *

PART 150—[AMENDED]

4. The authority citation for Part 150 continues to read as follows:

Authority: 33 U.S.C. 1231, 1509(a)(b); 49 CFR 1.46.

5. Section 150.711 is amended by adding a new paragraph (b)(9) to read as follows:

§ 150.711 Casualty or accident.

* * * * *

(b) * * *

(9) The vessel casualty reporting requirements relating to alcohol or drug involvement as specified in the vessel casualty reporting requiremens of 46 CFR 4.50–12.

* * * * *

PART 173—[AMENDED]

6. The authority citation for Part 173 is revised to read as follows and all other authority citations within this part are removed:

Authority: 46 U.S.C. 6101 and 12121; 49 CFR 1.46(n)(1).

§ 173.51 [Amended]

7. In § 173.51 paragraph (b) is revised to read as follows:

* * * * *

(b) This subpart does not apply to a vessel subject to inspection under Title 46 U.S.C. Chapter 33.

8. In § 173.57, paragraph (v) is revised to read as follows:

§ 173.57 Casualty or accident report.

* * * * *

(v) The opinion of the person making the report as to the cause of the casualty, including whether or not alcohol or drugs, or both, was a cause or contributed to causing the casualty.

* * * * *

PART 177—[AMENDED]

9. The authority citation for Part 177 is revised to read as follows:

Authority: 46 U.S.C. 4302; 49 CFR 1.46(n)(1).

10. Section 177.01 is amended by revising the introductory text to read as follows:

§ 177.01 Purpose and applicability.

This part prescribes rules to implement section 4308 of Title 46 United States Code which governs the correction of especially hazardous conditions on recreational vessels and uninspected passenger vessels on waters subject to the jurisdiction of the United States and, for a vessel owned in the United States, on the high seas, except operators of:

* * * * *

§ 177.03 [Amended]

11. Section 177.03 is amended by removing and reserving paragraph (a).

12. In § 177.05, the introductory text is revised to read as follows:

§ 117.05 Action to correct an especially hazardous condition.

An operator of a boat who is directed by a Coast Guard Boarding Officer to take immediate and reasonable steps necessary for the safety of those aboard the vessel, under section 4308 of Title 46, United States Code, shall follow the direction of the Coast Guard Boarding Officer, which may include direction to:

* * * * *

13. Section 177.07 is amended by revising the introductory text and paragraphs (b) and (c) to read as follows:

§ 177.07 Other unsafe conditions.

For the purpose of section 4308 of Title 46, United States Code, "other unsafe condition" means a boat:

* * * * *

(b) That is operated by an individual who is apparently under the influence of an intoxicant, as defined in § 95.010 of this chapter, to the extent that, in the boarding officer's discretion, the continued operation of the vessel would create an unsafe condition.

(c) Has a fuel leakage from either the fuel system or engine, or has an accumulation of fuel in the bilges.

* * * * *

PART 4—[AMENDED]

14. The authority citation for Part 4 continues to read as follows:

Authority: 43 U.S.C. 1333; 46 U.S.C. 2306, 6101, 6301, 6305, 80 U.S.C. 198; 49 CFR 1.46 (b) and (z), except subpart 4.40 for which the authority is: 49 U.S.C. 1903(a)(1)(E); 49 CFR 1.46(n)(10)(i).

15. Subpart 4.03 is amended by adding § 4.03–35 to read as follows:

§ 4.03–35 Nuclear vessel.

The term "nuclear vessel" means any vessel in which power for propulsion, or for any other purpose, is derived from nuclear energy; or any vessel handling or processing substantial amounts of radioactive material other than as cargo.

6. Subpart 4.05 is amended by revising § 4.05–10 and adding §§ 4.05–12 and 4.05–35 and to read as follows:

Subpart 4.05—Notice of Marine Casualty and Voyage Records

* * * * *

§ 4.05–10 Written report of marine casualty.

(a) In addition to the notice required by § 4.05–1, the owner, charterer, managing operator, agent, master, or person in charge of a vessel shall, within five days, report in writing to the Officer in Charge, Marine Inspection, at the port in which the casualty occurred or the nearest port of first arrival. The written report required for vessel or personnel accidents shall be made on Form CG–2692. The Form CG–2692A (Barge Addendum) may be used as needed and appended to Form CG–2692.

(b) If filed without delay, the Form CG–2692 may also provide the notice required by § 4.05–1.

§ 4.05–12 Alcohol or drug involvement.

(a) For each casualty required to be reported by § 4.05–10, the owner, charterer, managing operator, agent, master, or person in charge of the vessel shall determine whether there is any alcohol or drug involvement by persons directly involved in the casualty.

(b) The owner, charterer, managing operator, agent, master, or person in charge of the vessel shall include in the written report, Form CG–2692, submitted for the casualty information which:

(1) Identifies each person determined to be intoxicated; and,

(2) The method used to make this determination, such as by personal or reported observation of alcohol or drug use, personal or reported observation of the individual, or by toxicological testing.

(c) An entry shall be made in the official log book pertaining to those individuals determined to be under the influence of alcohol or drugs.

(d) The refusal to submit to a toxicological test to determine the degree of impairment from either alcohol or drug use when required to do so by the person in charge of the vessel, a Coast Guard official, or any law enforcement official authorized to conduct said test(s) under Federal, State, or local law for intoxication, shall be noted in the official log book, if carried, and in the written report and shall be admissible as evidence of intoxication in administrative hearings.

* * * * *

§ 4.05–35 Incidents involving nuclear vessels.

The master of any nuclear vessel shall immediately inform the Commandant in the event of any accident or casualty to the nuclear vessel which may lead to an environmental hazard. The master shall also immediately inform the competent governmental authority of the country in whose waters the vessel may be or whose waters the vessel approaches in a damaged condition.

PART 5—[AMENDED]

17. The authority citation for Part 5 continues to read as follows:

Authority: 46 U.S.C. 7301, 7310, 7701; 80 U.S.C. 198; 49 CFR 1.46(b).

18. Subpart E is amended by revising § 5.201 and adding § 5.205 to read as follows:

Subpart E—Deposit or Surrender of License, Certificate, or Document

§ 5.201 Voluntary deposits in event of mental or physical incompetence.

(a) A holder may deposit a license, certificate, or document with the Coast Guard in any case where there is evidence of mental or physical incompetence. A voluntary deposit is accepted on the basis of a written agreement, the original of which will be given to the holder, which specifies the conditions upon which the Coast Guard will return the license, certificate, or document to the holder.

(b) Where the mental or physical incompetence of a holder of a license, certificate, or document is caused by use of or addiction to dangerous drugs, a voluntary deposit will only be accepted contingent on the following circumstances:

(1) The holder is enrolled in a bonafide drug rehabilitation program;

(2) The holder's incompetence did not cause or contribute to a marine casualty;

(3) The incompetence was reported to the Coast Guard by the individual or any other person and was not discovered as a result of a Federal, state, or local government investigation; and

(4) The holder has not voluntarily deposited or surrendered a license, certificate, or document, or had a license, certificate or a document revoked for a drug related offense on a prior occasion.

(c) Where the mental or physical incompetence of a holder of a license, certificate, or document is caused by use or addiction to alcohol, a voluntary deposit will only be accepted contingent on the following circumstances:

(1) The holder is enrolled in a bonafide alcohol rehabilitation program;

(2) The holder's incompetence did not cause or contribute to a marine casualty; and

(3) The incompetence was reported to the Coast Guard by the individual or any other person and was not discovered as a result of a Federal, state, or local government investigation.

(d) Where the conditions of paragraphs (b) and (c) of this section are not met, the holder may only surrender such license, certificate or document in accordance with § 5.203.

* * * * *

§ 5.905 Return of Papers or Issuance of New Papers.

(a) A person may request the return of a voluntarily deposited license, certificate, or document at any time, provided he or she can demonstrate a satisfactory rehabilitation or cure of the condition which caused the incompetence; has complied with any other conditions of the written agreement executed at the time of deposit; and complies with the physical and professional requirements for issuance of a license, certificate, or document.

(b) Where the voluntary deposit is based on incompetence due to drug abuse, the deposit agreement shall provide that the license, certificate, or document will not be returned until the person:

(1) Successfully completes a bonafide drug abuse rehabilitation program;

(2) Demonstrates complete non-association with dangerous drugs for a minimum of six months after completion of the rehabilitation program; and

(3) Is actively participating in a bonafide drug monitoring program.

(c) Where the voluntary deposit is based on incompetence due to alcohol abuse, the deposit agreement shall provide that the license, certificate, or document will not be returned until the person:

(1) Successfully completes a bonafide alcohol abuse rehabilitation program; and

(2) Is actively participating in a bonafide monitoring program similar to Alcoholics Anonymous.

(d) The voluntary surrender of a license, certificate, or document is the equivalent of the revocation of such papers. A holder who voluntarily surrenders such papers must comply with provisions of § 5.901 and § 5.903 when applying for the issuance of new papers.

19. Subpart L is amended by adding paragraphs (d), (e), and (f) to § 5.901 to read as follows:

Subpart L—Issuance of New Licenses, Certificates or Documents After Revocation or Surrender

§ 5.901 Time limitations.

* * * * *

(d) For a person whose license, certificate, or document has been revoked or surrendered for the wrongful simple possession or use of dangerous drugs, the three year time period may be waived by the Commandant upon a showing that the individual:

(1) Has successfully completed a substance abuse rehabilitation program;

(2) Has demonstrated compete non-association with dangerous drugs for a minimum of one year following completion of the rehabilitation program; and

(3) Is actively participating in a bonafide drug monitoring program.

(e) For a person whose license, certificate, or document has been revoked or surrendered for offenses related to alcohol abuse, the waiting period may be waived by the Commandant upon a showing that the individual has successfully completed an alcohol abuse rehabilitation program and is actively participating in a bonafide monitoring program similar to Alcoholics Anonymous.

(f) The waivers specified under subparagraphs (d) or (e) of this section may only be granted once to each person.

PART 26—[AMENDED]

20. The authority citation for Subpart 26.08 is revised to read as follows:

Authority: 46 U.S.C. 6101; 46 CFR 1.46(b).

21. Subpart 26.08 is revised to read as follows:

Subpart 26.08—Notice and Reporting of Casualty and Voyage Records

§ 26.08–1 Notice and reporting of casualty and voyage records.

The requirements for providing notice and reporting of marine casualties and for retaining voyage records are contained in Part 4 of this chapter.

PART 35—[AMENDED]

22. The authority citation for Part 35 continues to read as follows:

Authority: 46 U.S.C. 3306 and 3703; 49 CFR 1.46.

23. Subpart 35.15 is revised to read as follows:

Subpart 35.15—Notice and Reporting of Casualty and Voyage Records

§ 35.15–1 Notice and reporting of casualty and voyage records.

The requirements for providing notice and reporting of marine casualties and for retaining voyage records are contained in Part 4 of this chapter.

PART 78—[AMENDED]

24. The authority citation for Subpart 78.07 is revised to read as follows:

Authority: 46 U.S.C. 3306; 49 CFR 1.46(b).

25. Subpart 78.07 is revised to read as follows:

Subpart 78.07—Notice and Reporting of Casualty and Voyage Records

§ 78.07–1 Notice and reporting of casualty and voyage records.

The requirements for providing notice and reporting of marine casualties and for retaining voyage records are contained in Part 4 of this chapter.

PART 97—[AMENDED]

26. The authority citation for Part 97 continues to read as follows:

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

27. Subpart 97.07 is revised to read as follows:

Subpart 97.07—Notice and Reporting of Casualty and Voyage Records

§ 97.07–1 Notice and reporting of casualty and voyage records.

The requirements for providing notice and reporting of marine casualties and for retaining voyage records are contained in Part 4 of this chapter.

PART 109—[AMENDED]

28. The authority citation for Part 109 is revised to read as follows:

Authority: 43 U.S.C. 1333; 46 U.S.C. 3306; 46 App. U.S.C. 86; 49 CFR 1.46 (b) and (n)(6).

29. Subpart D of Part 109 is amended by removing §§ 109.413 and 109.417 and revising § 109.411 to read as follows:

§ 109.411 Notice and reporting of casualty.

The requirements for providing notice and reporting of marine casualties are contained in Part 4 of this chapter.

PART 167—[AMENDED]

30. The authority citation for Part 167 continues to read as follows:

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

Section 167.65–65 is revised to read as follows:

§ 167.65–65 Notice and reporting of casualty and voyage records.

The requirements for providing notice and reporting of marine casualties and for retaining voyage records are contained in Part 4 of this chapter.

PART 185—[AMENDED]

32. The authority citation for Part 185 is revised to read as follows and all other authority citations in the Part are removed:

Authority: 46 U.S.C. 3306; 49 CFR 1.46(b).

33. Subpart 185.15 is revised to read as follows:

Subpart 185.15—Notice and Reporting of Casualty and Voyage Records

§ 185.15–1 Notice and reporting of casualty and voyage records.

The requirements for providing notice and reporting of marine casualties and for retaining voyage records are contained in Part 4 of this chapter.

PART 196—[AMENDED]

34. The authority citation for Part 196 continues to read as follows:

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

35. Subpart 196.07 is revised to read as follows:

Subpart 196.07—Notice and Reporting of Casualty and Voyage Records

§ 196.07–1 Notice and reporting of casualty and voyage records.

The requirements for providing notice and reporting of marine casualties and for retaining voyage records are contained in Part 4 of this chapter.

PART 197—[AMENDED]

36. The authority citation for Part 197 is revised to read as follows:

Authority: 33 U.S.C. 1509(b); 43 U.S.C. 1333; 46 U.S.C. 3306, 6101; 49 CFR 1.46 (b) and (s).

37. Section 197.486 is amended by adding paragraph (d) to read as follows:

§ 196.486 Written report of casualty.

* * * * *

(d) The report required by this section must include information relating to alcohol and drug involvement as required by § 4.05–12 of this chapter.

Dated: May 19, 1986.

BILLING CODE 4910–14–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[FRL–3020–1; OPP–300144A]

Pesticide Tolerance for Daminozide; Extension of Comment Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule; extension of comment period.

SUMMARY: This document extends the comment period on a proposal to reduce, on an interim basis, the existing tolerance for the herbicide daminozide [butanedioic acid mono [2, 2-dimethylhydrazide)] in or on the raw agricultural commodity apples. The National Resources Defense Council requested the extension.

DATE: Comments, identified by the document control number (OPP–300144A), must be received on or before May 27, 1986.

ADDRESS: By mail, submit written comments to: Information Services Section, Program Management and Support Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in room 236 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT:

By mail: Robert Taylor, Product Manager (PM) 25, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460

Office location and telephone number: Room 245, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)–557–1800.

SUPPLEMENTARY INFORMATION: EPA issued, in the Federal Register of April 16, 1986 (51 FR 12889), a proposed rule to amend 40 CFR 180.246 by reducing the tolerance for residues of daminozide in or on apples from 30 ppm to 20 ppm on an interim basis, with the tolerance to expire on July 31, 1987. The comment period was 30 days—the expiration date being May 16, 1986.

The National Resources Defense Council, 25 Kearny St., San Francisco, CA, has requested additional time to prepare comments responding to the proposed rule. EPA is granting this request for extension of the comment period.

Therefore, the proposed amendment to 40 CFR 180.246 *Daminozide; tolerances for residues*, published in the Federal Register of April 16, 1986 (51 FR 12889), is modified to extend the comment period to May 27, 1986.

(21 U.S.C. 346a)

Dated: May 16, 1986.

Douglas D. Campt,

Director, Registration Division, Office of Pesticide Programs.

National Oceanic and Atmospheric Administration

50 CFR Part 651

Northeast Multispecies Fishery; Availability of Fishery Management Plan and Request for Comments

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of availability of a fishery management plan and request for comments.

SUMMARY: NOAA issues notice that the New England Fishery Management Council (Council) has resubmitted a Fishery Management Plan for the Northeast Multispecies Fishery (FMP) for Secretarial review and is requesting comments from the public. Copies of the plan may be obtained from the address below.

DATE: Comments on the plan should be submitted on or before June 20, 1986.

ADDRESS: All comments should be sent to Mr. Richard Schaefer, Acting Regional Director, National Marine Fisheries Service, Northeast Regional Office, 14 Elm Street, Gloucester, MA 01930–3799. Mark the outside of the envelope "Comments on the Multispecies FMP."

FOR FURTHER INFORMATION CONTACT: Peter Colosi, Groundfish Coordinator, 617–281–3600, ext. 252.

SUPPLEMENTARY INFORMATION: The Magnuson Fishery Conservation and Management Act, as amended (16 U.S.C. 1801 *et seq.*) requires that each fishery management council submit any fishery management plan it prepares to the Secretary of Commerce (Secretary) for review and approval or disapproval. This act also requires that the Secretary, upon receiving the plan, must immediately publish a notice that the plan is available for public review and comment. The Secretary will consider the public comments in determining whether to approve the plan.

This plan will replace the Interim FMP for Atlantic Groundfish and proposes to: (1) Establish new minimum size regulations for seven major commercial species; (2) establish minimum sizes for

VOL 51 ISS 100 MAY 23 1986 UMI

recreationally caught cod and haddock; (3) implement major extensions of closed spawning areas on Georges Bank; (4) establish a closed area in Southern New England to enhance yellowtail flounder spawning potential; (5) make major changes in the regulations governing small mesh fisheries; (6) implement a major increase in the mesh size of mobile trawl gear; (7) establish a marking requirement for gillnet gear; and (8) increase the spawning potential for redfish.

Regulations proposed by the Council and based on this plan are scheduled to be published within 10 days.

(16 U.S.C. 1801 *et seq.*)

Dated: May 19, 1986.

DEPARTMENT OF AGRICULTURE

Cooperative Agreement: Iowa State University

AGENCY: Office of International Cooperation and Development, USDA.
ACTION: Notice of intent to enter into a cooperative agreement.

ACTIVITY: The Office of International Cooperation and Development intends to enter into a cooperative agreement with Iowa State University to carry out research and technical services related to improving the data bases and capacity for undertaking consumption effects analyses in low income countries.

Authority

Section 1458 of the National Agricultural Research, Extension and Teaching Policy Act of 1977, as amended (7 U.S.C. 3291), and the Food Security Act of 1985 (Pub. L. 99–198).

The Office of International Cooperation and Development announces the availability of funds during Fiscal Year 1986 to enter into a cooperative agreement with Iowa State University to carry out research and technical services related to improving the data bases and capacity for undertaking consumption effects analyses in low income countries. The purpose of this agreement is to cooperatively plan and then collaboratively develop a series of handbooks which can be used as references for training analysts in developing countries on how to process and edit income and expenditure and consumption survey data, and how and when to apply selected analytical techniques to such data to answer important food and nutrition policy questions. This work will be carried out in two stages. Stage one activities will include: (a) Planning the handbook series; (b) establishing an advisory committee; and (c) preparing and reviewing sample chapters. Implementation of stage two—handbooks—will depend on the availability of funds as well as the amount of interest generated by the output from stage one.
handbooks—will depend on the availability of funds as well as the amount of interest generated by the output from stage one.

This is a joint activity which is part of a program of activities designed to assist developing countries improve their data bases and capabilities for undertaking consumption effects analyses. Iowa State University is already successfully collaborating with this Agency in several efforts in this area and will be able to build upon as well as generalize from these experiences in the development of these handbooks.

Based on the above, this is not a formal request for applications. It is estimated that approximately $30,000 will be available during Fiscal Year 1986 to carry out stage one. Development of the handbooks, themselves, is expected to be founded over a period of years—the exact number of years and amounts dependent on fund avaibility and future decision with respect to the number of handbooks of be developed.

Information may be obtained from: Ms. Roberta van Haeften, Nutrition Economics Group, Technical Assistance Division, Office of International Cooperation and Development, U.S. Department of Agriculture, (58–319R–6–027).

Dated: May 1, 1986.

Agricultural Marketing Service

Renewal of the National Advisory Committee for Tobacco Inspection Services

Notice is hereby given that the Secretary of Agriculture has renewed the National Advisory Committee for Tobacco Inspection Services for an additional period of two years.

This Committee advises the Secretary of the level of services needed under the Tobacco Inspection Act and the establishment of fees and charges to recover the cost of such services.

The Committee consists of 14 producers of tobacco representing all production areas, and shall meet at the call of the Secretary.

The authority for this Committee is Section 5 of the Tobacco Inspection Act (7 U.S.C. 511 *et seq.*).

This notice is given in compliance with the Federal Advisory Committee Act (5 U.S.C. App. I).

Dated: May 15, 1986.

William T. Manley,
Deputy Administrator, Marketing Programs.

BILLING CODE 3410-02-M

National Advisory Committee for Tobacco Inspection Service; Meeting

In accordance with the Federal Advisory Committee Act (5 U.S.C. App. 1) announcement is made of the following Committee meeting:

Name: National Advisory Committee for Tobacco Inspection Services.

Date: June 9, 1986.

Time: 1 p.m.

Place: U.S. Department of Agriculture, Agricultural Marketing Service, Tobacco Division, Training Laboratory, Room 223, 1306 Annapolis Drive, Raleigh, North Carolina 27605.

Purpose: To review various regulations issued pursuant to the Tobacco Inspection Act (49 Stat. 731; 7 U.S.C. 511 *et seq.*), to hear from individuals who have requested to address the Committee and who have been prescheduled to do so, and to discuss the level of tobacco inspection and related services, that is, the number of sets of graders for the flue-cured and burley markets, and the fees and charges associated with providing these services.

The meeting is open to the public. Public participation will be limited to written statements submitted before or at the meeting unless otherwise requested by the Committee Chairperson. Persons, other than members, who wish to address the Committee at the meeting are requested to contact Lioniel S. Edwards, Director, Tobacco Division, Agricultural Marketing Service, U.S. Department of Agriculture, 300 12th Street SW., Room 502 Annex Building, Washington, DC 20250, (202) 447–2567.

Dated: May 21, 1986.

Agency Forms Under Review by the Office of Management and Budget (OMB)

DOC has submitted to OMB for clearance the following proposals for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: International Trade Administration

Title: Caribbean Basin Initiative Export Declaration

Form Number: Agency—ITA-370; OMB-N/A

Type of Request: New Collection

Burden: 200 respondents; 3,200 reporting hours

Needs and Uses: On February 20, 1986, the President announced a special program to guarantee access to the U.S. market for Caribbean-produced textile products made form fabric formed and cut in the United States. Firms participating in the Caribbean Basin Initiative program must certify that the textile products assembled meet the criteria of the program. The Customs Service will use the information provided to conduct audits and detect fraud

Affected Public: Businesses or other for-profit institutions; small businesses or organizations

Frequency: On occasion

Respondent's Obligation: Required to obtain or retain a benefit Sheri Fox, 395-3785

Agency: International Trade Administration

Title: Worldwide Services Program

Form Number: Agency—ITA-4099P; OMB—0625-0127

Type of Request: Required to obtain or retain a benefit

Burden: 200 respondents; 67 reporting hours

Needs and Uses: Information collected from firms is used to promote their services overseas through U.S. consular posts. The information obtained is disseminated to potential buyers/agents overseas through direct mail or commercial newsletters prepared by the posts

Affected Public: Businesses or other for-profit institutions; small businesses or organizations

Frequency: On occasion

Respondent's Obligation: Required to obtain or retain a benefit

OMB Desk Officer: Sheri Fox, 395-3785.

Copies of the above information collection proposals can be obtained by calling or writing DOC Clearance Officer, Edward Michals, (202) 377-4217, Department of Commerce, Room 6622, 14th and Constitution Avenue NW., Washington, DC 20230.

Written comments and recommendations for the proposed information collections should be sent to Sheri Fox, OMB Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503.

Dated: May 19, 1986.

Edward Michals,

Departmental Clearance Officer, Information Management Division, Office of Information Resources Management.

International Trade Administration

[A-580-507]

Antidumping Duty Order; Malleable Cast Iron Pipe Fittings, Other Than Grooved, From Korea

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice.

SUMMARY: In an investigation concerning malleable cast iron pipe fittings, other than grooved (pipe fittings), from Korea, the United States Department of Commerce (the Department) and the United States Department of Commerce (the Department) and the United States International Trade Commission (the ITC) have determined that pipe fittings from Korea are being sold at less than fair value and that sales of pipe fittings from Korea are materially injuring a United States industry. Therefore, based on these findings, all unliquidated entries, or warehouse withdrawals, for consumption of pipe fittings from Korea made on or after January 14, 1986, the date on which the Department published its "Preliminary Determination" notice in the Federal Register, will be liable for the possible assessment of antidumping duties. Further, a cash deposit of estimated antidumping duties must be made on all such entries, and withdrawals from warehouse, for consumption made on or after the date of publication of this antidumping duty order in the Federal Register.

EFFECTIVE DATE: May 23, 1986.

FOR FURTHER INFORMATION CONTACT: Kenneth G. Shimabukuro or Mary Clapp, Office of Investigations, International Trade Administration, United States Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-5332 or (202) 377-1769.

SUPPLEMENTARY INFORMATION: The products covered by this order are malleable cast iron pipe fittings, other than grooved, currently classifiable in the *Tariff Schedules of the United States Annotated* (TSUSA), under items 610.7000, and 610.7400.

In accordance with section 733 of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1673b), on January 14, 1986, the Department published its preliminary determination that there was reason to believe or suspect that pipe fittings from Korea are being sold at less than fair value (51 FR 1546). On March 31, 1986, the Department published its final determination that these imports are being sold at less than fair value (51 FR 10930).

On May 12, 1986, in accordance with section 735(d) of the Act (19 U.S.C. 1673d(d)), the ITC notified the Department that such importations materially injure a United States industry. Therefore, in accordance with sections 736 and 751 of the Act (19 U.S.C. 1673e and 1675), the Department directs United States Customs officers to assess, upon further advice by the administering authority pursuant to section 736(a)(1) of the Act (19 U.S.C. 1673e(a)(1)), antidumping equal to the amount by which the foreign market value of the merchandise exceeds the United States price for all entries of pipe fittings from Korea. Antidumping duties will be assessed on all unliquidated entries of pipe fittings from Korea entered, or withdrawn from warehouse, for consumption on or after January 14, 1986, the date on which the Department published its "Preliminary Determination" notice in the Federal Register (15 FR 1546).

On and after the date of publication of this notice, United States Customs officers must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit equal to the estimated weighted-average antidumping duty margin of 12.48 percent. This rate is applicable to all pipe fittings imported from Korea.

This determination constitutes an antidumping duty order with respect to pipe fittings from Korea, pursuant to section 736 of the Act (19 U.S.C. 1673e) and § 353.48 of the Commerce Regulations (19 CFR 353.48). We have deleted from the Commerce Regulations, Annex I of 19 CFR Part 353, which listed antidumping findings and orders currently in effect. Instead, interested parties may contact the Office of Information Services, Import Administration, for copies of the updated list of orders currently in effect.

This notice is published in accordance with section 736 of the Act (19 U.S.C. 1673e) and § 353.48 of the Commerce Regulations (19 CFR 353.48).

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

May 19, 1986.

Antidumping Duty Order: Malleable Cast Iron Pipe Fittings, Other Than Grooved, From Taiwan

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice.

SUMMARY: In an investigation concerning malleable cast iron pipe fittings, other than grooved (pipe fittings), from Taiwan, the United States Department of Commerce (the Department) and the United States International Trade Commission (the ITC) have determined that pipe fittings from Taiwan are being sold at less than fair value and that sales of pipe fittings from Taiwan are materially injuring a United States industry. Additionally, the Department found that "critical circumstances" do not exist with respect to pipe fittings from Taiwan. Therefore, based on these findings, all unliquidated entries, or warehouse withdrawals, for consumption of pipe fittings from Taiwan made on or after January 14, 1986, the date on which the Department published its "Preliminary Determination" notice in the Federal Register, will be liable for the possible assessment of antidumping duties. Further, a cash deposit of estimated antidumping duties must be made on all such entries, and withdrawals from warehouse, for consumption made on or after the date of publication of this antidumping duty order in the Federal Register.

EFFECTIVE DATE: May 23, 1986.

FOR FURTHER INFORMATION CONTACT: Kenneth E. Shimabukuro or Mary Clapp, Office of Investigations, International Trade Administration, United States Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377-3333 or (202) 377-1766.

SUPPLEMENTARY INFORMATION: The products covered by this order are malleable cast iron pipe fittings, other than grooved, currently classifiable in the *Tariff Schedules of the United States Annotated* (TSUSA), under items 610.7000, and 610.7400.

In accordance with section 733 of the Tariff Act of 1930, as amended (the Act) (19 U.S.C 1673b), on January 14, 1986, the Department published its preliminary determination that there was reason to believe or suspect that pipe fittings from Taiwan are being sold at less than fair value (51 FR 1547). We preliminary determined that "critical circumstances" do not exist within the meaning of section 733(e) of the Act (19 U.S.C. 1673(e)). On March 31, 1986, the Department published its final determination that these imports are being sold at less than fair value and that "critical circumstances" do not exist with respect to pipe fittings from Taiwan (51 FR 10901).

On May 12, 1986, in accordance with section 735(d) of the Act (19 U.S.C. 1673(d)), the ITC notified the Department that such importations materially injure a United States industry.

Therefore, in accordance with sections 736 and 751 of the Act (19 U.S.C. 1673e and 1675), the Department directs United States Customs officers to assess, upon further advice by the administering authority pursuant to section 736(a)(1) of the Act (19 U.S.C. 1673e(a)(1)), antidumping duties equal to the amount by which the foreign market value of the merchandise exceeds the United States price for all entries of pipe fittings from Taiwan. Antidumping duties will be assessed on all unliquidated entries of pipe fittings from Taiwan entered, or withdrawn from warehouse, for consumption on or after January 14, 1986, the date on which the Department published its "Preliminary Determination" notice in the Federal Register 51 FR 1547).

On and after the date of publication of this notice, United States Customs officers must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit equal to the estimated weighted-average antidumping duty margins as noted below.

Manufacturers/producers/exporters	Weighted-average percent
Sun Yang	58.57
De Ho	13.12
Tai Yang	37.99
Kwang Yu	7.93
Young Shiang	58.00
All others	44.67

This determination constitutes an antidumping duty order with respect to pipe fittings from Taiwan, pursuant to

section 736 of the Act (19 U.S.C. 1673e) and § 353.48 of the Commerce Regulations (19 CFR 353.48). We have deleted from the Commerce Regulations, Annex I of 19 CFR Part 353, which listed antidumping findings and orders currently in effect. Instead, interested parties may contact the Office of Information Services, Import Administration, for copies of the updated list of orders currently in effect.

This notice is published in accordance with section 736 of the Act (19 U.S.C. 1673e) and § 353.48 of the Commerce Regulations (19 CFR 353.48).

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

[A-507-502]

Certain In-Shell Pistachios From Iran Final Determination of Sales at Less Than Fair Value

AGENCY: International Trade Administration, Import Administration, Commerce.

ACTION: Notice.

SUMMARY: We have determined that certain in-shell pistachios (pistachios) from Iran are being, or are likely to be, sold in the United States at less than fair value. We have notified the U.S. International Trade Commission (ITC) of our determination. We have directed the U.S. Customs Service to continue with the suspension of liquidation of all entries of pistachios from Iran that are entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice and to require a cash deposit or bond for each entry in an amount equal to the estimated dumping margin as described in the "Continuation of Suspension of Liquidation" section of this notice. The ITC will determine, within 45 days of the date of this determination, whether these imports are materially injuring, or are threatening material injury to, a U.S. industry.

EFFECTIVE DATE: May 23, 1986.

FOR FURTHER INFORMATION CONTACT: Kenneth G. Shimabukuro (202-377-5332) or Mary S. Clapp (202-377-1769), Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Final Determination

We have determined that in-shell pistachios from Iran are being, or are likely to be sold, in the United States at less than fair value, as provided in section 735(a) of the Tariff Act of 1930, as amended (19 U.S.C. 1673d(a)) (the Act). We found that all sales during the period of investigation were at less than fair value, and the weighted-average margin is 241.14 percent. We have determined that "critical circumstances" exist with respect to raw in-shell pistachios from Iran.

Case History

On September 26, 1985, we received a petition filed in proper form from the California Pistachio Commission, Blackwell Land Co., California Pistachio Orchards, Kern Pistachio Hulling & Drying Co-op., Los Rancho de Poco Pedro, Pistachio Producers of California, and T.M. Duche' Nut Co., Inc., on behalf of the industry consisting of domestic pistachio growers and processors of domestically grown pistachios. In compliance with the filing requirements of § 353.36 of the Commerce regulations (19 CFR 353.36), the petition alleged that imports of the subject merchandise from Iran are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Act (19 U.S.C. 1673) and that these imports are materially injuring, or threatening material injury to, a U.S. industry. The petitioners also alleged that "critical circumstances" exist with respect to raw pistachios.

After reviewing the petition we determined that it contained sufficient grounds upon which to initiate an antidumping duty investigation. We initiated the investigation on October 15, 1985 (50 FR 42978), and notified the ITC of our action.

On November 12, 1985, the ITC found that there is a reasonable indication that imports of pistachios from Iran are threatening material injury to a U.S. industry (U.S. ITC Pub. No. 1777, November 1985).

On October 25, 1985, we presented a questionnaire to the Rafsanjan Pistachio Cooperative, the only known seller of pistachios from Iran. On January 10, 15, and 24, 1986, we received responses to our questionnaire. By letter dated January 30, 1986, we informed the Embassy of Algeria that the information it submitted to us on behalf of the Government of Iran was inadequate for purposes of a preliminary determination since the respondent did not know the destination of the pistachios it sold. On January 30, 1986, the Department sent questionnaires to the Rafsanjan Pistachio Cooperative to be forwarded to its customers who export pistachios to the United States. We did not receive any further responses.

We published the preliminary determination of sales at less than fair value on March 11, 1986 (51 FR 8342). A hearing, requested by the petitioners and importers, was held on April 8, 1986. Arguments raised in the briefs of all parties were considered for the final determination.

Scope of Investigation

The products covered by this investigation are certain raw and roasted in-shell pistachio nuts from which the hulls have been removed, leaving the inner hard shells and the edible meat, currently classifiable in the Tariff Schedules of the United States Annotated (TSUSA) under items 145.2600 and 145.5300. The period of investigation is April 1 through September 30, 1985.

Scope of Investigation Issues

In the present investigation questions arose at the time of the Department's preliminary determination as to whether roasted in-shell pistachios were included within the scope of its investigation. It was brought to the Department's attention that the TSUSA item included in its notices, 145.2600, covered only one variety of in-shell pistachios, raw, that was being imported into the United States. Inasmuch as the Department seeks to include all products that are of the same class or kind within the scope of its investigations as are necessary to ensure that it investigates all imports that may be sold within the United States at less than fair value, we requested comments to help in determining whether the Department's intent to include roasted in-shell pistachios within its scope was made apparent throughout the investigation. In addition, we requested comments on the issue of whether roasted in-shell pistachios are within the same class or kind as raw in-shell pistachios and as such, properly within the scope of this investigation.

Importers of raw in-shell pistachios from Iran argued (1) that prior notices have specifically referred to in-shell pistachios provided for under TSUSA item 145.2600 and (2) the ITC limited its preliminary determination to raw in-shell pistachios. The principal importer of roasted in-shell pistachios from Iran, who accounted for eighty percent of the imports of such pistachios from September through December 1985, argued (1) that its imports were not an

attempt at circumvention and there is little possibility of substantial circumvention in the future because of the limited roasting facilities in Europe, where the roasting is done, and (2) that since it has relied on prior determinations and notices, with respect to roasted in-shell pistachios from Iran, to include such pistachios in the scope of the investigation at this time would be an unfair denial of due process.

The importers of raw in-shell pistachios and the importer of roasted in-shell pistachios argue (1) that the Department's determinations of product scope in other investigations do not support inclusion of roasted pistachios in this investigation, and (2) that the roasted in-shell pistachios were previously sold in the free market of Europe and therefore are exports from Europe.

In-shell pistachios are marketed as a snack food and are generally roasted for this purpose. Thus the ultimate use of roasted and raw in-shell pistachios, as well as the expectations of the consumer, are the same for the two products. Additionally, both products are part of the same channel of trade, the end purpose of which is to provide for consumption a roasted edible nut. Roasting of raw in-shell pistachios is not a substantial transformation of that product since roasting is essentially a preparation of the product for use as a snack food. Though the Department is not bound by Customs Service determinations regarding substantial transformation, we note that in its notice of September 18, 1985, *Country of Origin Markings for Pistachio Nuts* (50 FR 37842), the Customs Service found roasting not to be a substantial transformation. The Customs Service also found that the cost of transforming raw in-shell pistachios to roasted in-shell pistachios was insignificant, the process costing 2.5 cents to 3 cents per pound. Based upon these reasons, the Department has determined that roasted and raw in-shell pistachios are within the same class or kind.

The Department further notes that it has never limited the scope in the investigation to raw in-shell pistachio nuts. The Department recognized the need to clarify the scope in this case because of its use of the single TSUSA item 145.2800 in its notices. TSUSA items serve as aids in describing products under investigation but are not binding upon the Department in scope determinations. In fact, the Department may add an item number to cover a product under investigation where the omission of that item would be inconsistent with the products under investigation.

With respect to the parties' point regarding country of exportation, the Department considers pistachios grown in Iran as products of Iran, whether or not they have been sold or roasted in the European market. Both parties have referred to section 773(g) of the Tariff Act of 1930, as amended. That provision deals with the exportation from an intermediate country. That provision states that if a reseller purchases merchandise from a producer who does not know at the time of the sale the destination of the merchansise, and that merchandise is initially exported by or on the behalf of the reseller to a country other than the United States, where it is not subetantially transformed, and the merchandise is subsequently exported to the United States, that merchandise will be treated for purposes of that section, which deals with foreign market value, as an export from that intermediate country.

The provision is not relevant to the issue of whether in-shell pistachios are properly classified as products of Iran. The provision provides that the intermediate country will be considered as the country of exportation for foreign market value calculations. In *Synthetic Methionine from Japan* (47 FR 15622, April 12, 1982), an administrative review two years before the provisions was added to the antidumping law, the Department explained its policy at that time with regard to intermediate country exportation as not removing certain products from the scope of a proceeding because they were exported from a third country. Accordingly, the Department does not consider roasted in-shell pistachios as imports from Europe for purposes of the scope of these proceedings.

Regarding the allegation of the importer of roasted in-shell pistachios that it was denied due process, we note that all interested parties were aware that the Department was considering clarification of the scope regarding roasted in-shell pistachios shortly after the preliminary determination. At that time the only known importer of roasted in-shell pistachios entered appearance as an interested party and had the opportunity to comment upon all aspects of the investigation, including matters not involving scope.

Fair Value Comparisons

To determine whether sales of the subject merchandise in the United States were made at less than fair value, we compared the United States price, based on the best information available, with foreign market value, also based on the best information available. We used the best information available, as required by section 776(b) of the Act, because appropriate responses were not submitted.

United States Price

For our determination we did not use sales data presented by respondents to calculate United States price since they did not include data regarding specific quantities and prices for pistachios sold for export to the United States. We determined United States price on the basis of the average F.A.S. value for the six-month period of investigation as derived from the IM145 statistics compiled by the Bureau of Census.

Foreign Market Value

We used price information provided in the petition, as the best information available, pursuant to section 776(b) of the Act since we did not have specific data regarding quantities and prices for pistachios sold in the home market. The price information used from the petition was the price for a representative grade in May 1985.

Petitioners' Comment

Comment: Petitioners argue that, for the preliminary determination, the Department inadvertently based foreign market value on an average price for the period March 1984 to March 1985, instead of the price of a representative grade in May 1985.

DOC Response: We agree. Foreign market value for the final determination is based on the May 1985 price of a representative grade within the period of review.

Importers' Comment

Comment: Importers argue that the sales price of in-shell pistachios in Iran was converted to U.S. dollars at an improper rate of exchange. The law requires that such conversion be made at a rate which reflects the actual market value of the currency and not at the rate proclaimed by the foreign government when that rate has no relation to the actual value of the currency. Further, the law does not contemplate that agencies of the U.S. government blindly accept values reported by the Federal Reserve Bank when there is evidence that the reported rate is grossly overstated or understated.

DOC Response: Section 522 of the Trade Act of 1930 requires the Department to use the exchange rate furnished by the Federal Reserve Bank of New York. The applicable regulation and statutory provision do not grant the

Department the authority to disregard exchange rate information furnished by the Federal Reserve Bank of New York.

Verification

Verification in accordance with section 776(a) of the Act was not conducted since timely and complete responses were not filed.

Final Affirmative Determination of Critical Circumstances

Petitioners have alleged that imports of certain raw in-shell pistachio nuts present "critical circumstances" within the meaning of section 735(a)(3) of the Act. Critical circumstances exist when the Department finds that: (a) There is a history of dumping in the United States or elsehwere of the merchandise under investigation, or (b) the person by whom, or for whose account, the merchandise was imported knew or should have known tht the exporter was selling the merchandise under investigation at less than its fair value; and (c) there have been massive imports of merchandise under investigation over a relatively short period. In determining whether there have been massive imports over a relatively short period, we normally consider the following factors: (1) The volume and value of the imports; (2) seasonal trends; and (3) the share of domestic consumption accounted for by the imports. Based on our analysis of the first two of these three factors, we have determined that imports from Iran have been massive.

In determining whether there is a history of dumping of pistachios from Iran, in the United States or elsewhere, we reviewed past antidumping findings of the Department of Treasury as well as past Department of Commerce antidumping duty orders. We also reviewed the antidumping actions of other countries made available through the Antidumping Code Committee established by the Agreement on Implementation of Article VI of the General Agreement on Tariffs and Trade. We found no final determination on pistachios from Iran. Therefore, we did not find the requisite history of dumping of the class or kind of merchandise.

The second criterion is whether the importers knew, or should have known, that the exporter was selling the merchandise at less than fair value. We normally consider margins of 25 percent or more to constitute constructive knowledge of sales at less than fair value. Since the margin in this case exceeds this level, we find that knowledge of sales at less than fair value can be imputed to the importers.

For the reasons described above we determine that critical circumstances exist with respect to raw in-shell pistachios from Iran. Since, however, there was no allegation of critical circumstances for roasted in-shell pistachios we did not make such a determination for roasted in-shell pistachios.

Suspension of Liquidation

In accordance with section 733(d) of the Act, we are directing the U.S. Customs Service to continue to suspend liquidation of all entries of raw in-shell pistachios from Iran that are entered, or withdrawn from warehouse, for consumption, on or after December 11, 1985. Suspension of liquidation shall be continued for all entries of roasted in-shell pistachios from Iran that are entered, or withdrawn, from warehouse, for consumption on or after March 11, 1986, the date of publication of the preliminary determination (51 FR 8342). The U.S. Customs Service shall continue to require a cash deposit or the posting of a bond equal to the estimated weighted-average amount by which the foreign market value of the merchandise subject to this investigation exceeds the United States price. In the case of in-shell pistachios from Iran the rate is 241.14 percent. This suspension of liquidation will remain in effect until further notice.

Article VI.5 of the General Agreement of Tariffs and Trade provides that "(n)o product . . . shall be subject to both antidumping and countervailing duties to compensate for the same situation of dumping or export subsidization." This provision is implemented by section 772(d)(1)(D) of the Act. Since the dumping duties cannot be assessed on the portion of the margin attributable to export subsidies, there is no reason to require a cash deposit or bond for that amount. Accordingly, the level of export subsidies as determined in the final affirmative countervailing duty determination on pistachios from Iran will be subtracted from the dumping margin for deposit or bonding purposes.

ITC Notification

In accordance with section 735(d) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all nonprivileged and nonconfidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information publicly or under an administrative protective order without the written consent of the Deputy Assistant Secretary for Import Administration.

The ITC will determine whether these imports materially injure, or threaten injury to, a U.S. industry within 45 days of the date of this determination. If the ITC determines that material injury, or threat of material injury, does not exist, this proceeding will be terminated and all securities posted as a result of the suspension of liquidation will be refunded or cancelled. If the ITC, however, determines that such injury does exist, we will issue an antidumping duty order directing the U.S. Customs Service to assess an antidumping duty on pistachios from Iran which were entered, or withdrawn from warehouse, for consumption after the suspension of liquidation, equal to the amount by which the foreign market value exceeds the United States price, less the amount of the countervailing duty.

This determination is being published pursuant to section 735(d) of the Act (19 U.S.C. 1673d(d)).

Paul Freedenberg,

Assistant Secretary for Trade Administration.

BILLING CODE 3510-DS-M

Decision of Application for Duty-Free Entry of Scientific Instrument; Columbia University

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket No. 85-285. Applicant: Columbia University, New York City, NY 10027. Instrument: Stereomicroscope, Model M5A with accessories. Manufacturer: Leitz (Wild-Heerbrugg), Switzerland. Intended use: See notice at 50 FR 41380.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument provides high imaging clarity and a large transmitted light base. The National Institutes of Health advises in its memorandum dated April 3, 1986 that (1) this capability is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or

apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

Applications for Duty-Free Entry of Scientific Instruments; Harvard University et al.

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897; 15 CFR Part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with § 301.5(a) (3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 A.M. and 5:00 P.M. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket No. 86-190. Applicant: Harvard University, 1350 Massachusetts Avenue, Cambridge, MA 02138. Instrument: Electron Microscope, Model JEM-1200EX/SEG with Accessories. Manufacturer: JEOL, Ltd., Japan. Intended use: The instrument is intended to be used for the study of the ultrastructure of white blood cells, cells derived from blood vessels, tumor cells and kidney tissues. The experiments to be conducted include but are not limited to studies of:

(1) Cytoskeletal characteristics of resting and stimulated leukocytes.

(2) Cytoskeletal characteristics of cells from blood vessels.

(3) Characterization of the lysosomal system in vascular smooth muscle cells.

(4) Characterization of the non-lysosomal acid-hydrolase-containing compartment in vascular smooth muscle cells.

(5) Morphological component of the effect of heparin on cells from blood vessels.

(6) Organization of "artificial blood vessels" in tissue culture.

(7) Morphology and cytochemical changes in a drug-induced model of kidney damage.

Application Received by Commissioner of Customs: April 18, 1986.

Docket No. 86-194. Applicant: University of Wisconsin-Milwaukee, Department of Biological Sciences, Lapham Hall, Room 252, P.O. Box 413, Milwaukee, WI 53201. Instrument: Electron Microscope, Model H-600 CR/CR with Accessories. Manufacturer: Hitachi, Japan. Intended use: The instrument is intended to be used to perform research on a variety of biological specimens, e.g., membrane formation in facultative photosynthetic bacteria, replication of DNA synthesis in the F plasmid in *Escherichia coli*, factors that affect the immune response in fish, and regulation of gene expression in two model systems, the developmentally regulated synthesis of a protein, globin, in the insect *Chironomous thummi*, and the regulation of the synthesis of ribosomal components in somatic cell hybrids. In addition, the instrument will be used for class instruction for undergraduate and graduate student research at the master's and doctoral level. Application Received by Commissioner of Customs: April 23, 1986.

Docket No. 86-195. Applicant: Calcilex Corporation, 10605 Carnegie Avenue, Cleveland, OH 44106. Instrument: Kidney Lithotripter. Manufacturer: Dornier, West Germany. Intended use: The instrument is intended to be used to conduct research concerning the clinical efficacy, morbidity and mortality and the cost of effectiveness of extracorporeal shock wave lithotripsy and alternative therapies in the treatment and management of urinary calculi. The instrument will also be used in the training and education of physicians, resident surgeons in post-graduate training, medical students, and allied health care personnel. Application Received by Commissioner of Customs: April 23, 1986.

Docket No. 86-196. Applicant: Pomona Valley Community Hospital, Ltd., 1798 North Garey Avenue, Pomona, CA 91767. Instrument: Kidney Lithotripter. Manufacturer: Dornier Medizintechnik GmbH, West Germany. Intended use: The instrument is intended to be used to treat patients with kidney stone disease, to research and develop further guidelines for its use and to train physicians, nurses and other ancillary medical personnel in the applications of extracorporeal shock-wave lithotripsy as a less risky and less costly alternative to the removal of kidney and urinary tract stones. Application Received by Commissioner of Customs: April 25, 1986.

Docket No. 86-198. Applicant: The Medical College of Wisconsin, 8701 Watertown Plank Road, Milwaukee, WI 53226. Instrument: Electron Microscope, Model H-600-3 with Accessories. Manufacturer: Hitachi, Ltd., Japan. Intended use: The instrument will be used to study the ultrastructural morphology of tissues and cell cultures derived from various regions of the eye.

infection, in inflammatory conditions and after exposure to potentially toxic substances. In animal models of vitreoretinal pathology and glaucoma, the morphology of the retina and the optic nerve will be studied. In all investigations, the ultrastructure of both the cellular and the extracellular matrix constituents will be examined. Application Received by Commissioner of Customs: April 30, 1986.

Docket No. 86-199. Applicant: University of Medicine and Dentistry of New Jersey, Rutgers Medical School, Department of Anatomy, P.O. Box 101, Piscataway, NJ 08854. Instrument: Electron Microscope, Model CM 12/STEM with Accessories. Manufacturer: N.V. Philips, The Netherlands. Intended use: The instrument will be used for studies of the individual molecules (gangliosides) and mediators of neuritogenesis in order to understand their mechanisms. Other studies will include changes in microtubule distribution and other cytoskeletal structure during cell division and electron microscopic examination of the degeneration of nigral neuronal terminals and synapses in the caudate nucleus. In most of the studies the major objectives are to determine the structure/function relationships of cellular processes. In addition, the instrument will be used for educational purposes in three major graduate programs: Zoology-Cell and Developmental Biology, Physiology-Neurobiology and Biochemistry. Application Received by Commissioner of Customs: April 30, 1986.

Docket No. 86-200. Applicant: Albert Einstein College of Medicine, 1300 Morris Park Avenue, Bronx, NY 10461. Instrument: Optical Microscope. Manufacturer: Carl Zeiss, West Germany. Intended use: The instrument is intended to be used for the study of embryonic, normal adult and cancer cells. Living cells are penetrated with one or more ultrafine microelectrodes under visual control. A primary goal of the studies is to analyze mechanisms of intracellular communication, which is important in development, growth control and electrical signalling between excitable cells of, for example, brain, heart and pancreatic islets. The instrument will also be involved in graduate and postdoctoral teaching in that research instruments are shared and a vital part of this advanced education is hands-on research experience. Application Received by Commissioner of Customs: April 30, 1986.

BILLING CODE 3510-DS-M

Decision on Application for Duty-Free Entry of Scientific Instrument; Purdue University

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket No. 86-006. Applicant: Purdue University, West Lafayette, IN 47907. Instrument: Free Flow Electrophoresis Apparatus, Model Elphor Vap 22 with Accessories. Manufacturer: Bender and Hobein GmbH, West Germany. Intended use: See notice at 50 FR 45647.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument can collect 15 distinct fractions over a separation distance of 1.0 centimeter rapidly and at a controlled temperature of +4 to +25 degrees centigrade. The National Institutes of Health advises in its memorandum dated April 3, 1986 that (1) this capability is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

We know of no other instrument or apparatus of equivilent scientific value to the foreign instrument which is being manufactured in the United States.

Decision on Application for Duty-Free Entry of Scientific Instrument; State University of New York at Stony Brook

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 AM and 5:00 PM in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket No. 85-291. Applicant: State University of New York at Stony Brook, Stony Brook, NY 11794. Instrument: Reflex Light Microscope. Manufacturer: Reflex Measurement Limited, United Kingdom. Intended use: See notice at 50 FR 41381.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument provides three-dimensional measurements of very small objects with a horizontal repeatability of pointing to a well-defined point of 0.002 millimeters and 0.015 in the vertical direction. The National Institutes of Health advises in its memorandum dated April 3, 1986 that (1) this capability is pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument for the applicant's intended use.

We know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

Decision on Application for Duty-Free Entry of Scientific Instrument; University of Texas

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 am and 5:00 pm in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket No. 85-066R. Applicant: University of Texas, Austin, TX 78712. Instrument: X-ray Photoelectron Spectrometer (ESCALAB 5). Manufacturer: VG Scientific Limited, United Kingdom. Original notice of this resubmitted application was published in the Federal Register of December 14, 1982.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.

Reasons: The foreign instrument provides a guaranteed minimum sensitivity of 30 000 counts/second on the Ag 3d ⅝ at resolution 0.88 eV (FMHM). The capability is pertinent to the applicant's intended purpose. We know of no domestic instrument or apparatus of equivalent scientific value to the foreign instrument, at time of purchase (October 4, 1982), for the applicant's intended use.

Consolidated Decision on Applications for Duty-Free Entry of Micromanipulators; Virginia Commonwealth University et al.

This is a decision consolidated pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 1523, U.S. Department of Commerce, 14th & Constitution Avenue, NW., Washington, DC.

Docket Number: 85-298. Applicant: Virginia Commonwealth University/ Medical College of Virginia. Intended Use: See notice at 50 FR 41379.

Docket Number: 85-302. Applicant: Virginia Commonwealth University/ Medical College of Virginia. Intended Use: See notice at 50 FR 43045.

Article: Micromanipulator.

Manufacturer: Narishige Scientific Instrument Laboratory, Japan. Advice submitted by: National Institutes of Health: April 3, 1986.

Comments: None received. Decision: Approved. No instrument of equivalent scientific value to the foreign instrument, for such purposes as each is intended to be used, is being manufactured in the United States. Reasons: The foreign instruments provide precise and smooth movements in increments of 2.0 micrometers on any of three axes with a singly controlled variable-ratio hydraulic mechanism. The National Institutes of Health advises in the cited memoranda that (1) this capability is pertinent to each applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value for the intended use of each instrument.

We know of no other instrument or apparatus being manufactured in the United States which is of equivalent scientific value to the foreign instruments.

National Bureau of Standards

[Docket No. 60630-6139]

Federal Information Processing Standard 119, Ada Programming Language

AGENCY: National Bureau of Standards, Commerce.

ACTION: Final notice; correction.

SUMMARY: In FR Doc. 85-26700, appearing on pages 40472-40474, in the issue of Friday, November 8, 1985, a portion of a sentence was inadvertently

omitted which is now being added as shown below.

On page 46474, first column, section 11.1 *Acquisition of Ada Processors* which continues into the middle column on that page, the concluding paragraph in section 11.1 should read as follows:

"A transition period provides time for industry to produce Ada processors conforming to the standard. The transition period begins on the effective date and continues for one year (1) thereafter. The provisions of this publication apply to orders placed after the effective date; however, an Ada language processor not conforming to FIPS Ada may be acquired for interim use during the transition period."

National Oceanic and Atmospheric Administration

Caribbean Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The Caribbean Fishery Management Council and its Administrative Subcommittee will convene separate public meetings, June 10–12, 1986 at Fort Christiansvaern, at Christiansted, St. Croix, U.S. Virgin Islands, as follows:

Council—will convene its 56th regular public meeting, June 11, 1986, at 9 a.m., adjourn at 5 p.m., reconvene June 12 at 9 a.m., and adjourn at noon, to consider fishery management plans under development, and other technical and administrative matters related to Council operations.

Administrative Subcommittee—will convene June 10 at 2 p.m. and adjourn at 5 p.m., to discuss issues related to its regular administrative operations.

For further information contact the Caribbean Fishery Management Council, Banco de Ponce Building, Suite 1108, Hato Rey, Puerto Rico 00918; telephone: (809) 763–4928.

Dated: May 20, 1986.

BILLING CODE 3510-22-M

North Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service, NOAA, Commerce.

The North Pacific Fishery Management Council's Permit Review and Domestic Annual Processing (DAP) Estimating Committees will convene separate public meetings, June 5–6, 1986, at the Northwest and Alaska Fisheries Center, National Marine Fisheries Service (NMFS), 7600 Sand Point Way, Room 2079, Seattle, WA, as follows:

Permit Review Committee—will convene June 5 at 9 a.m., to review the Council's current joint venture policy and discuss the need for company limits on both bycatch and target species and develop recommendations for Council review in late June.

DAP Estimating Committee—will convene June 6 at 1 p.m. The DAP Estimating Committee was established to develop ways to improve the DAP reporting system from industry. At this first meeting, the Committee will receive a report from the NMFS on their progress in developing ways to obtain more reliable DAP estimates. The Committee also may draft alternatives for public review.

For further information contact Clarence Pautzke, Deputy Director, North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99510; telephone: (907) 274–4563.

Dated: May 20, 1986.

BILLING CODE 3510-22-M

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Additions to Procurement List 1986

SUMMARY: This action adds to Procurement List 1986 commodities to be produced by and services to be provided by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: May 23, 1986.

ADDRESSES: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202–3509.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557–1145.

SUPPLEMENTARY INFORMATION: A Notice of Proposed Addition to the Procurement list of the commodity and services listed below was published in the Federal Register on February 18, March 14, and March 28, 1986 (51 FR 5753, 51 FR 8868, and 51 FR 10651). One comment was received in response to the notice proposing the addition to the Procurement List of Janitorial/Custodial, Jacob K. Javits Federal Building including U.S. Court of International Trade, 26 Federal Plaza and Centre Street Garage, 203–209 Centre Street, New York, New York. The commentor indicated that his firm is minority owned and employs disadvantaged individuals in the New York area. He stated that the service should be set-aside for contracting under the SBA 8(a) program. This service is currently performed by Federal employees and has not been contracted for. The Committee considered the comment received and determined that the addition of this service to the Procurement List would not cause severe impact.

Additions

After consideration of the relevant matter presented, the Committee has determined that the commodities and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c, 85 Stat. 77 and 41 CFR 51–2.6.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered were:

a. The action will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The action will not have a serious economic impact on any contractors for the commodities and services listed.

c. The action will result in authorizing small entities to produce the commodities and services procured by the Government.

Accordingly, the following commodities and services are hereby added to Procurement List 1986:

Commodities

Enamel

8010–00–067–5436
8010–00–067–5437
8010–00–079–2750
8010–00–079–2752
8010–01–303–7803
8010–01–303–7804
8010–00–079–3750
8010–00–079–3752

8010-00-079-3758
8010-00-079-3759
8010-00-079-3758
8010-00-079-3709
8010-00-079-3782
8010-00-079-3784

Services

Elevator Operation Service, Wyoming Valley Veterans Building, 19 North Main Street, Wilkes-Barre, Pennsylvania
Janitorial/Custodial, Jacob K. Javits Federal Building, including U.S. Court of International Trade, 26 Federal Plaza and Centre Street Garage, 203–209 Centre Street, New York, New York
Operation of Postal Service Center Minot Air Force Base, North Dakota.

E. R. Alley, Jr.,
Acting Executive Director.

[FR Doc. 86-11681 Filed 5-22-86; 8:45 am]
BILLING CODE 6820-33-M

Proposed Additions to Procurement List 1986

SUMMARY: The Committee has received proposals to add to Procurement List 1986 a commodity to be produced by and services to be provided by workshops for the blind or other severely handicapped.

Comments must be received on or before: June 25, 1986.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202–3509.

FOR FURTHER INFORMATION CONTACT: C. W. Fletcher, (703) 557–1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77 and 41 CFR 51–2.6. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

Additions

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodity and services listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodity and services to Procurement List 1986, October 15, 1985 (50 FR 41689):

Commodity

Handkerchief, Man's
8440-00-201-4246

Services

Commissary Shelf Stocking, Naval Air Station, Pensacola, Florida
Rehabilitation of Recorder Covers (Requirements of U.S. Geological Survey, Bay St. Louis, Mississippi only).

E. R. Alley, Jr.,
Acting Executive Director.

DEPARTMENT OF DEFENSE

Office of the Secretary

Agency Information Collection Activities Under OMB Review

ACTION: Public Information Collection Requirement Submitted to OMB for Review.

SUMMARY: The Department of Defense has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Each entry contains the following information: (1) Type of submission; (2) Title of Information Collection and Form Number, if applicable; (3) Abstract statement of the need for and the uses to be made of the information collected; (4) Type of Respondent; (5) An estimate of the number of responses; (6) An estimate of the total number of hours needed to provide the information; (7) To whom comments regarding the information collection are to be forwarded; (8) The point of contact from whom a copy of the information proposal may be obtained.

Revision

Industrial Security Inspection Report; DD Form 695

The Defense Investigative Service (DIS) uses the Inspection Report to assist in arriving at a determination that DoD contractors participating in the Defense Industrial Security Program are adequately safeguarding classified information. The report is completed in its entirety by DoD industrial security representatives at their official duty stations to reflect results of individual inspection of contractor's security programs.

Contractor facilities inspection.
Responses 13,600.
Burden Hours 100,918.

ADDRESSES: Comments are to be forwarded to Mr. Edward Springer, Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503 and Mr. Daniel J. Vitiello, DoD Clearance Officer, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202–4302, telephone number (202) 746–0933.

SUPPLEMENTARY INFORMATION: A copy of the information collection proposal may be obtained from Mr. Richard A. Brushwood, DIS Industrial Security Programs Division, Room 5338, 1900 Half St., SW., Washington, DC 20324–1700, telephone (202) 475–0906.

Patricia H. Means,
OSD Federal Register Liaison Officer, Department of Defense.

Each entry contains the following information: (1) Type of Submission; (2) Title of Information Collection and Form Number, if applicable; (3) Abstract statement of the need for and the uses to be made of the information collected; (4) Type of Respondent; (5) An estimate of the number of responses; (6) An estimate of the total number of hours needed to provide the information; (7) To whom comments regarding the information collection are to be forwarded; (8) The point of contact from whom a copy of the information proposal may be obtained.

Extension

Arms, Ammunition, and Explosives (AA&E) Inspection/Survey Report; DIS Form 90

The Defense Investigative Service (DIS) uses the Inspection/Survey Report to assess DoD contractor compliance with the physical security requirements of contracts involving AA&E. The report is completed onsite at Defense contractor plants by DIS industrial security representatives. Information obtained identifies contract security compliance problems which require resolution or military department attention.

Contractors facilities inspected by DIS.
Responses 200.
Burden Hours 200.

ADDRESSES: Comments are to be forwarded to Mr. Edward Springer, Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503 and Mr. Daniel J. Significant AA&E Incident Report; DIS Form 91

The Defense Investigative Service (DIS) uses the Significant AA&E Incident Report to record significant incidents pertaining to the loss, theft, and recovery of conventional AA&E at Defense contract facilities. The reports completed by DIS Industrial Security Representatives after telephonic notification of such incidents by contractors possessing AA&E. Information obtained provides a basis for evaluating adequacy of contractor physical security systems.

Contractors facilities eligible to report incidents.

Responses 200.

Burden Hours 200.

ADDRESSES: Comments are to be forwarded to Mr. Edward Springer, Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503 and Mr. Daniel J. Vitiello, DoD Clearance Officer, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, Virginia 22202–4302, telephone number (202) 746–0933.

SUPPLEMENTARY INFORMATION: A copy of the information collection proposal may be obtained from Mr. Everett S. Johnson, Jr., DIS Industrial Facilities Protection Programs Division, Room 5333, 1900 Half Street, SW., Washington, DC 20324–1700, telephone (202) 475–0906.

Patricia H. Means,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

Department of the Air Force

Privacy Act of 1974; Systems of Records

AGENCY: Department of the Air Force (DAF), DoD.

ACTION: Notice of deletion and amendment of Air Force Systems of Records Notices.

SUMMARY: The Air Force proposes to delete 2 systems of records notices, amend 7 and add 1. Changes are summarized below and the rewritten notices follow in their entirety. The added system was formerly published by the Department of the Army as system A0708.16USREDCOM at 50 FR 22180, May 29, 1985. The added notice is being republished here due to the transfer of support responsibility for the US Readiness Command to the Department of the Air Force.

EFFECTIVE DATE: The deletions are effective immediately May 20, 1988 and the amendments shall be effective without further notice June 23, 1988, unless public comments are received which would result in a contrary determination.

FOR FURTHER INFORMATION CONTACT: Mr. Jon Updike, HQ USAF/DAQD(S), the Pentagon, Washington, DC 20330–5024, telephone: 202/694–3431.

SUPPLEMENTARY INFORMATION: The Air Force systems of records inventory subject to the Privacy Act of 1974, Title 5, United States Code, Section 552a (Pub. L. 93–579; 44 Stat. 1898 *et seq.*) has been published in the Federal Register as follows:

FR Doc. 85–10237 (50 FR 22332) May 29, 1985
FR Doc. 85–14122 (50 FR 24672) June 12, 1985
FR Doc. 85–15062 (50 FR 25737) June 21, 1985
FR Doc. 85–26775 (50 FR 40477) November 8, 1985
FR Doc. 85–29261 (50 FR 50337) December 10, 1985
FR Doc. 86–2527 (51 FR 4531) February 5, 1986
FR Doc. 86–4546 (51 FR 7371) March 3, 1986
FR Doc. 86–10044 (51 FR 16735) May 6, 1986.

None of the proposed changes or the added system require a report as mandated by 5 U.S.C. 552a(o). The added system does not duplicate any now in use within the Department of the Air Force.

P.H. Means,

OSD Federal Register Liaison Officer, Department of Defense.

May 20, 1988.

DELETIONS

F010 MAC A

System Name:

Correspondence, Message, Project Files (Civil Reserve Air Fleet (50 FR 22337) May 29, 1985.

Reason:

This system has been discontinued.

F030 TAC A

System Name:

Base Automated Mobility System (BAMS) Personnel Extract Tape (50 FR 22371) May 29, 1985.

Reason:

This system has been replaced by F030 AF MP D, Contingency Operations System (COMPES) (50 FR 22360). May 29, 1985.

AMENDMENTS

F030 AF MP A

System Name:

Personnel Data System (50 FR 22350) May 29, 1985.

Changes:

Categories of individuals covered by the system:

Delete "nonappropriated fund employees," and add at end, "DOD contractors and foreign military personnel on liaison or support duty."

F035 AF MP C

System Name:

Military Personnel Records System (50 FR 22373) May 29, 1985.

Change:

Routine uses of Records Maintained in the System, Including Categories of Users and the Purposes of Such Uses:

Add, "Used by the Veterans Administration for research."

F045 MPC A

System Name:

Educational Delay Board Findings (50 FR 22438) May 29, 1985.

Authority for Maintenance of the System:

Change to, "10 USC 2108, Advanced standing; interruption of Training; delay in starting obligated service; release from program, and 50 Appendix USC 456, Deferments and exemptions from training and service."

F125 AF SP K

System Name:

Vehicle Administration Records (50 FR 22501) May 29, 1985

Change:

Purpose(s):

Add at end, "Note: In the State of Alaska, the system is also used to ensure that individuals comply with state law on the Alaskan Emission Inspection Program."

F160 DODMERB A

System Name:

Department of Defense Medical Examination Review Board Medical Examination Files (50 FR 49485) May 29, 1985.

Changes:

System Location:

Add, "and Camp Hill PA."

Categories of Individuals Covered by the System:

Change to read, "All applicants to the five service Academies; the Four Year Reserve Officer Training Corps (ROTC) Scholarship Program; Uniform Services University of the Health Sciences (USUHS); Army, Navy, Air Force College Scholarship Program (CSP)."

Categories of Records in the System:

Change to read, "Report of the Medical Examination, Report of Medical History, Report of Dental Examination, to include dental x-rays and any associated civilian forms or medical tests that have been accomplished; may also contain personal correspondence between DODMERB and the applicant, parents/guardian concerning the applicant's medical history or qualification status."

Purpose(s):

Change to read, "The medical examination in computer form is used to determine medical acceptability for one or more of the five service academies or the ROTC, USUHS, CSP for the Air Force, and/or POC Program for Air Force ROTC. The computer also produces products to advise each program manager of initial medical status and all update actions on the applicant."

Routine Uses of Records Maintained in the System, Including Categories of Users and the Purposes of Such Uses:

Add, "Medical consultation may be necessary with parent/legal guardians to clarify/explain applicant's medical status. Examinations may be released to civilian contract agents of the government and private physicians associated with medically certifying applicants for military service."

Storage:

Change to read, "Stored in computer and electronic digital imaging system."

F215 AFA A

System Name:

Library Authorized Patron File (50 FR 22556) May 29, 1985.

Changes:

Categories of Records in the System:

Change to read, "Social Security Number, name, library card number, base and/or home address, privilege code, statistical code, base organizational affiliation code, telephone number(s), expiration date, number of cards issued, service code (if appropriate), graduate school code (if appropriate) for special borrowers, and difsiv training code (if appropriate)."

Purpose(s):

Change, "Library," to "Library and Visual Information Services."

Retention and Disposal:

Add, "Paper forms are destroyed when no longer needed."

F900 TAC A

System Name:

Special Awards File (50 FR 22562) May 29, 1985.

Changes:

System Manager(s) and Address:

Change "Director of Personnel" to "Deputy Chief of Staff, Personnel."

ADDITIONS

F030 REDCOM A

System Name:

USREDCOM Military Personnel Data File.

Reason:

Support responsibilities for the US Readiness Command have been transferred from the Department of the Army to the Department of the Air Force. This was formally Army system A0708.16 USREDCOM (50 FR 221891) May 29, 1985.

F030 REDCOM A

SYSTEM NAME:

030 REDCOM A USREDCOM Military Personnel Data File.

SYSTEM LOCATION:

US Readiness Command, MacDill AFB FL 33608-8001.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All Army, Navy, Marine Corps, and Air Force personnel assigned for duty with USREDCOM.

CATEGORIES OF RECORDS IN THE SYSTEM:

File contains individual's name, SSN, rank, pay grade, date of rank, branch of service, basic pay entry date, date of birth, organization and division, alert status-joint task force, immunization dates, weapons qualification, primary and secondary military specialty, duty MOS/AFSC, marital status, officer evaluation report/enlisted efficiency report date, reserve regular status, duty telephone number, home address and telephone number, date arrived at USREDCOM, projected loss date, expiration term of service, foreign service availability code, human personal reliability screening date, language proficiency, enlisted evaluation report weighted average, name of OER/EER rater, duty title, permanent grade, date of rank, rated category, highest professional military and civilian education, source of commission, mandatory retirement date (officers).

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 8012, Secretary of the Air Force: Powers and duties; delegation by.

PURPOSE(S):

To maintain a consolidated joint personnel file on personnel assigned to the USREDCOM. Although each service has its own personnel system, USREDCOM requires basic data for Command Manning Rosters, Joint Task Force Deployment Rosters, and similar management purposes.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Records from this system of records may be disclosed for any of the blanket routine uses published by the Department of the Air Force.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

On-line disk storage backed up by magnetic tape.

RETRIEVABILITY:

Data is retrieved by SSN.

SAFEGUARDS:

All personnel who maintain the system are cleared for Top Secret. Access to the data is controlled by system software. Outputs are labeled.

RETENTION AND DISPOSAL:

Records are deleted when individuals depart USREDCOM.

SYSTEM MANAGER(S) AND ADDRESS:

Commander, US Readiness Command, MacDill AFB FL 33608-6001.

NOTIFICATION PROCEDURE:

Individuals wishing to know if the system contains information on them may write the system manager, ATTN: Directorate of Personnel, JI (ATTN: RCJi–MP). Individuals must furnish full name, SSN, current address and telephone number, and a signature.

RECORD ACCESS PROCEDURES:

Individual may obtain assistance by writing the address and providing the information listed under Notification procedure.

CONTESTING RECORD PROCEDURES:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the System Manager and are published in Air Force Regulation 12–35.

RECORD SOURCE CATEGORIES:

Information is obtained from military personnel records.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

Amended Systems

F030 AF MP A

SYSTEM NAME:

030 AF MP A Personnel Data System (PDS).

SYSTEM LOCATION:

Headquarters United States Air Force, Washington, DC 20330. Air Force Manpower and Personnel Center, Randolph Air Force Base, TX 78150. Air Reserve Personnel Center, Denver, CO 80280. Headquarters of major commands and separate operating agencies and consolidated base personnel offices, central civilian personnel offices (CCPOs) and consolidated reserve personnel offices. Official mailing addresses are in the Department of Defense directory in the appendix to the Air Force's system notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Air Force active duty and retired military personnel. Air Force Reserve and Air National Guard personnel. Air Force Academy cadets. Air Force Civilian employees. Certain surviving dependents of deceased members of the US Air Force and predecessor organizations; potential Air Force enlistees; candidates for commission enrolled in college level Air Force Reserve Officer Training Corps Programs; Deceased members of the Air Force and predecessor organizations; Separated members of the US Air Force, the Air National Guard (ANG) and Air Force Reserve (USAFR); ANG and USAFR Technicians; Prospective, pending, current, and former Air Force civilian employees, except Air National Guard Technicians-current and former civilian employees from other Governmental agencies that are serviced at CCPOs may be included at the option of servicing CCPO: DOD contractors and foreign military personnel on liasion or support duty.

CATEGORIES OF RECORDS IN THE SYSTEM:

The principal digital record maintained at each PDS operating level is the master personnel record, which contains the following categories of information: 1. Accession data pertaining to an individual's entry into the Air Force (place of enlistment source of commission, home of record, date of enlistment, place from which ordered to EAD). 2. Education and training data, describing the level and type of education and training, civilian or military (academic education level, major academic specialty, professional specialty courses completed, professional military education received). 3. Utilization data used in assigning and reassigning the individual, determining skill qualifications, awarding Air Force Specialty Codes, determining duty location and job assignment, screening/selecting individual for overseas assignment, performing strength accounting processes, etc. (Primary Air Force Specialty code, Duty and Control Air Force Specialty Code, personnel accounting symbol, duty location, up to 24 previous duty assignments, aeronautical rating, date departed last duty station, short tour return date, reserve section, current/last oversea tour). 4. Evaluation Data on members of the Air Force during their career (Office Effectiveness Report dates and ratings, Airman Performance Report dates and ratings, result of various qualification tests, an "Unfavorable Information" indicator, and Drug and Alcohol Abuse data). 5. Promotion Data including promotion history, current grade and/or selection for promotion (current grade, date of rank and effective date; up to 10 previous grades, dates of rank and effective dates; projected temporary grade, key "service dates"). 6. Compensation data—although PDS does not deal directly with paying Air Force members, military pay is largely predicated on personnel data maintained in PDS and provided to the Air Force Accounting and Finance Center (AFAFC) as described in ROUTINE USES below (pay date, Aviation Service Code, sex, grade, proficiency pay status. 7. Sustentation data—information dealing with programs provided or actions taken to improve the life, personal growth and moral of Air Force members (awards and decorations, marital status, number of dependents, religious denomination of member and spouse, race relations education). 8. Separation and retirements data, which identifies an individual's eligibility for and reason for separation (date of separation, mandatory retirement date, projected or actual separation program designator and character of discharge). At the central processing site (AFMPC), other subsidiary files or processes are operated which are integral parts of PDS: 1. Procurement Management Information System (PROMIS) is an automated system designed to enable the USAF to exercise effective management and control of the personnel procurement personnel required to meet the total scheduled

manpower requirements necessary to accomplish the Air Force mission. The system provides the recruiter with job requirement data such as necessary test scores, Air Force Specialty Code, sex, date of enlistment, and the recruiter enters personal data on the applicant—SSN, name, date of birth, etc.—to reserve the job for him or her. 2. Career Airman Reenlistment Reservation System (CAREERS) is a selective reenlistment process that manages and controls the numbers by skill of first-term airmen that can enter the career force to meet established objectives for accomplishing the Air Force mission. A Centralized data bank contains the actual number, by quarter, for each Air Force Specialty Code (AFSC) that can be allowed to reenlist during that period. The individual requests reenlistment by stating his eligibility (AFSC, grade, active military service time, etc.). If a vacancy exists, a reservation—by name, SSN, etc.—will be made and issued to the CBPO processing the reenlistment. 3. Airman Accessions provides the process to capture a new enlistee's initial personal data (entire personnel record) to establish a personnel data record and gain it to the Master Personnel File of the Air Force. The initial record data is captured through the established interface with the Processing and Classification of Enlistees System (PACE) at Basic Military Training, Lackland Air Force Base, for non-prior service; for prior service enlistees the basic data (name, SSN, DOE, grade, etc.) is input directly by USAF Recruiting Service and updated and completed by the initial gaining CBPO. 4. Officer Accessions is the process whereby each of the various Air Force sources of commissioning (AF Academy, AFROTC, Officer Training School, etc.) project their graduates in advance allowing management to select by skill, academic specialty, etc. which and how many will be called to active duty when, by entering into the record an initial assignment and projected entry onto Active Duty date. On that date the individual's record is accessed to the active Master Personnel File of the Air Force. 5. Technical Training Management Information System (TRAMIS) is a system dealing with the Technical Training activities controlled by Air Training Command. The purpose of the system is to integrate the training program, quota control and student accounting into the personnel data system. TRAMIS consists of numerous files which constitute "quota banks" of available training spaces, in specific courses, projected for future use based on estimated training requirements. Files include such data as: Course Identification Numbers, Class Start and Graduation Dates, Length of Training, Weapon System Identification, Training Priority Designators, Responsible Training Centers, Trainee Names, SSN (and other pertinent personnel data) on individuals scheduled to attend classes. 6. Training Pipeline Management Information System (TRAPMIS) is an automated quota allocating system which deals with specialized combat aircrew training and aircrew survival training. Its files constitute a "quota bank" against which training requirements are matched and satisfied and through which trainees are scheduled in "pipeline" fashion to accommodate the individual's scheduled geographical movement from school to school to end assignment. Files contain data concerning the courses monitored as well as names, SSNs and other pertinent personnel data on members being trained. 7. Air Force Institute of Technology (AFIT) Quota Bank File reflects program quotas by academic specialty for each fiscal year (current plus two future fiscal years, plus the past fiscal year programs for historical purposes). Also, this file reflects the total number of quotas for each academic specialty. Officer assignment transactions process against the AFIT Quota Bank file to reflect the fill of AFIT Quotas. Examples of data maintained are: Academic Specialty, Program Level, Fiscal Year, Name of Incumbent selected, projected, filling AFIT Quota. 8. Job File is derived from the Authorization Record and is accessible by Position Number. Resource managers can use the Job File to validate authorizations by Position Number for assignment actions and also to make job offers to individual officers. Internal suspensing within the Job File occurs based upon Resource Managers update transactions. Data in the file includes: Position Number, Duty AFSC, Functional Account Code, Program Element, Location, and name of incumbent. 9. Casualty subsystem is composed of transactions which may be input at Headquarters Air Force and/or CBPOs to report death or serious illness of members from all components. A special file is maintained in the system to record information on individuals who have died. Basic identification data and unique data such as country of occurrence, date of incident, casualty group, aircraft involved in the incident and military status are recorded and maintained in this file. 10. Awards/Decorations are recorded and maintained on all component personnel in the headquarters Air Force master files: All approved decorations are input at CBPOs whereas disapproved decorations are input at MAJCOM/HAF. A decorations statistical file is built at AFMPC which reflects an aggregation of approvals/disapprovals by category of decoration. This file does not contain any individually identifiable data. All individually identifiable data on decorations is maintained in the Master Personnel File. Such information as the type of decoration, awarding authority, special order number and date of award are identified in an individual's record. Seven occurrences for all decorations are stored; however only specific data on the last decoration of a particular type is maintained. 11. Point Credit Accounting and Reporting System (PCARS). This system is an Air National Guard/Air Force Reserve Unique supported by PDS. Its basic purpose is to maintain and account for retirement/retention points accrued as a result of participating in Drills/Training. The system stores basic personal identification data which is associated with a calendar of points, earned by participation in the Reserve program. Each year an individual's record is closed and point totals are accumulated in history, and a point earning statement is provided the individual and various records custodians. 12. Human Reliability/Personnel Reliability File: This file is maintained at Headquarters Air Force in support of Air Force Regulation 35–99. It is not part of the Master Personnel Files but a free standing file which is updated by transactions from CBPOs. The file was established to specifically identify individuals who have become permanently disqualified under the provisions of the above regulations. A record is maintained on each disqualified individual which includes basic identification data, service component, Personnel/Human reliability status and date, and reason for disqualification. 13. Variable Incentive Pay (VIP) File for medical officers: Contains about 125 character record on all Air Force physicians and is specifically used to identify whether the individual is participating in the Continuation Pay or Variable Incentive Pay programs. Update to this file is provided by the Surgeon (AFMPC), the Air Force Accounting and Finance Center and directly from changes to the Master Personnel File. Besides basic identification data an individual's record includes source of appointment, graduate medical location status, amount of VIP or Continuation Pay and the dates of authorization and the dates and reason for separation. 15. Weighted

Airman Promotion System: (a) The Test Scoring and Reporting Subsystem (TSRS) provides for: Identifying at the CBPO individuals eligible for testing; providing output to the Base Test Control Officer and the CBPO to control, monitor, and operate WAPS testing functions; editing and scoring WAPS test answer cards at AFMPC; providing output for maintaining historical and analytical files at AFMPC and the Human Resources Laboratory (HRL) and includes the central identification at AFMPC of individuals eligible for testing. (b) The Personnel Data Reporting Subsystem (PDRS) provides for: Identifying promotion eligibles at AFMPC; verifying these eligibles and selection promotion data; merging test and weighted promotion data at AFMPC to effect promotion scoring, assigning the promon objective and aligning selectees in promotion priority sequence; maintaining projections on promotion selectees at AFMPC, MAJCOM, and the CBPO; updating these projections monthly; creating output products to monitor the flow of data in the system; maintaining promotion historical and analytical files and reports at AFMPC. (c) Basically, identification data along with time in grade, test scores, decoration information, time in service, and airman performance report history is used to support this program. 16. Retired Personnel Data System (RPDS) is made up of four files—Retired Officer Management File and Retired Airman Management File containing records on members in retired status and the Retired Officer and Airman Loss Files containing records on former retirees who have been lost from rolls, usually through death. The RPDS is used to produce address listings for the Retired Newsletter and Policy letter, statistical reports for budgeting, to manage the Advancement Program, the Temporary Disability Retired List, Age 59 rosters for ARPC, General Officer roster, and statistical digest data for management analysis functions. Data is extracted from the master files upon retirement from Active Duty or Reserves. Data includes: name, SSN, grade data, service data, education data, retirement data and address. 17. Separated Officer File contains historical information on officers who leave the Air Force via separation, retirement, or death. Copies are sent to Human Resources Lab and Washington offices for research purposes. The data comprises the Master Personnel Record in its entirety and is captured 30 to 60 days after separation from the Air Force. 18. Airman Gain/loss File includes data extracted from the Airman Master file when accession and separation (gains and losses) occur. This file, like the Separated Officer File, is used for historical reports regarding strength changes. Data includes name, SSN, and other data, that reflects strength, i.e., promotions, reassignment data, specialty codes, etc. 19. Officer and Airman Separation Subsystem is used to process, track, approve, disapprove and project separations from the Air Force and transfers between components of the Air Force. This subsystem uses the Active, Guard, and Reserve MPFs. Data includes that specifically related to separations, e.g., Data of Separation, Separation Program Designator, waivers, etc. 20. The Retirements Subsystem is used to process and track applications for and approval/disapproval and projections of retirements. This subsystem uses the Master Files for Active Duty and Reserve officers and airmen. Data specifically related to retirements includes application data, date of separation, waiver codes, disapproval reason codes, Separation Program Designator, Title 10 U.S.C. section, etc. 21. Retired Orders Log is a computer produced retirement orders routine. Orders are automatically produced when approval, verification of service dates, and physical clearance have been entered in system. The orders log contains data found in administrative orders for retirement, including name, SSN, grade, order number, effective dates, etc. The log is used to control assignment of order number, and as a cross-reference between orders, revocations, and amendments. 22. General Officer Subsystem of PDS contains data extracted from the Master Personnel File and language qualification data and assignment hisory data maintained by the Assistant for General Officer matters. A record is maintained on each general officer and general officer selectee. The general officer files are updated monthly and is used to produce products used in the selection/identification of general officers for applicable assignments. 23. Officer Structure Simulation Model (OSSM) provides officer force descriptions in various formats for existing, predictive or manipulated structures. It functions as a planning tool against which policy options can be applied so as to determine the impact of such policy decisions. The OSSM input records contain individual identification data from the Master Personnel Record, but all output is statistical. 24. Widow's File is maintained on magnetic tape and updated by the office of primary Responsibility. When required, address lables and listings are produced by employing selected PDS utility programs. The address labels are used to forward the Retired Newsletter to widows of active duty and retired personnel. The listings are used for management control of the program. Contained in the file are the name, address, and SSN of the widow. Additionally, the deceased sponsor's name, SSN, date of death, and status at time of death are maintained. 25. Historical Files are files with a retention period of 365 days or more. They consist of copies of active master files, and are used primarily for aggregation and analysis of statistical data, although individual records may be accessed to meet ad hoc requirements. 26. Miscellaneous files, records, and processes are a number of work files, inactive files with a less-than-365 day retention period, intermediate records, and processes relating to statistical compilations computer operation, quality control and problem diagnosis. Although they may contain individual-identifying data, they do so only as a function of system operation, and are not used in making decisions about people. 27. Civilian employment information including authorization for position, personnel data, suspense information; position control information; projected information and historical information; civilian education and training data; performance appraisal, ratings, evaluations of potential; civilian historical files covering job experience, training and transactions; civilian awards information; merit promotion plan work files; career programs files for such functional areas as procurement, logistics, civilian personnel, etc., civilian separation and retirement data for reports and to determine eligibility; adverse and disciplinary data for statistical analysis and employee assistance; stand alone files, as for complaints, enrollee programs; extract files from which to produce statistical reports in hard copy, or for immediate access display on remote computer terminals; miscellaneous files, as described in item 26, above.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 265, policies and regulations: Participation of reserve officers in preparation and administration; 269, Ready reserve: Placement in; transfer from; 275, Personnel records; 278, Dissemination of information; 279, Training Reports; Chapter 31, Enlistments; 564, Warrant officers: effect

of second failure of promotion; 555, Commissioned officers: appointment, how made; term; 651, Members: Required service; 671, Members not to be assigned outside US before completing training; 673, Ready reserve; Chapter 47, Uniform Code of Military Justice, Sections 835, Art. 35. Service of Charges, 837, Art. 37. Unlawfully influencing action of court; 885, Art. 85. Desertion; 886, Art. 86. Absence without leave; 887, Art. 87. Missing movement; 972, Enlisted members: Required to make up time lost; 1005, Commissioned officers: Retention until completion of required service; 1163, Reserve components: Members; limitations on separation; 1164, Warrant officers; separation for age; 1166, Regular warrant officers: Elimination for unfitness or unsatisfactory performance; Chapter 61, Retirement—Physical disability; Chapter 63, Retirement for Age, Section 1263—Age 62: Warrant officers; Chapter 65, Retirement for Length of Service; 1293, Twenty years or more: warrant officers; 1305, Thirty years or more: Regular warrant officers; Chapter 67, Retired pay; 1331, Computation of years of service in determining entitlement to retired pay; 1332, Age and service requirements; 1333, Computation of years of service in computing retired pay; Chapter 79, Correction of Military Records; Chapter 165, Accountability and responsibility, Section 2771, Final settlement of accounts: Deceased members; 9012, Secretary of the Air force: powers and duties; delegation by; Chapter 805, The Air Staff, Sections 8032, General duties; and Section 8033, Reserve components of Air Force; policies and regulations for government for government of: Functions of National Guard Bureau with respect to Air National Guard; Chapter 831, Strength, Section 8224, Air National Guard of the United States; Chapter 833, Enlistments; 835, Appointments in the Regular Air Force, 8284, Commissioned officers: appointment, how made; 8285, Commissioned officers: Original appointment; qualifications; 8296, Promotion lists: Promotion-list officer defined; determination of place upon transfer or promotion; 8297, Selection boards; 8303, commissioned officers: Effect of failure of promotion to captain, major, or lieutenant colonel; Chapter 837, Appointments as Reserve Officers; 8360, Commissioned officers: Promotion service; 8362, Commissioned officers: selection boards; 8363, Commissioned officers: Selection boards; general procedures; 8366, Commissioned officers: Promotion to captain, major or lieutenant colonel; 8376, Commissioned officers: promotion when serving in temporary grade higher than reserve grade: Chapter 839, Temporary Appointments, 8442, Commissioned officers; regular and reserve components: Appointment in higher grade; 8447, Appointments in commissioned grade: How made; how terminated; Chapter 841, Active Duty, 8485, Air National Guard of United States Commissioned officers; duty in National Guard Bureau; Chapter 853, Rights and benefits, Section 8691, Flying officer rating: Qualifications; Chapter 857, Decorations and Awards; Chapter 859, Separation, 8796, Officer considerd for removal: Voluntary retirement or honorable discharge; severance benefits; 8796, Officers considered for removal: Retirement or discharge; Seperation or Transfer to Retired Reserve, 8840, Deferred Officers; 8848, 25 years: Reserve first lieutenants, captains, majors, and lieutenant colonels; 8851, Thirty years or five years in grade: reserve colonels and brigadier generals; 8852, Thirty-five years or five years in grade: Reserve major generals; 8853, Computation of years of service; Chapter 865, Retirement for Age, 8883, Age 60; regular commissioned officers below major general; 8884, Age 60: Regular major generals whose retirement has been deferred; 8885, Age 62: Regular major generals; 8886, regular major generals whose retirement has been deferred; Chapter 867, Retirement for Length of Service, 8911, Twenty years or more; regular or reserve commissioned officers; 8913, Twenty years or more: Deferred officers not recommended for promotion; 8914, twenty to thirty years: regular enlisted members; 8915, Twenty-five years: Female majors except those designated under section 8067(a)–(d) or (g)–(i) of this title; 8916, twenty-eight years: Promotion-list lieutenant colonels; 8917, Thirty years or more: Regular enlisted members; 8918, Thirty years or more: Regular commissioned officers; 8921, Thirty years or five years in grade: Promotion-list colonels; 8922, Thirty years or five years in grade: regular brigadier generals; 8923, Thirty-five years or five years in grade: Regular major generals; 8924, Forty years or more: Air Force officers; Chapter 901, Training generally, 9301, Members of Air Force: Detail as students, observers and investigators at educational institutions, industrial plants, and hospitals; and 9302, Enlisted members of Air Force: Schools; Chapter 903, United States Air Force Academy, 9342, Cadet: Appointment; numbers, territorial distribution; 9344, Selection of persons from Canada and American Republics; 9345, Selection of Filipinos; Chapter 1, Organization, 102, General policy; and 104, units: Location; organization; command; Chapter 3, Personnel, 307, Federal recognition of officers: Examination, certification of eligibility; Chapter 7, Services, supplies, etc., 708, Caretakers and clerks; Chapter 3, Basic Pay, 308, Special pay: Reenlistment bonus; 313, Special pay: Medical officers who execute active duty agreements; Chapter 7, Allowances, 407, Travel and transportation allowances: Dislocation allowance; Chapter 10; Air Force Manual 30-3, Vol I–V, Mechanized Personnel Procedures, Air Force Manual 30-130, Base Level Military Personnel System, and Air Force Manual 300-4, Standard Data Elements and Codes.

PURPOSE(S):

The Air Force operates a centralized personnel management system in an environment that is widely dispersed geographically and encompasses a population that is diverse in terms of qualifications, experience, military status and needs. There are three major centers of Air Force personnel management: Washington, DC, where most major policy and long-range planning/programming decisions are made; the Air Force Manpower and Personnel Center at Randolph Air Force Base, TX, which performs most personnel operations-type functions for the active duty components of the force; and the Air Reserve Personnel Center at Denver Co., which performs certain operational functions for the Reserve components of the force. Offices at Major Command Headquarters, State Adjutant General, and Air Force Bases perform operational task pertaining to the population for which they are responsible. The structure of the Air Force and its personnel management system, the composition of the Force, and the Air Force's stated objective of treating its people as individuals, i.e., giving due consideration to their desires, needs and goals, demand a dynamic data system that is capable of supporting the varying needs of the personnel managers at each echelon and operating locations. It is to this purpose that the data in the Personnel Data System is collected, maintained, and used. A. *Routine uses within the Air Force—Internal to the Personnel Community: HQ USAF, Washington, DC:* Deputy Chief of Staff, Personnel and his immediate staff; Director of Personnel Plans; Director of Personal Programs; Assistant for General Officer Matters; Assistant for Colonel Assignments; Reserve Personnel Division; Air National Guard Personnel

Division; and The Surgeon General, the Chief of AF Chaplains and the Staff Judge Advocate, each of which perform certain Personnel functions within their area of responsibility. Data from the central data base at the AFMPC is furnished Washington area agencies by retrieval from the computer at Randolph via remote access devices and by provision of recurring products containing required management information, including computer tape files which are used as input to unique systems with which PDS interfaces. Although most of the data is used by policy makers to develop long-term plans and programs and tack progress toward established goals, some individual data is provided/retrieved to support actions taken on certain categories of persons managed by offices in the headquarters e.g., General Officers, Colonels, Air National Guard personnel, etc. *Air Force Manpower and Personnel center (AFMPC), Randolph Air Force Base, TX.* Personnel managers at AFMPC use the data in PDS to make decisions on individual actions to be taken in areas such as personnel procurement, education and training, classification, assignment, career development, evaluation, promotion, compensation, casualty and personal affairs, separation and retirement. *Air Reserve Personnel Center (ARPC), Denver, Colorado.* Personnel managers at ARPC perform many of the same functions for the Reserve components of the Air Force as the managers at AFMPC perform for the active duty force. As with the Washington area, ARPC obtains data from the central data base at AFMPC by retrieval through remote terminals and recurring output products containing information necessary to their management processes. *Major Command Headquarters.* Major command headquarters personnel operations are supported by the standard content of PDS records provided them by AFMPC. In addition, there is provided in the PDS record an "add-on area" which the commands are authorized to use for the storage of data which will assist them in fulfilling unique personnel management requirements generated by their mission, structure, geographical location, etc. The standard functions performed fall generally under the same classifications as those in AFMPC, e.g. assignment, classification, separation, etc. Non-standard usages include provisions of unique aircrew data, production of specially-tailored name listing, control of threatre oriented training, etc. Some commands use PDS data—both standard and add-on as input to unique command systems, which are separately described in the **Federal Register**. *Consolidated Base Personnel Offices (CBPO).* CBPOs, which represent the base-level aspect of PDS, are the prime point of system-to-people interface. Supplied with a standard data base and system, CBPOs provide personnel management support to commanders and supervisors on a daily basis. Acting on receipt of data from higher headquarters, primarily by means of transactions processed through PDS, they notify people of selection for reassignment, promotion, approval/disapproval of requests for separation and retirement, and similar personnel actions. When certain events occur on an individual at the local level, e.g., volunteer for overseas duty, reduction in grade, change in marital status, application for retirement, etc., the CBPO enters transactions into the vertical system to transmit the requisite information to other management levels and update the automated records resident at those levels. CBPOs too are allotted an "add-on" area in the computer record which they use to support local management unique requirements such as local training scheduling, unique locator listing, urinalysis testing scheduling, etc. B. *Routine uses within the Air Force—External to the Personnel Community 1. Headquarters USAF/AFMPC Interfaces:* Automated interfaces exist between the PDS cental site files and the following systems of other functions: a. The Flight Records Data System (FRDS) maintained by the Air Force Inspection and Safety Center (AFISC) at Norton Air Force Base, CA. (1) Certain personnel identification data on rated officers is transferred monthly to the FRDS. This data flow creates the basic identifying data in the FRDS, insurers compatibility with the PDS, and precludes duplicative data collection and input generation by the AFISC. (2) Update of the personnel data to the FRDS generates return flow of flying hour data which is used at AFMPC for rated resource distribution management. b. The Master Military Pay Account (MMPA), is the Joint Uniform Military Pay System (JUMPS) centralized pay file maintained by the Air Force Accounting and Finance Center (AFAFC) at Denver, CO. The PDS transfers certain pay related data as changes occur to update the MMPA, e.g., promotions, accessions, separations/retirements, name, SSN, grade. These data provide criteria for the AFAFC to determine specific pay entitlements. c. The AFAFC maintains a separate pay system for Air National Guard and Air Force Reserve personnel called the Air Reserve Pay and Allowances System (ARPAS). (1) PDS outputs certain pay related data to ARPAS as changes occur, e.g., retirements/ separations, promotions, name, SSN, grade. These data form the criteria for the AFAFC to determine specific Reserve pay entitlements. (2) ARPAS outputs data which affect accumulated point credits for Air National Guard/ Reserve participation to AFMPC for update of the Point Credit Accounting and Reporting System (PCARS), a component of PDS. PCARS also receives monthly input from Hq Air University which updates point credits as a result of completing an Extension Courses Institute correspondence program. d. AFAFC provides data on Variable Incentive Pay (VIP) for Medical Officers which is used to update a special control file within PDS and produce necessary reports for management of the VIP program. e. Air Training Command operates a system called PACE (Processing and Classification of Enlistees) at Lackland Air Force Base, TX. From that system data is fed to AFMPC to initially establish the PDS record on an Air Force enlistee. f. On a monthly basis, copies of the PDS master Personnel File are provided to the Human Resources Laboratory at Brooks Air Force Base, TX, where they are used as a statistical data base for research purposes. g. On a quarterly basis, AFMPC provides the USAF School of Aerospace Medicine with data concerning name, SSN and changes in base and command of assignment of flying personnel. The data reflects significant medical problems in the flying population. h. A complete printout of PDS data pertaining to an individual is included in his Master Personnel Record when it is forwarded to National Personnel Records Center. i. PDS data is provided to the Contingency Planning Support Capability (CPSC) at six major command headquarters: Tactical Air Command, Strategic Air Command, Military Airlift Command, Air Force Communications Command, United States Air Forces, Europe, and Pacific Air Forces. A record identifiable by individual's name and SSN provides contingency and/or mannning assistance temporary duty (TDY) being performed by the individual. Record is destroyed upon completion of the TDY. Statistical records (gross statistics by skill and unit) are also generated for CPSC from PDS providing force availability estimates. CPSC is described separately in the **Federal Register**. 2. *Base Level (CBPO) Interfaces:* Certain interfaces have been established at base level to pass data

from one functional system to another. The particular mode of interface depends on the needs of the receiving function and the capabilities of the system to produce the necessary data: a. The Flight Management Data System (FMDS) receives an automated flow of selected personnel data on flying personnel as changes occur. This data consists primarily of assignment data and service dates which the base flight manager uses to determine appropriate category of aviation duty which is reflected by designation of an Aviation Service Code. The FMDS outputs aviation service data as changes occur to the BLMPS. These data subsequently flow to the PDS central site files at AFMPC so it is available for resource management decisions. b. The Medical Administration Management System (MAMS), currently being developed and tested, will receive flow of selected assignment data as changes occur for personnel assigned to medical activities. MAMS will use these data to align assigned personnel with various cost accounting work centers within the medical activity and thus be able to track manpower expenditure by sub-activities. c. The Automated Vehicle Operator Record (AVOR) is being developed to support motor vehicle operator management. Approximately 115 characters of vehicle operator data will be incorporated into the BLMPS data base during FY76 for both military and civilian personnel authorized to operate government motor vehicles and selected personnel data items (basic identification data) will be authorized for access by the vehicle operator managers. d. Monthly, a magnetic tape is extracted from BLMPS containing selected assignment data on all assigned personnel. This tape is transferred to the basic Accounting and Finance Office for input into the Accounting Operations System. This system uses these data to derive aggregate base manpower cost data. e. A procedure is designed into BLMPS to output selected background data in a pre-defined printed format for personnel being administrated military justice. This output is initiated upon notification by the base legal office. The data is forwarded to the major command where it is input into the Automated Military Justice Analysis and Management System (AMJAMS). f. The BLMPS output (on a event-oriented basis) pay-affecting transactions such as certain promotions, accessions, and assignments/reassignments, to AFAFC, where the data is entered into the JUMPS. C. *Routine uses external to the Air Force, to the Office of the Secretary of Defense (OSD).* 1. Individual information is provided to offices in OSD on a recurring basis to support top-level management requirements within the Department of Defense. Examples are the DOD Recruiter File to the Assistant Secretary for Manpower and Reserve Affairs, (M&RA), a magnetic tape extract of military personnel records (RCS: DDM(SA) 1221) to M&RA, input to the Reserve Component Common Personnel Data System to M&RA, and the Post Career Data File to M&RA. 2. *To other Defense Agencies.* PDS supports other components of DOD by provision of individual data in support of programs operated by those agencies. Examples are the Selected Officer List to the Defense Intelligence Agency for use in monitoring a classified training program and the Defense System Management School (DSMS) Track Record System to DSMS for use in evaluating the performance of graduates of that institution. And extract file on Air National Guard Technicians is provided the National Guard Computer Center. 3. *Other Government-Quasi-Government Agencies.* Information used in analyzing officer/airman retention is provided RAND Corporation. Data on prior service personnel with military service obligations is forwarded to the National Security Agency. Lists of officers selected for promotion and/or appointment in the Regular Air Force are sent to the Office of the President and/or the Congress of the United States for review and confirmation. Certain other personnel information is provided these and other government agencies upon request when such data is required in the performance of official duties. Selected personnel data is provided foregin governments, US governmental agencis, and other Uniformed Services on USAF personnel assigned or attached to them for duty. Examples: The government of Canada, Federal Aviation Administration, US Army, Navy, etc.) 4. *Litigation.* 5. *Miscellaneous.* Lists of individuals selected for promotion or appointment, who are being reassigned, who die, or who are retiring are provided to unofficial publications such as the Air Force Times, along with other information of interest to the general Air Force public. Information from PDS support a world-wide locator system which responds to queries as to the location of individuals in the Air Force. Locator information pertinent to personnel on active duty may be furnished to a recognized welfare agency such as the American Red Cross or the Air Force Aid Society. For civilian personnel—to provide automated system support to Air Force officials at all levels from that part of the Office of Personnel Management required personnel management and records keeping system that pertains to evaluation, authorization and position control, position management, staffing skills inventory, career management, training, retirement, employee services, rights and bnefits, merit promotion, demotions, reductions in force, complaints resolution, labor management relations, and the suspensions and processing of personnel actions; to provide for transmission of such records between employing activities within the Department of Defense—to provide individual record and reports to OPM; to provide information required by OPM for the transfer between federal activities; to provide reports of military reserve status to other armed services for contingency planning—to obtain statistical data on the work force to fulfill internal and external report requirements and to provide Air Force offices with information needed to plan for and evaluate manpower, budget and civilian personnel programs—to provide minority group designator codes to the Office of Personnel Management's automated data file—to provide the Office of the Assistant Secretary of Defense Manpower and Reserve Affairs with data to access the effectiveness of the program for employment of women in executive level positions—to obtain listings of employees by function or area for locator and inventory purposes by Air Force offices—to assess the effect or probable impact of personnel program changes by simulation and modeling exercises—to obtain employee duty locations and other employee data for personnel program management purposes—to obtain employee duty locations and other information releasable under OPM rules and Freedom of Information Act to respond to request from Air Force offices, other Federal agencies and the public—to provide individual records to other components of the Department of Defense in the concuct of their official personnel management program responsibilities—to provide records to OPM for file reconciliation and maintenance purposes—and to provide information to employee unions as required by negotiated contracts.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

Records from this system of records may be disclosed for any of the blanket routine uses published by the Air Force.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in visible file binders/cabinets, card files, on computer magnetic tapes, disks or computer paper printouts or microfiche.

RETRIEVABILITY:

Filed by name, or Social Security Number (SSN). The primary individual record identifier in PDS is SSN. Some files are sequenced and retrieved from by other identifiers; for instance, the assignment action record is identified by an assignment action number. Additionally, at each echelon there exists computer programs to permit extraction of data from the system by constructing an inquiry containing parameters against which to match and select records. As an example, an inquiry can be written to select all Captains who are F–15 pilots, married, stationed at Randolph AFB, who possess a master's degree in Business Administration; then display name, SSN, number of dependents and duty location. There is the added capability of selecting an individual's record or certain pre-formatted information by SSN on an immediate basis using a teletype or cathode ray tube display device. High-speed line printers located in the Washington, DC, area, at Major Comm and Headquarters, and at ARPC permit the transfer of volume products to and for the use of Personnel managers at those locations.

SAFEGUARDS:

Records are accessed by custodian of the record system and by person(s) responsible for servicing the record system in the performance of their official duties where authorized, and properly screened and cleared for need-to-known, and by commanders of medical centers and hospitals. Records are stored in security file containers/cabinets, safes, vaults and locked cabinets or rooms. Records are protected by guards. Records are controlled by personnel screening visitor registers and computer system software.

RETENTION AND DISPOSAL:

Retained in office files until superseded, obsolete, no longer needed for reference, or on inactivation, then destroyed by tearing into pieces, shredding, pulping, macerating, or burning. Preceding retention statement applies to Analog output products of the Personnel Data System. Data stored digitally within system is retained only for the period required to satisfy recurring processing requirements and/or historical requirements. Files with a retention period of 364 days of less are automatically released at the end of their specified retention period. "Permanent history" files are retained for 10 years. Files 365 or more days old are defined as "historical files" and are not automatically released. Retention periods for categories of PDS files are as follows: If cycle in which a program or series of programs creating output is daily, and the created magnetic tape file will be use for processing of next daily, then the retention will be not greater than 10 days. If cycle in which a program or series of programs creating output is daily, and the created magnetic tape file will be use for processing of next daily, which is also used for processing of weekly runs, then the retention will be not greater than 20 days. If cycle in which a program or series of programs creating output is daily, and the created magnetic tape file will be used for processing of next weekly, then the retention will not be greater than 20 days. If cycle in which a program or series of programs creating output is daily, and the created magnetic tape file will be used for processing of next weekly, which is also used for processing of monthly runs, then the retention will be not greater than 30 days. If cycle in which a program or series of programs creating output is weekly, and the created magnetic tape file will be used for processing of next weekly, then the retention will be not greater than 20 days. If cycle in which a program or series or programs creating output is weekly, and the created magnetic tape file will be used for processing of next weekly, which is also used for processing of monthly runs, then the retention will be not greater than 30 days. If cycle in which a program or series of programs creating output is monthly, and the created magnetic tape file will be used for processing of next monthly, then the retention will be not greater than 30 days. If cycle in which a program or series of programs creating output is monthly, and the created magnetic tape file will be used for processing of next monthly, which is also used for processing of quarterly runs, then the retention will be not greater than 90 days. If cycle in which a program or series of programs creating output is monthly, and the created magnetic tape file will be used for processing of next monthly, which is also used for processing of Semi-Annual run, then the retention will be not greater than 190 days. If cycle in which a program or series of programs creating output is monthly, which is also used for processing of annual runs, then the retention will be not greater than 365 days. If cycle in which a program or series of programs creating output is monthly, and the created magnetic tape file will be used for processing of next monthly, which is also used for processing of permanent history, then the retention will be not greater than 999 days. If cycle in which a program of series of programs creating output is quarterly, and the created magnetic tape file will be used for processing of next quarterly, then the retention will be not greater than 90 days. If cycle in which a program or series of programs creating output is quarterly, and the created magnetic tape file will be used for processing of next quarterly, which is also used for processing of semi-annual run, then the retention will be not greater than 190 days. If cycle in which a program or series of programs creating output is quarterly, and the created magnetic tape file will be used for processing of next quarterly, which is also used for processing of annual runs, then the retention will be not greater than 365 days. If cycle in which a program or series of programs creating output is quarterly, and the created magnetic tape file will be used for processing of next quarterly, which is also used for processing of permanent history, then the retention will be not greater than 999 days. If cycle in which a program or series of programs creating output is semi-annual, and the created magnetic tape file will be used for processing of next semi-annual, then the retention will be not greater than 190 days. If cycle in which a program or series of programs creating output is semi-annual, and the created magnetic tape file will be used for processing of next semi-annual, which is also used for processing of annual runs, then the retention will be not greater than 365 days. If created magnetic tape file will be used for processing of permanent history, then the retention will be not greater than 999 days. If cycle in which a program or series of programs creating output is annual, and the created magnetic tape file will be used for processing of next annual, then the retention will be not greater than 365 days. If cycle is which a program or series of programs creating output is annual, and the created magnetic tape file will be used for processing of next annual, which is also used for processing of permanent history, then the retention will be not greater than 999 days. If the program or series of programs creating output is a one time run, and the file will be used for processing as required, then the retention will be lowest possible

retention commensurate to job completion. If the program or series of programs creating output is compile card image or SOLT tapes, and the created magnetic tape file will be used for processing as required run, then the retention will be not greater than 90 days maximum. If cycle in which a program or series of programs creating output is as required runs, and the created magnetic tape file will be used for processing as required, the retention will be lowest possible retention commensurate to job completion. If the program or series of programs creating output is test files, and the created magnetic tape file will be used for processing as required, then the retention will be not greater than 30 days. If the program or series of programs creating output is print/punch backup and the created magnetic tape file will be used for processing as required, then the retention will be not greater than 10 days. In addition, for civilian personnel at base level (CCPO), master personnel files for prospective employees are transfered to the active file upon appointment of the employee or in the event the employee is not appointed and will no longer be considered a candidate for appointment, are destroyed by degaussing—master personnel files for active employees are transferred to the separated employee history file where they are retained for three years subsequent to separation and then destroyed by degaussing. The notification of personnel action—Standard Form 50—is disposed of as directed by OPM—work files and records such as the employee career brief, position survey work sheet, retention register work sheet, alphabetic and Social Security Number locator files, and personnel and position control register are destroyed after use by tearing into pieces, shredding, pulping, macerating, or burning-work sheets pertaining to qualification and retention registers are disposed of as directed by OPM—transitory files such as pending files, and recovery files are destroyed after use by degaussing—files and records retrieved through general retrieval systems are destroyed after use by tearing into pieces, shredding, pulping, macerating, or burning. Those records at AF Manpower and Personnel Center for the end of each fiscal year quarter are retained for five years before destroying by deletion—the separated employee file retains employee information at time of separation for five years after which the employee's record is destroyed by degaussing.

SYSTEM MANAGER(S) AND ADDRESS:

Deputy Chief of Staff/Manpower and Personnel, Headquarters United States Air Force. Subordinate System Managers are: A. Director of Personnel Data Systems, Assistant Deputy Chief of Staff for Personnel for Military Personnel, Air Force Manpower and Personnel Center (AFMPC), Randolph Air Force Base, TX, 78150. He is responsible for overall PDS design, maintenance and operation, and is designated the Automated Data Processing System Manager for all Air Force personnel data system. B. The Director of Personnel Data Systems at each Major Command headquarters for systems operated at that level. C. The Chief, CBPO, at Air Force installations for systems operated at the level. D. The Civilian Personnel officer at Air Force installations for civilian systems operated at that level.

NOTIFICATION PROCEDURE:

Requests from individuals for notification as to whether the system contains a record on them should be addressed to the System Manager of the operating level with which they are concerned. Persons submitting such a request, either personally or in writing, must provide SSN, name, and military status (active, ANG/USAFR, retired, etc. ANG members not on extended active duty may submit such requests to the appropriate State Adjutant General or the Chief of the servicing ANG CBPO. USAFR personnel not on extended active duty may submit such requests to ARPC, Denver, CO, 80280 or, if unit assigned, to the Chief of the servicing CBPO or Consolidated Reserve Personnel Office. Personal visits to obtain notification may be made to the Military Records Review Room, Air Force Manpower and Personnel Center, Randolph Air Force Base, TX 78150, the Military Records Review Room, Air Reserve Personnel Center, Denver, CO 80280; The Office of the Director, National Personnel Records Center (NPRC), 111 Winnebago St., St. Louis, MO, 63118; the office of the Director of Personnel Data Systems at the appropriate major command headquarters; or the office of the Chief of his servicing CBPO. Identification will be based on presentation of DD Form 2AF, Military Identification Card. Air Force civilian employees must provide SSN, full name, previous names if any, last date and location of Air Force civilian employment if not currently employed by the Air Force—current employees should submit such requests to their CCPO—former employees of the Air Force should submit such requests to the CCPO for the last Air Force installation at which they were employed. Authorizations for a person other than the data subject to have access to an individual's records must be based on a notarized statement signed by the data subject.

RECORD ACCESS PROCEDURE:

Assistance in gaining access to his records will be provided the individual by the appropriate subordinate System Manager at AFMPC, ARPC, NRPC, major command or CBPO/CRPO/CCPO.

CONTESTING RECORD PROCEDURES:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the System Manager.

RECORD SOURCE CATEGORIES:

Information obtained from educational institutions, medical institutions, automated system interfaces, police and investigating officers, the bureau of motor vehicles, a state or local government and source documents such as reports.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

F035 AF MP C

SYSTEM NAME:

035 AF MP C Military Personnel Records System.

SYSTEM LOCATION:

Headquarters United States Air Force, Washington DC 20330. Air Force Manpower and Personnel Center, Randolph Air Force Base, TX 78150. Air Reserve Personnel Center, Denver, CO 80280. National Personnel Records Center, Military Personnel Records, 9700 Page Boulevard, St. Louis, MO 63132. Headquarters of the major commands and separate operating agencies. At consolidated base personnel offices and other installation units. At State Adjutant General Office of each respective State, District of Columbia or Commonwealth of Puerto Rico. At Air Force Reserve and Air National Guard units. Official mailing addresses are in the Department of Defense Directory in the Appendix to the Air Force's Systems Notices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Air Force active duty military peronnel.

CATEGORIES OF RECORDS IN THE SYSTEM:

Officer Correspondence and Miscellaneous Document Group (C&M) at Air Force Military Personnel Center (AFMPC); Headquarters United States Air Force (HQ USAF) Selection Record Group (SR) at HQ USAF Assistant for General Officer Matters; Retired Air Force general officers. Master Personnel Record Group (MPeRGp) at AFMPC: active duty colonels at HQ USAF, Assistant for Senior Officer Management, C&M at AFMPC Air Force active duty officer personnel. MPeRGp at AFMPC Officer Command Selection Record Group (OCSR) at the respective major command or separate operating agency, Field Record Group (FRGp) at the respective Air Force base of assignment/servicing Consolidated Base Personnel Office (CBPO); Air Force active duty enlisted personnel. MPeRGp at AFMPC, FRGp at respective servicing CBPO, Senior Noncommissioned Officer (NCO) Selection Folder at the respective servicing CBPO; personnel in Temporary Disability Retired List (TDRL) status, Missing in Action (MIA), Prisoner of War (POW), Dropped From Rolls (DFR), MPeRGp at AFMPC; Reserve officers MPeRGp at Air Reserve Personnel Center (ARPC), OCSR at the respective Air Force (AF) major command (MAJCOM) when applicable, FRGp at the respective unit of assignment or servicing CBPO or Consolidated Reserve Personnel Office (CRPO); Reserve airmen MPeRGp at ARPC, FRGp at the respective unit of assignment or servicing CBPO/CRPO; Air National Guard (ANGUS) officers MPeRGp at ARPC, OCSR at the respective State Adjutant General Office, FRGp at the respective unit of assignment, ANGUS airmen MPerGp at the respective State Adjutant General Office FRGp at the respective unit of assignment; Retired Air Force military personnel; Discharged personnel MPerGp at National Personnel Records Center (NPRC); Air Force Academy cadets MPerGp at unit of assignment CBPO. System contains substantiating documentation such as forms, certificates, administrative orders and correspondence pertaining to appointment as a commissioned officer, warrant officer, Regular AF, AF Reserve or ANGUS; enlistment/reenlistment/extension or enlistment; assignment Permanent Change of Station (PCS)/Temporary Duty (TDY); promotion/demotion; identification card requests; casualty; duty status changes—Absent Without Leave (AWOL)/MIA/POW-Missing-Deserter; military test administration/results; service dates; separation; discharge; retirement; security; training, Precision Measurement Equipment (PME), On-The-Job Training (OJT), Technical, General Military Training (GMT), commissioning, driver; academic education; performance/effectiveness reports; records corrections—formal/informal; medical or dental treatment/examination; flying/rated status administration; extended active duty; emergency data; line of duty determinations; human/personnel reliability; career counseling; records transmittal; AF reserve administration; Air National Guard administration; board proceedings; personnel history statements; Veterans Administration compensations; disciplinary actions; record extracts; locator information; personal clothing/equipment items; passport; classification; grade data; Career Reserve application/cancellations; traffic safety; Unit Military Training; travel voucher for TDY to Republic of Vietnam; dependent data; professional achievements; Geneva Convention cards; drug abuse; Federal insurance; travel and duty restrictions; Conscientious Objector status; decorations and awards; badges; Favorable Communications (colonels only); Inter-Service transfers; pay and allowances; combat duty; leave; photographs; Personnel Data System products.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 8012, Secretary of the Air Force: Power and duties; delegation by; implemented by Air Force Regulation 35-55, Military Personnel Records System.

PURPOSE(S):

Military Personnel Records are used at all levels of Air Force personnel management within the agency for actions/processes related to procurement, education and training, classification, assignment, career development, evalution, promotion, compensation, sustentation, separation and retirement.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Records from this system of records may be disclosed for any of the blanket routine uses published by the Air Force. Compensation claims submitted to Veterans Administration Regional Offices; dependents and survivors requesting issuance or determination of eligibility for identification card privileges; Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) eligibility and benefits requests—copies are provided to CHAMPUS, Denver, CO; Immigration and Naturalization—copies are provided to respective local immigration Office; Unemployment Compensation Requests—verification of service related information provided to State Unemployment Compensation (UCX) Office; Vietnam State Bonus—information provided to respective local State offices; Civil Service requests for verification of military service for benefits; leave or Reduction in Force (RIF) purposes—Worldwide locator inquiries; Dual compensation cases involving former officers—provided to establish Civil Service employee tenure and leave accrual rate; Social Security Retirement Credit Verification—verification of service data provided to substantiate applicant's credit for Social Security compensation; Soldiers and Sailors Civil Relief Act requests—verification of service—Information as to current military address and assignments may be provided to military banking facilities who provide banking services overseas and who are reimbursed by the Government for certain checking and loan losses. For personnel separated, discharged or retired from the Armed Forces, information as to last known residential or home address may be provided to the military banking facility upon certification by a banking facility officer that the facility has a returned or dishonored check negotiated by the individual or the individual has defaulted on a loan and that if restitution is not made by the individual the United States Government will be liable for the losses the facility may incur. Information is provided to the US Department of Agriculture for investigative and audit procedures. Separation information provided to the Veteran's Administration and Selective Service Agencies. American National Red Cross—information to local Red Cross offices for emergency assistance to military members, dependents, relatives or other persons if conditions are compelling. Department of Labor, Bureau of Employees' compensation—medical information for claims of civilian employees formerly in military services; Employment and Training Administration—verification of service-related information for unemployment compensation claims; Labor Management Services Administration for investigations of possible violations of labor laws and pre-employment investigations; National Research Council—for medical research purposes; U.S. Soldiers' and Airman's Home—service information to determine

eligibility; used by Veterans Administration for research.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in file folders, placed in metal file containers or on open shelves. Microfiche placed in rotary power files; computer disk resident data file consists of Social Security Number (SSN) and disk location of the associated image record which includes document data describing document type, date, location, and number of pages in each document.

RETRIEVABILITY:

Information in the system is retrieved by last name, first name, middle initial and Social Security Number (SSN). Records stored at National Personnel Records Center are retrieved by registry number, last name, first name, middle initial and SSN.

SAFEGUARDS:

The prescribing directive for the Military Personnel Records System requires those records to be stored (after duty hours) in a locked building, room or filing cabinets. Access is specifically limited to those personnel designated by the Consolidated Base Personnel Office (CBPO) Chief and those provisions for access and release of information contained in Air Force Regulation 12–35 and 31–4.

RETENTION AND DISPOSAL:

Users who are granted access to the microfiche files are screened by computer software. Those documents designated as Temporary in the prescribing directive remain in the records until their obsolescence (superseded, member terminates status, or retires) when they are removed and provided to the individual data subject. Those documents designated as Permanent remain in the military personnel records system permanently and are retired with the master personnel record group.

SYSTEM MANAGER(S) AND ADDRESS:

Assistant Deputy Chief of Staff Personnel for Military Personnel, Randolph Air Force Base, TX 78150.

NOTIFICATION PROCEDURE: The individual data subject may be notified that a record exists on him by submitting a request to or appearing in person at the responsible officials office or the respective repository for records for personnel in particular category during normal duty house any day except Saturday, Sunday or national and local holidays. The Saturday and Sunday exception does not apply to Reserve and National Guard units during periods of training. Response to written requests will be provided not later than ten days following receipt of request. The System Manager has the right to waive these requirements for personnel located in areas designated as Hostile Fire Pay areas.

RECORD ACCESS PROCEDURES:

The same written notification or personal visit procedures which apply to notification also apply to access.

CONTESTING RECORDS PROCEDURES:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the System Manager.

RECORD SOURCE CATEGORIES:

Sources of information contained in the system include data subject's applications, requests, personal history statements, supervisors' evaluations, correspondence generated within the agency in the conduct of official business, medical treatment records, educational institutions, civil authorities, other service departments, and interface with the Personnel Data System.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

F045 MPC A

SYSTEM NAME:

045 MPC A Educational Delay Board Findings.

SYSTEM LOCATION:

Air Force Manpower and Personnel Center, Randolph Air Force Base, TX 78150.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Air Force Reserve Officers' Training Corps (AFROTC) Cadets and/or AFROTC graduates (officers)

CATEGORIES OF RECORDS IN THE SYSTEM:

Applications for delay in entering extended active duty status to pursue advanced degrees.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 2106, Advanced standing; interruption of training; delay in starting obligated service; release from program, and 50 Appendix 456, Deferments and exemptions from training and service, as implemented by Air Force Regulation 33–3, Enlistment in the United States Air Force.

PURPOSE(S):

Used to inform applicants of results of Board action on their request for delay.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

Records from this system of records may be disclosed for any of the blanket routine uses published by the Air Force.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained invisible file binders/ cabinets.

RETRIEVABILITY:

Filed by name.

SAFEGUARDS:

Records are accessed by custodian of the record system and by persons responsible for servicing the record system in performance of their official duties who are properly screened and cleared for need-to-know. Records are stored in locked cabinets or rooms.

RETENTION AND DISPOSAL:

Disapproved applications are destroyed after 6 months; approved applications are destroyed on completion of delay.

SYSTEM MANAGER(S) AND ADDRESS:

Assistant Deputy Chief of Staff/ Manpower and Personnel for Military Personnel, Randolph Air Force Base, TX 78150.

NOTIFICATION PROCEDURE:

Requests from individuals should be addressed to the System Manager.

RECORD ACCESS PROCEDURES:

Individual can obtain assistance in gaining access from the System Manager.

CONTESTING RECORDS PROCEDURES:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the System Manager.

RECORD SOURCE CATEGORIES:

Member's application.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

F125 AF SP K

SYSTEM NAME:

125 AF SP K Vehicle Administration Records.

SYSTEM LOCATION:

Chief of Security Police at the installation where an individual registers or frequently operates a vehicle. Information copies of some portions of this system may be kept an an individual's assigned unit. Official mailing addresses are in the Department of Defense Directory in the appendix to the Air Forces' system notice.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Persons who frequently drive or register vehicles on an Air Force installation.

CATEGORIES OF RECORDS IN THE SYSTEM:

Vehicle registration records, driver records, letters of suspension or revocation as applicable, and forms or letters which are necessary in the vehicle administration program for driver improvement actions.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 8012, Secretary of the Air Force: Powers and duties; delegation by.

PURPOSE(S):

Used to record an individual's statement of understanding on financial responsibilities with regard to operation of a vehnicle on an Air Force installation. Driver records are maintained to record information about motor vehicle accidents and moving traffic violations that are used to provide for traffic point assessment, suspension, or revocation, or other driver improvement actions affecting driving privileges on Air Force installations.

Note. In the State of Alaska, the system is also used to ensure that individuals comply with state law on the Alaskan Emission Inspection Program.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

Records from this system of records may be disclosed for any of the blanket routine uses published by the Air Force. Records from this system of records may be disclosed to state or local law enforcement agencies or to motor vehicle bureaus.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in file folders, card files and and on computer and computer output products.

RETRIEVABILITY:

Filed by name.

SAFEGUARDS:

Records are accessed by persons responsible for servicing the record system in performance of their offical duties who are properly screened and cleared for need-to-know. Records are stored in security file containers/cabinets and maintained on computer and computer output products. Manual records are stored in locked cabinets or rooms. Automated records are controlled by computer system software.

RETENTION AND DISPOSAL:

Private vehicle registration documentation is destroyed after departure of the registrant to a new duty station, upon termination of an individual vehicle registration, or at the end of the particular registration period. Driver records on employees are transferred to gaining installations when an individual is reassigned or transferred. These are destroyed on permanent separation from active service, termination of employment, or upon deletion of all entries. Destruction of these forms is done by tearing into pieces, shredding, pulping, macerating, or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Air Force Office of Security Police, Kirtland Air Force Base, NM 87117.

NOTIFICATION PROCEDURE:

Contact the installation Chief of Security Police for information. When requesting information in writing, individual should include full name, Social Security Number, military, status, home address, and the letter must be notarized. During a personal visit, individual will be required to produce military ID, if applicable, a valid drivers license, or other appropriate proof of identity.

RECORD ACCESS PROCEDURES:

Individual can obtain assistance in gaining access from the System Manager. Contact the Chief of Security Police at the appropriate installation. Mailing addresses are in the Deprtment of Defense directory in the appendix to the Air Force's systems notices.

CONTESTING RECORDS PROCEDURES:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the System Manager.

RECORD SOURCE CATEGORIES:

Information obtained from police and investigating officers and from the bureau of motor vehicles.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

F160 DODMERB A

SYSTEM NAME:

160 DODMERB A Department of Defense Medical Examination Review Board Medical Examination Files.

SYSTEM LOCATION:

Department of Defense Medical Examination Review Board (DODMERB) US Air Force Academy, CO 80840-6518 and Camp Hill, PA.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All applicants to the five service academies, the Four year Reserve Officer Training Corps (ROTC) Scholarship Program for, Uniform Services University of Health Sciences (USUHS), Army, Navy, Air Force College Scholarship Program (CSP).

CATEGORIES OF RECORDS IN THE SYSTEM:

Report of the Medical Examination, Report of Medical History, Report of Dental Examination, to include dental x-rays and any associated civilian forms or medical tests that have been accomplished; may also contain personal correspondence between the DODMERB and the applicant, parents/guardian concerning the applicant's medical history or qualification status.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 U.S.C. 133, Executive department.

PURPOSE(S):

The medical examination in computer form is used to determine medical accceptability for one or more of the five military service academies or the ROTC, USUHS, CSP for the Air Force, Army and Navy ROTC. The computer also produces products to advise each program manager of initial status and all update actions on the applicant.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

Medical consultations concerning may be necessary with parents/legal guardians may be necessary to clarify/explain applicant's medical status. Examinations may be released to civilian contract agents of the government and private physicians associated with medically certifying applicants for military service. Records from this system of records may be disclosed for any of the blanket routine uses published by the Air Force.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Stored in computer and electronic digital imaging storage system.

RETRIEVABILITY:

Filed by Name and Social Security Number (SSN).

SAFEGUARDS:

Records are accessed by person(s) responsible for servicing the record system in performance of their official duties. Computer is in a controlled area with restricted access and data is protected by computer system software.

RETENTION AND DISPOSAL:

A paper copy of medical and dental records will be generated by computer on all appointed candidates and will be forwarded to each program the applicant is medically certified for. Computer and optical disk files for all applicants will be retained for five years.

SYSTEM MANAGER(S) AND ADDRESS:

Department of Defense Medical Examination Review Board, US Air Force Academy, CO 80840-2518.

NOTIFICATION PROCEDURE:

Requests from individuals should be addressed to the System Manager.

RECORD ACCESS PROCEDURE:

Individual can obtain assistance in gaining access from the System Manager.

CONTESTING RECORD PROCEDURES:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the System Manager and are published in Air Force Regulations 12-35.

RECORD SOURCE CATEGORIES:

Information obtained from medical institutions.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

F215 AFA A

SYSTEM NAME:

215 AFA A Library Authorized Patron File.

SYSTEM LOCATION:

USAF Academy Library, United States Air Force Academy, Colorado Springs CO 80840-5721.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

All Academy military and civilian personnel and cadets, specially authorized nonbase library patrons.

CATEGORIES OF RECORDS IN THE SYSTEM:

Social security number, library card number, name, base or home address, privilege code, statistical code, base organizational affiliation code, telephone number(s), expiration date, number of cards issued, service code (if appropriate), graduate school code (if appropriate) for special borrowers, and dfsiv training code (if appropriate). Expiration data for special borrower privileges.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 United States Code Chapter 903, United States Air Force Academy.

PURPOSE(S):

Used by Library and Visual Information personnel to fully identify patrons to whom library material is charged in operation of the Library's automated circulation control system, to follow up on delinquent borrowers by generation of overdue notices, and to clear departing patrons and delete their names from the file, and to issue library cards.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSE OF SUCH USES:

Records from this system of records may be disclosed for any of the blanket routine uses published by the Air Force.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in computer and computer output products, and on paper application forms.

RETRIEVABILITY:

Social Security Number.

SAFEGUARDS:

Records are accessed by person(s) responsible for library circulation control operation in the performance of their office duties. Computer storage devices are protected by computer system software. Paper files are stored in locked cabinets in restricted areas.

RETENTION AND DISPOSAL:

Partron data is deleted from master files maintained on computer when outgoing clearance is accomplished. Paper forms are destroyed when no longer needed.

SYSTEM MANAGER(S) AND ADDRESS:

Director of Academy Libraries, USAF Academy, Colorado Springs CO 80840.

NOTIFICATION PROCEDURE:

Request from individuals should be addressed to the System Manager.

RECORD ACCESS PROCEDURE:

Individual can obtain assistance in gaining access from the System Manager.

CONTESTING RECORDS PROCEDURES:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the System Manager and is published in Air Force Regulation 12-35.

RECORD SOURCE CATEGORIES:

Individual.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

F900 TAC A

SYSTEM NAME:

900 TAC A Special Awards File.

SYSTEM LOCATION:

Headquarters Tactical Air Command, Langley Air Force Base, VA 23665.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Air Force active duty military personnel, civilian employees and retired Air Force officers who are or were formerly assigned to Tactical Air Command.

CATEGORIES OF RECORDS IN THE SYSTEM:

Alphabetical file containing limited award and biographical data on TAC personnel where awards have been approved and may be used for reference in future. File is informational in nature and action does not result therefrom.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

10 USC 8012, Secretary of the Air Force: Powers and duties; delegation by and 8074, Commands: Territorial

organization, and Air Force Regulation 900–48, Decorations, Service and Achievement Awards, Unit Awards; Special Badges, and Devices, TAC Sup 1, and Air Force Regulation 900–29, Special Trophies and Awards, TAC Sup 1.

PURPOSE(S):

Used by Command Awards Branch for reference.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

Records from this system of records may be disclosed for any of the blanket routine uses published by the Air Force.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

Maintained in file folders.

RETRIEVABILITY:

Filed by name.

SAFEGUARDS:

Records are accessed by authorized personnel who are properly screened and cleared for need-to-know. Records are stored in security file containers/cabinets.

RETENTION AND DISPOSAL:

Retained in office files until superseded, obsolete, no longer needed for reference, or on inactivation, then destroyed by tearing into pieces, shredding, pulping, macerating, or burning.

SYSTEM MANAGER(S) AND ADDRESS:

Deputy Chief of Staff, Personnel, Tactical Air Command, Langley Air Force Base, VA 23665.

NOTIFICATION PROCEDURE:

Requests from individuals should be addressed to the System Manager.

RECORD ACCESS PROCEDURE:

Individual can obtain assistance in gaining access from the System Manager.

CONTESTING RECORDS PROCEDURES:

The Air Force's rules for access to records and for contesting and appealing initial determinations by the individual concerned may be obtained from the System Manager.

RECORD SOURCE CATEGORIES:

Information obtained from previous employers and source documents such as reports.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

Agency Information Collection Activities Under OMB Review

ACTION: Public Information Collection Requirement Submitted to OMB for review.

SUMMARY: The Department of Defense has submitted to OMB to review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Each entry contains the following information: (1) Type of Submission; (2) Title of Information Collection and Form Number if applicable; (3) Abstract statement of the need for and the uses to be made of the information collected; (4) Type of Respondent; (5) An estimate of the number of responses; (6) An estimate of the total number of hours needed to provide the information; (7) To whom comments regarding the information collection are to be forwarded; (8) The point of contact from whom a copy of the information proposal may be obtained.

Extension

Application for Membership in Military Affiliate Radio System (MARS)

DD 630

The information is necessary to assess the applicant's qualifications to meet membership criteria outlined in Naval Telecommunications Procedures Manual. Information gathered is used by officials to certify eligibility for membership.

Individuals

Responses 1,000.
Burden hours 375.

ADDRESSES: Comments are to be forwarded to Mr. Edward Springer, Office of Management and Budget, Desk Officer, Room 3235, New Executive Office Building, Washington, DC 20503 and Mr. Daniel J. Vitiello, DOD Clearance Officer, WHS/DIOR, 1215 Jefferson-Davis Highway, Suite 1204, Arlington, VA 22202-4302, telephone (202) 746-0933.

FOR FURTHER INFORMATION CONTACT: A copy of the information collection proposal may be obtained from Mr. A.R. Delperdang, Naval Telecommunications Command Headquarters (MARS), 4401 Massachusetts Avenue, NW., Washington, DC 20390, telephone (301) 238-2236.

Patricia H. Means,

OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 3810-01-M

DEPARTMENT OF EDUCATION

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Information Resources Management Service invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATE: Interested persons are invited to submit comments on or before June 23, 1986.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place, NW., Room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B. Webster, Department of Education, 400 Maryland Avenue, SW., Room 4074, Switzer Building, Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Margaret B. Webster (202) 426-7304.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public

participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with an agency's ability to perform its statutory obligations.

The Director, Information Resources Management Service publishes this notice containing proposed information collection requests prior to the submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Agency form number (if any); (4) Frequency of the collection; (5) The affected public; (6) Reporting burden; and/or (7) Recordkeeping burden; and (8) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Margaret Webster at the address specified above.

Dated: May 20, 1986.

George P. Sotos,

Director, Information Resources Management Service.

Office of Elementary and Secondary Education

Type of Review: New.

Title: Chapter 1 of the Education Consolidation and Improvement Act—Final Regulations.

Agency Form Number: NA.

Frequency: Annually.

Affected Public: State or local governments.

Reporting Burden: Response: 5,000; Burden Hours: 20,000.

Recordkeeping Burden: Recordkeeping: 0; Burden Hours: 0.

Abstract: Chapter 1 of Education Consolidation and Improvement Act requires local educational agencies (LEAs) to consult with parents as they design and implement their Chapter 1 projects. To meet this requirement, LEAs must develop written policies to ensure parental participation.

[FR Doc. 86-11708 Filed 5-22-86; 8:45 am]

BILLING CODE 4000-01-M

Office of Special Education and Rehabilitative Services

Application Notice Establishing Closing Date for Transmittal of New Experimental and Innovative Training Project Applications for Fiscal Year 1986

AGENCY: Department of Education.

Programmatic and Fiscal Information

The purpose of this application notice is to inform potential applicants of fiscal and programmatic information and the closing date for transmittal of applications for new projects under the Experimental and Innovative Training Program administered by the Department of Education under the Office of Special Education and Rehabilitative Services. Awards are made under the program to support projects to: (1) Develop new types of rehabilitation personnel and demonstrate the effectiveness of these new types of personnel in providing rehabilitation services to severely disabled persons; and (2) develop new and improved methods of training rehabilitation personnel to achieve more effective delivery of rehabilitation services by State and other rehabilitation agencies. Eligible applicants are State vocational rehabilitation agencies and other public or nonprofit agencies or organizations, including institutions of higher education. The authority for this program is section 304 of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 774)

The total amount of funds available for rehabilitation training in fiscal year 1986 is $25,836,000. Of this amount, approximately $500,000 will be reserved for experimental and innovative training projects that address the proposed priority published in this issue of the Federal Register. It is estimated that 4 projects will be funded at an average cost of $125,000.

These estimates do not bind the Department to a specific number of grants or to the amount of any grant unless that amount is otherwise specified by statute or regulations.

All applications will be evaluated according to selection criteria which appear in program regulations in 34 CFR 387.30.

Instructions for Transmittal of Applications

Applications for new awards must be mailed or hand-delivered on or before July 8, 1986.

Applications sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: (CFDA No. 84.129Y), 400 Maryland Avenue, SW., Washington, DC 20202.

Each late applicant for a new award will be notified that its application will not be considered.

Applications that are hand-delivered must be taken to the U.S. Department of Education, Application Control Center, Room 3633, Regional Office Building ROB #3, 7th and D Streets, SW., Washington, DC.

The Application Control Center will accept hand-delivered applications between 8:00 a.m. and 4:30 p.m. (Washington, D.C. time) daily, except Saturdays, Sundays, and Federal holidays. An application that is hand-delivered will not be accepted after 4:30 on the closing date.

Application Forms: Application forms and program information packages are expected to be available by May 23, 1986. These may be obtained by writing to the Office of Developmental Programs, Rehabilitation Services Administration, U.S. Department of Education, 400 Maryland Avenue, SW., Room 3332, Mary E. Switzer Building, (2312), Washington, DC 20202. Telephone: (202) 732-1342.

Applicable Regulations: Regulations applicable to this program include the following:

(a) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 74, 75, 77 and 78); and

(b) Regulations governing the Experimental and Innovative Training Program (34 CFR Parts 385 and 387). A notice of proposed priority was published on May 21, 1986 at 51 FR 18651. If substantive changes are made to the proposed funding priority when published in final form, applicants will be given an opportunity to amend or resubmit their applications to address the revised funding priority.

BILLING CODE 4000-01-M

Application Establishing Closing Date for Transmittal of New Rehabilitation Long-Term Training Project Applications for Fiscal Year 1986

AGENCY: Department of Education.

ACTION: Application notice establishing closing date for transmittal of new rehabilitation long-term training project applications for fiscal year 1986.

BEST COPY AVAILABLE

Programmatic and Fiscal Information

The purpose of this application notice is to inform potential applicants of programmatic and fiscal information and the closing date for the transmittal of applications for new projects in the field of Rehabilitation Workshop and Facility Personnel under the Rehabilitation Long-Term Training Program. Awards are made under the program to support projects to train personnel for employment in public and private agencies involved in the rehabilitation of physically and mentally disabled individuals, especially those who are the most severely disabled. Eligible applicants are State vocational rehabilitation agencies and other public or nonprofit agencies or organizations, including institutions of higher education. The authority for this program is section 304 of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 774.)

The total amount of funds available for rehabilitation training in fiscal year 1986 is $25,838,000, including $6,669,000 for the funding of new rehabilitation long-term training projects. Of this amount, approximately $500,000 will be reserved for rehabilitation workshop and facility personnel projects that respond to the proposed priority published in this issue of the Federal Register. It is estimated that 5 projects will be funded at a average cost of $100,000.

These estimates do not bind the Department of Education to a specific number of grants or to the amount of any grant, unless that amount is otherwise specified by statute or regulations.

All applications will be evaluated according to selection criteria which appear in program regulations in 35 CFR 386.30.

Instructions for Transmittal of Applications

Applications for new awards must be mailed or hand-delivered on or before July 8, 1986.

Applications sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: (CFDA No. 84.129X), 400 Maryland Avenue, SW., Washington, DC 20202.

Each late applicant for a new award will be notified that its application will not be considered.

Applications that are hand-delivered must be taken to the U.S. Department of Education, Application Control Center, Room 3633, Regional Office Building #3, 7th and D Streets, SW., Washington, DC.

The Application Control Center will accept hand-delivered applications between 8:00 a.m. and 4:30 p.m. (Washington, DC) daily, except Saturdays Sundays, and Federal holidays. An application that is hand-delivered will not accepted after 4:30 p.m. on the closing date.

Application Forms: Applications forms and program information packages are expected to be available by May 23, 1986. These may be obtained by writing to the Office of Developmental Programs, Rehabilitation Services Administration, Room 3332, Mary E. Switzer Building (2312), Washington, DC 20202. Telephone: (202) 732-1343.

Applicable Regulations: Regulations applicable to this program include the following:

(a) Education Department General Administrative Regulations (EDGAR) (34 CFR Parts 74, 75, 77 and 78); and

(b) Regulations governing the Rehabilitation Long-Term Training Program (34 CFR Parts 385 and 386). A notice of proposed priorty was published on May 20, 1986 at 51 FR 18549. If substantive changes are made to the proposed funding priority when published in final form, applicants will be given an opportunity to amend or resubmit their applications to address the revised funding priority.

Further Information: Delores L. Watkins, Division of Resource Development, Rehabilitation Services Administration, U.S. Department of Education, 400 Maryland Avenue, SW. (Room 3324–M/S 2312, Mary E. Switzer Building), Washington, DC 20202. Telephone: (202) 732–1332.

BILLING CODE 4000-1-M

Application Establishing Closing Date for Transmittal of New Rehabilitation Long-Term Training Project Applications for Fiscal Year 1986

AGENCY: Department of Education.

ACTION: Application notice establishing closing date for transmittal of new rehabilitation long-term training project applications for fiscal year 1986.

Programmatic and Fiscal Information

The purpose of this application notice is to inform potential applicants of fiscal and programmatic information and the closing date for transmittal of applications for new projects in the field of Rehabilitation Counseling under the Rehabilitation Long-Term Training Program. Awards are made under this program to support projects to train personnel for employment in public and private agencies involved in the rehabilitation of physically and mentally disabled individuals, especially those who are the most severely disabled. Eligible applicants are State vocational rehabilitation agencies and other public or nonprofit agencies or organizations, including institutions of higher education. The authority for this program is Section 304 of the Rehabilitation Act of 1973, as amended. (29 U.S.C. 774.)

The total amount of funds available for rehabilitation training in fiscal year 1986 is $25,838,000, including $6,669,000 for the funding of new rehabilitation long-term training projects. Of this amount, approximately $2,700,000 will be reserved for and distributed among rehabilitation counseling projects that respond to proposed priorities published on April 25, 1986 at 51 FR 15665–15666. It is expected that funds to be made available in the field of rehabilitation counseling will be distributed among the 3 proposed priority areas published in the Federal Register as follows: *Priority 1*—$1,800,000 for rehabilitation counseling training that emphasizes linkages with business and industry; *Priority 2*—$500,000 for rehabilitation counseling personnel training with an emphasis on specialization in providing supported employment services; and *Priority 3*—$400,000 for rehabilitation counseling training at the doctoral level. An estimated 40 projects will be funded at an average cost of $65,000.

These estimates do not bind the Department of Education to a specific number of grants or to the amount of any grant, unless that amount is otherwise specified by statue or regulations.

All applications will be evaluated according to selection criteria which appear in program regulations in 34 CFR 386.30.

Instructions for Transmittal of Applications

Applications for new awards must be mailed or hand-delivered on or before July 8, 1986.

Applications sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: (CFDA No. 84.129B), 400 Maryland Avenue, SW., Washington, DC 20202.

In FR Doc. 86-11457 appearing on page 18549 in the issue of Tuesday, May 20, 1986, the DATE caption should read: "DATE: Comments must be received on or before June 19, 1986."

BILLING CODE 1505-01-M

DEPARTMENT OF ENERGY

National Petroleum Council, Coordinating Subcommittee on U.S. Oil and Gas Outlook; Meeting

Notice is hereby given that the Coordinating Subcommittee on U.S. Oil and Gas Outlook will meet in June 1986. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Coordinating Subcommittee on U.S. Oil and Gas Outlook will function as the coordinating and integrating function of the task group activities. It will also be responsible for development of recommendations as to actions which are indicated for avoiding or mitigating future crises with respect to oil and gas supply and demand.

The Coordinating Subcommittee on U.S. Oil and Gas Outlook will hold its second meeting on Tuesday, June 24, 1986, immediately following the adjournment of the Committee on U.S. Oil and Gas Outlook meeting, which will begin at 9:00 a.m., in the Conference Room of the National Petroleum Council, 1625 K Street, NW., Washington, DC.

The tentative agenda for the Coordinating Subcommittee on U.S. Oil and Gas Outlook meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.
2. Discuss study assignments.
3. Review task group assignments.
4. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Coordinating Subcommittee on U.S. Oil and Gas Outlook is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Coordinating Subcommittee on U.S. Oil and Gas Outlook will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Ms. Pat Dickinson, Office of Oil, Gas, Shale and Coal Liquids, Fossil Energy, 301/353-2430, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E-190, DOE Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on May 16, 1986.

Donald L. Bauer,

Acting Assistant Secretary for Fossil Energy.

[FR Doc. 86-11669 Filed 5-22-86; 8:45 am]

BILLING CODE 6450-01-M

National Petroleum Council, Coordinating Subcommittee on U.S. Petroleum Refining; Meeting

Notice is hereby given that the Coordinating Subcommittee on U.S. Petroleum Refining will meet in June 1986. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Coordinating Subcommittee on U.S. Petroleum Refining will be addressing the current activities of all task groups and providing guidance for future studies. Its analysis and findings will be basd on information and data to be gathered by the various task groups.

The Coordinating Subcommittee on U.S. Petroleum Refining will hold its twelfth meeting on Tuesday, June 10, 1986, starting at 9:00 a.m., in the Conference Room of the National Petroleum Council, 1625 K Street, NW., Washington, DC.

The tentative agenda for the Coordinating Subcommittee on U.S. Petroleum Refining meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.
2. Discuss study assignments.
3. Review task group assignments.
4. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Coordinating Subcommittee on U.S. Petroleum Refining is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public

who wishes to file a written statement with the Coordinating Subcommittee on U.S. Petroleum Refining will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Ms. Pat Dickinson, Office of Oil, Gas, Shale and Coal Liquids, Fossil Energy, 301/353–2430, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E–190, DOE Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on May 10, 1986.

Donald L. Beaver,

Acting Assistant Secretary for Fossil Energy.

BILLING CODE 6450–01–M

National Petroleum Council, Future Supply/Demand Factors Task Group; Meeting

Notice is hereby given that the Future Supply/Demand Factors Task Group will meet in June 1986. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Future Supply/Demand Factors Task Group's activities will be to identify the major factors that will affect the U.S.'s future supply and demand of oil and gas and to evaluate the influence such factors could have on the vulnerability of the U.S. to future energy crises.

The Future Supply/Demand Factors Task Group will hold its second meeting on Monday, June 23, 1986, starting at 9:00 a.m., in the Conference Room of the National Petroleum Council, 1625 K Street, NW., Washington, DC.

The tentative agenda for the Future Supply/Demand Factors Task Group meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.
2. Review progress of Task Group study assignments.
3. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Future Supply/Demand Factors Task Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly, conduct of business. Any member of the public who wishes to file a written statement with the Future Supply/Demand Factors Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Ms. Pat Dickerson, Office of Oil, Gas, Shale and Coal Liquids, Fossil Energy, 301/353–2430, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E–190, DOE Forrestal Building, 1000 Independence Avenue, SW., Washington, DC, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on May 16, 1986.

BILLING CODE 6450–01–M

Voluntary Agreement and Plan of Action to Implement the International Energy Program; Meetings

In accordance with section 252(c)(1)(A)(i) of the Energy Policy and Conservation Act (42 U.S.C. 6272(c)(1)(A)(i)), the following meeting notices are provided:

I. A meeting of the Industry Working Party (IWP) of the International Energy Agency (IEA) will be held on June 2, 1986, at the offices of the IEA, 2 rue Andre Pascal, Paris 16, France, beginning at 10:00 a.m. The agenda for the meeting is as follows:

1. Opening remarks.
2. New chairman.
3. Oil trading methods, their impact on the industry and on the market.
4. Monitoring, analysis and presentation of oil price trends.
5. How to present refinery utilization trends.
6. Future work program.

II. A meeting of the IWP will be held on June 2, 1986, at the offices of the IEA at the aforesaid address beginning at 2:00 p.m. and continuing on June 3. This meeting is being held in order to permit attendance by representatives of U.S. company members of the IWP at a meeting of the IEA Standing Group on the Oil Market (SOM) which is bing held in Paris on those dates. The agenda for the meeting is under the control of the SOM. It is expected that the following agenda will be followed:

1. Adoption of provisional agenda.
2. Approval of the Summary Record of the 51st Session.
3. Current oil market developments.

(a) —1985 Annual Oil Market Report.
—End-May Oil Market Report.
—Complementary oral report by the IEA Secretariat.

(b) —Short- and medium-term oil market outlook.
—Consultation with Petro-Canada Ltd.: Presentation by Mr. W.H. Hopper, Chairman of the Board and Chief Executive Officer.

4. Impact of lower oil prices.

(a) Assessment of short- and medium-term impact on the oil consumption, production, and upstream investment in OECD countries.
—Secretariat introduction and country presentations.

(b) Impact of lower oil prices on oil company finances.
—Presentation by Mr. Dillard Spriggs, President, Petroleum Analysis Ltd.

5. Oil pricing and trading.

(a) Recent trends in oil pricing and trading.
—Secretariat note.
—Analysis of latest Crude Oil Register data.
—Comments by the IWP.

(b) Trading methods and market transparency.
—Presentation by Mr. M.S. Robinson, President, Shell International Trading Company.

6. Monitoring of oil product markets and related developments.

(a) Recent developments in oil product supply and refining.
—IEA Secretariat Quarterly Report.
—Comments by the IWP on the oil producte monitoring methodology.

(b) Presentations by delegations on the refining sector, product supply market structure, and relevant government practices.

7. Round-table reports.
—Country presentations on notable developments in the oil sector and member countries.
8. SOM program of work for 1987.
—Secretariat note.
9. Date of next meeting.

It is expected that representatives of the IWP will be present for discussion of agenda items 5(a) and 6(a) and possibly other agenda items.

As provided in section 252(c)(1)(A)(ii) of the Energy Policy and Conservation Act, the IWP meeting is open only to representatives of members of the IWP, their counsel, employees of the Departments of Energy, Justice, State, the Federal Trade Commission, and the Genera Accounting Office,

representatives of committees of Congress, employees of the IEA, representatives of the Commission of the European Communities, and invitees of the IWP or the IEA. The SOM meeting is open only to the aforesaid persons, representatives of members of the SOM, and invitees of the SOM.

Issued in Washington, DC, May 20, 1986.

J. Michael Farrell,

General Counsel.

BILLING CODE 6450-01-M

Economic Regulatory Administration

[ERA Docket No. 86-33-NG]

Phibro Energy, Inc.; Application to Import Natural Gas From Canada

AGENCY: Department of Energy, Economic Regulatory Administration.

ACTION: Notice of Application for Blanket Authorization to Import Natural Gas from Canada for Short-Term and Spot Sales.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) gives notice of receipt on May 1, 1986, of an application filed by Phibro Energy Inc. (Phibro), a wholly-owned subsidiary of Phibro-Salomon Inc., for blanket authorization to import up to 200 Bcf of Canadian natural gas over a two-year period beginning on the date of first delivery. The gas would be sold on a short-term or spot basis to U.S. purchasers, including gas distributors, pipelines, electric utilities, and industrial or agricultural users. Phibro would act either as an importer or reseller, as agent on behalf of Canadian producers and pipeline, or as agent on behalf of domestic purchasers. The specific terms of each import and sale would be negotiated on an individual basis including the price and volumes. Phibro proposes to make quarterly reports to the ERA.

The application is filed with the ERA pursuant to section 3 of the Natural Gas Act and DOE Delegation Order No. 0204-111. Protests, motions to intervene, notices of intervention and written comments are invited.

DATE: Protests, motions to intervene or notices of intervention, as applicable, and written comments are to be filed no later than 4:30 p.m., on June 23, 1986.

FOR FURTHER INFORMATION:

Chuck Boehl, Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, U.S. Department of Energy, Forrestal Building, Room GA-076, 1000 Independence Avenue, SW., Washington, D.C. 20585 (202) 252-6050

Diane J. Stubbs, Natural Gas and Mineral Leasing, Office of General Counsel, U.S. Department of Energy, Forrestal Building, Room 6E-042, 1000 Independence Avenue, SW., Washington, D.C. 20585 (202) 252-6667.

SUPPLEMENTARY INFORMATION: The decision on this application will be made consistent with the DOE's gas import policy guidelines, under which the competitiveness of an import arrangement in the markets served is the primary consideration in determining whether it is in the public interest (49 FR 6684, February 22, 1984). Parties that may oppose this application should comment in their responses on the issue of competitiveness as set forth in the policy guidelines. The applicant asserts that this import arrangement is competitive. Parties opposing the arrangement bear the burden of overcoming this assertion.

Public Comment Procedures

In response to this notice, any person may file a protest, motion to intervene, or notice of intervention, as applicable, and written comments. Any person wishing to become a party to the proceeding and to have written comments considered as the basis for any decision on the application must, however, file a motion to intervene or notice of intervention, as applicable. The filing of a protest with respect to this application will not serve to make the protestant a party to the proceeding, although protests and comments received from persons who are not parties will be considered in determining the appropriate procedural action to be taken on the application. All protests, motions to intervene, notices of intervention, and written comments must meet the requirements that are specified by the regulations in 10 CFR Part 590. They should be filed with the Natural Gas Division, Office of Fuels Programs, Economic Regulatory Administration, Room GA-076-A, RG-23, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, (202) 252-9478. They must be filed no later than 4:30 p.m., June 23, 1986.

The Administrator intends to develop a decisional record on the application through responses to this notice by parties, including the parties' written comments and replies thereto. Additional procedures will be used as necessary to achieve a complete understanding of the facts and issues. A party seeking intervention may request that additional procedures be provided, such as additional written comments, an oral presentation, a conference, or a trial-type hearing. Any request to file additional written comments should explain why they are necessary. Any request for an oral presentation should identify the substantial question of fact, law or policy at issue, show that it is material and relevant to a decision in the proceeding, and demonstrate why an oral presentation is needed. Any request for a conference should demonstrate why the conference would materially advance the proceeding. Any request for a trial-type hearing must show that there are factual issues genuinely in dispute that are relevant and material to a decision and that a trial-type hearing is necessary for a full and true disclosure of the facts.

If any additional procedure is scheduled, the ERA will provide notice to all parties. If no party requests additional procedures, a final opinion and order may be issued based on the official record, including the application and responses filed by parties pursuant to this notice, in accordance with 10 CFR 590.316.

A copy of Phibro's application is available for inspection and copying in the Natural Gas Division Docket Room, GA-076, at the above address. The docket room is open between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, on May 12, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket Nos. ES86-40-000 et al.]

Electric Rate and Corporate Regulation Filings; MDU Resources Group, Inc., et al.

May 19, 1986.

Take notice that the following filings have been made with the Commission:

1. MDU Resources Group, Inc.

[Docket No. ES86-40-000]

Take notice that on May 6, 1986, MDU Resources Group, Inc. (Applicant) filed an application with the Federal Energy Regulatory Commission, pursuant to section 204 of Federal Power Act, seeking an Order authorizing the issuance of approximately 18,000,000 shares of Common Stock, par values $5,

in connection with a two-for-one Common Stock split.

Comment date: June 6, 1986, in accordance with Standard Paragraph E at the end of this notice.

2. MDU Resources Group, Inc.

[Docket No. ES86-41-000]

Take notice that on May 8, 1986, MDU Resources Group, Inc. (Applicant), filed an application with the Federal Energy Regulatory Commission, pursuant to section 204 of the Federal Power Act (Act), seeking an Order authorizing the issuance of an aggregate of no more than $100,000,000 principal amount of one or more series of its First Mortgage Bonds and an exemption from competitive bidding.

Comment date: June 5, 1986, in accordance with Standard Paragraph E at the end of this notice.

3. Upper Peninsula Generating Company

[Docket No. ES86-38-000]

Take notice that on May 5, 1986, Upper Peninsula Generating Company filed an application with the Federal Energy Regulatory Commission seeking authority, pursuant to section 204 of the Federal Power Act, to issue short-term notes and banker's acceptance in an aggregate principal amount up to $60,000,000 to be issued on or before July 1, 1988, and will have a final maturity date not later than July 1, 1990.

Comment date: June 4, 1986, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-11074 Filed 5-22-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ID-2185-000]

John N. Nordstrom; Amended Filing

May 19, 1986.

Take notice that on May 1, 1986, John N. Nordstrom tendered for filing an amended application for authority to hold the following interlocking directorates:

Position	Name of corporation	Classification
Director	Puget Sound Power and Light Company.	Public Utility
Director	Seafirst Corporation.	a subsidiary of Seafirst's parent corporation has placed commercial paper or certain public utilities as a placement agent for the issuer; a foreign third-tier subsidiary of Seafirst's parent corporation has underwritten or participated in the marketing of public utility securities outside of the United States; and other foreign second-, third-, and fourth-tier subsidiaries and affiliates of Seafirst's parent corporation are authorized to participate in the marketing of public utility securities outside of the United States.
Director	Seattle First National.	a subsidiary of parent corporation Bank has placed commercial paper of certain public utilities as placement agent for the issuer; a foreign third-tier subsidiary of parent corporation's parent corporation has underwritten or participated in the marketing of public utility securities outside of the United States; and other foreign second-, third-, and fourth-tier subsidiaries and affiliates of parent corporation's parent corporations are authorized to participate in the marketing of public utility securities outside of the United States.

Any person desiring to be heard or to protest the application should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before June 4, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this application are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RM85-1-000]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol (Texas Eastern Transmission Corp.) Order Granting Request for Waiver

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

Issued: May 19, 1986

On April 11, 1986, Texas Eastern Transmission Corporation filed a request for waiver of the transitional provisions of Order No. 436 [1] as they apply to a transportation transaction to be performed under former § 284.221 of the Commission's Regulations. We will grant Texas Eastern's request.

On October 1, 1985, Texas Eastern entered into a written agreement with Tennessee Gas Pipeline Company, a Division of Tenneco Inc., whereby Tennessee agreed to transport natural gas for Texas Eastern pursuant to former § 284.221 of the Commission's Regulations under authoriation issued on February 21, 1980, in Docket No. CP80-132, 10 FERC ¶ 61,166. The gas to be transported by Tennessee is purchased by Texas Eastern from three wells in Wharton County, Texas.

On September 23, 1985, Texas Eastern commenced constructing a pipeline in order to connect one of these wells to Tennessee's system. Construction was completed on October 8 at an approximate cost of $135,000.

We find that Texas Eastern, in its role as a purchaser, has expended substantial funds and constructed significant facilities before October 9, 1985, in reliance on a transportation agreement executed prior to that date.[2] Accordingly, we hereby waive the restrictions in § 284.105 to the extent necessary to permit the transportation

[1] 33 FERC ¶ 61,007 (1985), FERC Statutes and Regulations ¶ 30,665 (1985).

[2] *See* Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol (CLARCO Gas Company, Inc.), 34 FERC ¶ 61,366 (March 28, 1986).

transaction identified in Texas Eastern's petition to commence.

By the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-11679 Filed 5-22-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RM85-1-000]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol (Transok, Inc.); Order Denying Clarification

Issued: May 19, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

On February 21, 1986, Transok, Inc., an Oklahoma intrastate pipeline company, filed a request for clarification with respect to the reporting requirements under Order No. 436 for continuing transportation arrangements under section 311 of the Natural Gas Policy Act of 1978 (NGPA).

Specifically, Transok requests clarification on whether it may continue transporting gas under section 311 for existing transactions beyond the transition period simply by filing a subsequent report pursuant to § 284.126(b), or at most, an initial report pursuant to § 284.126(a). Transok states that the Commission should not view the continuation of these existing "grandfathered" transactions as new transactions because they are merely a continuation of existing transactions. Transok states that if the Commission treats the continuation of these arrangements as new transactions, Transok would be required to pay $2,800 in filing fees.

We deny Transok's petition. Under the transition provisions, existing section 311 transportation arrangements terminate on the earlier of either (1) the original or extended term of the arrangement, or (2) October 9, 1987. Once those transportation arrangements terminate, they can be continued only as a new arrangement under Order No. 436 and are subject to the filing requirements and fees for new transportation arrangements. When the pipeline converts its on-going section 311 transportation to transportation under Order No. 436, it will have to file both an initial report under § 284.126(a) and the rate information under § 284.123.[1] A subsequent report is not appropriate under these circumstances because the transportation would be performed under new authorization, the authorization in Order No. 436.[2]

By the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-11680 Filed 5-22-86; 8:45 am]

BILLING CODE 6717-01-M

[1] We note that under our current fees regulations, the pipeline's fee is the higher of these two fees, and not the sum of these fees. § 381.303(c)

[Docket No. RP86-84-001]

Algonquin Gas Transmission Co.; Compliance Filing

May 21, 1986.

Take notice that on May 12, 1986, Algonquin Gas Transmission Company (Algonquin) tendered for filing Original Sheet No. 551 to its FERC Gas Tariff, Second Revised Volume No. 1, in compliance with the Commission's Letter Order issued in the above-referenced docket on April 30, 1986. According to § 381.103(b)(2)(iii) of the Commission's regulations (18 CFR 381.103(b)(2)(iii)), the date of filing is the date on which the Commission receives the appropriate filing fee, which in the instant case was not until May 15, 1986.

Algonquin states that Original Sheet No. 551 complies with the Commission's directive by deleting the language "(after making allowance for applicable fuel reimbursement)". The effective date of the sheet is October 31, 1985.

Copies of this filing have been provided to Algonquin's customers under its FERC Gas Tariff, Second Revised Volume No. 1 and on all parties to this proceeding.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before May 28, 1986 (18 CFR 385.214, 385.211). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-11706 Filed 5-22-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP86-89-001]

East Tennessee Natural Gas Co.; Tariff Revisions

May 21, 1986.

Take notice that on May 12, 1986, East Tennessee Natural Gas Company (East Tennessee) tendered for filing Substitute First Revised Sheet No. 123 and Substitute Original Sheet No. 123A to Original Volume No. 1 of its FERC Gas Tariff, to be effective April 12, 1986. According to § 381.103(b)(2)(iii) of the Commission's regulations (18 CFR 381.103(b)(2)(iii)), the date of filing is the date on which the Commission receives the appropriate filing fee, which in the instant case was not until May 14, 1986.

East Tennessee states that the revised tariff sheets are in compliance with Ordering Paragraph (D) of the Commission's April 11, 1986, order issued on this proceeding and modify the new section 22.4 to its PGA provision to permit it to revise its rates on an interim basis in accord with the April 11th order.

East Tennessee states that copies of the filing have been mailed to all of its customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before May 28, 1986 (18 CFR 385.214, 385.211). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP86-11-001]

K N Energy, Inc.; Motion To Place Tariff Sheets Into Effect

May 21, 1986.

Take notice that on May 13, 1986, K N Energy, Inc. (K N) filed a Motion to Place Tariff Sheets Into Effect in accordance with the Commission orders issued November 29, 1985 and April 30, 1986. K N submitted the following tariff

sheets to its FERC Gas Tariff, Third Revised Volume No. 1:

Substitute Twenty-Third Revised Sheet No. 4
Substitute Second Revised Sheet No. 4B

According to § 381.103(b)(2)(iii), of the Commission's regulations (18 CFR 381.103(b)(2)(iii)), the date of filing is the date on which the Commission receives the appropriate filing fee, which in the instant case was not until May 15, 1986.

The rates shown on these tariff sheets reflect the elimination of the cost-of-service effect of all facilities not in service as of March 31, 1986. An effective date of May 1, 1986 is requested.

K N further states that no changes were required to be made to Third Revised Sheet No. 27B, Fourth Revised Sheet No. 27C and First Revised Sheet No. 27C, as filed in Docket No. RP86-11 and suspended by the Commission's November 29, 1985 order. Therefore, K N requests these sheets also be made effective May 1, 1986.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before May 28, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. RP86-58-002]

Midwestern Gas Transmission Co.; Tariff Revisions

May 21, 1986.

Take notice that on May 12, 1986, Midwestern Gas Transmission Company (Midwestern) tendered for filing Substitute Second Revised Sheet No. 164, Substitute Second Revised Sheet No. 165 and Substitute Original Sheet No. 165A to Original Volume No. 1 of its FERC Gas Tariff, to be effective April 12, 1986. According to § 381.103(b)(2) (iii) of the Commission's regulations (18 CFR § 381.103(b)(2)(iii)), the date of filing is the date on which the Commission receives the appropriate filing fee, which in the instant case was not until May 14, 1986.

Midwestern states that the revised tariff sheets are in compliance with Ordering Paragraph (D) of the Commission's April 11, 1986, order issued on this proceeding and modify the new Section 4 to its PGA provision to permit it to revise its rates on an interim basis in accord with the April 11th order.

Midwestern states that copies of the filing have been mailed to all of its customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC. 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before May 28, 1986 (18 CFR § 385.214, 385.211). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Docket No. CP86-489-000]

Transcontinental Gas Pipe Line Corp.; Application

May 20, 1986.

Take notice that on May 7, 1986, as supplemented on May 12, 1986, Transcontinental Gas Pipe Line Corporation (Applicant), Post Office Box 1396, Houston, Texas 77251, filed in Docket No. CP86-489-000 an application pursuant to section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing (1) a certain transportation service with "flexible authority" to add and/or delete sources of gas and/or receipt points, and (2) the operation of certain facilities, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant requests authorization to transport on behalf of Lynchburg Gas Company (Lynchburg), on an interruptible basis, up to 10,000 dt equivalent of natural gas per day pursuant to a transportation agreement between Applicant and Lynchburg dated March 21, 1986, as amended April 1, 1986. Applicant states that Lynchburg has contracts to purchase such quantities of gas from Energy Marketing Exchange, Inc. (EME) and Transco Energy Marketing Company (TEMCO).

It is stated that pursuant to the transportation agreement, Applicant would receive the gas that Lynchburg purchases from EME at the existing interconnections between the facilities of Applicant and the facilities of

(1) Columbia Gas Transmission Corporation at Clinton County, Pennsylvania and Terrebonne Parish, Louisiana;

(2) Tennessee Gas Pipeline Company at Crowley, Acadia Parish, Louisiana;

(3) The Texaco Inc. gathering line in Clinton County, Pennsylvania;

(4) Delhi Gas Pipeline Corporation in Victoria County, Texas; and

(5) Sun Exploration and Production Company in Starr and Jim Wells Counties, Texas.

Applicant states that it would receive the gas purchased from TEMCO at the points of interconnection between the facilities of Applicant and the facilities of the TEMCO producer sellers.

Applicant further states that it would redeliver equivalent quantities, less compressor fuel and line loss make-up, to Lynchburg at the existing points of interconnection between the facilities of Applicant and Lynchburg in Virginia.

Applicant states that for this transportation service, it would retain a percentage of the gas quantities it receives for compressor fuel and line loss make-up and would charge Lynchburg a transportation rate based on Applicant's currently applicable Rate Schedule T-I rate and as such rate may be legally amended or superseded from time-to-time.[1] Applicant further states that Lynchburg would reimburse Applicant for any fees which Applicant pays to the Commission in connection with the proposed transportation. The transportation agreement would remain in effect for a primary term of ten years from the date of initial deliveries and year-to-year thereafter unless and until

[1] Applicant's current Rate Schedule T-1 rate is 10 cents per dt within and 8 cents per dt in excess of Lynchburg's firm sales level for transportation from the Clinton County, Pennsylvania, receipt points and 30 cents per dt within and 28.7 cents dt in excess of Lynchburg's firm sales level for transportation from the receipt points in Texas and Louisiana. Applicant's Rate Schedule T-1 currently provides for 0.9 percent of the gas transported from the Clinton County receipt points and 5.8 percent of the gas transported from the Texas and Louisiana receipt points to be retained for compressor fuel and line loss make-up.

terminated by either party's giving proper notice.

Applicant further states that Lynchburg is considering alternatives in its source of supply of natural gas. Such alternatives could involve different suppliers and/or changes in receipt points, but would not involve any increase in peak day volumes to be transported by Applicant. Applicant also requests "flexible authority" whereby it would undertake certain filing requirements to advise the Commission in the event Lynchburg obtains different sources of supply or if additions or deletions of receipt points are required in furtherance of the transportation authority requested. Applicant states that upon implementation of "flexible authority", it would file by May 1 of each year appropriate tariff sheet revisions with the Commission reflecting sources of gas and/or receipt points added during the preceding calendar year.

Applicant further requests authority to operate a dual 4-inch measuring and regulating station, tap and appurtenant facilities at milepost 1466.39 on Applicant's pipeline system in Appomattox County, Virginia, as one of the points of delivery to Lynchburg for the proposed transportation service.[2] Applicant states that such facilities were constructed and installed pursuant to Subpart B of Part 284 of the Commission's Regulations as part of a transportation service rendered by Applicant for Lynchburg and reported to the Commission in Docket No. ST86-776-000. Applicant states that it would continue to operate such facilities solely for the purpose of providing such transportation service pursuant to Subpart B of Part 284 until the Commission grants the requested certificate.

Applicant states that by filing this application it is not electing "non-discriminatory access" as such term is described and defined in §§ 284.8(b) and 284.9(b) of the Commission's Regulations, promulgated in Order No. 436, Docket No. RM85-1-000.

Any person desiring to be heard or to make any protest with reference to said application should on or before June 4, 1986, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessary. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. FA83-18-001]

Transcontinental Gas Pipe Line Corp; Order Establishing Hearing Procedures

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C. M. Naeve.

Issued: May 8, 1986.

Under the Natural Gas Act,[1] every natural gas company must file such annual and other periodic or special reports as the Commission prescribes as necessary or appropriate to assist in the proper administration of the Act.

Commission staff (staff) recently performed an audit of Transcontinental Gas Pipe Line Corporation (Transco). In a letter order issued February 5, 1986,[2] the Commission noted that Transco had not agreed to adopt the staff's recommendations relating to the company's accounting, reporting and tariff (purchased gas adjustment clause) billing practices. Staff's position, as stated in the letter order, is that Transco failed to record the proper amount of deferred state income taxes in its accounts and reports to the Commission, and did not use the proper amount of deferred income taxes in computing carrying charges on unrecovered purchased gas costs.

The letter order requested Transco to notify the Commission within 30 days as to whether it would consent to disposition of the accounting and tariff matters in accordance with the shortened procedure set forth in Part 158 of the Commission's regulations.[3] Under the shortened procedure, the Commission would rule on the matter solely on pleadings submitted by interested parties and staff. By letter dated March 7, 1986, Transco notified the Commission that it did not consent to the use of the shortened procedure. Consequently, we now set these matters for hearing.

Any interested person seeking to participate in this docket shall file a motion to intervene under Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.214) no later than 15 days after the date of publication of this order in the Federal Register.

The Commission Orders

(A) Pursuant to the Natural Gas Act, particularly sections 8 and 10 thereof, the Commission's Rules of Practice and Procedure, and the regulations under the Natural Gas Act, a public hearing shall be held concerning the appropriateness of Transco's accounting reporting and tariff billing practices as discussed above.

(B) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding, to be held within 45 days of the date of this order, in a hearing room of the Federal Regulatory Commission 825 North Capitol Street, NE., Washington, DC 20426. The presiding judge is authorized to establish procedural dates and to rule on motions as provided in the Commission's regulations.

---

[2] Lynchburg has advised Applicant that it may also wish to utilize such facilities in the future to receive gas which it may purchase from Applicant for transport under Applicant's Rate Schedule MDQ if such rate schedule is ultimately approved by the Commission as part of Applicant's settlement filed on March 28, 1986, in Docket Nos. TA86-1-29-000, TA86-9-29-000, TA86-1-29-000, RP82-127-000 and CP85-160-000.

BILLING CODE 6717-01-M

[Docket No. CP86-37-001]

Mississippi River Transmission Corp.; Proposed Changes in FERC Gas Tariff Tariff

May 21, 1986.

Take notice that on May 12, 1986, Mississippi River Transmission Corporation ("Mississippi") submitted for filing the tariff sheets listed below to its FERC Gas Tariff, Original Volume No. 2:

Tariff sheets	Proposed effective date
Original Sheet Nos. 222 through 226	April 12, 1986.

Mississippi states that the purpose of the filing is to effectuate tariff sheets regarding the tranportation on an interruptible basis of up to 10,000 Mcf of natural gas per day for Texas Gas Transmission Corporation (Texas Gas) as authorized by Commission order dated March 20, 1986. Mississippi has requested waiver of the notice requirements in order to allow the filed tariff sheets to become effective on the date proposed.

Copies of the filing have been served upon Mississippi's jurisdictional customers and the State Commissions of Arkansas, Illinois and Missouri.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.211 and 385.214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before May 28, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-11701 Filed 5-22-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RP86-76-000]

Texas Eastern Transmission Corp.; Request for Authorization of the Limited Waiver of Certain Tariff Provisions

May 21, 1986.

On May 9, 1986, Texas Eastern Transmission Corporation (Texas Eastern) filed a request for authorization of the limited waiver of its gas storage Rate Schedules ISS-3 and SS-3. Rate Schedule SS-3 is a new rate schedule which enlarges and extends the limited term storage rendered by Texas Eastern under Rate Schedule ISS-3, which expired April 15, 1986. Texas Eastern provides storage service for its local gas distributor customers under these rate schedules. The storage services Texas Eastern renders to its local gas distributor customers are subject to storage service rendered by Consolidated Gas Transmission Corp. (Consolidated) to Texas Eastern. Consolidated's storage agreement with Texas Eastern authorizes Consolidated to charge Texas Eastern a roll-over charge for injections and withdrawals of gas remaining in storage on expiration of Texas Eastern's Limited Term Storage Service Agreement. Texas Eastern's ISS-3 customers have until June 15, 1986 to withdraw any gas balance remaining in storage as of April 15, 1986, and must pay a withdrawal charge for that service. Rate Schedule SS-3 customers must pay an injection charge for injections under Rate Schedule SS-3.

Texas Eastern asks the Commission to waive such provisions of Rate Schedules ISS-3 and SS-3 as may be necessary to: (1) Permit six local gas distributor customers [1] to roll-over to Rate Schedule SS-3 the quantities of gas in storage for their account under Rate Schedule ISS-3 as of June 15, 1986; and (2) to flow through and collect from such electing customers on a prorated basis, the amount Consolidated charges Texas Eastern for such roll-over under the Storage Service Agreement between Eastern and Consolidated in lieu of Texas Eastern's charging injection and withdrawal charges under Rate Schedules ISS-3 and SS-3.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure (18 CFR 385.214, 385.211). All such motions or protests should be filed on or before May 28, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-11703 Filed 5-22-86; 8:45 am]

BILLING CODE 6717-01-M

[1] Algonquin Gas Transmission Co., Central Hudson Gas & Electric Corp., Long Island Lighting Co., N.J. Natural Gas Co., Philadelphia Gas Works, and Public Service Electric & Gas Co.

[Docket No. CP86-37-000]

Texas Railroad Commission, NGPA Section 103 Determination, MR Oil Co. and University Section 30 No. 2 Well, TRC Docket No. F-03-062389, FERC No. JD 86-18383; Preliminary Finding

May 5, 1986

On March 21, 1986, the Texas Railroad Commission (TRC) submitted to the Commission a notice of determination that University Section 30 No. 2 Well (U-2 Well) operated by MR Oil Company (MR) qualifies as a new, onshore production well under section 103 of the Natural Gas Policy Act of 1978 (NGPA).[1] For a well to qualify as a new, onshore production well, the surface drilling must have begun on or after February 19, 1977. The TRC notice states that the subject well satisfies this requirement.

A review of the evidence submitted to TRC reveals that the U-2 Well was originally drilled in March, 1967, to a depth of 5,159 feet, and was plugged on March 24, 1967 as a dry hole. On August 24, 1982, MR reentered the well and made no additional drilling, but merely ran production casing to 5,174 feet,[2] tubing to 5,043 feet, and acidized and perforated from 5,003 to 5,009 feet in the same formation. MR indicated that the tangible, intangible, and acquisition costs to complete and equip this well totalled $90,377. MR stated that this cost is within the range of costs for drilling and completing a new well in the same geographic area. MR also stated that to the best of its knowledge the well did

[1] 15 U.S.C. 3313 (1982).

[2] MR stated on the recompletion form that it submitted to TRC that it had performed no additional drilling. The fifteen-foot discrepancy between the stated depth of the original drilling (5,159 feet) and the depth of MR's production casing (5,174 feet) could have been caused by any one of a number of different reasons, such as different methods of calculating depth, or using different measuring equipment.

not produce gas prior to the reentry. However, neither MR nor TRC submitted any data relative to the cost of drilling a new well in the West Texas area to a similar depth for the relevant time period.

In *L&B Oil Co. v. Federal Energy Regulatory Commission,*[3] the court concluded that a well could qualify as a "new, onshore production well" even if it was not literally spudded [4] on or after February 19, 1977. In deciding *L&B* the court considered the following factors: (1) Surface drilling commenced when L&B drilled out the surface plug on reentry; (2) L&B did not merely reactivate or deepen a previously spudded well; (3) L&B used little of the original hole before deviating to over 7,000 feet; (4) L&B incurred almost the entirety of normal exploration costs and production effort; and (5) L&B discovered and produced gas where none had previously been produced. In determining whether a reentered well qualifies under section 103, the Commission considers all the *L&B* factors to see whether on balance a particular well satisfies the test.[5]

In applying this test the Commission has held that there must be substantial new drilling for a reentered well to qualify under section 103, and has considered both the amount of the increase in depth, as well as the costs. Where there is more than a 50% increase in well depth, or if there is less than a 50% increase but the costs on reentry are comparable to the cost of drilling a new well, we have found the test satisfied.[6] In this case MR entered the subject well without deviation from, or variation in the depth of, the existing wellbore. MR made more than minimal use of the existing wellbore upon reentry. Further, although MR states that the $90,000 reentry costs are comparable to the costs of drilling a new well, there is no record evidence to support the claim, and published reports indicate that the average cost of a new 5,000-foot well drilled in that area in 1982 exceeded $250,000.[7] Thus the sole element to support TRC's finding appears to be that gas was produced from a well which had not previously produced gas. Under the circumstances presented we do not believe this factor is sufficient to justify a finding that the well is a new, onshore production well under section 103.

Accordingly, the Commission hereby makes a preliminary finding pursuant to 18 CFR 275.202(a)(1)(i) (1985) that the determination submitted by TRC is not supported by substantial evidence in the record on which the determination was made, and pursuant to 18 CFR 275.202(f) (1985) any party may, within 30 days of the issuance of this Notice, submit written comments to the Commission and request an informal conference with the Commission staff.

By direction of the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-11676 Filed 5-22-86; 8:45 am]

BILLING CODE 6717-01-M

[3] 685 F.2d 758 (5th Cir. 1982).

[4] Spudding refers to the initial boring of the hole, to a depth of approximately 100 feet, in drilling an oil or gas well. H. Williams & C. Meyers, *Manual of Oil and Gas Terms* 884 (4th ed. 1976).

[5] Phillips Petroleum Co., 32 FERC ¶ 61,104 (1985).

[6] *Id.*

[7] The Joint Association Survey on Drilling Costs, published by the American Petroleum Institute (at 30) indicates that the average cost of drilling and equipping a gas well in 1982 in the West Texas area was $230,307 for the 3,750–4,999 foot range, and $368,140 for the 5,000–7,499 foot range. The Index of Domestic Well Costs by the Energy Information Administration (at 49) indicates an average cost of approximately $276,000 to drill a 5,000 foot well in West Texas in 1982.

[Docket No. CP81-83-010]

Transcontinental Gas Pipe Line Corp.; Proposed Change in FERC Gas Tariff

May 31, 1986.

Take notice that on May 13, 1986, Transcontinental Gas Pipe Line Corporation (Transco) tendered for filing the following sheets to its FERC Gas Tariff, Original Volume No. 2:

Tariff sheets	Proposed effective date
First Revised Sheet Nos. 2407, 2408, 240, 2411, 2412, 2413, 2414, 2415, [illegible], and 2417.	Mar. 20, 1986.

Transco states that the subject tariff sheets reflect revisions to Transco's Rate Schedule X-240, which is a transportation agreement between Transco and Southern Natural Gas Company (Southern), dated September 30, 1980, (as amended March 4, 1981 and July 12, 1985), and authorized by the Commission in a certificate issued in Docket No. CP81-83 on February 8, 1982, as amended. In the amendatory agreement date July 12, 1985, Transco and Southern agreed to revise their transportation arrangement to include two additional points of delivery for gas which Transco transports for Southern. On October 2, 1985, Transco filed a petition to amend certificate in the aforementioned proceeding to obtain authorization for the additions, and the July 12, 1985 amendatory agreement was included therein as Amended Exhibit P. On March 20, 1986, the Commission issued an order in Docket No. CP81-83-004 authorizing the additional points.

A copy of the instant filing has been served upon Southern.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practices and Procedure (18 CFR 385.214 and 385.211). All such motions or protests should be filed on or before May 28, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CI86-418-000 et al.]

El Paso Natural Gas Co. et al.; Applications for Blanket Limited-Term Abandonment and Blanket Limited-Term Certificate With Pre-Granted Abandonment

May 20, 1986.

Take notice that on May 9, 1986, as supplemented on May 19, 1986, El Paso Natural Gas Company (El Paso), P.O. Box 1492, El Paso, Texas 79978, filed, on behalf of producer-suppliers currently selling gas to El Paso pursuant to certificates of public convenience and necessity, applications in Docket Nos. CI86-418-000 and CI86-424-000. In Docket No. CI86-424-000 El Paso requests the Commission issue an order under section 7(b) of the Natural Gas Act (NGA), to be effective for three (3) years from the date of issuance, authorizing blanket limited-term abandonment by El Paso's producer-suppliers of certain sales for resale of natural gas in interstate commerce. In Docket No. CI86-418-000 El Paso requests a blanket limited-term certificate of public convenience and necessity under section 7(c) of the NGA authorizing the sale for resale of natural gas in interstate commerce by those producer-suppliers with pre-granted abandonment. El Paso also requests, on behalf of those producer-suppliers, waiver of certain Commission Regulations, including those at §§ 154.94

(h) and (k), and in Parts 154 and 271 of the Commission's Regulations. El Paso Gas Marketing Co. (EPGM) requests a declaration of its status if it offers and performs limited functions in connection with El Paso's proposal, all as more fully set forth in the applications on file with the Commission and open for public inspection.

It is stated that the applications are filed as a necessary corollary to El Paso's evolution from a merchant of natural gas into a supplier/open-access transporter of natural gas. El Paso states these applications, and the authorizations requested, are essential to the proper and efficient functioning of the market served by El Paso, for without the authorizations requested, willing sellers of natural gas cannot be appropriately matched with willing buyers, and El Paso's efforts to provide open-access transportation pursuant to the Commission's Order Nos. 436, *et seq.*, will be partially frustrated.

The applications further state that the transportation volumes moving through the El Paso system displace El Paso's system sales. El Paso states that its inability to hold the market with system sales volumes reflects the competitive disadvantages suffered by El Paso as an interstate natural gas pipeline subject to the rigidities inherent in regulation (as to immediate price responsiveness, implementation of new rate structures, acceptance of new customers, realignment of facilities, and so forth), and contractual rigidities built into El Paso's long-term gas supply contracts entered into over the course of the preceding decades. El Paso states that in recognition that it could not utilize its facilities fully and efficiently in the changing market conditions unless it moved definitively in the direction of open-access transportation, El Paso opened its system on January 17, 1986, under the terms and conditions set forth in Commission Order Nos. 436, *et seq.* Thereafter, El Paso states it formulated and filed tariffs and rate schedules, at Docket No. RP86-45-000, necessary to implement open-access transportation, and these filings now await final Commission action.

El Paso's applications state further that as El Paso continues the transition from a merchant to a supplier/open-access transporter, there are specific and serious problems which must still be adequately addressed and appropriately resolved. In essence, El Paso states the decline in El Paso's sales market poses risks to El Paso (and ultimately its customers) through the build-up of potential take-or-pay liabilities which may arise under El Paso's existing long-term contracts with producer-suppliers.[1] Secondly, El Paso states the cash flow to producer-suppliers on the El Paso system has been severely impacted as El Paso's purchases have declined. El Paso states that almost two-thirds of its deliverability is shut-in on an average day. El Paso states that it is concerned, as are the producer-suppliers and the Commission, that inadequate cash flow will cause not only an impairment of present deliverability, but also inadequate development to ensure reliable and adequate long-term supplies of natural gas. El Paso states it proposes a program designed to mitigate the dual problem of take-or-pay and lowered producer-supplier revenues. The proposal herein advanced is stated to be an expansion of an experimental program open by El Paso in the last half of 1985 called the "Spot Market Release Program" (the Program).

Under the Program, El Paso states the seller of gas from non-NGA wells, that is, wells that produce gas the first sale of which is not subject to the Commission's jurisdiction under the NGA, by operation of section 601 of the Natural Gas Policy Act of 1978 (NGPA), is offered the opportunity to obtain a share of the spot market demand secured by EPGM, or to make its own marketing arrangements and sell gas surplus to El Paso's needs in the spot market. El Paso states the seller receives a price that is net of all costs of moving the gas from the wellhead to the market.

El Paso proposes to implement the Program, upon receipt of appropriate authorizations, substantially as has been done with its existing Program, except the NGA gas would be eligible for participation, and subject to the following general terms and conditions: (1) Participation in the Program by a producer-supplier shall be wholly voluntary; (2) Participation in the Program by producer-suppliers shall be on a month-to-month basis or for such longer periods as El Paso and individual producer-suppliers may agree upon, subject to El Paso's need for such gas to supply its traditional market. Participation in the Program for any period of time shall not alter the participating producer-supplier's contractual relationship with El Paso, other than as to take-or-pay credit for volumes sold into the Program; (3) The price of gas sold through the Program shall not exceed the applicable maximum lawful price prescribed by the NGPA and the Commission's implementing regulations; (4) El Paso will receive credit against its take-or-pay obligations for all gas sold by producer-suppliers through the expanded Program; (5) Participation in the Program will not be available if any facility modifications, abandonments or additions are required on the part of El Paso, or if participation would reduce the utilization of El Paso's existing facilities; (6) Gas released under the Program will be available only for purchase in El Paso's existing market area; and (7) The services of EPGM will be available to a participating producer-supplier, but utilization of those services will not be a pre-condition to participation in the Program.

It is stated that EPGM presently functions as a non-jurisdictional broker, agent, or purchaser/reseller of non-NGA gas. It is anticipated that EPGM would continue to provide the services as and when requested. With respect to the expansion of the Program to include NGA gas, EPGM will offer services as an agent to producer-suppliers to facilitate spot market sales of NGA gas. In so acting, however, EPGM will not undertake to purchase and resell gas in interstate commerce for resale. Accordingly, EPGM requests confirmation from the Commission that its contemplated activities will not make EPGM a "natural-gas company," nor subject EPGM to Commission certificate and rate regulations which apply to natural gas companies.

The applications further state that Commission approval would constitute issuance to El Paso's participating producer-suppliers of the requisite blanket abandonment and sales certificate authorizations, under section 7 of the NGA and such other authorizations, if any, as are necessary to implement the marketing of all released gas supplies which are subject to the Commission's NGA jurisdiction. El Paso states it will file with the Commission, and serve on its customers, statements identifying producer-suppliers which become eligible to participate in the expanded Program through grant of the requested authorizations. Further, El Paso states it shall file or cause to be filed with the Commission, on a quarterly basis, information as to released quantities subject to the Commission's NGA jurisdiction. El Paso states that any or all of the gas which is currently committed to El Paso under contract with participating producer-suppliers and subject to NGA jurisdiction would be covered by the abandonment and sales authorizations sought herein; *i.e.*,

[1] El Paso states that is potential take-or-pay exposure for 1985 could be several hundred million dollars and El Paso's sales volumes are still declining.

these applications contemplate the possible release and sale of all NGPA categories of gas, including NGPA section 104, section 106 and section 109 gas. However, El Paso states that because it has implemented a least-cost production scheduling program, only very small quantities of gas subject to the NGPA section 104 "flowing gas" and "replacement contract gas" maximum lawful prices, or to the maximum lawful price under NGPA section 106 will actually be available for release into the Program. El Paso estimates that 450 MMbtu per day of NGPA section 104 flowing and replacement contract gas and 106 gas might be available for release into the expanded release gas program during the balance of 1986.

The applications also state that El Paso requests that the Commission waive its regulations under the NGA as to the establishment and maintenance by participating producer-suppliers of rate schedules under Part 154 of the Commission's Regulations. El Paso states the blanket sales certificate issued to participating producer-suppliers by Commission approval of these applications could be conditioned so that the rates charged in the authorized sales would be limited by the applicable maximum lawful price prescribed by the NGPA, including any rate that the participating producer-suppliers have established the right to collect pursuant to Parts 273, 274 or 275 of the Commission's Regulations. In addition, El Paso states automatic collection of the appropriate monthly adjustments should be permitted, and El Paso requests that in approving these applications the Commission waive the requirement that participation producer-suppliers qualify for collection of any applicable allowances under section 110 of the NGPA. El Paso further requests that the Commission waive the requirement that the participating producer-suppliers comply with § 154.94(k) and Part 271 of the Commission's Regulations.

El Paso states that no transportation authority is sought in these applications. El Paso states transportation on El Paso's system of any gas released and sold under the authorizations sought herein would be accomplished under the terms of El Paso's Order Nos. 436 and 436–A tariff filing at Docket No. RP86–45–000, providing such tariff is approved by the Commission as proposed through El Paso's pending offer of settlement in that docket.

The circumstances presented in the applications meet the criteria for consideration on an expedited basis, pursuant to § 2.77 of the Commission's rules as promulgated by Order Nos. 436 and 436–A, issued October 9, and December 12, 1985, respectively, in Docket No. RM85–1–000, all as more fully described in the applications which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before 15 days after the date of publication of this notice in the **Federal Register**, file with the Federal Energy Regulatory Commission, Washington, DC 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not seve to make the protestants parties to the proceedings. Any person wishing to become a party to the proceedings herein must file petitions to intervene in accordance with the Commission's rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for El Paso or EPGM to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6560–50–M

[ER–FRL–3019–6]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared May 5, 1986 through May 9, 1986 pursuant to the Environmental Review Process (ERP), under section 309 of the Clean Air Act and section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 382–5075/76. An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated February 7, 1986 (51 FR 4804).

Draft EISs

ERP No. D–AFS–J82002–MT, Rating EC2, Deerlodge Nat'l Forest, Individual Lodgepole Pine Trees Protection From Mountain Pine Beetle Attacks, MT. Summary: EPA is concerned that the effects of carbaryl on bees was not discussed. Further mitigation measures to prevent and correct accidental spills and exposures, applicator training and certification requirements, and procedures for disposing of spent pesticide containers should be described.

ERP No. D-AFS-J65094-00, Rating EC2, Intermountain Region Nat'l Forest System Lands, Noxious Weeds and Poisonous Plants Control Program, Continuation, CA, WY, ID, UT, NV, and CO. Summary: EPA thought potential human health effects were adequately addressed, but felt the draft EIS did not fully address the broader environmental risks. EPA also questioned the use of amitrole, due to its higher potential for adverse human impacts, emphasizing that it is a restricted use pesticide.

ERP No. D-AFS-K65073-AZ, Rating EC2, Apache-Sitgreaves Nat'l Forests, Land and Resource Mgmt. Plan, AZ. Summary: EPA expressed concerns about potential impacts to water quality and riparian habitat, especially from grazing activities.

ERP No. D-AFS-K65099-CA, Rating EC1, Plumas Nat'l Forest, Land and Resource Mgmt. Plan, CA. Summary: EPA expressed concerns that forest management activities could interfere with water quality restoration and protection. EPA indicated that water quality protection/restoration should be a priority item, since 30% of the water draining the forest does not meet State water quality standards.

ERP No. DS-AFS-L65095-AK, Rating EC2, 1988-90 Alaska Pulp Long-Term Sale Area, Operating Plan, Designation, Tongass Nat'l Forest, AK. Summary: EPA's primary concerns continue to be with the sale's impact on water quality. Since the environmental consequences section remains unchanged from the draft EIS, EPA has no additional comments.

ERP No. D-AFS-L65101-OR, Rating EC2, Deschutes Nat'l Forest, Land and Resource Mgmt. Plan, OR. Summary: EPA is concerned that the Forest Plan be consistent with the adopted Statewide Water Quality Management Plan for Forest Practices required by the Clean Water Act. The water quality management discussions in both the DEIS and Plan are insufficient to evaluate potential impacts. There are no specific information or data summaries to support the general statements about riparian areas and water quality. In addition, the final EIS and Plan should include the policy and program directions for the monitoring plan and how the monitoring will be used to make forest management decisions.

ERP No. D-BLM-J70006-CO, Rating EO2, Little Snake Resource Area, Resource Mgmt. Plan, CO. Summary: The EPA review was primarily concerned with protection and improvement where needed of water, air, and wetland-riparian related values. EPA identified several commendable resource management initiatives. EPA recommended several corrective actions, such as: better description of consistency with water quality standards; more definitive objectives for wetland identification and wetland-riparian area restoration and improvements; further development of mineral activity guidance and impact assessment; stronger correlation of grazing direction to protection of rangeland resource values; and inclusion of a more specific comprehensive resource monitoring strategy. EPA requested follow-up consultation.

ERP No. D-FHW-J40113-MT, Rating EC1, Bozeman Arterials Development, N. 19th Avenue Construction, Durston Rd. to Oak St.; Oak Street Construction, N. 19th Ave. to N. 7th Ave.; and Kagy Blvd. Construction, S. 3rd Ave. to S. 19th Ave., 404 Permit, MT. Summary: EPA requested that the final EIS include a commitment to construct stormwater detention facilities. EPA also indicated that further comments regarding wetlands may be appropriate after an upcoming wetland coordination meeting.

ERP No. DS-FHW-K40031-CA, Rating EC2, CA-15 Reconstruction, I-805 to I-8, New Preferred Alternative, CA. Summary: EPA expressed concerns about the potential violation of the National Ambient Air Quality Standard for carbon monoxide. EPA requested alternatives and/or mitigation that would avoid creating a violation be developed and be included in the final EIS.

ERP No. D-FHW-K40153-CA, Rating EC2, I-5/Santa Ana Freeway Widening and Interchange Reconstruction, I-405 to CA-55, 404 Permit, CA. Summary: EPA expressed concerns about the potential for increased sedimentation in Newport Bay and the need for additional air quality analysis and mitigation.

ERP No. DC-IBR-J61127-ND, Rating EU2, Garrison Diversion Unit, New Irrigation Areas and New Project Features, Operation and Maintenance, Pick-Sloan Missouri Basin Program, James R., ND. Summary: EPA's review of the proposed project as recommended by the Congressional Commission in 1984 and evaluated in this supplemental EIS identified major environmental improvements over the previous plan, however, EPA has two significant environmental concerns with the proposed action: (1) The proposed wetland replacement plan fails to meet EPA's interpretation of the requirements of the 404(b)(1) Guidelines for replacement based upon acre-for-acre compensation; (2) Salinity standards are predicted to be exceeded for the full project size of 113,000 irrigated acres at the 90th percentile and maximum probable salinity conditions for the James River in South Dakota. Violation of the State of South Dakota's antidegradation policy for the mean and median water quality conditions are also predicted and reported in the draft supplemental EIS. EPA also identified additional information needs including the need to analyze selenium mobility from the newly irrigated soils, review the alternative Municipal and Industrial water supply options recommended by the Commission, address the options for Indian Land water development as recommended by the Commission, and to specify the Best Management Practices as required by State legislation and as offered in the 1979 and 1983 EIS's. Due to these concerns EPA found the project to be environmentally satisfactory. EPA did note, however, that should the proposed Reformulation Bill become law for the Garrison Diversion Unit, most of these deficiencies in the mitigation aspects of the irrigation project would be corrected. EPA would review the subsequent revised draft EIS and determine if the rating of environmentally unsatisfactory should be withdrawn.

ERP No. D-MMS-A02116-00, Rating EC2, January 1987-December 1991 OCS Oil and Gas Lease Sales, 5 Year Program, Offshore the Atlantic, Pacific, Gulf of Mexico, and Alaska Regions, US. Summary: EPA recommended that the subarea deferrals proposed for Alternatives I and II be deferred from the Final Program, and endorsed Alternative VI, which would defer oil and gas lease sales from six planning areas altogether. EPA also recommended against holding a sale in the Straits of Florida. EPA believes that the draft EIS for the program should be revised to remove inconsistencies in analyses among OCS regions.

Final EISs

ERP No. F-BLM-L61151-ID, Shoshone and Sun Valley Wilderness Study Area, Wilderness Designation, ID. Summary: EPA made no formal comments. EPA reviewed the final EIS and found the project to be satisfactory.

ERP No. FB-COE-H36029-NB, Papillion Creek and Tributaries Lakes, Flood Control Plan and Recreational Improvements, Papillion Creek Basin, NB. Summary: EPA has no objections to the selected plan. Previously expressed concerns regarding proposed reservoir alternatives have been adequately addressed by selection of a channel improvement alternative as the recommended plan.

ERP No. FS-COE-K85029-HI, West Beach Resort Development, Construction of Marina and Beach Lagoons, Permit, Oahu Island, HI. Summary: EPA noted that its prior concerns on ground water impacts and project alternatives were adequately addressed, but expressed continuing concerns about adverse impacts to water quality and marine ecosystems.

Dated: May 20, 1986.

David G. Davis,

Acting Director, Office of Federal Activities.

Applications To Register Pesticide Products; Certain Companies; Pennwalt Corp. et al.

Correction

In FR Doc. 86-10444, beginning on page 17069, in the issue of Wednesday, May 14, 1986, make the following correction:

In the "Dates" caption, "May 29, 1986" should read "June 13, 1986".

BILLING CODE 1505-01-M

[OPTS-59215A; FRL-3015-8]

Certain Chemical Approval of Test Marketing Exemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces EPA's approval of an application for a test marketing exemption (TME) under section 5(h)(6) of the Toxic Substances Control Act (TSCA), TME-86-32. The test marketing conditions are described below:

EFFECTIVE DATE: May 9, 1986.

FOR FURTHER INFORMATION CONTACT: Joseph Payer, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Environmental Protection Agency, RM. E-613, 401 M Street, SW., Washington, DC 20460, (202-382-3380).

SUPPLEMENTARY INFORMATION: Section 5(h)(1) of TSCA authorizes EPA to exempt persons from premanufacture notification (PMN) requirements and permit them to manufacture or import new chemical substances for test marketing purposes if the Agency finds that the manufacture, processing, distribution in commerce, use and disposal of the substance for test marketing purposes will not present any unreasonable risk of injury to health or the environment. EPA may impose restrictions on test marketing activities and may modify or revoke a test marketing exemption upon receipt of new information which casts significant doubt on its finding that the test marketing activity will not present any unreasonable risk of injury.

EPA hereby approves TMS-86-32. EPA has determined that test marketing of the new chemical substance described below, under the conditions set out in the TME application, and for the time period and restrictions (if any) specified below, will not present any unreasonable risk of injury to health or the environment. Production volume, use, and the number of customers must not exceed those specified in the application. All other conditions and restrictions described in the application and in this notice must be met.

The following additional restrictions apply to TME-86-32. A bill of lading accompanying each shipment must state that the use of the substance is restricted to those approved in the TME. In addition, the Company shall maintain the following records until five years after the dates they are created, and shall make them available for inspection or copying in accordance with section 11 of TSCA:

1. The applicant must maintain records of the quantity of the TME substance produced.

2. The applicant must maintain records of dates of the shipments to the customer and the quantities supplied in each shipment.

3. The applicant must maintain copies of the bill of lading that accompanies each shipment of the TME substances.

T-86-32

Date of Receipt: March 19, 1986.

Notice of Receipt: March 28, 1986 (51 FR 10681).

Applicant: Confidential.

Chemical: (G) Cationic aliphatic condensate.

Use: (G) Paper additive.

Production Volume: 18,000 pounds.

Number of Customers: One.

Worker Exposure: Import: None. Processing and use: dermal, a total of 8 workers up to 90 days/yr.

Test Marketing Period: 90 days. *Commencing on* May 9, 1986.

Risk assessment: EPA identified no significant concerns for human health effects. Therefore, the test market substance will not pose any unreasonable risk of injury to health. The Agency did identify potential adverse effects to aquatic organisms. However, since wastes from processing will be recycled, the test market substance will not pose any unreasonable risk of injury to the environment.

Public Comments: None.

The agency reserves the right to rescind approval or modify the conditions and restrictions of an exemption should any new information come to its attention which casts significant doubt on its findings that the test market activities will not present any unreasonable risk of injury to health or the environment.

Dated: May 9, 1986.

Don R. Clay,

Director, Office of Toxic Substances.

[OPTS-59766; FRL-3020-3]

Certain Chemicals Premanufacture Notices

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Statutory requirements for section 5(a)(1) premanufacture notices are discussed in EPA statements of the final rule published in the Federal Register of May 13, 1983 (48 FR 21722). In the Federal Register of November 11, 1984, (49 FR 46066)(40 CFR 723.250), EPA published a rule which granted a limited exemption from certain PMN requirements for certain types of polymers. PMNs for such polymers are reviewed by EPA within 21 days of receipt. This notice announces receipt of four such PMNs and provides a summary of each.

DATES: Close of Review Period:

Y 86-145 and 86-146—June 1, 1986.

Y 86-147 and 86-148—June 4, 1986.

FOR FURTHER INFORMATION CONTACT: Wendy Cleland-Hamnett, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-611, 401 M Street, SW., Washington, DC 20460, (202) 382-3725.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential

version of the submission by the manufacturer on the exemptions received by EPA. The complete non-confidential document is available in the Public Reading Room E-107 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

Y 86-143

Importer. Confidential.
Chemical. (G) Isoyanate polymer with polyalkyloxy compound, substituted propanoic acid, and a diamine.
Use/Import. (S) Industrial color fixing agent for leather. Import range: Confidential.
Toxicity Data. No data submitted.
Exposure. Use: Dermal and ocular, a total of 1 worker.
Environmental Release/Disposal. Release during clean-up operations. Disposal by publicly owned treatment works (POTW) and on-site biological treatment.

Y 86-146

Manufacturer. Confidential.
Chemical. (G) Water reducible air-dry alkyd resin.
Use/Production. (S) Industrial warter reducible binder for air-dry finishes. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. No data submitted.
Environmental Release/Disposal. No data submitted.

Y 86-147

Manufacturer. E.I. duPont de Nemours and Company, Inc.
Chemical. (G) Ethylene interpolymer.
Use/Production. (G) Fast cure polymer. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. No data submitted.
Environmental Release/Disposal. No data submitted.

Y 86-148

Manufacturer. Confidential.
Chemical. (G) Polymer from poly(alkylene ether)glycol and methylene bis-cyclohexyl isocyanate.
Use/Production. (G) Coating or film. Prod., range: Confidential.
Toxicity Data. No data on the PMN substance submitted.
Exposure. Confidential.
Environmental Release/Disposal. Confidential.

Dated: May 16, 1986.

P 86-1014

Importer. American Cyanamid Company.
Chemical. (G) Substituted phosphine oxide.
Use/Import. (G) Chemical extractant. Import range: Confidential.
Toxicity Data. Acute oral: >5 g/kg; acute dermal: >2 g/kg; Irritation: Skin—Severe, Eye—Mild; Ames test: Nonmutagenic.
Exposure. Processing: A total of 10 workers, up to 4 hrs/da, up to 300 da/yr.
Environmental Release/Disposal. Minimal.

P 86-1015

Importer. American Cyanamid Company.
Chemical. (G) Substituted phosphine oxide.
Use/Import. (G) Chemical extractant. Import range: Confidential.
Toxicity Data. Acute oral: >5 g/kg; Acute dermal: >2 g/kg; Irritation: Skin—Severe, Eye—Mild; Ames test: Nonmutagenic.
Exposure. Processing: A total of 10 workers, up to 4 hrs/da, up to 300 da/yr.
Environmental Release/Disposal. Minimal.

P 86-1016

Importer. Marubeni America Corporation.
Chemical. (S) N,N-Dimethylaminopropylacrylamide.
Use/Import. (G) Coating resin for open, non-dipersive use. Import range: 10,000-100,000 kg/yr.
Toxicity Data. Acute oral: 3.9 g/kg; Acute dermal >2.0 g/kg; Irritation: Skin—Severe, Eye—Severe; Ames test: Nonmutagenic; Inhalation: 5.9 mg/ml.
Exposure. Processing: A total of 20 workers, up to 8 hrs/da.
Environmental Release/Disposal. Minimal release to water. Disposal by standard waste disposal means.

P 86-1017

Importer. Confidential.
Chemical. (G) Isocyanate polymer with polyalkyloxy compound, substituted propanic acid, and a diamine.
Use/Import. (S) Industrial color fixing agent for leather. Import range: Confidential.

Toxicity Data. No data submitted.
Exposure. Processing: Dermal, a total of 1 worker, up to 15 min/da.
Environmental Release/Disposal. Release to water. Disposal by publicly owned treatments works (POTW) and biological treatment system.

P 86-1018

Importer. Nuodex Inc.
Chemical. (G) Unsaturated polyester resin from dibasic acids and polyols.
Use/Import. (S) Industrial coatings and adhesives. Import range: 30,000–150,000 kg/yr.
Toxicity Data. Acute oral: >10,000 mg/kg; Irritation: Skin—Non-irritant, Eye—Slight.
Exposure. No data submitted.
Environmental Release/Disposal. No data submitted.

P 86-1019

Manufacturer. Confidential.
Chemical. (G) Cyclotetra(2-hydroxy-5-tert-butylbenzene).
Use/Production. (G) Destructive use. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture: A total of 10 workers.
Environmental Release/Disposal. 0.05 to 0.15 kg/batch released to land. Sent to a disposal facility.

P 86-1020

Manufacturer. Confidential.
Chemical. (G) Hydroxymethyl tetramer of substituted phenol.
Use/Production. (G) Destructive use. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture: A total of 10 workers.
Environmental Release/Disposal. 0.05 to 0.15 kg/batch released to land. Sent to a disposal facility.

P 86-1021

Manufacturer. Confidential.
Chemical. (G) Transition metal trichalcogenide.
Use/Production. (G) Sealed energy source component. Prod. range: Confidential.
Toxicity Data. Acute oral: 5.0 gm/kg; Irritation: Skin—Non-irritant, Eye—Non-irritant; Ames test: Negative.
Exposure. Manufacture: A total of 4 workers, up to 260 da/yr.
Environmental Release/Disposal. Minimal.

P 86-1022

Manufacturer. Confidential.
Chemical. (S) Polymer of acetoacetate of hydroxy ethyl methacrylate, methyl methacrylate, styrene, butyl methacrylate.
Use/Production. (G) Polymer for industrial finishing. Prod. range: 9,000–45,000 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture: Dermal and inhalation, a total of 4 workers, up to 3 hrs/da, up to 7 da/yr.
Environmental Release/Disposal. Release to air, sewer and land. Disposal by POTW and venting with 20 kg/batch incinerated.

P 86-1023

Manufacturer. Confidential.
Chemical. (S) Polymer of dipropylene glycol, diethylene glycol, ethylene glycol, trimethylol propane, phthalic anhydride, terephthalic acid, tall oil fatty acid.
Use/Production. (S) Industrial polymer for industrial metal coatings. Prod. range: 90,000–160,000 kg/yr.
Toxicity Data. Confidential.
Exposure. Manufacture: Dermal and inhalation, a total of 4 workers, up to 3 hrs/da, up to 4 da/yr.
Environmental Release/Disposal. Release to air, sewer and land. Disposal by POTW and venting with 20 kg/batch incinerated.

P 86-1024

Manufacturer. E. I. du Pont de Nemours and Company, Inc.
Chemical. (G) Acrylic polyelectrolyte.
Use/Production. (G) Open, non-dispersive. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture and processing: Dermal, a total of 11 workers.
Environmental Release/Disposal. No release. Disposal by public incineration.

P 86-1025

Manufacturer. E. I. du Pont de Nemours and Company, Inc.
Chemical. (G) Acrylic polyelectrolyte.
Use/Production. (G) Open, non-dispersive. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture and processing: Dermal, a total of 11 workers.
Environmental Release/Disposal. No release. Disposal by public incineration.

P 86-1026

Manufacturer. Confidential.
Chemical. (G) Alkyl esters.
Use/Production. (G) Intermediate, surfactant and textile processing aid. Prod. range: Confidential.
Toxicity Data. No data on the PMN substance submitted.
Exposure. Confidential.
Environmental Release/Disposal. Disposal by POTW.

P 86-1027

Manufacturer. Confidential.
Chemical. (G) Alkyl esters.
Use/Production. (G) Intermediate, surfactant and textile processing aid. Prod. range: Confidential.
Toxicity Data. No data on the PMN substance submitted.
Exposure. Confidential.
Environmental Release/Disposal. Disposal by POTW.

P 86-1028

Manufacturer. Amoco Corporation.
Chemical. (S) 2, 6-dimethyl naphthalene.
Use/Production. (G) Chemical intermediate. Prod. range: Confidential.
Toxicity Data. Acute oral: >13,430 mg/kg; Acute dermal: >3,000 mg/kg; Skin—Non-irritant, Eye—Mild.
Exposure. Confidential.
Environmental Release/Disposal. Disposal by navigable waterway.

P 86-1029

Manufacturer. Reichhold Chemicals, Inc.
Chemical. (G) Aromatic terpene phenol resin.
Use/Production. (S) Industrial tackifiers for adhesives. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture: Dermal, a total of 4 workers, up to 0.25 hrs/da, up to 100 da/yr.
Environmental Release/Disposal. 1 to 3 kg/batch to air and water. Disposal by waste water treatment, mechanical filter system and settling pond.

P 86-1030

Manufacturer. Reichhold Chemicals, Inc.
Chemical. (G) Aromatic hydrocarbons, phenol polymer.
Use/Production. (S) Industrial tackifiers for adhesives. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture: Dermal, a total of 4 workers, up to 0.25 hrs/da, up to 100 da/yr.
Environmental Release/Disposal. 3 kg/batch released to air. Disposal by mechanical filter system and settling pond.

P86-1031

Manufacturer. E. I. du Pont de Nemours and Company, Inc.
Chemical. (G) Hydroxyl containing acrylic copolymer.
Use/Production. (G) Open, non-dispersive use. Prod. range: Confidential.
Toxicity Data. No data submitted.

Exposure. Manufacture: Dermal, a total of 4 workers.
Environmental Release/Disposal. Disposal by incineration.

P 86-1555

Manufacturer. Rohm and Haas Company.
Chemical. (G) Functionalized acrylic-vinyl aromatic copolymer.
Use/Production. (G) Polymeric processing aids in a contained use. Prod range: Confidential.
Toxicity Data. No data on the PMN substance submitted.
Exposure. Confidential.
Environmental Release/Disposal. Disposal by POTW.

P 86-1553

Manufacturer. Rohm and Haas Company.
Chemical. (G) Modified acrylic-vinyl aromatic copolymer.
Use/Production. (G) Polymeric processing aids for destructive and non-destructive use. Prod. range: Confidential.
Toxicity Data. No data on the PMN substance submitted.
Exposure. Confidential.
Environmental Release/Disposal. Disposal by POTW and biological treatment system.

P 86-1554

Manufacturer. Confidential.
Chemical. (G) Moleated, phenolic rosin ester, calcium salt.
Use/Production. (G) Resin vehicle for printing inks. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. Confidential.

P 86-1555

Manufacturer. Confidential.
Chemical. (G) Polymer of aromatic diisocyanate, aliphatic diacid and alkanediols.
Use/Production. (S) Site-limited used for production of urethane elastomers. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture and use: Dermal, a total of 12 workers.
Environmental Release/Disposal. 0.4 to 1.0 kg/day released to land. Disposal by foaming a solid PUR product.

P 86-1556

Manufacturer. Confidential.
Chemical. (G) Cyanoacrylate ester polymer.
Use/Production. (G) Intermediate for adhesive. Prod. Range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. Confidential.

P 86-1557

Manufacturer. Confidential.
Chemical. (G) Polyfunctional methacrylate of polyisocyanate adduct of alkoxylated polyol.
Use/Production. (S) Graphic arts printing plate. Prod. range: Confidential.
Toxicity Data. No data on the PMN substance submitted.
Exposure. Confidential.
Environmental Release/Disposal. Confidential.

P 86-1558

Manufacturer. Confidential.
Chemical. (G) Oxime blocked polyether urethane.
Use/Production. (G) Industrial polymer used in coatings. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture and processing: Dermal, a total of 44 workers, up to 8 hrs/da, up to 260 da/yr.
Environmental Release/Disposal. 2 to 200 kg/batch released to land. Disposal by incineration, approved landfill and commercial disposer.

P 86-1559

Manufacturer. Confidential.
Chemical. (G) Polyurethane.
Use/Production. (G) Open use for industrial paint product. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture and processing: Dermal, a total of 53 workers, up to 8 hrs/da, up to 232 da/yr.
Environmental Release/Disposal. 5 to 182 kg/batch released to land. Disposal by incineration, approved landfill and commercial disposer.

P 86-1560

Manufacturer. Confidential.
Chemical. (G) Vinyl toluene alkyd.
Use/Production. (S) Industrial coatings. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Manufacture: Dermal, a total of 5 workers.
Environmental Release/Disposal. Confidential.

P 86-1561

Manufacturer. Quantum Composites, Inc.
Chemical. (G) Amine salt.
Use/Production. (G) Accelerator for cross linking resin systems. Prod. range: Confidential.
Toxicity Data. No data submitted.
Exposure. Confidential.
Environmental Release/Disposal. No data submitted.

P 86-1562

Manufacturer. Mona Industries, Inc.
Chemical. (S) Mixed mono- and di-phosphate esters of 1H-imidazole propanoic acid, 4,5-dihydro-1-(2-hydroxyethyl)-,2-undecyl mixed di- and tri-potassium salt.
Use/Production. (S) Exempt use (cosmetics), textile fiber producer finish, surfactant in fabrics and surface cleaners for industrial, commercial and consumer use. Prod. range: 8,750-39-375 kg/yr.
Toxicity Data. No data submitted.
Exposure. Manufacture: Dermal, a total of 3 workers, up to 2 hrs/da, up to 15 da/yr.
Environmental Release/Disposal. 0.2 to 2 kg/batch released to water. Disposal by POTW.

Management Advisory Group Meeting

Under Pub. L. 92-463, notice is hereby given that a meeting of the Management Advisory Group to the EPA Construction Grants Program (MAG) will be held on June 10-11, 1986, at Falmouth and the Woods Hole Oceanographic Institution in Massachusetts.

The meeting will take place at the Sheraton Hotel in Falmouth on June 10 from 9 a.m. to 5 p.m., and from 8 a.m. to 1 p.m. on June 11. The meeting will be continued at the Woods Hole Oceanographic Institution, at Woods Hole from 2 p.m. to 4:30 p.m. on June 11.

The agenda will include meetings of the MAG Task Forces on Sludge Management, Infiltration/Inflow, and the Clean Water Act Reauthorization. There will be presentations and discussion on sewage treatment in reference to the Buzzards Bay estuary and the sole source aquifer in Cape Cod. The agenda will also include briefings and discussions on other topics of current or future interest to MAG. Any member of the public wishing to make comments is invited to submit them in writing to the Executive Secretary at the meeting.

The meeting will be open to the public. For additional information, please contact Georgette Brown at (202) 382-5859.

Dated: May 16, 1986.

Rebecca W. Hanmer,

Acting Assistant Administrator for Water.

Test Marketing Exemption Applications

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA may upon application exempt any person from the premanufacturing notification requirements of section 5(a) or (b) of the Toxic Substances Control Act (TSCA) to permit the person to manufacture or process a chemical for test marketing purposes under section 5(h)(1) of TSCA. Requirements for test marketing exemption (TME) applications, which must either be approved or denied within 45 days of receipt, are discussed in EPA's final rule published in the Federal Register of May 13, 1983 (48 FR 21722). This notice, issued under section 5(h)(6) of TSCA, announces receipt of five applications for exemption, provides a summary, and requests comments on the appropriateness of granting each exemption.

DATE: Written comments by June 9, 1986.

ADDRESS: Written comments, identified by the document control number "[OPTS-59222]" and the specific TME number should be sent to: Document Control Officer (TS-790), Confidential Data Branch, Information Management Division, Office of Toxic Substances, Environmental Protection Agency, Rm. E-201, 401 M Street, SW., Washington, DC 20460, (202) 382-3532.

FOR FURTHER INFORMATION CONTACT: Wendy Cleland-Hannett, Premanufacture Notice Management Branch, Chemical Control Division (TS-794), Office of Toxic Substances, Environmental Protection Agency, Rm. E-611, 401 M Street, SW., Washington, DC 20460, (202) 382-3725.

SUPPLEMENTARY INFORMATION: The following notice contains information extracted from the non-confidential version of the submission provided by the manufacturer on the TMEs received by EPA. The complete non-confidential document is available in the Public Reading Room E-107 at the above address between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding legal holidays.

FEDERAL HOME LOAN BANK BOARD

Agency Information Collection Activities Under OMB Review; Thrift Industry Report

Dated: May 19, 1986.

AGENCY: Federal Home Loan Bank Board.

ACTION: Notice.

SUMMARY: The public is advised that the Federal Home Loan Bank Board ("Board") has submitted a revised information collection request, "Thrift Industry Report", formerly designated as "Periodic Reports of Saving & Loan, Sections A,B,C,D,E,F,G,H,I and K", to the Office of Management and Budget for expedited approval in accordance with the Paperwork Reduction Act (44 U.S.C Chapter 35).

COMMENTS: Comments on the information collection request we welcome and should be submitted within 15 days of publication of this notice in the Federal Register. Comments regarding the paperwork-burden aspects of the request should be directed to: Office of Management and Budget, Office of Information and Regulatory Affairs, Washington, DC 20503, Attention: Desk Officer for the Federal Home Loan Bank Board.

The Board would appreciate commenters sending copies of their comments to the Board.

Requests for copies of the proposed information collection request and supporting documentation are obtainable at the Board address given below: Director, Information Services Section, Office of Secretariat, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552, Phone: 202-377-6933.

FOR FURTHER INFORMATION CONTACT: Parker Jayne, Office of Examinations and Supervision, (202) 377-6486, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, DC 20552.

Jeff Sconyers,

Secretary.

BILLING CODE 6720-01-M

FEDERAL RESERVE SYSTEM

Bank of New England Corp., et al., Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.15) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received no later than June 13, 1986.

A. Federal Reserve Bank of Boston (Robert M. Brady, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *Bank of New England Corporation*, Boston Massachusetts; to acquire 100 percent of the voting shares of Consumer Savings Bank, Worcester, Massachusetts. Comments on this application must be received not later than June 16, 1986.

2. *United Vermont Bancorporation*, Rutland, Vermont; to acquire 66.9 percent of the voting shares of The Green Mountain Bank, Winhall Township, Vermont.

B. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, NW., Atlanta, Georgia 30303:

1. *Citizens and Southern Georgia Corporation*, Atlanta, Georgia, and Citizens and Southern Florida Corporation, Fort Lauderdale, Florida; to acquire 100 percent of the voting shares of Landmark Bank of Seminole County, Casselberry, Florida, a *de novo* bank.

2. *Genala Banc, Inc.*, Geneva, Alabama; to become a bank holding company by aquiring 80 percent of the voting shares of The Citizens Bank, Geneva, Alabama.

C. Federal Reserve Bank of St. Louis (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Citizen Fidelity Corporation*, Louisville, Kentucky; to acquire 100 percent of the voting shares of First Midwest Bancorp, New Albany, Indiana, and thereby indirectly acquire First Midwest Bank and Trust, New Albany, Indiana.

Board of Governors of the Federal Reserve System, May 19, 1986.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

BankEast Corp. et al.; Applications To Engage de Novo in Permissible Nonbanking Activities

The companies listed in this notice have filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c) (8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than June 13, 1986.

A. Federal Reserve Bank of Boston (Robert M. Brady, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *BankEast Corporation*, Manchester, New Hampshire; to engage *de novo* through its subsidiary BankEast Leasing Corp., Manchester, New Hampshire, in leasing personal or real property or acting as agent, broker, or advisor in leasing such property pursuant to section 225.25(b)(5) of the Board's Regulation Y.

2. *BayBanks, Inc.*, Boston, Massachusetts; to engage *de novo* through its subsidiary BayBanks Credit Corporation, Dedham, Massachusetts, in processing and servicing consumer loans pursuant to section 225.25(b)(1) of the Board's Regulation Y.

B. Federal Reserve Bank of Philadelphia (Thomas K. Desch, Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105:

1. *Meridian Bancorp*, Reading, Pennsylvania; to engage directly in the making, acquiring, servicing and soliciting of loans.

Board of Governors of the Federal Reserve System, May 9, 1986.

James McAfee,

Associate Secretary of the Board.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

Each Friday the Department of Health and Human Service (HHS) publishes a list of information collection packages it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. Chapter 35). The following are those packages submitted to OMB since the last list was published on May 16, 1986.

Public Health Service

(Call Reports Clearance Officer on 202-245-2100 for copies of packages)

Centers for Disease Control

Subject: Birth Defects and/or Genetic Disease Surveillance—Extension—(0920–0010)
Respondents: Individuals or households
Subject: Reproductive Study of Women Who Work With Video Display Terminals—New
Respondents: Individuals or households

Office of the Assistant Secretary for Health

Subject: National Hospital Discharge Survey—Extension—(0937–0004)
Respondents: State and local governments, businesses, nonprofit institutions and small businesses
OMB Desk Officer: Bruce Artim

Health Care Financing Administration

(Call Reports Clearance Officer on 301–594–8650 for copies of packages)
Subject: Disclosure of Ownership and Financial Interest Statement—HCFA–1513—Revision—(0938–0066)
Respondents: Providers
Subject: Request for Certification as a Supplier of Portable X-ray Services and the Portable X-ray Survey Report Form—HCFA 1880 and 1882—Extension—(0938–0027)
Respondents: Suppliers of portable X-ray services
Subject: Histocompatibility Testing Laboratories Survey Report Form—HCFA 445—Extension—(0938–0376)
Respondents: States
Subject: Home Health Agency—Home Health Visit Questions—HCFA–R–7—Existing Collection—
Respondents: Individuals
Subject: Corrective Action Plan (Medicaid Eligibility Quality Control)—HCFA–320—Extension—(0938–0144)
Respondents: States
OMB Desk Officer: Fay S. Iudicello

Social Security Administration

(Call Reports Clearance Officer on 301–594–5706 for copies of package)
Subject: Report to U.S. Social Security Administration by Person Receiving Benefits for Child or Adult Unable to Handle Funds, SSA–7161, and Reports to U.S. Social Security Administration, SSA—7162—Extension—(0960–0049)
Respondents: Individuals
Subject: Reconsideration Report for Disability Cessation, SSA–782—Extension—(0960–0350)
Respondents: Individuals
Subject: Cessation or Continuance of Disability or Blindness Determination and Transmittal, SSA–832—Existing Collection—
Respondents: State and local governments
Subject: Representation Payee Evaluation Report, SSA–624—Extension—(0960–0069)
Respondents: Individuals
OMB Desk Officer: Judy A. McIntosh

Copies of the above information collection clearance packages can be obtained by calling the Reports Clearance Officer on the number shown above.

Written comments and recommendations for the proposed information collections should be sent directly to the appropriate OMB Desk Officer designated above at the following address:

OMB Reports Management Branch, New Executive Office Building, Room 3208, Washington, DC 20503
Attn: (name of OMB Desk Officer).

Dated: May 20, 1986.

K. Jacqueline Hola,

Deputy Assistant Secretary for Management Analysis and Systems.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

Facilities Improvement and Repair Priority List for Fiscal Year 1986.

AGENCY: Office of Construction Management, Interior.

ACTION: Notice of facilities improvement and repair priority list for fiscal year 1986.

This notice is published in exercise of authority delegated by the Secretary of Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.

The Facility Improvement and Repair list has been prepared for fiscal year 1986 in accordance with House Report Number 98-888, page 52, "To avoid some of the problems experienced in the past year, the Committee directs the Bureau to revise the FI&R priority system by publishing in the Federal Register by October 1 of each fiscal year, the national list of projects expected to be accomplished that year within the available funds."

This notice for FY 1986 provides the approved list of FI&R projects. Construction of these projects is subject to the availability of funds. The list is based upon the Bureau's criteria for ranking projects as published in the Federal Register/Vol. 51, No. 30/ Thursday, February 13, 1986/Notice 5415:

The Projects for FY 1986 are:

1. Pierre Indian Learning Center
2. Turtle Mountain L&O Facility
3. Blackfeet Dormintory
4. Carter Seminary Airconditioning
5. Sells L&O Facility
6. Owyhee L&O Facility
7. Fort Apache L&O Facility
8. Hopi/Moencopi Day School
9. Mescalero Agency Headquarters
10. Greasewood School
11. Chi-Chil-Tah Boarding School
12. Chinle Boarding School—Phase I
13. Warm Springs Headquarters
14. Bogue Chitto Boarding School
15. Conehatta School
16. Redwater Day School
17. Choctaw Headquarters

[redacted] O. Swimmer,

Assistant Secretary—Indian Affairs.

May 13, 1986.

Bureau of Land Management

[AA-8964-A]

Alaska Native Claims Selection; English Bay Corp.

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of section 14(a) of the Alaska Native Claims Settlement Act of December 18, 1971 (ANCSA), 43 U.S.C. 1601, 1613(a), will be issued to The English Bay Corporation for approximately 1 acre. The lands involved are in the vicinity of English Bay, Alaska.

Seward Meridian, Alaska

T. 9 S., R. 16 W. (Surveyed)
Sec. 1, those lands formerly within ANCSA Sec. 3(e) application AA-8963.

A notice of the decision will be published once a week for four (4) consecutive weeks, in the *Anchorage Times*. Copies of the decision may be obtained by contacting the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513. ((907) 271-5960).

Any party claiming a property interest which is adversely affected by the decision shall have until June 23, 1986 to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management, Division of Conveyance Management (960), address identified above, where the requirements for filing an appeal can be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E shall be deemed to have waived their rights.

Joe J. Labay,

Section Chief, Branch of ANCSA Adjudication.

Endangered and Threatened Species; Receipt of Applications for Permits; California Academy of Sciences et al.

The following applicants have applied for permits to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

PRT-704241

Applicant: California Academy of Sciences, San Francisco, CA.

The applicant requests a permit to export six Asian bonytongues (*Sclerapages formosus*) to the Vancouver Public Aquarium for enhancement of propagation and survival of the species.

PRT-706875

Applicant: Native Gardens, Greenback, TN.

The applicant requests a permit to sell in interstate commerce artificially propagated Tennessee purple coneflower (*Echinacea tennesseensis*) derived from cultivated stock and plants rescued from the wild for the purpose of enhancement of propagation of the species.

PRT-707023

Applicant: Melissa Josey Gribble, Rosston, TX.

The applicant requests a permit to purchase two pairs of captive born red siskins (*Carduelis* (=*Spinus*) *cucullata*) from Pat Demko of Pittsburgh, PA, for the enhancement of propagation.

PRT-707271

Applicant: Louisiana Purchase Gardens & Zoo, Monroe, LA.

The applicant requests a permit to export one pair of captive born margays (*Felis wiedii*) to Ardastra Gardens, Nassau, Bahamas, for the purpose of enhancement of propagation.

PRT-707241

Applicant: I & K Productions, Inc. Washington, DC.

The applicant requests a permit to purchase one male and four female Asian elephants (*Elephas maximus*) from Diamond "O" Ranch, Canton, Ohio, for the purpose of enhancement of propagation.

PRT-706846

Applicant: St. Paul's Como Zoo, St. Paul, MN.

The applicant requests a permit to purchase in interstate commerce one female orangutan (*Pongo pygmaeus*) from Gladys Porter Zoo, Brownsville, TX, for the purpose of enhancement of propagation.

PRT-707005

Applicant: International Animal Exchange, Ferndale, MI.

The applicant requests a permit to purchase in interstate commerce and export to the Taipei Municipal Zoo, Taiwan a pair of ocelots (*Felis pardalis*) for the purpose of enhancement of the propagation of the species.

Documents and other information submitted with these applications are available to the public during normal business hours (7:45 am to 4:15 pm) Room 611, 1000 North Glebe Road,

Golden Gate National Recreation Area, Advisory Commission; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a meeting of the Golden Gate National Recreation Area Advisory Commission will be held at 7:30(PST) on Thursday, June 5, 1986 at Tamalpais High School Student Center, Mill Valley, California.

The Advisory Commission was established by Pub. L. 92-589 to provide for the free exchange of ideas between the National Park Service and the public and to facilitate the solicitation of advice or other counsel from members of the public on problems pertinent to the National Park Service systems in Marin, San Francisco and San Mateo Counties.

Members of the Commission are as follows:

Mr. Frank Boerger, Chairman
Ms. Amy Meyer, Vice Chair
Mr. Ernest Ayala
Mr. Richard Bartke
Ms. Margot Patterson Doss
Mr. Jerry Friedman
Ms. Daphne Green
Mr. Burr. Heneman
Mr. John Mitchell
Ms. Gimmy Park Li
Mr. Merritt Robinson
Mr. John J. Spring
Dr. Edgar Wayburn
Mr. Joseph Williams

The main agenda items are: review of the environmental assessment of the Eucalyptus Removal Program for GGNRA and consideration of the staff report and the Marin Committee recommendations on the Coast Guard's proposed move to East Fort Baker.

The meeting is open to the public. Any member of the public may file with the Commission a written statement concerning the matters to be discussed.

Persons wishing to receive further information on this meeting or who wish to submit written statements may contact General Superintendent Brian O'Neill, Golden Gate National Recreation Area, Building 201, Fort Mason, CA 94123.

Minutes for the meeting will be available for public inspection by July 5, 1986, in the office of the General Superintendent, Golden Gate National Recreation Area, Fort Mason, San Francisco, CA 94123.

Dated: April 29, 1986.

BILLING CODE 4310-70-M

Office of Surface Mining Reclamation and Enforcement

Availability of Decision and Statement of Reasons for Decisions of Red Rim Unsuitability Petition

SUMMARY: The Director of the Office of Surface Mining Reclamation and Enforcement (OSMRE) has reached a decision on a petition to designate Federal lands as unsuitable for surface coal mining operations in the Red Rim area of Wyoming.

ADDRESSES: Copies of the Statement of Decision and the Statement of Reasons for the decision may be obtained from Mark Boster, Chief, Division of Permit and Environmental Analysis, Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Avenue NW., Washington, DC 20240, or Allen D. Klein, Administrator, Western Technical Center, Office of Surface Mining Reclamation and Enforcement, Brooks Tower, Second Floor, 1020 15th Street, Denver, Colorado 80202.

FOR FURTHER INFORMATION CONTACT: Mark Boster, Chief, Division of Permit and Environmental Analysis; Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Avenue NW., Washington, DC 20240; Telephone (202) 343-1480.

SUPPLEMENTARY INFORMATION: The National Wildlife Federation and the Wyoming Wildlife Federation filed a petition with OSMRE on September 27, 1982, to designate approximately 9,000 acres of Federal lands in the Red Rim area of Wyoming as unsuitable for surface coal mining operations. The Federations also petitioned the State of Wyoming to designate approximately 2,000 acres of private lands within the Red Rim area as unsuitable for surface coal mining operations. The Federal petition was filed in accordance with section 522 of the Surface Mining Control and Reclamation Act of 1977 (SMCRA) and its implementing regulations at 30 CFR Part 769. The petition alleged: (1) That reclamation of the area was not technologically and economically feasible; and (2) that Federal lands within the area were fragile lands, as defined at 30 CFR 762.5. Pursuant to 30 CFR Part 769, OSMRE analyzed the allegations of the petition, and on January 22 and 23, 1985, held a public hearing. OSMRE published the final petition evaluation document and environmental impact statement (PED/EIS) in November 1985.

A copy of the Statement of Decision signed by the Director appears as an appendix to this notice. Additional copies of the Statement of Decision and copies of the Statement of Reasons (not attached to this notice) are available at no cost from the Offices listed above under ADDRESSES. OSMRE has sent copies of these documents to all interested parties of record.

Additional information on the petition can be found in Federal Register notices of January 5, 1983 (Receipt of a Complete Petition for Designation of Lands as Unsuitable for Surface Coal Mining Operations, 48 FR 523); June 29, 1983 (Notice of Intent to Prepare Environmental Impact Statement, 48 FR 29961); October 20, 1983 (Notice of public hearing, 48 FR 48724); January 4, 1984 (notice of postponement of the public hearing, 49 FR 521); March 5, 1984 (Notice of rescheduling of public hearing, 49 FR 8092); April 4, 1984 (Notice of postponement of public hearing, 49 FR 13440); and December 19, 1984 (Notice of public hearing, 49 FR 49366).

Dated: May 19, 1986.

Ted D. Christensen,

Director, Office of Surface Mining Reclamation and Enforcement.

Statement of Decision

Under section 522 of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), 30 U.S.C. 1272, the Office of Surface Mining Reclamation and Enforcement (OSMRE) was petitioned by the National Wildlife Federation and the Wyoming Wildlife Federation to designate certain Federal lands in the Red Rim area of southcentral Wyoming as unsuitable for all types of surface coal mining operations. The Federations also petitioned the State of

Wyoming with respect to certain private lands in the same area. Rocky Mountain Energy Company, the owner of private coal underlying the petition area, and Taylor Lawrence, the owner of the majority of private surface comprising the area and the lessee of the majority of the Federal grazing allotments within it, intervened in opposition to the petition.

As required by sections 522(c) and 522(d) of SMCRA, OSMRE sought public comment on the petition. With the State of Wyoming, OSMRE held a public hearing in Rawlins, Wyoming, which is located near the petition area. OSMRE also prepared a detailed petition evaluation document/environmental impact statement (PED/EIS) evaluating the petition and all reasonable decision alternatives.

In reaching my decision on the Red Rim unsuitability petition, I have considered all of the information in the Administrative Record for this proceeding, including the PED/EIS, the recommendation of the Federal land management agency, and the information provided by the petitioners, intervenors, government agencies, the State of Wyoming, industry and the public. Based upon this information, I have reached the following decision:

1. I find that, as the petitioners allege, Federal lands within the petition area are fragile lands which surface coal mining operations would affect, potentially resulting in significant damage to important natural systems. The fragile lands and important natural systems at issue in the petition include portions of the Red Rim critical winter range delineated by the Wyoming Game and Fish Department for the Baggs Herd of pronghorn. In accordance with section 522(a)(3) of SMCRA, the decision whether to designate those fragile Federal lands within the petition area as unsuitable for certain types of surface coal mining operations is subject to my discretion.

2. Exercising this discretion, I decline to designate all or any part of the Red Rim petition area as unsuitable for surface coal mining operations, but hereby require that the approval of any Federal mining plan for the petition area include a condition that restricts from development the pronghorn winter range located within the south portion of the petition area until reclamation of pronghorn winter habitat in the north portion of the petition area has been demonstrated to be successful.

3. Reclamation in the north portion of the petition area shall be demonstrated to be successful when the Department of the Interior finds in writing that the operator/lessee has (1) demonstrated its capability to restore the carrying capacity of the critical winter range, (2) met the requirements of SMCRA, the applicable regulatory program, and the Bureau of Land Management's (BLM's) land-use planning decisions for the petition area, and (3) demonstrated that postmining vegetation would provide for pronghorn forage production equal to or greater than premining conditions. The postmining vegetation (composition and diversity (structural and species-specific)) must approximate premining conditions and be self-renewing when subjected to foraging use. The north portion of the petition area consists of secs. 24, 26, and 34, T. 21 N., R. 89 W.; secs. 4, 6, 8, and 18, T. 20 N., R. 89 W.; and secs. 12, 14, 22, and 24, T. 20 N., R. 90 W. The south portion of the petition area consists of secs. 26, 28, 32, and 34, T. 20 N., R. 90 W.; secs. 4, 6, 8, 18, and 30, T. 19 N., R. 90 W.; and secs. 24 and 26, T. 19 N., R. 91 W.

4. I find that there is insufficient evidence to demonstrate that, as the petitioners allege, reclamation of surface coal mining operations in the petition area pursuant to the requirements of SMCRA is not technologically and economically feasible. I, therefore, decline to designate all or any part of the Red Rim petition area as unsuitable for either surface or underground coal mining operations based on the technological and economic feasibility criterion of section 522(a)(2) of SMCRA.

My *Statement of reasons* explains the basis for my decision not to designate the Red Rim petition area unsuitable for either surface or underground coal mining operations. This decision is final on the date signed. Any appeal from this decision must be filed within 60 days of that date in the United States District Court for the District of Wyoming, as provided in section 526(a)(1) of SMCRA. Copies of this decision will be sent by certified mail to all parties to this proceeding.

Dated: May 19, 1986.

Jed D. Christensen,

Director, Office of Surface Mining Reclamation and Enforcement.

BILLING CODE 4310-05-M

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development

Housing Guaranty Program; Panama, Investment Opportunity

The Agency for International Development (A.I.D.) has authorized the guaranty of a loan for the Republic of Panama as part of A.I.D.'s development assistance program. The proceeds of this loan will be used to finance shelter projects for low income families in the Republic of Panama. The name and address of the representative of the Borrower to be contacted by interested U.S. lenders or investment bankers, the amount of the loan and project number are indicated below:

Republic of Panama

Project: 525-HG-012—$10,000,000.00

Attention: Dr. Eduardo Dudley, Director

Ministry of Planning and Economic Policy

Apartado 2994, Zona 3, Panama, Republic of Panama, Telephone: 69-4962 or 69-2169

Telex: 3638 (System: Intel)

Interested investors should telegram their bids to the Borrower's representative on June 3, 1986 but no later than 12:00 noon Eastern Standard Time. Bids should be open at least 48 hours. Copies of all bids should be simultaneously sent to the following addresses:

Mr. William Gelman, RHUDO/PSA, USAID/Panama, Ave. Manuel Espinosa Batista, Apartado 0959, Panama 5, Republic of Panama

Telex: c/o American Embassy, USAID/Panama, Panama City, Republic of Panama

Michael G. Kitay, Agency for International Development, GC/PRE, Room 3208 N.S., Washington, D.C. 20523

Telex No.: 892703 AID WSA.

Each proposal should consider the following terms:

(a) *Amount:* U.S. $10.0 million. The borrowing should be so structured that the sum of the principal disbursed to the Borrower and interest unpaid, accrued and capitalized during the grace period should not exceed $10.0 million.

(b) *Term:* Up to 30 years.

(c) *Grace Period on Principal:* 10 years.

(d) *Grace Period on Interest:* Proposals should be made with a grace period up to three years on interest payments. Interest earned during the grace period will be capitalized and added to the principal to be amortized starting at the end of the ten year grace period for payments on principal.

(e) *Interest Rate:* Proposals should include both fixed rate and variable rate alternatives on interest. An option for Borrower to convert from variable to fixed interest rate should be maintained.

(f) *Draw Down:* Net proceeds from borrowing should be disbursed to Borrower upon signing through an escrow account. Notwithstanding, proposals with disbursements of 50 percent of borrowing's net proceeds upon signing and the remaining 50 percent to be disbursed six months later will be welcome.

(g) *Prepayment:* Proposals should include the possibility of partial or total prepayment of the loan by Borrower.

(h) *Investment Expense:* Borrower has agreed to pay for all investment expenses, fees, and costs at closing from the proceeds of the loan. All such costs, fees, and commissions shall be clearly specified in each proposal.

Selection of investment bankers and/or lenders and the terms of the loan are initially subject to the individual discretion of the Borrower and thereafter subject to approval by A.I.D. The lender and A.I.D. shall enter into a Contract of Guaranty, covering the loan. Disbursements under the loan will be subject to certain conditions required of the Borrower by A.I.D. as set forth in agreements between A.I.D. and the Borrower.

The full repayment of the loans will be guaranteed by A.I.D. The A.I.D. guaranty will be backed by the full faith and credit of the United States of America and will be issued pursuant to authority in Section 222 of the Foreign Assistance Act of 1961, as amended (the "Act").

Lenders eligible to receive an A.I.D. guaranty are those specified in Section 238(c) of the Act. They are: (a) U.S. citizens; (2) domestic U.S. corporations, partnerships, or associations substantially beneficially owned by U.S. citizens; (3) foreign corporations whose share capital is at least 95 percent owned by U.S. citizens; and, (4) foreign partnerships or associations wholly owned by U.S. citizens.

To be eligible for an A.I.D. guaranty, the loans must be repayable in full no later than the thirtieth anniversary of the disbursement of the principal amount thereof and the interest rates may be no higher than the maximum rate established from time to time by A.I.D.

Information as to the eligibility of investors and other aspects of the A.I.D. housing guaranty program can be obtained from:

Director, Office of Housing and Urban Program, Agency for International Development, Room 3208 N.S., Washington, D.C. 20523, Telephone: (202) 647-3662.

Dated: May 21, 1986.

Mario Pita,

Deputy Director, Office of Housing and Urban Programs.

BILLING CODE 4116-01-M

DEPARTMENT OF JUSTICE

Lodging of Amended Consent Decree Pursuant to the Clean Water Act; Saline Sewer Co.

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on May 14, 1986, a proposed Amended Consent Decree in *United States* v. *Saline Sewer Company*, Civil Action No. 80-0948C(C), was lodged with the United States District Court for the Eastern District of Missouri. The proposed decree concerns violations by defendant of the Consent Decree entered on December 21, 1981, by discharging pollutants in excess of specified effluent limitations, by discharging pollutants from unpermitted locations, and by failing to comply with the implementation schedule of said Decree. The proposed Amended Decree imposes a civil penalty of one hundred twenty seven dollars ($127.00) and requires Saline to undertake and complete a program to maintain compliance with the Clean Water Act and the State of Missouri Clean Water Law.

The Department of Justice will receive for a period of thirty (30) days from the date of publication comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Divison, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Saline Sewer Company*, D.J. Ref. 90-5-1-1-1323.

The proposed consent decree may be examined at the Office of the United States Attorney, Room 414, U.S. Court and Custom House, 114 Market Street, St. Louis, MO. 63101, and at the Region VII Office of the Environmental Enforcement Section, Land and Natural Resources Division, Department of Justice, Room 1515. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy, please enclose a check in the amount of $3.60 (10 cents per page reproduction cost) payable to the Treasurer of the United States.

F. Henry Habicht II,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Antitrust Division

Proposed Termination of Final Judgment; Battery Council International et al.

Notice is hereby given that Battery Council International (as successor to the Association of American Battery Manufacturers), Sears, Roebuck and Co., Globe Battery Division of Johnson Controls, Inc. (formerly Globe-Union, Inc.), B.F. Goodrich Company, Goodyear Tire & Rubber Co., Inc., Firestone Tire & Rubber Company, NL Industries, Inc. (formerly National Lead Company), Wickes Companies, Inc. (as successor to Gamble Skogmo, Inc.), Western Auto Supply Co., Montgomery Ward & Co., and Exide Corporation (purchaser of Willard Storage Battery Co.) have filed with the United States District Court for the Western District of Missouri a motion to terminate the final judgment in *United States* v. *The Association of American Battery Manufacturers, et al.*, Civil No. 6199; and the Department of Justice ("Department"), in a stipulation also filed with the court, has consented to termination of the judgment, but has reserved the right to withdraw its consent for at least seventy (70) days after the publication of this notice. The complaint in this case (filed on February 6, 1950) alleged that the defendants had combined and conspired to monopolize the manufacture and sale of automobile batteries.

The judgment (entered on December 10, 1953) dissolved the Lead Disposal Company and limited membership in the defendant association to battery manufacturers. In addition the defendants were enjoined from agreeing to fix prices for the sale of used batteries sold to third persons, to divide, allocate, or assign customers of territories, to sell to any purchaser approved or designated by any person other than the seller, to restrict, hinder, or prevent the movement of used batteries to battery rebuilders, to sell or provide for the sale of used batteries or the lead salvaged therefrom only to certain designated third persons, to require or cause the destruction of used batteries, and to collect, compile, or disseminate any statistics, figures, or percentages on used batteries sold by or collected from a particular soure or the amount of lead salvaged therefrom.

The Department has filed with the court a memorandum setting forth the reasons why the Department believes that termination of the judgment would serve the public interest. Copies of the complaint and final judgment, the defendants' motion papers, the stipulation containing the Government's consent, the Department's memorandum and all further papers filed with the court in connection with this motion will be available for inspection in the Legal Procedure Unit of the Antitrust Division, Room 7233, Department of Justice, 10th Street and Pennsylvania Avenue NW., Washington, DC 20530 (telephone 202-633-2481), and at the office of the Clerk of the United States District Court for the Western District of Missouri, Western Division, Federal Courthouse, 811 Grand Avenue, Kansas City, Missouri 64106. Copies of any of these materials may be obtained from the Legal Procedure Unit upon request and payment of the copying fee set by Department of Justice regulations.

Interested persons may submit comments regarding the proposed termination of the judgment to the Department. Such comments must be received within sixty days, and will be filed with the court. Comments should be addressed to John W. Clark, Chief, Professions and Intellectual Property Section, Antitrust Division, Department

of Justice, Washington, DC 20530 (telephone 202–724–6335).

Dated: May 13, 1986.

Joseph H. Widmar,

Director of Operations, Antitrust Division.

BILLING CODE 4410–01–M

DEPARTMENT OF LABOR

Labor Advisory Committee for Trade Negotiations and Trade Policy; Steering Subcommittee; Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92–463 as amended), notice is hereby given of a meeting of the Steering Subcommittee of the Labor Advisory Committee for Trade Negotiations and Trade Policy.

Date, time and place: June 10, 1986, 9:30 a.m., Rm S4215 A&B Frances Perkins, Department of Labor Building, 200 Constitution Avenue, NW., Washington, DC 20210

Purpose: To discuss trade negotiations and trade policy of the United States.

This meeting will be closed under the authority of section 10(d) of the Federal Advisory Committee Act. The Committee will hear and discuss sensitive and confidential matters concerning U.S. trade negotiations and trade policy.

For further information, contact: Fernand Lavallé, Executive Secretary, Labor Advisory Committee, Phone: (202) 523–6565.

Signed at Washington, DC, this 15th day of May 1986.

Robert W. Searby,

Deputy Under Secretary, International Affairs.

[FR Doc. 86–11716 Filed 5–22–86; 8:45 am]

BILLING CODE 4510–28–M

Employment Standards Administration, Wage and Hour Division

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR Part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersede as decisions thereto, contain no expiration dates and are effective from their date of notice in the Federal Register, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., Room S–3504, Washington, DC 20210.

Modifications to General Wage Determination Decisions

The numbers of the decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume, State, and page number(s). Dates of publication in the Federal Register are in parentheses following the decisions being modified.

North Dakota:
ND86-1 (Jan. 3, 1986) ..... p.204.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 60 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783–3238.

When ordering subscriptions(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. The subscription cost is $277 per volume. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC this 16th day of May 1986.

James L. Valin,

Assistant Administrator.

BILLING CODE 4510-27-M

Mine Safety and Health Administration

[Docket No. M–86–44–C]

Pontiki Coal Corp.; Petition for Modification of Application Mandatory Safety Standard

Pontiki Coal Corporation, P.O. Box 190, Lovely, Kentucky 41231 has filed a petition to modify the application of 30 CFR 75.1710 (cabs and canopies) to its Pontiki No. 1 Mine (I.D. No. 15–08413) located in Martin County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that cabs or canopies be installed on the mine's electric equipment.

2. Petitioner states that the heights in the mine are inconsistent ranging from 36 to 72 inches, with many dips and hills.

3. Installation of cabs or canopies on the equipment would limit the operator's vision and could damage energized cables hung overhead.

4. For these reasons, petitioner requests a modification of the standard in mining heights less than 48 inches.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before June 23, 1986. Copies of the petition are available for inspection at that address.

Dated: April 22, 1986.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

[FR Doc. 86–11715 Filed 5–22–86; 8:45 am]

BILLING CODE 4510-43-M

[Docket No. M–86–47–C]

Whitaker Coal Corp.; Petition for Modification of Application of Mandatory Safety Standard

Whitaker Coal Corporation, P.O. Box 5001, Hazard, Kentucky 41701 has filed a petition to modify the application of 30 CFR 75.305 (weekly examinations for hazardous conditions) to its EAS No. 1 Mine (I.D. No. 15–02085) located in Perry County, Kentucky. The petition is filed under section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that return aircourses be examined in their entirety on a weekly basis.

2. Due to hazardous roof conditions and the length and age of the workings it is hazardous for miners to make the weekly examinations.

3. As an alternate method petitioner proposes to establish ventilation check points at specific locations.

4. For these reasons, petitioner requests a modification of the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before June 23, 1986. Copies of the petition are available for inspection at that address.

Dated: April 22, 1986.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

BILLING CODE 4510-43-M

Pension and Welfare Benefits Administration

[Prohibited Transaction Exemption 86–64; Exemption Application No. D–6167 et al.]

Grant of Individual Exemptions; Intrec, Inc., Money Purchase Pension Plan, et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Grant of individual exemptions.

SUMMARY: This document contains exemptions issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Notices were published in the Federal Register of the pendency before the Department of proposals to grant such exemptions. The notices set forth a summary of facts and representations contained in each application for exemption and referred interested persons to the respective applications for a complete statement of the facts and representations. The applications have been available for public

inspection at the Department in Washington, DC. The notices also invited interested persons to submit comments on the requested exemptions to the Department. In addition the notices stated that any interested person might submit a written request that a public hearing be held (where appropriate). The applicants have represented that they have complied with the requirements of the notification to interested persons. No public comments and no requests for a hearing, unless otherwise stated, were received by the Department.

The notices of pendency were issued and the exemptions are being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Statutory Findings

In accordance with section 408(a) of the Act and/or section 4975(c)(2) of the Code and the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975), and based upon the entire record, the Department makes the following findings:

(a) The exemptions are administratively feasible;

(b) They are in the interests of the plans and their participants and beneficiaries; and

(c) They are protective of the rights of the participants and beneficiaries of the plans.

[Prohibited Transaction Exemption 86–64; Intrec, Inc. Money Purchase Pension Plan and Intrec, Inc. Defined Benefit Pension Plan (the Plans) Located in Santa Monica, California Exemption Application Nos. D–6167 and D–6168]

Exemption

The restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c) (A) through (E) of the Code, shall not apply to the sale for cash by the Plans of certain real property to Questor, Inc., a party in interest with respect to the Plans, provided that the price received is not less than the fair market value of the real property on the date of the sale, and provided further that the net cash proceeds to the Plans are at least equal to the Plans' cash outlay for the property to the date of sale plus interest on funds advanced by the Plans at 1% per annum over the 1-year Treasury Bill rate on the date of advance.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on March 18, 1986 at 51 FR 9292.

For Further Information Contact: Joseph L. Roberts III of the Department, telephone (202) 523–8194. (This is not a toll-free number.)

Mandel-Kahn Industries, Inc. Profit Sharing Plan (the Plan) Located in Houston, Texas

[Prohibited Transaction Exemption 86–65; Exemption Application No. D–6450]

Exemption

The restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the loans of money (the Loans) by the Plan to its sponsor, Mandel-Kahn Industries, Inc. (the Company), nor to the personal guarantees of the Company's obligation for the term of the Loans by Joel H. Mandel and Jack B. Kahn, parties in interest with respect to the Plan.

Effective Date: This exemption is effective February 10, 1986.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on March 18, 1986 at 51 FR 9293.

For Further Information Contact: Joseph L. Roberts III of the Department, telephone (202) 523–8194. (This is not a toll-free number.)

[Prohibited Transaction Exemption 86–66; Exemption Application No. D–6561]

Exemption

The restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the sale by the Plan of a parcel of real estate located at 5012 South Third Street, Louisville, Kentucky (the Property) to Shoney's, Inc. for $282,000 in cash, provided such amount is not less than the fair market value of the Property on the date of the sale.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption refer to the notice of proposed exemption published on April 2, 1986 at 51 FR 11370.

For Further Information Contact: Gary H. Lefkowitz of the Department, telephone (202) 523–8881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(3) The availability of these exemptions is subject to the express condition that the material facts and representations contained in each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 20th day of May 1986.

Elliot I. Daniel,

Assistant Administrator for Regulations and Interpretations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

[FR Doc. 86–11717 Filed 5–22–86; 8:45 am]

BILLING CODE 4510–29–M

[Application No. D-6170]

Withdrawal of the Proposed Exemption Involving Kenneth M. Spain, D.D.S., M.S., P.C. Pension Plan (the Plan) Located in Bozeman, MT

In the Federal Register dated February 21, 1986 (51 FR 6336), the Department of Labor published a notice of pendency of a proposed exemption from the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 and from certain taxes imposed by the Internal Revenue Code of 1954. The notice of pendency concerned a proposed purchase by the Plan of a parcel of unimproved real property from Donna M. Spain, a trustee of the Plan.

By letter dated March 31, 1986, the applicant requests that the exemption application be withdrawn.

Accordingly, the notice of pendency is hereby withdrawn.

Signed at Washington, DC, this 9th day of May 1986.

Elliot I. Daniel,

Assistant Administrator for Regulations and Interpretations, Pension and Welfare Benefits Administration.

[FR Doc. 86-11718 Filed 5-22-86; 8:45 am]

BILLING CODE 4510-29-M

[Application No. D-6121 et al.]

Proposed Exemptions; Wynn & Graff, Inc. Profit Sharing Plan, et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Notice of proposed exemptions.

SUMMARY: This document contains notices of pendancy before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1954 (the Code).

Written Comments and Hearings Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemptions, unless otherwise stated in the Notice of Pendancy, within 45 days from the date of publication of this Federal Register Notice. Comments and requests for a hearing should state the reasons for the writer's interest in the pending exemption.

ADDRESS: All written comments and requests for a hearing (at least three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Regulations and Interpretations, Room N-5669, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210. Attention: Application No. stated in each Notice of Pendency. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefit Programs, U.S. Department of Labor, Room N-4677, 200 Constitution Avenue, NW., Washington, DC 20210.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the Federal Register. Such notice shall include a copy of the notice of pendency of the exemption as published in the Federal Register and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of pendency are issued by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

Wynn and Graff, Inc. Profit Sharing Plan (the Profit Sharing Plan) and the Wynn and Graff, Inc. Pension Plan (the Pension Plan; Collectively, the Plans) Located in Nashville, Tennessee

[Application No. D-6121]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the proposed exemption is granted, the restrictions of section 406(b)(2) of the Act shall not apply to the June 29, 1979 cash sale by the Pension Plan to the Profit Sharing Plan of an undivided, one-half collective interest (the Interest) in certain real property (the Real Property) for $150,000, provided the price paid for the Interest was not less than its fair market value at the time the transaction was consummated.

In addition, if the proposed exemption is granted, the restrictions of section 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the proposed cash sale by the Profit Sharing Plan to Wynn and Graff, Inc. (the Employer) of the Real Property, for the total consideration of $450,000, provided the price paid for the Real Property is not less than its fair market value at the time the transaction is consummated.

EFFECTIVE DATE: If the proposed exemption is granted, it will be effective June 29, 1979 with respect to the sale to the Profit Sharing Plan by the Pension Plan of the Interest in the Real Property.

Summary of Facts and Representations

1. The Plans, which share common participants, consist of the Pension Plan and the Profit Sharing Plan. As of August 15, 1985, the Pension Plan had 40 participants and total assets having a fair market value of $755,420. Also on that date, the Profit Sharing Plan had 44 participants and total assets having a fair market value of approximately $1,154,971. The applicant represents that the Plans are not parties in interest with respect to each other within the meaning of section 3(14) of the Act.

2. The trustee of the Plans (the Trustee) is the Third National Bank in Nashville located in Nashville, Tennessee. The Trustee makes investment decisions for the Plans. The Employer, which is engaged in the wholesale business of upholstery, maintains its principal place of business at 223-229 Boscobel Street, Nashville, Tennessee.

3. Four parcels or improved and unimproved property comprise the Real Property. On March 15, 1985, the Profit Sharing Plan acquired two parcels of the Real Property from Wynn Properties, Inc. (Wynn Properties), a subsidiary of the Employer. On June 30, 1985, Wynn Properties sold a third parcel of the Real Property to the Profit Sharing Plan for $2,200. On August 11, 1986, the Profit Sharing Plan sold an undivided one-half interest in the three parcels of the Real Property to the Pension Plan. On

December 28, 1973, the Employer sold an undivided one-half interest in a fourth parcel of the Real Property to the Profit Sharing Plan and an undivided one-half interest in the same parcel to the Pension Plan for the total consideration of $98,167.

4. On December 28, 1973, the Plans executed a formal lease (the Lease) of the Real Property to the Employer for a term of 15 years. The Lease, which became effective on January 1, 1974, provided for an annual rental of $30,000 for the first five years. On January 1, 1979 and January 1, 1984, the annual rental was increased to $33,000 and $36,000, respectively. The Lease has required the Employer to pay all taxes assessed against its business as well as insurance premiums, utilities and repair costs.[1]

5. On June 29, 1979, the Profit Sharing Plan acquired the Pension Plan's collective Interest in the Real Property for $150,000. The purchase price, which was paid in cash, was determined to be the fair market value of the Interest under the terms of an appraisal of the Real Property performed on January 5, 1979 by Mr. Frank W. Bainbridge, M.A.I., S.R.P.A., an independent appraiser from Nashville, Tennessee. The Profit Sharing Plan and the Pension Plan incurred no real estate fees or commissions as a result of the sale. Further, at the time of the sale, the Trustee determined that it was in the best interests of the Profit Sharing Plan and the Pension Plan that the Profit Sharing Plan purchase from the Pension Plan the Interest. Following the sale, the Profit Sharing Plan became the exclusive lessor to the Employer.

6. The Employer desires to terminate its existing leasing arrangement with the Profit Sharing Plan by purchasing the Real Property for cash in the amount of $450,000. The Profit Sharing Plan will not be required to pay any real estate fees or commissions in connection with the proposed transaction.

7. The value of the Real Property was initially established on January 6, 1984 by Mr. Joseph M. Draper, M.A.I. (Mr. Draper), an independent appraiser from Nashville, Tennessee. Based on data contained in his appraisal report, Mr. Draper placed the fair market value of the Real Property at $425,000 and the net fair market rental value of the Real Property at $51,000 per annum. In an appraisal report dated May 23, 1985, two independent M.A.I. appraisers, Messers. Marvin A. Maes and James L. Harper, also from Nashville, Tennessee, revalued the Real Property at $450,000 as of March 6, 1985 and established its fair market rental value at $56,000 per annum.

8. In addition to purchasing the Real Property, the Employer states that at the time of closing, it will pay the Profit Sharing Plan $17,296. (This amount reflects the difference between the rentals that have been paid under the Lease at the rate of $3,025 per month from July 1, 1984 through June 30, 1985 and the rental rate as determined by the 1984 and 1985 appraisals.) The Employer also represents that for the period July 1, 1985 to the date of closing, it will pay the Profit Sharing Plan an amount representing the difference between the rent required under the Lease and the fair market rental value of the Real Property as determined by the 1985 appraisal. The Employer further states that at closing, it will pay the Profit Sharing Plan an amount reflecting interest on the rental deficiencies. Finally, the Employer represents that it will pay any excise taxes that may be owed to the Internal Revenue Service (the Service) by reason of the leasing of the Real Property within 60 days of the granting of the exemption.

9. In summary, it is represented that the transactions have satisfied or will satisfy the criteria of section 408(a) of the Act because: (a) The June 1979 sale of the Interest by the Pension Plan to the Profit Sharing Plan was made pursuant to an independent appraisal and a determination by the Trustee that the sale was in the best interests of the Plans; (b) the prospective sale of the Real Property by the Profit Sharing Plan to the Employer will be a one-time transaction for cash; (c) the Profit Sharing Plan will not incur any real estate fees or commissions in connection with the proposed sale; (d) the purchase price for the Real Property will be based on its most recent appraised value as determined by an independent appraiser; (e) at the time of closing, the Employer will pay the Profit Sharing Plan all deficient rent plus interest with respect to the leasing of the Real Property; and (f) the Employer will pay the Service all applicable excise taxes which may be due within 60 days of the granting of the exemption.

For further Information Contact: Ms. Jan D. Broady of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

[1] The applicant states that the Lease has satisfied the requirements of section 414(c)(2) of the Act and as such, it believes the transaction is statutorily exempt from the restrictions of section 406 and 407(a) of the Act. However, the Department expresses no opinion on whether these conditions of section 414(c)(2) have been satisfied.

M&M Metals, Inc. Profit Sharing Plan (the Profit Sharing Plan) and Beryl Merritt Money Purchase Pension Plan (the Money Purchase Plan; collectively, the Plans) Located in Cincinnati, Ohio

[Application Nos. D-6572 and D-6573]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 28, 1975). If the exemption is granted the restrictions of section 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to (1) the proposed lease of a certain portion of a parcel of improved real property (the Property) by the Plans to M&M Metals International, Inc. (M&M Metals), the sponsor of the Profit Sharing Plan, provided that the terms of the lease are at least as favorable to the Plans as an arm's-length transaction with an unrelated party; and (2) the proposed sale of the Property to M&M Metals pursuant to an option to purchase the Property under the lease, provided that the sales price is no less than the fair market value of the Property on the date of sale.

Summary of Facts and Representations

1. The Plans are defined contribution plans. The Profit Sharing Plan has only one participant, Mr. Jerry Mellman (Mr. Mellman), and total plan assets of $584,966.03 as of February 28, 1986. The Money Purchase Plan also has only one participant, Mr. Beryl Merritt (Mr. Merritt), and total plan assets of $1,401,164 as of October 31, 1985. Mr. Mellman and Mr. Merritt are the trustees of their respective Plans. M&M Metals is an Ohio corporation engaged in the business of the recycling metal and selling scrap. Mr. Mellman and Mr. Merritt each own one-third of the outstanding stock of M&M Metals.

2. The Property consists of three buildings and an adjacent parking lot located at 841 Delway Street, Cincinnati, Ohio. The Plans purchased the Property in May, 1986 from the Seybold Company, an unrelated party, for $75,000. The Plans have incurred a total cost, including the purchase and the subsequent construction of a new building, of approximately $275,000 with respect to the Property. The applicant represents that there has been substantial deterioration to the Property and the surrounding neighborhood since

the time of purchase. The Property was sold on October 16, 1981 to Sigma-Tri-State Industries, Inc., another unrelated party, for $197,000, and carried a mortgage of $140,000. The mortgage was defaulted upon and the Property had to be reacquired by deed in lieu of foreclosure in December 1982.

The applicant states that a portion of the Property, consisting of an office building of approximately 2,000 square feet, another building containing approximately 8,400 square feet, and the land between the two buildings, is currently being leased to Tom Butcha, Inc., an unrelated third Party, (the Butcha Lease) at an annual rental of $15,000. The applicant states further that the remaining portion of the Property has been vacant for many months with no prospective tenants. M&M Metals proposes to lease the portion of the Property currently vacant (The Vacant Parcel), consisting of a small concrete block building and an adjacent parking lot.

3. The Property was appraised on November 1, 1985 by Mr. M. Robert Garfield, Executive Vice President of West Shell, Inc. (Mr. Garfield), an independent real estate appraiser in Cincinnati, Ohio, as having a fair market value of $200,000. Mr. Garfield represents that the fair market rental value for the Vacant Parcel would be $12,000 per year. Thus, Mr. Garfield states that the $15,000 per year from the Butscha Lease and the potential $12,000 per year for the Vacant Parcel would yield a $27,000 per annum gross return for the Property, which compares favorably with similar commercial properties in the area.

4. The applicant represents that the Vacant Parcel will be leased to M&M Metals for $12,000 per year in accordance with Mr. Garfield's appraisal. The proposed lease (the Lease) will be for a five year term with no renewals. M&M Metals, as lessee, will have an option to purchase the Property (the Option) at any time during the five year term. The applicant states that the Lease will provide that the purchase of the Property pursuant to the Option will be for cash at a price no less than the fair market value of the Property on the date that the Option is exercised, as established by an independent qualified appraiser. The Lease will provide further that M&M Metal will have a right of first refusal upon ten days' notice of a sale of the Property to the third party that will allow M&M Metals to buy the Property for cash at the terms under which the Plans propose to sell the Property to such third party. In addition, M&M Metals will pay for all insurance and taxes on the Property under the Lease and all repairs not required to be paid under the Butscha Lease.

5. The applicant states that the transaction would be in the best interests of the Plans and their respective participants because it would allow the utilization of the Vacant Parcel and enable the Property to be sold in the future at fair market value. The applicant represents that since the price a potential buyer of commercial property is willing to pay is a function of the rental income that property is producing, the current inability of the Plans to fully rent the Property would likely produce an inadequate price if the Property were to be listed for sale. The applicant believes that it would be benefical to the Plans if M&M Metals decided to exercise the Option to be contained in the Lease, since the sales price under the Option would be the fair market value for the Property as established by an independent appraiser. The Plans would thereby reduce their risk from the investment in the Property and could use the proceeds from the sale of the Property to achieve greater diversification in their investments. The Plans will pay no commissions or other expenses with respect to the sale of the Property.

6. The Profit Sharing Plan's one-half ownership interest in the Property represents only approximately 17 percent of its assets, based on the fair market value of the Property as appraised by Mr. Garfield. Further, the Money Purchase Plan's one-half ownership interest in the Property represents only approximately 7 percent of its assets, based on the Property's fair market value as appraised by Mr. Garfield.

7. The applicant states that there is little chance of there ever being any participants in either of the Plans other than Mr. Merrill or Mr. Merritt. However, if there are ever any other participants in the Plans, a separate defined contribution plan for such employee will be established by the employer containing provisions comparable to those contained in the existing Plan of that employer.

8. In summary, the applicant represents that the proposed transaction will satisfy the criteria of section 408(a) of the Act because: (a) The Plans will be able to lease the Vacant Parcel at its fair market rental value as determined by an independent appraiser; (b) the sale of the Property to M&M Metals under the Option will be at a price which is no less than the Property's fair market value as established by an independent, qualified appraiser at the time the Option is exercised; (c) the Plans will not pay any expenses with respect to the proposed sale of the Property to M&M Metals; and (d) Mr. Mellman and Mr. Merritt, as the sole participants of their respective Plans and the only participants to be affected by the transaction, have determined that the transaction is in the best interest of the Plans and desire that the transaction be consummated.

Notice to Interested Persons: Because Mr. Mellman and Mr. Merritt are the only participants in their respective Plans to be affected by the proposed transaction, it has been determined that their is no need to distribute the notice of proposed exemption to interested persons. Comments and requests for a public hearing are due 30 days from the date of publication of this proposed exemption in the Federal Register.

For Further Information Contact: Mr. E.F. Williams of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

Bear, Stearns & Co., Inc. and Custodial Trust Company

[Application No. D-6833]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 406(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75-1 (40 FR 18471, April 20, 1975). If the exemption is granted, the restrictions of sections 406(a)(1) (A) through (D) and 406(b) (1) and (2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the lending of securities to Bear, Stearns & Co., Inc. (Bear Stearns) by employee benefit plans for which Custodial Trust Company (CTC) acts as directed trustee or custodian and securities lending agent and to the receipt of compensation by CTC in connection with these transactions, if the conditions incorporated in the representations set forth below are met.

Summary of Facts and Representations

1. Bear Stearns, a wholly owned subsidiary of the Bear Stearns Companies, Inc., is an investment services firm which is a member of the New York Stock Exchange and other principal securities exchanges in the United States and also a member of the National Association of Securities Dealers. Bear Stearns is one of the

largest investment firms in the United States, with consolidated capital (equity and subordinated debt) of over $700 million.

2. Bear Stearns, acting as principal, facilitates securities loans made by institutions to brokerage firms and other entities which need a particular security for a certain period of time in order to satisfy deliveries in cases of short sales or where a broker fails to receive securities it is required to deliver. Bear Stearns is one of the largest institutional securities lenders in the United States, lending securities equal in value to approximately $2 billion on an average daily basis. In making such loans, Bear Stearns carefully reviews the credit worthiness of the borrowing brokers.

3. CTC is a wholly owned subsidiary of the Bear Stearns Companies, Inc., which is also the parent company of Bear Stearns. CTC is organized as a trust company in New Jersey which provides fiduciary services to institutions, including serving as trustee or custodian to employee benefit plans. CTC also has been offering securities lending services to institutions. As of March 1, 1986, CTC served as securities lending agent for approximately $350 million in lendable securities. As securities lending agent, CTC assures that the required collateral is received by CTC and that adequate levels of collateral are maintained. All of CTC's procedures for lending securities are designed to comply with the applicable conditions of Prohibited Transaction Exemption (PTE) 81–6 and PTE 82–63.[1]

4. An institutional investor, such as a pension fund, lends securities in its portfolio to a broker-dealer or bank in order to earn a fee in addition to any interest, dividends or other distributions paid on those securities. The lender generally requires that the security loans be fully collateralized, and the collateral usually is in the form of cash or high quality liquid securities such as U.S. Government or Federal Agency obligations or certain bank letters of credit. When cash is the collateral, the lender generally invests the cash and rebates a portion of the earnings on the collateral to the borrower. The "fee" received by the lender would then be the difference between the earnings on the collateral and the amount of rebate paid to the borrower. Where a loan of securities is collateralized with Government or Federal Agency securities or bank letters of credit, a fee is paid directly by the borrower to the lender. Institutional investors often utilize the services of an agent in the performance of their securities lending transactions. The lending agent is paid a fee for its services which may be calculated as a percentage of the income earned by the investor from its securities lending activity.

5. CTC requests an exemption for the lending of securities owned by certain pension plans for which it serves as directed trustee or custodian (client-plans) to Bear Stearns, following disclosure of its affiliation with Bear Stearns, under either of two arrangements described as Plan A and Plan B and for the receipt of compensation in connection with such transactions. CTC will have no discretionary authority or control over the investment decisions of these plans. Its discretion will be limited to activities such as negotiating the terms of the securities loans with Bear Stearns and investing any cash collateral on the loans. Because Bear Stearns is a subsidiary of the parent company of CTC, the lending of securities to Bear Stearns by plans for which CTC serves as trustee or custodian may be outside the scope of relief provided by PTE 81–6 and PTE 82–63.[2]

6. When a loan is collateralized with cash, CTC will invest the cash in short-term securities or interest-bearing accounts and will rebate a portion of the earnings to Bear Stearns on behalf of the plan. Bear Stearns will pay a fee to the lending plan based on the value of the loaned securities where the collateral consists of obligations other than cash. Under both Plan A and Plan B, the plan will pay a fee to CTC for providing lending services to the plan which will reduce the income earned by the plan from the lending of securities to Bear Stearns. The plan and CTC will agree in advance to this fee which will represent a percentage of the income the plan earns from its lending activities. Several safeguards, described more fully below, are incorporated in the application in order to ensure the protection of the plan assets involved in the transactions. In addition, the applicant represents that each of the two arrangements incorporates the relevant conditions contained in PTE 81–6 and PTE 82–63.

7. *Plan A.* A fiduciary of a client-plan who is independent of CTC and Bear Stearns must sign a Securities Lending Authorization before the plan may particpate in CTC's securities lending program. This authorization describes the operation of the landing program and allows CTC to lend securities held by the client-plan to securities brokers, including Bear Stearns, as selected by CTC. The authorization also sets forth, in an attachment, the basis and rate for CTC's compensation from the plan for the performance of securities lending services.

8. The independent fiduciary also must sign a Bear Stearns Lending Authorization before CTC may include security loans to Bear Stearns in the lending activities of the client-plan. The Bear Stearns Lending Authorization will specify, in an attached exhibit, the method of determining the daily securities lending rates (fees and rebates) and the maximum rebate rate payable to Bear Stearns. A client-plan may terminate both the Securities Lending Authorization and the Bear Stearns Lending Authorization at any time.

9. CTC, as securities lending agent, will negotiate a Customer Securities Loan Agreement (basic loan agreement) with Bear Stearns on behalf of its client-plans. An independent fiduciary of a client-plan will approve the terms of the agreement before that fiduciary executes the Bear Stearns Lending Authorization. The basic loan agreement will specify, among other things, the right of the client-plan to terminate a loan at any time (subject to the customary notification period) and the plan's rights in the event of any default by Bear Stearns. The agreement will explain the basis for compensation to the plan for lending securities to Bear Stearns under each category of collateral. The agreement also will contain a requirement that Bear Stearns must pay all transfer fees and transfer taxes related to the security loans.

10. Before entering into the basic loan agreement, Bear Stearns will furnish its most recent available audited and unaudited financial statements to CTC, who, in turn, will provide the statements to a client-plan before the plan is asked to approve the terms of the agreement. The agreement will contain a requirement that Bear Stearns must promptly notify lenders at the time of a loan of any material adverse changes in

---

[1] PTE 81–6 (46 FR 7527, January, 23, 1981) provides an exemption under certain conditions from section 406(a)(1) (A) through (D) of the Act and the corresponding provisions of section 4975(c) of the Code for the lending of securities that are assets of an employee benefit plan to certain broker-dealers or banks which are parties-in-interest.

PTE 82–63 (47 FR 14804, April 6, 1982) provides an exemption under specified conditions from section 406(b)(1) of the Act and section 4975(c)(1) (E) of the Code for the payment of compensation to a plan fiduciary for services rendered in connection with loans of plan assets that are securities.

[2] Condition 1 of PTE 81–6 requires, in part, that neither the borrower nor an affiliate of the borrower has discretionary authority or control with respect to the investment of the plan assets involved in the transaction.

PTE 82–63 permits the payment of compensation to a plan fiduciary for the provision of securities lending services only if the loan of securities itself is not prohibited under section 406(a) of the Act.

its financial condition. If any such changes have taken place, CTC will request that an independent fiduciary of the plan approve the loan in view of the changed financial condition.

11. The client-plan and CTC will agree to the fee CTC will receive for its services as lending agent prior to the commencement of any lending activity. The agreement by CTC to provide securities lending services to a client-plan will be in writing and subject to prior written approval of a fiduciary of the client-plan who is independent of Bear Stearns and CTC.[3] The agreement will allow termination by the plan without penalty to the plan within five business days of written notice. Before entering into an agreement, CTC will provide the plan with any reasonably available information which it believes is necessary for the plan to make a determination whether to enter into or renew the agreement and such other information as the plan may request.

12. Each time a plan loans securities to Bear Stearns pursuant to the basic loan agreement, Bear Stearns will execute a designation letter specifying, in part, the securities to be loaned, the necessary amount of collateral, the fee or rebate payable, and any special delivery instructions. The terms of each loan will be at least as favorable to the client-plan as those of an arm's-length transaction would be between unrelated parties.

13. CTC will credit to the account of the client-plan all interest, dividends and the like on the loaned securities, including distributions and rights of any kind. The basic loan agreement will provide that the plan may terminate any loan at any time. Upon a termination, Bear Stearns will deliver the loaned securities back to the client-plan within five business days of written notification. If Bear Stearns fails to return the securities within the designated time, the client-plan has certain rights that it may exercise under the agreement.

14. CTC will establish each day a written schedule of lending fees and rebate rates in order to assure uniformity of treatment among borrowing brokers and to limit the discretion CTC would have in negotiating securities loans to Bear Stearns. Loans to Bear Stearns on that day will be made at rates on the daily schedule or at rates which may be more advantageous to the client-plans. In no case will loans be made to Bear Stearns at rates below those on the schedule. The daily rate schedule will be based on two variables: the current value of short-term funds, and market conditions as reflected by demand for securities by borrowers other than Bear Stearns.

15. CTC will also adopt a maximum daily rebate rate for cash collateral payable to Bear Stearns on behalf of a plan. This maximum rebate will not exceed a stated percentage of the mean between the bid and asked quotations of the "broker call rate" published daily in the Wall Street Journal for the previous day. Moreover, when cash is used as collateral, the daily rebate rate will always be at least 50 basis points lower than the rate of return available to CTC from authorized investments for cash collateral.[4] If interest rates rise, the rebate applicable to Bear Stearns will never be increased above the daily rate at which a loan was originnally made. CTC will submit the formula for determining the maximum daily rebate rate to an independent fiduciary of a client-plan for approval before lending any securities to Bear Stearns on behalf of the plan.

16. For collateral other than cash, the rate charged by CTC the previous day is reviewed for competitiveness. Based on the demand of the marketplace, this daily fee tends to remain constant and is currently one percent of the current value of the collateral. Because 50 percent or more of securities loans by client-plans will be to unrelated brokers or dealers, the competitiveness of CTC's rate schedule will be continuously tested in the marketplace. Accordingly, loans to Bear Stearns should result in competitive rate income to the lending client-plan.

17. CTC will loan securities available for lending to borrowers on a first come, first served basis. This will provide additional assurance of uniformity of treatment among borrowing brokers.

18. Bear Stearns will make a guarantee to each lending client-plan that the plan will incur no loss on its loans of securities to Bear Stearns. Accordingly, Bear Stearns will assure the plan that the rate of return on each loan will at a minimum equal the transactional cost to the plan of lending securities to Bear Stearns. The applicant contends that, as a result of this guarantee, the rate of return earned by client-plans from lending to Bear Stearns will in total exceed the return from lending securities to other brokers.

19. CTC will receive collateral from Bear Stearns by physical delivery or book entry in a securities depository by the close of business on the day the loaned securities are delivered to Bear Stearns. The collateral will consist of cash, securities issued or guaranteed by the U.S. Government or its agencies or irrevocable bank letters of credit issued by a person other than Bear Stearns or its affiliates. The market value of the collateral on the day preceding the day of the loan will be at least 102 percent of the market value of the loaned securites. The basic loan agreement will give the client-plan a continuing security interest in and a lien on the collateral. CTC will monitor the level of the collateral daily to ensure that it is maintained at no less than 102 percent. If the market value of the collateral falls below 102 percent of that of the loaned securities, CTC will require Bear Stearns to deliver by the close of business the next day sufficient additional collateral to bring the level back to at least 102 percent.

20. A client-plan that loans securities to Bear Stearns will recieve a weekly report with which to monitor lending activity, rates on loans to Bear Stearns compared with loans to other brokers, and the level of collateral on the loans. The weekly report will show, on a daily basis, the market value of all outstanding security loans to Bear Stearns and to other borrowers as compared to the total collateral held for both categories of loans.

21. The weekly report will state the daily fees where collateral other than cash is utilized and will specify the details used to establish the daily rebate payable to all brokers where cash is used as collateral. The weekly report also will state, on a daily basis, the rates at which securities are loaned to Bear Stearns compared with those at which securities are loaned to other bankers. This statement will give an independent fiduciary information which can be compared to that contained in the daily rate schedule.

22. CTC also will send a monthly report to each client-plan participating in the lending program. The monthly report will provide a list of all security loans outstanding and closed for a specified period. The report will show each security loaned, the number of shares involved, the value of the security for collateralization purposes, the current value of the collateral, the rate at which the security is loaned, and the number of days the security has been on loan.

23. Only client-plans with assets having an aggregate market value of at least $50 million will be permitted to

[3] This closely parallels conditions c and d of PTE 82-63 which require that the payment of compensation to a "lending fiduciary" is made under a written instrument and is subject to prior written authorization of an independent "authorizing fiduciary."

[4] These short-term investments include repurchase agreements, certificates of deposit, and Treasury bills.

loan securities to Bear Stearns. The applicant maintains that this restriction is intended to assure that any lending to Bear Stearns will be monitored by an independent fiduciary of above average experience and sophistication in matters of this kind.

24. CTC will record on audio tape all telephone traffic between its securities lending department and all borrowers, including Bear Stearns. The telephone tapes will be retained for a period of at least six months. This recording procedure will enable client-plans and the Department to review CTC's adherence to its policy of lending securities at or above the daily specified rates to the first interested borrower.

25. *Plan B.* Bear Stearns will directly negotiate "exclusive borrowing" agreements with client-plans for which CTC serves as directed trustee or custodian. Under such an agreement, Bear Stearns will have exclusive access for a specified period of time to borrow certain securities of a client-plan pursuant to certain conditions. CTC will not participate in the negotiation of the agreement. The involvement of CTC will be limited to such activities as handling the movement of borrowed securities and collateral and investing or depositing any cash collateral and supplying the plans with certain reports.

26. Upon delivery of loaned securities to Bear Stearns, CTC, as securities lending agent for a plan, will receive from Bear Stearns the same day by physical delivery or book entry in a securities depository collateral consisting of cash, securities issued or guaranteed by the U.S. Government or its agencies, or other collateral permitted under PTE 81–6. The market value of the collateral on the preceding day will be at least 102 percent of the market value of the loaned securities. CTC will monitor the level of the collateral daily and, if its market value falls below 102 percent, will require Bear Stearns to deliver sufficient additional collateral on the following day. CTC will provide a weekly report to the client-plan showing, on a daily basis, the aggregate market value of all outstanding security loans to Bear Stearns and the aggregate market value of the collateral.

27. Before entering into an agreement, Bear Stearns will furnish to the plan the most recent audited and unaudited statements of its financial condition. Further, the agreement will contain a representation by Bear Stearns that for each time it borrows securities, there have been no material adverse changes in its financial condition.

28. In exchange for the exclusive right to borrow certain securities from a client-plan, Bear Stearns will pay the plan either a flat fee or a minimum flat fee plus a prior negotiated percentage based on the total balance outstanding of borrowed securities. In light of this fee arrangement, all earnings generated by cash collateral will be returned to Bear Stearns. CTC will credit to the account of the plan all interest, dividends or other distributions on any borrowed securities.

29. The "exclusive borrowing" agreement may be terminated by either party to the agreement at any time. Upon termination, Bear Stearns will deliver any borrowed securities back to the plan within five business days of written notice of termination. If Bear Stearns fails to return the securities or equivalent, the plan has certain rights under the agreement. Bear Stearns will indemnify the plan against any losses due to its use of the borrowed securities equal to the difference between the replacement cost of the securities and the market value of the collateral on the date a loan is declared to be in default.

30. CTC will receive a fee for its lending services which will be computed as a percentage of the income earned by the client-plan from its securities lending activity. The plan and CTC will agree in advance to the fee. The agreement for CTC to provide securities lending services to the client-plan will be in writing and subject to prior written approval of a plan fiduciary who is independent of Bear Stearns and CTC. The agreement will allow termination by the plan within five business days of written notice without penalty to the plan except for the return to Bear Stearns of part of the flat fee paid by Bear Stearns to the plan, if the plan also has terminated its "exclusive borrowing" agreement with Bear Stearns. Before entering into an agreement with a client-plan to provide securities lending services to the plan, CTC will furnish to the plan any reasonably available information which it believes is necessary for the plan to determine whether to enter into or renew the agreement.

31. In summary, the applicant represents that the described transactions satisfy the statutory criteria of section 408(a) of the Act because: (1) Plan A requires approval of the basic loan agreement and the Bear Stearns Lending Authorization by a plan fiduciary independent of Bear Stearns and CTC before a client-plan lends any securities to Bear Stearns, while under Plan B Bear Stearns will directly negotiate "exclusive borrowing" agreements with a client-plan; (2) the lending arrangements will permit the client-plans to benefit from Bear Stearns' substantial market position as a securities lender and will enable the plans to earn additional income from the loaned securities while still receiving dividends, interest and other distributions on those securities; (3) Bear Stearns will provide sufficient information concerning its financial condition to a client-plan before the plan lends any securities to Bear Stearns; (4) the collateral on each loan to Bear Stearns will be at least 102 percent of the market value of the loaned securities, which exceeds the 100 percent collateral required under PTE 81–6, and will be monitored daily by CTC; (5) CTC will furnish a weekly report and a monthly report to the client-plans so that an independent fiduciary may monitor a plan's lending activity to Bear Stearns in comparison with the lending to other brokers; (6) security loans to Bear Stearns, under Plan A, will not exceed 50 percent on average of the total loan volume, so that the competitiveness of the daily rate schedule may be tested; (7) only client-plans for which CTC serves as directed trustee or custodian will lend securities to Bear Stearns; (8) the terms of each loan will be at least as favorable to the plans as those of an arm's-length transaction between unrelated parties; and (9) all the procedures under Plans A and B will, at a minimum, conform to the applicable provisions of PTE 81–6 and PTE 82–63.

For Further Information Contact: Paul Kelty of the Department, telephone (202) 523–8883. (This is not a toll-free number.)

Pincus, Schissel, Barricks and Alexander, M.D. Self-Employed Retirement Plan (the Plan) Located in Minneapolis, Minnesota

[Application No. D–6652]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 4975(c)(2) of the Code and in accordance with the procedures set forth in ERISA Procedure 75–1 (40 FR 18471, April 28, 1975). If the exemption is granted the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code shall not apply to the loan of $45,000 to Dr. Robert L. Barricks (Dr. Barricks) from his individually directed account (the Account) in the Plan, under the terms describerd in this notice of proposed exemption, provided such terms are not less favorable to the Plan than those obtainable in an arm's-length transaction with an unrelated party. Dr.

Barricks is an owner-employee with respect to the Plan as defined in section 401(c)(3) of the Code due to his 25% ownership of Plexus, Sublease, Barricks and Alexander, M.D. (the Employer), a medical partnership which is the plan sponsor. Section 408(d)(1) of the Act provides that the Department lacks authority to grant an exemption under section 408(a) of the Act for the lending of any part of the corpus or the income of a plan to an owner-employee. Therefore, the Department cannot grant an exemption under Title I for the subject loan. However, the Department can grant an exemption under Title II of the Act, pursuant to section 4975(c)(2) of the Code.

Summary of Facts and Representations

1. The Plan is a Keogh plan established by the Employer. The Employer has four equal 25% partners, one of whom is Dr. Barricks. The Plan has 11 participants. Dr. Barricks currently has $198,500 in the Account. The Plan Administrator is the Richfield Bank and Trust Company of Richfield, Minnesota (the Bank). The Plan provides for segregated accounts and for participant direction of the investment of the accounts.

2. Dr. Barricks owns a residence at 4825 Sheridan Avenue S., Minneapolis, Minnesota (the Property). The first mortgage on the Property is held by GMAC Mortgage Corporation, and had a principal balance of $128,619 as of December 31, 1985.

3. Dr. Barricks wishes to borrow $45,000 from his Account in order to replace the existing second mortgage on the Property. The loan would be at an interest rate of 11.25% amortized over 30 years. The United Mortgage Corporation of Bloomington, Minnesota, has represented that this is its current rate for 30 year second mortgages.

4. The loan from the Account will be secured by a second mortgage on the Property. The Property has been appraised by Mr. William F. Rieckhoff, an independent realtor with Realty Center of Minneapolis, Minnesota, as having a fair market value of $320,000 as of February 18, 1986. Thus, the Property has a fair market value approximately $200,000 greater than the principal balance of the first mortgage. The Property's fair market value will be approximately 190% of the principal amount of all encumbrances upon it. The second mortgage will be recorded with the Hennepin County Recorder.

5. The Bank, which is the trustee for the Plan, has reviewed the proposed transaction, and represents that the transaction is in the best interests of the Account. The Bank notes that Dr. Barricks is the only Plan participant to be affected by the transaction, and that the interest rate and security for the loan are appropriate. The Bank will monitor the loan and take whatever action is necessary in order to enforce the Account's rights under the terms of the loan, including foreclosure on the mortgage in the event of default.

6. In summary, the applicant represents that the proposed transaction satisfies the criteria of section 4975(c)(2) of the Code because (1) the loan represents less than 25% of the assets of the Account; (2) the interest rate for the loan is identical to that required by a local independent mortgage corporation; (3) the loan will be secured by a second mortgage on the Property, which has been appraised as having a fair market value approximately 190% of the principal amount of all encumbrances upon it; (4) the Plan's independent trustee has determined that the transaction is appropriate for the Plan and in the best interests of the Account; (5) the Bank will monitor the loan and take whatever action is necessary to enforce the Account's rights under the loan; and (6) Dr. Barricks is the only participants to be affected by the transaction, and he desires that it be consummated.

Notice to Interested Persons: Because Dr. Barricks is the only participant in the Plan to be affected by the proposed transaction, it has been determined that there is no need to distribute this notice of proposed exemption to interested persons. Comments and requests for a hearing are due 30 days from the date of publication of this proposed exemption in the Federal Register.

For Further Information Contact: Mr. Gary Lefkowitz of the Department, telephone (202) 523-8881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan; and

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction.

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete, and that each application accurately describes all material terms of the transaction which is the subject of the exemption.

Signed at Washington, DC, this 20th day of May 1986.

Elliot I. Daniel,

Assistant Administrator for Regulations and Interpretations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

[FR Doc. 86-11719 Filed 5-22-86; 8:45 am]

BILLING CODE 4510-29-M

NUCLEAR REGULATORY COMMISSION

Abnormal Occurrences for Fourth Quarter CY 1985; Dissemination of Information

Section 208 of the Energy Reorganization Act of 1974, as amended, requires the NRC to disseminate information on abnormal occurrences (i.e., unscheduled incidents or events which the Commission determines are significant from the standpoint of public health or safety). During the fourth quarter of calendar year 1985, the following incidents were determined to be abnormal occurrences using the criteria published in the Federal Register on February 24, 1977 (42 FR 10950). These abnormal occurrences are described below, together with the remedial actions taken. These events are also being included in NUREG-0090,

Vol. 8, No. 4 ("Report to Congress on Abnormal Occurrences: October-December 1985"). This report will be available in the NRC's Public Document Room, 1717 H Street NW. Washington, DC 20555, about three weeks after the publication date of this Federal Register Notice.

Nuclear Power Plants

Inoperable Main Steam Isolation Valves

One of the general abnormal occurence criteria notes that a major degradation of essential safety-related equipment can be considered an abnormal occurrence.

Date and Place—On September 27, 1985, during main steam isolation valve (MSIV) surveillance testing at Burnswick Unit 2, Carolina Power and Light Company (the licensee) discovered that MSIVs F028A, F022C and F028C would not fast close. At the time of the event, the plant was in cold shutdown following a controlled shutdown from power on September 26, 1985, as a precautionary measure in advance of the approaching hurricane Gloria. Brunswick Unit 2 is a General Electric-designed boiling water reactor located in Brunswick County, North Carolina.

Nature and Probable Consequences—The main steam line isolation system includes isolation valves that, individually or collectively, are designed to:

1. Close within the time established by design basis accident (DBA) analysis to limit the release of reactor collant or radioactive materials;
2. Close when required, despite the single failure of either valve or the associated controls, to provide a high level of reliability for the safety function;
3. Use separate energy sources, as the motive force, to independently close the redundant isolation valves in each individual steam line;
4. Use local storage energy (compressed air and/or springs) to close at least one isolation valve in each steam line without relying on continuity of any variety of electrical power for the motive force to achieve closure;
5. Be able to close during or after design basis seismic loadings to assure isolation; and
6. Be testable during normal operating conditions, to demonstrate that the valves will function.

Two MSIVs (F022 and F028) are welded in a horizontal run of each of the four main steam lines (A-D), with one valve as close as possible to the primary containment barrier inside, and the other just outside the barrier. The valves, when closed, form part of the nuclear system process barrier for openings outside the primary containment, and part of the primary containment barrier for nuclear system breaks inside the containment.

The valve is held open by pneumatic pressure and loss of air allows a spring assist to close the valve. The control unit is attached to an air cylinder and contains the pneumatic, ac, and dc control valves for opening, closing, and slow speed exercising of the main valve. The control power for each valve is supplied at 120 volts ac, 60 Hz, and 125 volts dc. Remote manual switches in the control room enable the reactor operator to operate each valve at fast speed (3 to 10 seconds) or at slow speed (45 to 60 seconds) for exercising or testing.

In the event that the main steam line should rupture downstream from the valve, the stream flow quickly increases to 200 percent of rated flow and is limited from further increase by the venturi flow restrictor upstream of the valves.

During approximately the first 75 percent of closing, the valve has little effect in reducing flow because the flow is choked by the venturi restrictor upstream from the valves. After the valve is more than about 75 percent closed, flow is reduced as a function of the valve area versus travel characteristic.

The safety objectives of the MSIVs are to:

1. Prevent damage to the fuel barrier by limiting the loss of reactor coolant in case of a major leak from the steam piping outside the primary containment;
2. Limit release of radioactive materials by closing the nuclear system process barrier in case of gross release of radioactive materials from the reactor fuel to the reactor cooling water and steam; and
3. Limit release of radioactive materials by closing the primary containment barrier in case of a major leak from the nuclear system inside the primary containment.

In the direct cycle boiling water nuclear power plant, the reactor steam goes to the turbine and to other equipment outside the reactor containments. Radioactive materials in the steam are released to the environs through process openings in the steam system, or they can escape from accidental openings. A large break in the steam system can void the water from the reactor core faster than it is replaced by feedwater. The analysis of a complete, sudden steam line break outside the primary containment shows that the fuel barrier is protected against loss of cooling if MSIV closure takes 10.5 seconds or less (including as much as 0.5 seconds for the instrumentation to initiate valve closure after the break).

Double isolation valves are provided on each of the main steam lines to minimize the potential leakage paths from the containment in case of a line break. Only one valve in each line is required to maintain the integrity of the containment. The Technical Specification surveillance requirements are based on the operating history of this type valve. The maximum closure time of five seconds has been selected to contain fission products and to ensure the core is not uncovered following line breaks.

Initial investigation determined a problem existed within the double solenoid valve on the actuator of MSIV F028A. In addition, a subsequent fast closure test of MSIV F028C revealed a closure time of approximately 45 seconds. A decision was made not to troubleshoot the F022C valve until it could be removed and diassembled. On September 28, 1985, the licensee began to disassemble, visually inspect, and collect samples of foreign materials in the double solenoid valves of the three subject MSIVs.

From the visual inspection, it was concluded the F028C valve had failed to fast close due to the exhaust port being blocked. The F022C valve failed to fast close because the solenoid valve disc was adhered to the valve seat and the valve could not move. The F028A valve failed either because the solenoid valve disc was stuck to its seat or because disc material had broken off and plugged the exhaust port.

An evaluation of the solenoid valve from the F028C by the valve vendor, ASCO, concluded the valve elastomer had degraded due to contamination. The vendor did not determine the contaminant; however, it is felt it was not introduced during manufacture or assembly of the solenoid valve assembly.

On September 28, 1985, a systems engineering task force was established by the licensee to determine the cause of the failures and to recommend and implement corrective actions.

The pilot valves that failed are ASCO Model 8323A36E double solenoid valves. Each valve has one ac and one dc coil. Both solenoids must be deenergized for the value to close the supply port and open the exhaust port. The valves operate with both solenoids normally energized. This model was installed in Unit 1 in June 1983 and in Unit 2 in August 1984. They are environmentally qualified replacements for nearly identical valves which used Buna N as the elastomer. These valves utilize

ethylene propylene (EP) in place of the Buna N. The EP material is rated for higher temperature use and has much higher radiation resistance than Buna N.

Because EP is resistant to high levels of radiation, it is the material of choice for environmentally qualified (EQ) applications. However, EP absorbs hydrocarbons and, like a sponge, softens and swells up. Laboratory analysis of the three subject solenoid valves showed a significant amount of hydrocarbons in the valve body of the F028C solenoid valve. The precise hydrocarbon has not yet been identified.

Cause or Causes—The precise failure mechanism of the elastomer material has not yet been identified; however, it is believed that temperature, contamination, and internal geometry played a part in the failure mechanism. Temperature alone can reproduce the failure mechanism but not at a temperature that is reasonably expected to occur in the plant. The physical evidence showed signs of swelling of the EP, which is known to occur when it is exposed to hydrocarbons. The geometry is such that the EP can swell and fill the exhaust port, thus blocking that path and providing a frictional force in opposition to the valve opening force. In addition, exposure to hydrocarbons may cause the elastomer in EP to vaporize at a lower temperature. Valves that are not subjected to the same conditions of temperature, contamination, and internal geometry are not expected to experience this failure.

Actions Taken to Prevent Recurrence

Licensee—The Unit 2 MSIV solenoid valves have been replaced with valves utilizing viton as the elastomer. The valves on Unit 1 were replaced during the ongoing 1986 Unit 1 refueling/maintenance outage by valves utilizing viton. Viton is impervious to the hydrocarbon contamination and licensee tests have shown that it can withstand temperatures that will degrade EP. While the geometry of the viton valves is the same as the EP, reduction of two of the three effects (i.e., temperature, contamination, and geometry) provides an increased degree of confidence that the viton valves will not fail in this mode. Viton, however, is less resistant to radiation than EP by a factor of ten; therefore, the material needs replacing more frequently.

During the next scheduled outage of sufficient length following six months of operation for either unit, a sampling of the MSIV double solenoid valves will be replaced. The removed solenoids will be evaluated as part of the continuing failure analysis of the ASCO solenoids. It is expected the solenoid valves will be replaced at approximately three-year intervals due to the radiation susceptibility of viton.

NRC—A detailed inspection to review the licensee actions with respect to the solenoid failures was conducted by NRC Region II. Inspectors from NRC Region II and NRC headquarters reviewed test results at both the site and the utility's research facility. An Inspection and Enforcement Information Notice regarding this event is under consideration.

Management Deficiencies at Fermi Nuclear Power Station

One of the abnormal occurrence examples notes that serious deficiencies in management or procedural controls in major areas can be considered an abnormal occurrence.

Date and Place—On December 24, 1985, NRC Region III issued a letter under 10 CFR 50.54(f) seeking information from Detroit Edison Company on plans to improve the regulatory performance of its Fermi Unit 2 Nuclear Power Station. The letter identified a series of operational and equipment problems occurring at Fermi Unit 2 and attributed them to ineffective management systems. The plant, which utilizes a General Electric-designed boiling water reactor, is located in Monroe County, Michigan.

Nature and Probable Consequences—In July 1985 the licensee began to experience a series of operational problems, some of which were the result of personnel errors.

On July 1, 1985, during startup of the reactor, a reactor operator failed to follow the procedure for withdrawing control rods from the reactor core. The operator withdrew 11 rods to their fully withdrawn position (position 48) instead of to the next intermediate position (position 04). As a result the reactor went critical (i.e., a sustained nuclear chain reaction was started) earlier in the startup procedures than planned.

When instrumentation indicated unexpected conditions in the reactor, the operator reinserted the control rods to stop the chain reaction. Later, the startup was resumed and criticality occurred at the expected point. Later analysis showed that the reactor had gone critical when the 11 rods were withdrawn.

The NRC's inspection and review of this premature criticality event identified nine apparent violations of NRC requirements associated with it. Because the plant had just achieved its initial criticality on June 21, 1985, and therefore had little residual radioactivity in the reactor core, this event was of minimal safety consequences. No damage to the fuel would be expected under these circumstances.

Subsequently, additional problems occurred at the plant, some of which were caused by personnel errors while others were strictly equipment failures. These problems included:

1. The South Reactor Feedwater Pump turbine was damaged during testing on July 22, 1985. The pump turbine had a history of excessive vibration during preoperational testing. The second feedwater pump was not affected by the vibration problem. Operation at power levels up to 50 percent is possible with only one feedwater pump in operation.

2. On July 28, 1985, while a diesel generator was undergoing testing, a low flow of cooling water for the diesel was observed. The diesel was shut off, and the licensee's subsequent investigation determined that a cooling tower bypass valve was closed. This valuve is required to be open for the flow of cooling water to the diesel generator and to other safety system equipment in Division 1, including the core spray system and the residual heat removal system.

The licensee determined that the valve had been left in the closed position while running the Reactor Heat Removal Service Water System on July 23, 1985. The plant is required to have both Divisions of its emergency core cooling system operable, while the plant is in startup or operating status. The plant was in a startup mode when the valve was closed, but shut down later because of the previously reported feedwater pump turbine problem. (The shutdown fortuitously avoided further violation of the plant Technical Specification requirement that the plant be placed in cold shutdown if one ECCS division is inoperable.)

3. On September 2, 1985, the licensee discovered that a Containment Monitoring System Valve was open and uncapped, thus providing a breach of the primary reactor containment. The valve was left open following installation of the valve in June 1985. (This event was described in Appendix C, "Other Events of Interest," in the Abnormal Occurrence Report to Congress for the Third Quarter 1985, i.e., NUREG–0090, Vol. 8, No. 3.)

4. Since receiving an operating license in March 1985, Fermi Unit 2 has experienced numerous personnel errors. Of 78 Licensee Event Reports submitted by the licensee between March and November 1985, 41 involved personnel errors.

5. NRC inspectors, in an inspection report covering the events listed above as well as other problems at the Fermi

Unit 2 facility, identified 28 items of apparent violation of NRC requirements. Enforcement action on these items is pending.

The unit was shut down on October 10, 1985, for the installation of a remote shutdown control panel to meet an NRC requirement for the capability of shutting the plant down safely from a point outside the main control room.

During the outage, significant problems were encountered with the facility's emergency diesel generators. During testing of the No. 13 diesel generator in November 1985, excessive noise and vibration were detected. The diesel generator was shut down, and an examination showed evidence of bearing damage. Subsequent inspections of two additional diesel generators (the site has a total of four) showed similar damage. The plant had previously encountered bearing problems with two diesel generators in January 1985 and the equipment was repaired.

The licensee and the diesel vendor, Fairbanks Morse, believe the damage is attributable to an insufficient break-in period. Further testing of the diesels is underway, and the root cause of the bearing problems remains under review by the licensee, its consultants, and the NRC.

Cause or Causes—The principal cause is attributed to ineffective management systems as reflected in a series of operational and equipment problems, and numerous personnel errors and violations of technical requirements.

Actions Taken to Prevent Recurrence

Licensee—The licensee has instituted various measures to improve its regulatory performance, including retraining of personnel and revision of procedures. An independent overview committee of consultants has been formed by the licensee to review the management and operation of the Fermi facility.

NRC—Following the July 1, 1985, premature critically incident, NRC Region III issued a Confirmatory Action Letter on July 26, 1985, to Detroit Edison, confirming the licensee's agreement not to operate the unit above five percent power until the premature criticality incident was fully analyzed and corrective action taken. Operation above five percent power would not occur without authorization from NRC Region III. That restriction was not lifted prior to the October 10, 1985, outage.

The December 24, 1985, request for information under 10 CFR 50.54(f) sought the licensee's response on the adequacy of management and management structures, on changes in controls needed to improve regulatory performance, and on actions planned to ensure readiness of the facility to resume operations and testing activities.

Other NRC Licensees

(Industrial Radiographers, Medical Institutions, Industrial Users, etc.)

Diagnostic Medical Misadministration

The general abnormal occurrence criterion notes that an event involving a moderate or more severe impact on public health or safety can be considered an abnormal occurrence.

Date and Place—On August 14, 1985, a patient at the Letterman Army Medical Center, Presidio of San Francisco, California, was inadvertently given the wrong radiopharmaceutical for a scheduled thyroid uptake study and scan. This resulted in an administered dose which exceeded the prescribed dose by approximately a factor of 30.

Nature and Probable Consequences—The attending physician mistakenly prescribed a dose of 150 microcuries of I–131 instead of I–123. The radiopharmacy misinterpreted the prescribed dose as 5 millicuries of I–131. The 5 millicuries of I–131 were administered to the patient on August 14, 1985. The mistake was identified on August 16, 1985, when the patient returned to the hospital for the uptake study and scan.

The level of radiopharmaceutical administered is commonly given to patients for certain other diagnostic procedures, and, despite the mistake, the diagnostic scan and uptake desired for this patient were able to be accomplished without administration of any additional radiation beyond the initial dose. Also, the patient had previously undergone a partial thyroidectomy and was taking thyroid hormones for thyroid gland suppression. The licensee states that, because of these circumstances, no adverse clinical symptoms were expected as a result of the misadministration.

The patient and the attending physicians were notified of the misadministration and the licensee began an immediate investigation to determine what factors and circumstances may have contributed to the incident.

Cause or Causes—The misadministration was caused when the attending physician prescribed the wrong radiopharmaceutical which was further misinterpreted by the radiopharmacy as a request for 5 millicuries of I–131.

Actions Taken to Prevent Recurrence

Licensee—Effective August 16, 1985, the licensee instituted a new hospital procedure which would require that only the nuclear medicine staff would administer radiopharmaceuticals and the radiopharmacist must authorize the release of radiopharmaceuticals from the pharmacy. All prescriptions will be in writing.

NRC—The circumstances of the misadministration were discussed with the licensee. The licensee's corrective actions were determined to be acceptable. The NRC does not plan any further actions.

Therapeutic Medical Misadministration

The general abnormal occurrence criterion notes that an event involving a moderate or more severe impact on public health or safety can be considered an abnormal occurrence.

Date and Place—On October 9, 1985, at the Queen's Medical Center, Honolulu, Hawaii, a patient was to receive 1000 rads to the lateral limbal area of the right eye using a Sr–90 applicator; however, the medial limbal area of the right eye was treated.

Nature and Probable Consequences—The attending physician realized the error when the patient returned for his second treatment on October 16, 1985. The patient and referring physician were informed of the error immediately. According to the attending physicians, there are no complications to be anticipated due to the incorrect treatment.

Cause or Causes—The misadministration was caused when the attending physician misinterpreted an area containing scar tissue in the medial limbal area of the right eye as the area to be treated. There were no written treatment instructions for the attending physician.

Actions Taken to Prevent Recurrence

Licensee—Effective November 20, 1985, the hospital has made it mandatory that a written requisition must be submitted by the referring physician prior to treatment. This requisition must include the patient's name and a deacription of the intended treatment area clearly identified. The physician must then sign and date the requisition. This requisition shall be kept in the patient's chart along with the treatment summary.

NRC—The circumstances of the misadministration were reviewed during a visit to the hospital on December 18, 1985, by members of the NRC Region V management staff. The licensee's corrective actions were determined to be acceptable. The NRC does not plan any further actions.

Diagnostic Medical Misadministration

The general abnormal occurrence criterion notes that an event involving a moderate or more severe impact on public health or safety can be considered an abnormal occurrence.

Date and Place—On December 9, 1985, a patient at Hospital Universitario, San Juan, Puerto Rico, received 4.96 millicuries of iodine-131 instead of a 10 to 15 microcuries dose usually given for a 24-hour thyroid uptake test.

Nature and Probable Consequences—The patient arrived at the hospital's Nuclear Medicine Division on December 9, 1985, to receive iodine-131 for a 24-hour thyroid test. The test was part of the physician's plan to evaluate the patient for hyperthyroidism. The usual dose for such a diagnostic procedure at the Nuclear Medicine Division is 10 to 15 microcuries. Instead, the technologist mistakenly administered a dose of 4.96 millicuries which is the dose usually given for whole body scans with iodine-131.

The patient's referring physician was notified of the misadministration. Based on statements from the physician, the patient was a likely candidate for iodine-131 therapy for treatment of the hyperthyroid condition; therefore, the probable consequences for the patient would be consistent with the projected medical treatment.

Cause or Causes—As discussed above, the reason for the misadministration was due to an error by the technologist.

Actions Taken to Prevent Recurrence

Licensee—Review with the nuclear medicine staff the protocol used for hyperthyroid patients dosed with radioiodine.

NRC—The incident and the licensee's protocol will be reviewed during the next NRC routine inspection.

Dated in Washington, DC, this 20th day of May 1986.

Samuel J. Chilk,

Secretary of the Commission.

BILLING CODE 7590-01-M

Public Service Company of New Hampshire, et al.; Receipt of Additional Antitrust Information; Time for Submission of Views on Antitrust Matters

Public Service Company of New Hampshire, *et al.*, pursuant to section 105 of the Atomic Energy Act, as amended, has filed information requested by the Attorney General for antitrust review as required by 10 CFR Part 50, Appendix L. This information concerns a proposed new owner, EUA Power Corporation (EUA Power), in the Seabrook Station, Units 1 and 2 located in Rockingham County, New Hampshire. The filing is precipitated by the proposed transfer of ownership shares of the Seabrook Station to EUA Power presently held by the following owners: Central Vermont Public Service Corporation; Central Maine Power Company; Bangor Hydro-Electric Company; and the Maine Public Service Corporation.

The Notice of Receipt of Application for Construction Permits and Facility Licenses and Availability of Applicants' Environmental Report; Time for Submission of Views on Antitrust Matters was published in the Federal Register on August 9, 1973 (38 FR 21522). The Notice of Receipt of Facility Operating Licenses was published in the Federal Register on October 19, 1981 (46 FR 51330).

Copies of the instant filing and the documents listed above are available for public examination and copying for a fee at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC 20555 and at the Exeter Public Library, Front Street, Exeter, New Hampshire 03833.

Any person who wishes to have views on antitrust matters with respect to the EUA Power Corporation presented to the Attorney General for consideration or who desires additional information regarding the matters covered by this notice, should submit such views or requests for additional information to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Planning and Program Analysis Staff, Office of Nuclear Reactor Regulation, on or before July 22, 1986.

Dated at Bethesda, Maryland, this 20th day of May, 1986.

For the Nuclear Regulatory Commission.

Jesse L. Funches,

Director, Planning and Program Analysis Staff, Office of Nuclear Reactor Regulation.

[FR Doc. 86-11052 Filed 5-22-86; 8:45 am]

BILLING CODE 7590-01-M

OFFICE OF MANAGEMENT AND BUDGET

Privacy Act of 1974; Proposed Guidance on the Privacy Act Implications of "Call Detail" Programs to Manage Employees' Use of the Government's Telecommunications Systems

AGENCY: Office of Management and Budget.

ACTION: Notice and request for public comment on Proposed Guidance implementing the Privacy Act of 1974.

SUMMARY: Pursuant to its responsibilities in section 6 of the Privacy Act of 1974 (Pub. L. 93-579), OMB has developed proposed guidance on how the recordkeeping provisions of that Act affect agencies' programs (so-called "call detail programs") to collect and use information relating to their employees' use of long distance telephone systems. This proposal:

- Describes the purposes of call detail programs and explains how they work.
- Notes that call detail records that contain only telephone numbers are not Privacy Act records, but that when linked with a name, they become Privacy Act records.
- Notes that when agencies start retrieving by reference to a linked number or name, they are operating a system of records.
- Urges agencies not to create artificial filing and retrieval schemes to avoid the Act.
- Suggests agencies establish an agency-wide system in which to maintain these records, and provides a model notice for them to use.
- Discusses the disclosure provisions of the Act as they would pertain to such a call detail system, especially emphasizing that intra-agency disclosures for improper employee surveillance purposes or to identify and harass whistleblowers are not sanctioned under section (b)(1).

Interested parties are invited to provide comments on this proposal.

DATE: Comments must be received before June 30, 1986.

ADDRESS: Send comments to the Office of Management and Budget, Office of Information and Regulatory Affairs, Room 3235 NEOB, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Robert N. Veeder, Information Policy Branch, OIRA, 202-395-4814.

Proposed Guidance:

1. *Purpose.*

This guidance is being offered in conjunction with guidance on call detailing published by the General Services Administration. Whereas GSA's guidance focuses on how to create and operate such programs, this document explains the ways in which the Privacy Act of 1974 affects any records generated during the course of call detail programs.

Nothing in this guidance should be construed to (a) authorize activities that are not permitted by law; or (b) prohibit

activities expressly required to be performed by law. Complying with these Guidelines, moreover, does not relieve a Federal agency of the obligation to comply with the provisions of the Privacy Act, including any provisions not cited herein.

2. *Scope.*

These Guidelines apply to all agencies subject to the Privacy Act of 1974 (5 U.S.C. 552a).

3. *Effective Date.*

These Guidelines are effective on the date of their issuance.

4. *Definitions.*

For the purposes of these Guidelines:

• All the terms defined in the Privacy Act of 1974 apply.

• "Call detail report"—This is the initial report of long-distance calls made during a specified period. A call detail report may be provided by a telephone company, the General Services Administration, or it may originate from a PBX (Private Branch Exchange) on an agency's premises. *No monitoring of conversations takes place during the collection of data for this report.* The report may contain such technical information as the originating number, destination number, destination city and State, date and time of day a call was made, the duration of the call, and cost of the call if made on commercial lines. At this stage, a call detail report contains no information directly identifying the individuals making or receiving calls.

• "Call Detail Information" or "Call Detail Records." These are records generated from call detail reports through administrative, technical or investigative follow-up. In some cases call detail information or records will contain *no* individually identifiable information and there for no Privacy Act considerations will apply. In other cases, the information and records will be linked with individuals and the Privacy Act must be taken into consideration.

5. *Background.*

Rapid growth in automated data processing and telecommunications technologies has created new and special problems relating to the Federal Government's creation and maintenance of information about individuals. At times, the capabilities of these technologies have appeared to run ahead of statutes designed to manage this kind of information, particularly the Privacy Act. An example is the establishment of *call detail* programs to help agencies control the costs of operating their long distance telephone systems. Call detail programs develop information about how an agency's telecommunications system is being used. The information may come from a number of sources, e.g., from agency installed or utilized devices to record usage information (pen registers or agency switching equipment); from central agency managers such as the General Services Administration or the Defense Communications Agency; or directly from the providers of telecommunications services.

There are many different purposes for call detail programs. Agency managers may use call detail information to help them choose more efficient and cost-effective ways of communicating. The information may be used to make decisions about acquiring hardware, software, or services, and to develop management strategies for using existing telecommunications capacity more efficiently. One aspect of this latter use may be the development of programs to identify unofficial use of the agency's telephone system. To this end, call detail programs work by collecting information about the use of agency telephone systems and then attempting to assign responsibility for particular calls to individual employees. Their two-fold purpose is to deter use of the system for unofficial purposes and to recoup for the government the cost of unofficial calls.

Soon, the establishment of call detail programs will become a government-wide priority as part of a management initiative on reducing the government's administrative costs.

6. *Privacy Act Implications.*

a. *Call Detail Records as Privacy Act Records.*

The Privacy Act of 1974 is the primary statute controlling the government's use of information about individuals. Not all individually identifiable information, however, qualifies for the Act's protections. With but few exceptions, only information that consists of "records" as defined by the Act, and which is maintained by an agency in a "system of records," triggers the Act's provisions. The Privacy Act defines a "record" as "* * * any item, collection or grouping of information about an individual that is maintained by an agency including, but not limited to, his education, financial transactions, medical history, and criminal or employment history and that contains his name, or the identifying number, symbol, or other identifying particular assigned to the individual, such as a finger or voice print or a photograph * * *."

A "system of records" is—a group of any such records from which information is retrieved by the name of the individual or other identifying particular.

As we have indicated in our original Privacy Act implementing Guidelines (40 FR 28949, July 9, 1975), the mere capability of retrieving records by an identifying particular is not enough to create a system of records; *the agency must actually be doing so.*

The threshold question for call detail information, then, is whether a telephone number is a record within the meaning of the Privacy Act. The answer to this question depends upon how the telephone number is maintained.

Standing alone, a telephone number, is *not* a Privacy Act record. To achieve the status of a Privacy Act record, a telephone number must be maintained in a way that links it to an individual's name or some other identifying particular such as a Social Security Account Number.

When an agency assigns a specific phone number to an employee and maintains that information in a way that the name and number are inseparably connected, there is sufficient identification linkage that a Privacy Act record is created. (It should be noted that the Privacy Act does not require that the record be unique to the individual, only that it be "about" him or her and include his or her name or other indentifying particular. Thus, a telephone number could be shared by several individuals and still meet the Privacy Act "record" definition).

The initial call detail reports which contain only technical information about telephone usage do not consist of records within the meaning of the Privacy Act and they will therefore never reach the level of a system of records. For many areas of telecommunications management, the information in call detail reports will never become systems of records and the Privacy Act will have no application.

When, however, call detail records are used in management programs designed to control costs and determine *individual* accountability for telephone calls, Privacy Act considerations must be addressed. In order to carry out these kinds of call detail programs, agencies will have to link numbers and names so that they can determine who is responsible for what call. It is at this point, that the telephone number meets the Privacy Act definition of a "record."

b. *Call Detail Records in Privacy Act Systems of Records.*

The next question, then, is when do files consisting of Privacy Act records created by linking a telephone number and an individual's name become a system of records? This occurs when agencies use the Privacy Act record as a

BEST COPY AVAILABLE

key to retrieve information from these files.

While it is important to remember that not every data base containing call detail records will be a Privacy Act system of records, agencies are cautioned against creating artificial filing schemes merely to avoid the effect of the Act when the establishment of a system of records would be appropriate. Since these records are clearly intended to establish *individual* responsibility for long distance telephone use, their use by the agency could have serious financial or disciplinary consequences for individual employees. By maintaining these records in conformance with the provisions of the Privacy Act, agencies can make certain that legitimate concerns about the implementation of call detail programs (e.g., improper use of the records for surveillance or employee harassment, unfairness, and record accuracy) are dealt with in a procedural framework that was designed to deal with such concerns.

Therefore, we recommend strongly that agencies create an agency-wide Privacy Act system of records in which to maintain call detail records that contain information about individuals and are used to determine accountability for telephone usage.

Such a system might contain the following kinds of records:

• The initial call detail monthly listing (in whatever form it is kept, e.g., on paper, magnetic tape or diskettes);

• Locator information showing where in the agency specific telephones are located;

• Records relating to the identification of individual employees, and (1) linking them with specific calling numbers; (2) linking them with specific called numbers.

Notes that not all Privacy Act records generated as a result of call detail programs would become a part of *this* system of records. Thus, investigative records of the Office of the Inspector General, personnel records reflecting administrative or disciplinary actions, finance and accounting records relating to cost attribution and recoveries, and the like, that are generated from call detail programs might be filed in appropriate existing systems and subjected to their particular disclosure/safeguarding provisions. In other instances, records (name and telephone number, for example) may be common to the call detail system and other systems.

To help the agencies in its construction, we offer a model system notice in Appendix I.

c. *Disclosing from Call Detail Records Systems under Section (b) of the Privacy Act.*

The Privacy Act provides 12 exceptions to its basic requirement that agencies must obtain the written consent of the record subject before disclosing information from a system of records. The following exceptions are the ones most relevant to the proposed Call Detail system of records:

• Section (b)(1). "To those officers and employees of the agency which maintains the record who have a need for the record in the performance of their duties." This exception does not contemplate unrestricted disclosures within the agency. Intra-agency disclosure of call detail records may be made *only when there is an official need to know the information.* The following are examples of disclosures that (b)(1) would permit:

—To individual supervisors to determine responsibility for specific telephone calls.

—To employees of the agency to review the call detail lists and identify calls made by the employee. Note that the other option for this kind of disclosure is a routine use (Section (b)(3)). Agencies that are concerned about establishing that employee A has an official need to know about the calls made from employee B's telephone may wish to adopt a routine use authorizing the disclosures.

—To the employees of the Office of the Inspector General who are conducting investigations into abuse of the FTS system;

—To employees of the Office of Finance and Accounting for processing of reimbursements for personal calls or for processing of administrative offsets of pay pursuant to the provisions of the Debt Collection Act;

—To Freedom of Information Act Officers and legal advisers.

Some examples of disclosures that (b)(1) would *not* authorize are:

—To agency personnel to identify and harass whistleblowers;

—To agency personnel who are merely curious to know who is calling whom.

• Section (b)(2). "Required under Section 552 of this title." Information may be disclosed both inside and outside the agency to the extent that the disclosure would be *required* by the Freedom of Information Act. Prior to the ruling of the Court of Appeals for the D.C. Circuit in *Bartel v. FAA*, 725 F.2d 1403 (D.C. Cir. 1984), longstanding agency practices and OMB interpretation treated this section as permitting agencies to *initiate* disclosure of material that they would be "required" to release under the FOIA. Disclosure under this interpretation did not depend on the existence of a FOIA request for the records; the mere finding that no FOIA exemption could apply and that the agency would therefore have no choice but to disclose, was sufficient. In fact, agencies relied upon this interpretation of the requirements of section (b)(2) to make routine disclosures of many documents, especially those traditionally thought to be in the public domain such as press releases, final orders, telephone books, and the like.

In *Bartel*, however, the court held that an agency must have received an actual FOIA request before disclosing pursuant to section (b)(2). In that case, the plaintiff, Bartel, brought a Privacy Act action asserting that his supervisor had gratuitously disclosed to three former colleagues the fact that Bartel had improperly obtained copies of their personnel records. The court interpreted the standard for (b)(2) disclosures to other than a conditional one, i.e., not merely that the agency *would* have to disclose *if* such a request were received, but that the agency must have to do so because an actual FOIA request for the records *has been* made. Under this ruling, agency-initiated requests of FOIA releasable material would be improper.

The court noted, however, that material traditionally held to be in the public domain might constitute an exception to its FOIA-request-in-hand interpretation. In guidance issued in May of 1985 (Memorandum from Robert P. Bedell to Senior Agency Officials for Information Resources Management, Subject: Privacy Act Guidance—Update, dated May 24, 1985) OMB suggested (without agreeing with the ruling) that agencies continue to make disclosure of these kinds of records without having received a FOIA request. We cautioned, however, that agencies should be careful about making gratuitous releases of sensitive classes of Privacy Act records without having received a request for them.

Applying the *Bartel* ruling to call detail information, there appear to be three distinct categories of records which could be considered for release under section (b)(2):

—Records which clearly fall into the "public domain" category. We suggest that these would be releasable either at the agency's initiation or in response to a FOIA request: The former because they are of the "traditionally released" class; the latter, because no FOIA exemption would prevent their disclosure. An example would be the names and

office telephone numbers of agency employees. These are generally considered public information (obviously there may be exceptions for investigative and intelligence organizations), and the only applicable FOIA exemption, (b)(6), the personal privacy exemption, would not apply. Thus, disclosures of an employee's name and office telephone number would be appropriate under Privacy Act section (b)(2).

—Records which could be withheld under an applicable FOIA exemption and which, therefore, would not be required to be released. These could be, for example, records which contain sensitive information relating to ongoing investigative or personnel matters such as records relating to the investigation of an employee for abuse of the agency's long distance telephone system. Such records could reasonably be withheld under FOIA exemption (b)(6) and, therefore, would not be releasable under section (b)(2) of the Privacy Act. An agency would not release these kinds of records either at its own initiative or in response to a FOIA request. It should be noted, however, that such records might be released under other sections of the Act, such as (b)(3), "for a routine use," or (b)(7) at the request of the head of an agency for an authorized civil or criminal law enforcement activity.

—Records for which no FOIA exemption applies but which contain sensitive information, e.g., records which reflect the results of official actions taken as a consequence of investigations of abuses of the telephone system. We suggest that agencies should be very cautious about initiating disclosure of these records without receiving a FOIA request since they appear to be of the category of records that concerned the *Bartel* court. Even with a request, agencies will have to determine that the interest of the public in having the record clearly outweighs the privacy interest of the record subject in order to overcome the applicability of FOIA exemption (b)(6).

• Section (b)(3). "For a routine use." See the routine use section of the model system notice at Appendix I. A routine use is a disclosure of information that will be used for a purpose that is compatible with the purpose for which the information was originally collected.

The concept of compatibility comprises both *functionally equivalent uses:*

—For example, routine use (5) in the model notice would authorize disclosure to the Department of Justice to prosecute an egregious abuser of an agency's long distance telecommunications system. This disclosure is functionally compatible since one of the purposes of the system is to identify abusers and subject them to administrative or legal consequences.

as well as other *uses that are necessary and proper:*

—For example, routine use (2) in the model notice authorizes disclosure to representatives of the General Services Administration or the National Archives and Records Administration who are conducting records management inspections pursuant to a specific statutory charter. Their purpose is in no way functionally equivalent to the purpose for which the system was established; it is, however, clearly necessary and proper.

• Section (b)(12). "To a consumer reporting agency." This disclosure exception was added to the origiunal 11 by the Debt Collection Act of 1982. It authorizes agencies to disclose bad debt information to credit bureaus. Before doing so, however, agencies must complete a series of due process steps designed to validate the debt and to offer the individual the chance to repay it (see OMB Guidelines on the Debt Collection Act, published in the **Federal Register** on April 11, 1983 (48 FR 15556). It is possible that agencies will wish to disclose information from call detail systems of records documenting an individual's responsibility for unofficial long distance calls as part of the bad debt disclosure. For this reason, the model system notice at Appendix I contains a statement identifying the system as one from which such disclosures can be made.

7. Contact Point for Guidance.

Refer any questions about this guidance to Robert N. Veeder, Office of Management and Budget, Office of Information and Regulatory Affairs, 395-4814.

Wendy L. Gramm,

Administrator for Information and Regulatory Affairs.

Appendix I—Proposed Model System Notice for Call Detail Records

This is a proposed notice; agencies should modify it as appropriate.

System Name:

Call Detail Records.

System Location:

Records are stored at (name of Headquarters Office containing central files) and at (insert component locations).

Categories of Individuals Covered by the System:

Agency employees who make long distance calls and individuals who received telephone calls placed from agency telephones.

Categories of Records in the System:

Records relating to use of the agency telephones to place long distance calls, records indicating assignment of telephone numbers to employees; records relating to location of telephones.

Authority for Maintenance of the System:

(Cite appropriate agency "housekeeping" statute authorizing the agency head to create, collect and keep such records as are necessary to manage the agency).

Routine Uses of Records Maintained in the System:

Records and data may be disclosed, as is necessary, (1) to Members of Congress to respond to inquiries made on behalf of individual constituents that are record subjects; (2) to representatives of the General Services Administration and the National Archives and Records Administration who are conducting records management inspections under the authority of 44 U.S.C. 2904 and 2906; (3) in response to a request for discovery or for the appearance of a witness, to the extent that what is disclosed is relevant to the subject matter involved in a pending judicial or administrative proceeding; (4) in a proceeding before a court or adjudicative body to the extent that they are relevant and necessary to the proceeding; (5) to an appropriate Federal, State or local law enforcement agency responsible for investigating, prosecuting, or defending an action where there is an indication of actual or potential violation of any government action; (6) to employees of the agency to determine their individual responsibility for telephone calls, but only to the extent that such disclosures consist of comprehensive lists of called and calling numbers; (7) to respond to a Federal agency's request made in connection with the hiring or retention of an employee, the letting of a contract or issuance of a grant, license or other benefit by the requesting agency, but only to the extent that the information disclosed is relevant and necessary to the requesting agency's decision on the matter. (Agencies should refrain from

automatically applying all of their blanket routine uses to this system).

Disclosures pursuant to 5 U.S.C. 552a(b)(12):

Disclosures may be made from this system to "consumer reporting agencies" as defined in the Fair Credit Reporting Act (15 U.S.C. 1681a(f)) or the Federal Claims Collection Act of 1966 (31 U.S.C. 3701(a)(3)).

Policies and Practices for Storing, Retrieving, Accessing, Retaining, and Disposing of Records in System:

Storage:

(Describe agency methods of storage).

Retrievability:

Records are retrieved by employee name or identification number, by name of recipient of telephone call, by telephone number.

Safeguards:

(Describe methods for safeguarding).

Retention and Disposal:

Records are disposed of as provided in National Archives and Records Administration General Records Schedule 12.

System Manager(s) and Address(es):

(List central system manager and component subsystem managers, if appropriate).

Notification Procedures:

(Explain notification procedures).

Record Access Procedures:

(Explain how individuals may obtain access to their records).

Record Source Categories:

Telephone assignment records; call detail listings; results of administrative inquiries relating to assignment of responsibility for placement of specific long distance calls.

Systems Exempted from Certain Provisions of the Act: None.

[FR Doc. 86-11633 Filed 5-22-86; 8:45 am]

BILLING CODE 3110-01-M

OFFICE OF PERSONNEL MANAGEMENT

Excepted Service; Schedules A, B, and C

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: This gives notice of positions placed or revoked under Schedules A, B, and C in the excepted service, as required by civil service rule VI, Exceptions from the Competitive Service.

FOR FURTHER INFORMATION CONTACT: Tracy Spencer, (202) 632-6217.

SUPPLEMENTARY INFORMATION: The Office of Personnel Management published its last monthly notice updating appointing authorities established or revoked under the Excepted Service provisions of 5 CFR Part 213 on May 2, 1986 (51 FR 16412). Individual authorities established or revoked under Schedule A, B or C between April 1, 1986, and April 30, 1986, appear in a listing below. Future notices will be published on the fourth Tuesday of each month, or as soon as possible thereafter. A consolidated listing of all authorities will be published as of June 30 of each year.

Schedule A

No Schedule A exceptions were established during April. However, the following exceptions are revoked:

Department of State

Schedule A excepted appointing authority for part-time or intermittent gauge readers employed by the International Boundary and Water Commission, United States and Mexico, was revoked because it is no longer used. Effective April 16, 1986.

General Services Administration

The Schedule A excepted appointing authority for custodians, guards, and related employees engaged in the custody and preservation of surplus facilities pending their disposal was revoked because it is no longer used. Effective April 8, 1986.

Schedule B

The following exception is established:

Department of Treasury

Not to exceed 10 positions engaged in functions mandated by Public Law 99-190, the duties of which require expertise and knowledge gained as a present or former employee of the Synthetic Fuels Corporation, as an employee of an organization carrying out projects or contracts for the Corporation, or as an employee of a Government agency involved in the Synthetic Fuels Program. Appointments under this authority may not exceed 4 years. Effective April 9, 1986.

Schedule C

The following exceptions are established:

Department of Agriculture

One Staff Assistant to the Secretary. Effective April 4, 1986.

One Confidential Assistant to the Secretary. Effective April 4, 1986.

One Confidential Assistant to the Secretary. Effective April 30, 1986.

Department of Commerce

One Confidential Assistant to the Director, Minority Business Development Agency. Effective April 4, 1986.

One Confidential Assistant to the Deputy Assistant Secretary, Import Administration, International Trade Administration. Effective April 17, 1986.

One Special Assistant to the Deputy Administrator, National Oceanic and Atmospheric Administration. Effective April 18, 1986.

One Confidential Assistant to the Deputy Assistant Secretary for Science and Electronics, International Trade Administration. Effective April 21, 1986.

One Confidential Assistant to the Special Assistant to the Deputy Secretary. Effective April 25, 1986.

One Associate Director to the Director, Office of Ocean and Coastal Resource Management, National Oceanic and Atmospheric Administration. Effective April 29, 1986.

Department of Defense

One Special Assistant to the Ambassador and Political/Military Counselor. Effective April 30, 1986.

Department of Education

One Confidential Assistant to the Under Secretary. Effective April 2, 1986.

BILLING CODE 6325-01-M

PACIFIC NORTHWEST ELECTRIC POWER AND CONSERVATION PLANNING COUNCIL

Proposed Procedure for Responding to Petitions for Rulemaking To Revise Power Plan

AGENCY: Pacific Northwest Electric Power and Conservation Planning Council (Northwest Power Planning Council).

ACTION: Proposed policy and opportunity to comment.

SUMMARY: The Northwest Power Planning Council propose the following procedures for responding to petitions for rulemaking to revise the Northwest Conservation and Electric Power Plan.

DATES: Comments must be submitted on or before June 6, 1986.

ADDRESS: Send comments to Janet C. Hanson, Associate Counsel, 850 SW. Broadway, Suite 1100, Portland, Oregon 97205.

FOR FURTHER INFORMATION CONTACT: Copies of this notice and the final procedures may be obtained by contacting Dulcy Mahar, Director of Public Information and Involvement at Northwest Power Planning Council, 850 SW. Broadway, Suite 1100, Portland, Oregon 97205, or at (503) 222-5161, or (toll-free) 1-800-222-3355 (in Montana, Idaho or Washington) or 1-800-452-2324 in Oregon.

SUPPLEMENTARY INFORMATION:

Background

The Administrative Procedures Act (APA), 5 U.S.C. 553(e), requires administrative agencies to give interested persons the right to petition for the issuance, amendment or repeal of an administrative rule. The Council is at this time considering adoption of a formal policy for responding to petitions to enter rulemaking to revise the Northwest Conservation and Electric Power Plan (Power Plan).

Although the APA requires that persons be given the right to petition for rulemaking, it does not prescribe any particular procedures to be followed in this process. This policy has been drafted based upon procedures for petitions for rulemaking used by other agencies.

This process will no doubt become increasingly important if the Council schedules less frequent major revisions to the Power Plan, which, pursuant to section 4(d)(1) of the Northwest Power Act, 16 U.S.C. 839(d)(1), is an administrative rule. If, for example, the Council decides to make major revisions as infrequently as every five years (the statutory maximum for review of the Plan), it may be increasingly necessary to have in place a procedure for responding to requests during the interim period to re-examine parts of the Power Plan. A procedure for handling petitions for rulemaking would clarify the process for interested persons to request the Council to review additional data and other information as it becomes available.

It is proposed that any recommendation or petition to amend the Council's Columbia River Basin Fish and Wildlife Program will continue to be handled separately under section 4(h) of the Northwest Power Act, 16 U.S.C. 839b(h), and sections 1400-1404 of the Fish and Wildlife Program. According to these sections, prior to a major revision of the Power Plan, the Council must request recommendations for amendment of the Fish and Wildlife Program. The Council also may consider applications for amendment to the Fish and Wildlife Program which are submitted at other times, as well as considering Fish and Wildlife Program amendments on its own motion. The Council will consider modifying the procedures contained in sections 1400-1404 of the Program if it determines that any of those procedures are incompatible with this policy or otherwise require improvement or clarification. The Council requests comment on this proposed treatment of Fish and Wildlife Program amendments and welcomes suggestions for possible modifications to section 1400-1404 of the Program.

If adopted by the Council, the proposed policy would be as follows:

Procedures for Responding to Petitions for Rulemaking To Revise Power Plan

The following procedures are to be followed for handling requests that the Council enter rulemaking for purposes of revising the Council's Power Plan:

1. Any interested person may petition the Council to initiate a proceeding for the issuance, amendment or repeal of a rule according to 5 U.S.C. 553 in order to revise the Council's Power Plan.

2. Such a petition must be submitted to the General Counsel, Northwest Power Planning Council, 850 SW. Broadway, Suite 1100, Portland, Oregon 97205.

3. The petition must:

(a) Set forth the substance or text of a proposed rule or amendment, or identify the rule requested to be repealed;

(b) Explain the interest of the petitioner in the action sought; and

(c) Set forth the facts, reasons and new information, not previously available, which the petitioner claims establish that it is necessary to issue, amend or repeal a rule promulgated by the Council.

4. The Council will conduct such investigation or proceeding as it deems appropriate in order to determine whether a petition should be granted. This proceeding may, but need not, include preparing and releasing a staff issue paper and holding one or more public hearings.

5. Within 120 days after receipt of a petition described in paragraph 1, the Council will either grant or deny the petition. Any final decision on a petition will be made at a public Council meeting in accordance with the notice provisions of the Government in the Sunshine Act and with the Council's normal practice of providing opportunity for public comment on its agenda items. If the Council grants the petition, the Council will promptly notify the petitioner and will commence a rulemaking proceeding. If the Council denies a petition, it will promptly notify the petitioner of the denial and the reasons therefor.

6. If the Council decides to enter rulemaking, it will proceed expeditiously to publish notice of a proposed rule in the **Federal Register** and to conduct such rulemaking in accordance with the Administrative Procedures Act and the Northwest Power Act.

7. The Council will make all reasonable efforts to take final action on the proposed rule within seven months after the Council's decision to enter rulemaking. The Council will take final action on the proposed rule within this

time, unless it finds that additional information or analysis is needed.

Edward Sheets,

Executive Director.

[Policy Statement P-5-39 and Delegation Order No. 23 (Rev. 9)]

Policy Statement and Delegation of Authority; District Directors et al.

AGENCY: Internal Revenue Service, Treasury.

ACTION: Policy Statement P-5-39 and Delegation Order No. 23 (Rev. 9).

SUMMARY: Policy Statement P-5-39 reflects that, in accordance with 31 U.S.C. 3723, The Small Claims Act, a

taxpayer may file a claim for reimbursement of certain expenses incurred due to an error by the Internal Revenue Service. Delegation Order No. 23 (Rev. 9) authorizes District Directors and Service Center Directors to consider, ascertain, adjust and determine, under U.S.C. 3723, claims for reimbursement of bank charges arising out of erroneous Service levies. The text of the policy statement and delegation order appears below.

EFFECTIVE DATE: May 2, 1986.

FOR FURTHER INFORMATION CONTACT: G. Stephen Ellis, C:PRP, Room 7212, 1111 Constitution Avenue, NW., Washington, DC 20224, telephone 202 566-4943, (not a toll-free telephone number).

Linda Martin,

Director, Problem Resolution Staff.

Order No. 23 (Rev. 9)

Effective date: 5-3-86

Settlement of Tort Claims, Claims Under the Small Claims Act, and Claims Made by an Employee of the Internal Revenue Service for Damage to or Loss of Personal Property Incident to Service

1. Pursuant to Treasury Department Order No. 145 as revised, and Treasury Department Order No. 177-22 as revised, (Rev. 2), there is hereby delegated to the officials listed below the authority to handle the claims and amounts of claims as specified:

(a) Safety and Occupational Health Manager, National Office:

(1) The authority, under 28 U.S.C. 2672 to consider, ascertain, adjust, determine, compromise, settle, and pay or transmit for payment claims for money damages for injury or loss of property or personal injury or death caused by the negligent or wrongful act or omission of any employee of the Internal Revenue Service;

(2) The authority to consider, ascertain, adjust, and determine claims under 31 U.S.C. 3722;

(3) The authority under the Military Personnel and Civilian Employees' Claims Act of 1964, as amended, to settle and pay claims made by an employee of the Internal Revenue Service for damage to or loss of personal property incident to his/her service.

(b) Chief, Facilities Management Branch, each Regional Office, the authority under the Military Personnel and Civilian Employees' Claims Act of 1964, as amended, to settle and pay claims made by an employee within the respective regions in any amount of $500 and less, for damage to or loss of personal property incident to his/her service.

(c) District Directors and Service Center Directors, the authority to consider, ascertain, adjust and determine under 31 U.S.C. 3723 claims for reimbursement of bank charges arising out of erroneous Service levies.

2. This authority may not be redelegated.

3. Delegation Order No. 23 (Rev. 8) issued October 31, 1985, is superseded.

Dated: May 2, 1986.

Approved:

James I. Owens,

Deputy Commissioner.

Reimbursement of Bank Charges Due to Erroneous Levy

The Service recognizes that there are circumstances when an erroneous use of its unique enforcement powers may cause taxpayers to incur certain bank charges. Taxpayers who incur bank charges due to an erroneous levy may file a claim for reimbursement of those expenses. Bank charges include a financial institution's customary charge for complying with the levy instructions and charges for overdrafts that are a direct consequence of an erroneous levy. The charges must have been paid by the taxpayer and must not have been waived or reimbursed by the financial institution. Claims must be filed with the District Director or Service Center Director within one year after accrual of the expense.

The following criteria must be present in all cases:

(1) The error was caused by the Service;

(2) the taxpayers must not have contributed to the continuation or compounding of the error; and

(3) prior to the levy the taxpayers must have timely responded to any contact from the Service and have timely provided the Service with any requested documentation or documentation sufficient to establish their position.

Dated: May 2, 1986.

Approved:

James I. Owens,

Deputy Commissioner.

NATIONAL TRANSPORTATION SAFETY BOARD

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 51 FR 18401, May 19, 1986.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: 9 a.m., Wednesday, May 28, 1986.

CHANGE IN MEETING: A majority of the Board determined by recorded vote that the business of the Board required revising the agenda of this meeting and that no earlier announcement was possible. The following item was added to the agenda to be discussed in closed session.

5. *Opinion and Order:* Administrator v. Schwontkowski, Docket SE-6818; disposition of the Administrator's appeal.

CONTACT PERSON FOR MORE INFORMATION: H. Ray Smith (202) 382-6525.

Catherine T. Kaputa,

Federal Register Liaison Officer.

May 20, 1986.

[FR Doc. 86-11732 Filed 5-21-86; 9:10 am]

OCCUPATIONAL SAFETY AND HEALTH REVIEW COMMISSION

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 51 FR 17652, (May 15, 1986).

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: Thursday, May 29, 1986 at 10:00 a.m.

CHANGES IN THE MEETING: The meeting has been rescheduled for Tuesday, May 27, 1986 at 10:00 a.m. In addition to the announced topic, the Commission also will consider possible revisions to the Commission's Rules of Procedure, Subpart M. Simplified Proceedings. 29 CFR 2200.200 through 2200.212.

Dated: May 21, 1986.

Earl R. Ohman, Jr.,

General Counsel.

POSTAL SERVICE

The Board of Governors of the United States Postal Service, pursuant to its Bylaws (39 CFR 7.5) and the Government in the Sunshine Act (5 U.S.C. 442b), hereby gives notice that it intends to hold a meeting at 8:30 a.m. on Tuesday, June 3, 1986, in the Benjamin Franklin Room, U.S. Postal Service Headquarters, 475 L'Enfant Plaza, SW., Washington, DC. The meeting is open to the public. The Board expects to discuss the matters stated in the agenda which is set forth below. Requests for information about the meeting should be addressed to the Secretary of the Board, David F. Harris, at (202) 268-4800.

There will also be a session of the Board on Monday, June 2, 1986, but it will consist entirely of briefings and not open to the public.

Agenda

Tuesday Session

June 3, 1986—8:30 a.m. (Open)

1. Minutes of the Previous Meeting, May 5-6, 1986.
2. Remarks of the Postmaster General.
3. Report of the Chief Postal Inspector.
   (Mr. Clauson, Chief Postal Inspector, will make present this item.)
4. Chief Inspector's Report on Consumer Protection (Pub. L. 98-186).
   (Mr. Clauson will make this presentation.)
5. Tentative agenda for July 7-8, 1986, meeting in Washington, DC.

David F. Harris,

Secretary.

Paul J. Kemp,

Alternate Liaison Officer for the U.S. Postal Service.

Part II

Department of Transportation

Office of the Secretary

49 CFR Parts 27 and 609
Nondiscrimination on the Basis of Handicap in Financial Assistance Programs; Final and Proposed Rules

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 27

[Docket No. 86x; Amdt. No. 27-3]

Nondiscrimination on the Basis of Handicap in the Department of Transportation Financial Assistance Programs

AGENCY: Office of the Secretary, DOT.

ACTION: Final rule.

SUMMARY: This final rule requires recipients of financial assistance from the Department of Transportation for urban mass transportation to establish programs to provide transit services to handicapped persons. The service must meet certain service criteria. The rule also establishes a limit on the amount of money a recipient must spend to meet these criteria. The rule carries out section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and section 317(c) of the Surface Transportation Assistance Act of 1982 (49 U.S.C 1612(d)), as they apply to the Department's financial assistance program for urban mass transportation. In an accompanying notice of proposed rulemaking, the Department is proposing provisions concerning commuter rail systems and certain other matters.

EFFECTIVE DATE: This final rule is effective June 23, 1986.

FOR FURTHER INFORMATION CONTACT: Robert C. Ashby, Deputy Assistant General Counsel for Regulations and Enforcement , U.S. Department of Transportation, Room 10424, 400 7th Street, SW., Washington, DC 20590; (202) 426–4723 (voice) or (202) 755–7687 (TDD). The Department is currently in the process of installing a new telephone system. As a result, the voice information number is expected to change, during July 1986, to (202) 366–9305. The TDD number is not expected to change. This rule has been taped for use by visually-impaired persons. Requests for taped copies of the rule should be made to Mr. Ashby.

SUPPLEMENTARY INFORMATION:

Highlights of the Rule

This final rule creates a new Subpart E of 49 CFR Part 27, Department's rule on nondiscrimination on the basis of handicap in financial assistance programs. The rule carries out section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and section 317(c) of the Surface Transportation Assistance Act of 1982 (49 U.S.C. 1612(d)), as they apply to the Department's financial assistance program for urban mass transportation. The new Subpart E replaces the present § 27.77, which originated in a July 1981 interim final rule.

With a few exceptions, the new rule requires each recipient of financial assistance from the Urban Mass Transporatation Administration (UMTA) to prepare a program for providing transportation services to handicapped persons. The recipient must go through a public participation process, including consultation with handicapped persons. Within a year from the effective date of this rule, the recipient must transmit the program to UMTA for approval.

Recipients may fulfill their obligations under the rule by choosing either a special service (e.g., dial-a-van, taxi voucher), an accessible bus system (either a scheduled or on-call accessible bus system), or a mixed system (i.e., a system having both special service and accessible bus elements). Whatever type of service the recipient elects to provide, the service must meet the following six service criteria:

(1) All persons who, by reason of handicap, are physically unable to use the recipient's bus service for the general public must be eligible to use the service for handicapped persons;

(2) Service must be provided to a handicapped person within 24 hours of a request of it;

(3) Restrictions or priorities based on trip purpose are prohibited;

(4) Fares must be comparable to fares charged the general public for the same or a similar trip;

(5) The service for handicapped persons must operate throughout the same days and hours as the service for the general public; and

(6) The service for handicapped persons must be available throughout the same service area as the service for the general public.

The rule spells out how the six criteria apply to each kind of transportation system.

The rules establishes a limit on the amount of money a recipient is required to spend to meet these service requirements. This limit on required expenditures is calculated by taking 3.0 percent of the recipient's average operating costs; over the current and two previous fiscal years.

If the recipient cannot meet the six criteria for the type of service it chooses without exceeding this limit on required expenditures, the recipient may modify its service to keep its expenditures within the limit, after consultation through its public participation process.

The rest of the rule's provisions are primarily administrative in nature. They concern such subjects as the expenses eligible to be counted in determining whether a recipient has exceeded its limit on required expenditures, UMTA monitoring of recipients' actions, special provisions for small recipients and multi-recipient regions, and technical exemption procedures.

The Department has performed a Regulatory Impact Analysis (RIA) in connection with this rule. This analysis, based on case studies of several existing systems and a computer model study of a large sample of systems, projects the annual and long-term costs and cost-effectiveness of various approaches to providing transportation service to disabled persons. A copy of the RIA has been placed in the docket for this rulemaking.

In an accompanying notice of proposed rulemaking (NPRM), the Department is proposing requirements for commuter rail systems, on which comments are being requested for 90 days. The NPRM also proposes to incorporate vehicle and fixed facility standards, as well as the reduced fare requirement for elderly and handicapped passengers, from 49 CFR Part 609, which would be withdrawn.

Background of the Rulemaking

Section 504 of the Rehabilitation Act of 1973 prohibits discrimination on the basis of handicap in federally-assisted programs. The Department's existing regulation, 49 CFR Part 27, implements this statute in the Department's mass transit programs. This 1979 regulation imposed accessibility requirements for DOT-assisted highways, airports, intercity rail service, and mass transit.

In *American Public Transit Association* v. *Lewis*, 556 F.2d 1271 (D.C. Cir., 1981), the U.S. Court of Appeals for the District of Columbia Circuit held that, under section 504, a transit authority might be required to take "modest, affirmative steps to accommodate handicapped persons". The Court said, however, that the 1979 regulation, as applied to mass transit, exceeded the Department's section 504 authority because it required overly costly efforts to modify existing systems.

The Department reviewed the rule and determined that its policy is that recipients of Federal assistance for mass transit must provide transportation that handicapped persons can use but that local communities have the major responsibility for deciding how this transportation should be provided.

Consistent with this policy and the Court decision, the Department issued

an interim final rule in July 1981. It deleted the mass transit requirements of the original regulation and substituted a new § 27.77. This section required recipients to certify that special efforts are being made in their service area to provide transportation that handicapped persons can use.

In 1983 Congress passed section 317(c) of the Surface Transportation Assistance Act of 1982 (49 U.S.C. 1612(d)). It provides as follows:

> In carrying out subsection (a) of this section [section 16(a) of the Urban Mass Transportation Act of 1964, as amended] section 165(b) of the Federal-Aid Highway Act of 1973, and section 504 of the Rehabilitation Act of 1973 (consistent with any applicable government-wide standards for the implementation of such section 504), the Secretary shall, not later than 90 days after the date of enactment of this subsection, publish in the Federal Register for public comment, proposed regulations and, not later than 180 days after the date of such enactment, promulgate final regulations, establishing (1) minimum criteria for the provision of transportation services to handicapped and elderly individuals by recipients of Federal financial assistance under this Act or any provisions of law referred to in section 165(b) of the Federal-Aid Highway Act of 1973, and (2) procedures for the Secretary to monitor recipients' compliance with such criteria. Such regulations shall include provisions ensuring that organizations and groups representing such individuals are given adequate notice of and opportunity to comment on the proposed activities of recipients for the purpose of achieving compliance with such regulations.

In order to implement this statute, as well as to replace the interim final rule with a permanent regulation, the Department published a notice of proposed rulemaking (NPRM) on September 8, 1983 (48 FR 40694). The NPRM proposed that recipients' service for handicapped persons had to meet a series of service criteria, but recipients were not required to spend more than a certain amount in a given year to provide this service.

The Department received more than 650 comments on the NPRM. The commenters included handicapped persons and groups representing them, local transit authorities and state transportation agencies, other transportation providers, private and public human service agencies, members of Congress, and members of the general public.

Legal Background and Issues

Basic Statutes

The legal authority for DOT's regulatory efforts in the area of mass transit service for handicapped persons comes from three statutes in addition to section 317(c). Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) provides that

> No otherwise qualified handicapped individual in the United States . . . shall, solely by reason of his handicap, be excluded from the participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance. . . .

Section 165(a) of the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1612(a)) provides that

> It is hereby declared to be the national policy that elderly and handicapped persons have the same right as other persons to utilize mass transportation facilities and services; that special efforts shall be made in the planning and design of mass transportation facilities and services so that the availability to elderly and handicapped persons of mass transportation which they can effectively utilize will be assured; and that all Federal programs offering assistance in the field of mass transportation (including the programs under this Act) should contain provisions implementing this policy.

Section 165(b) of the Federal-aid Highway Act of 1973, as amended, applies a similar requirement to mass transit projects funded under the Federal-aid Highway Act's interstate transfer provisions.

Court Interpretations of Section 504 and Section 16(a)

Since the mid-1970s, numerous court decisions have interpreted section 504 and section 16(a). The case law generally supports the proposition that these statutes do not require specific facilities or vehicles to be made accessible (e.g., there is no statutory right to bus accessibility). *See, e.g., United Handicapped Federation* v. *Andre*, 558 F.2d 413 (8th Cir. 1977); *Leary* v. *Crapsey*, 566 F.2d 863 (2nd Cir. 1977); *Vanko* v. *Finley*, 440 F. Supp. 656 (N.D. Ohio 1977); *Dopico* v. *Goldschmidt*, 518 F. Supp. 1161 (S.D.N.Y. 1981), *rev'd on other grounds* 687 F.2d 644; *Lloyd* v. *Chicago Regional Transportation Authority*, 518 F. Supp. 575 (N.D. Ill. 1982).

This same line of cases holds that the rights of handicapped users of federally-assisted mass transit services, and the obligations of transit authorities, are defined by DOT's regulations. These cases emphasize the Secretary's discretion in carrying out the statutes. In addition to the cases cited above, see also *Atlantis Community* v. *Adams*, 453 F. Supp. 831 (D. Colo., 1978) and *Michigan Paralyzed Veterans* v. *Coleman*, 451 F. Supp. 7 (E.D. Mich. S.D., 1977). This proposition was most recently reaffirmed in *Rhode Island Handicapped Action Committee* v. *Rhode Island Public Transit Authority (RIPTA)*, 718 F.2d 490 (1st Cir., 1983), where the court explicitly held that a transit authority that complied with the present 49 CFR 27.77 had met its statutory obligations.

The courts have held that an agency's discretion in fashioning rules in this area has some limits, however. This line of cases began with *Southeastern Community College* v. *Davis*, 442 U.S. 397 (1979).

Davis involved a federally-funded nurse training program. The hearing-impaired plaintiff was denied entry into the training program on the ground that her hearing disability made it unsafe for her to practice as a nurse and to participate safely in normal clinical training programs.

The Supreme Court held that it was not a violation of section 504 for the College to deny plaintiff's entry into the training program, saying that section 504 does not mandate "affirmative action" to accommodate the needs of handicapped individuals. 442 U.S. at 441. The court noted that:

> Technological advances can be expected to enhance opportunities to rehabilitate the handicapped or otherwise to qualify them for some useful employment. Such advances may also enable attainment of these goals without imposing undue financial and administrative burdens on a state. Thus situations may arise where a refusal to modify an existing program might become unreasonable and discriminatory.

442 U.S. at 412–413.

Davis was applied to the Department of Transportation's 1979 section 504 regulation by *APTA, supra*. The Court of Appeals held that section 504 did not provide authority to the Department for the regulation it had issued. Citing the portions of the *Davis* case quoted above, the court said:

> Applying these standards to public transit, we note that at some point a transit system's refusal to take modest, affirmative steps to accommodate handicapped persons might well violate section 504. But DOT's rules do not mandate only modest expenditures. The regulations require extensive modifications of existing systems and impose extremely heavy financial burdens on local transit authorities.

695 F.2d at 1278.

The court remanded the rule to the Department to consider whether section 16(a) and 165(b) would independently support the 1979 requirements. The preamble to the July 1981 interim final rule noted that "while the court allowed the Department to consider whether section 16 and section 165, among other statutes, might support the requirements of Subpart E, we believe that these statutes do not mandate, although they

may permit, the kinds of affirmative action that Subpart E contained." (46 FR 27491, July 20, 1981).

The *Dopico* case further elaborated the scope of obligations that can be imposed under section 504. The Second Circuit Court said that, while section 504 does not authorize massive relief, the statute can authorize some portion of the relief plaintiffs asked for, within appropriate statutory limits. The court stated that the *APTA* case only

> Sketches the outer limits, in the mass transportation context, of the limitation laid down by the Supreme Court in *Davis*. The key issue is whether *Davis* not only proscribed forcing massive restructuring of transportation programs, but in fact prohibits any . . . prospective relief in this setting.

687 F.2d at 651.

The court commented that since, according to *APTA*, section 504 may require "modest affirmative steps" to accommodate handicapped persons in public transportation, it is logical to assume that Congress intended that some steps could be required to be taken to effectuate the intent of the statute.

In the *Davis* fact situation, the court pointed out, the college would have had to restructure its training program to render unnecessary a nursing student's ability to hear. This was a fundamental change in the nature of the program. In *Dopico*, however,

> Plaintiffs do not seek fundamental changes in the nature of a program by means of alterations in its standards. They do not, to adapt the [*Davis*] example. . . . demand that the physical qualifications for the job of bus driver or motorman be altered so the handicapped are not excluded. The existing barriers to the "participation" of the wheelchair-bound are incidental to the design of facilities and allocation of services rather than being integral to the nature of the public transportation itself, just as a flight of stairs is incidental to a law school's construction but has no bearing on the ability of a otherwise qualified handicapped student to study law . . . The issue here is purely economic and administrative—how much accommodation is called for by regulations implementing the Rehabilitation Act . . . While it is bounded, after *Davis*, by a general proscription against "massive" expenditures, the question is one of the degree of effort necessary rather than whether any effort at all is required.

687 F.2nd at 653. *See also Lloyd*, 548 F. Supp. at 584–85.

A recent Supreme Court decision, *Alexander* v. *Choate*, 105 S. Ct. 712 (1985), elaborated further on the "undue burdens" standard originating in the *Davis* and *APTA* cases.

Relying on *Davis*, the Court said that section 504 guarantees qualified handicapped persons "meaningful access to the benefits that the grantee offers" (*Id.* at 721) and that "*reasonable adjustments* in the nature of the benefit being offered must at times be made to assure meaningful access." (*Id.*, n.21) (emphasis added). However, section 504 does not require " 'changes,' 'adjustments,' or 'modifications' to existing programs that would be 'substantial' . . . or that would constitute 'fundamental alteration(s) in the nature of a program.' " (*Id.*, n.20, citations omitted).

Because *Alexander* was decided after the comment period on the proposed regulation closed, the Department would have allowed additional comments if it believed that a change in the rule was necessary. *Alexander*, however, supports the position, based on *Davis*, *APTA*, and other cases, that in some situations, certain accommodations for a handicapped person may so alter an agency's program or activity, or entail such extensive costs and administrative burdens, that the refusal to undertake the accommodations is not discriminatory. Thus, the failure to include an "undue burdens" provision like § 27.97 could lead to judicial invalidation of the regulation or reversal of a particular enforcement action taken pursuant to the regulation.

Therefore, the *Alexander* case does not significantly alter the legal bases for the rule. The limit on required expenditures of § 27.97 ensures that the rule will not unduly burden recipients, and further changes to or comments upon the rule are not necessary in response to *Alexander*.

Section 317(c) and its Legislative History

An amendment to the Surface Transportation Assistance Act of 1982 concerning transportation services for elderly and handicapped persons was introduced by Senator Alan Cranston, for himself and Senator Donald Riegle, as floor amendment No. 5011 on December 14, 1982 (128 Cong. Rec. S 14740). The text of amendment No. 5011, which differs in a number of ways from the enacted version of section 317(c), is as follows:

> In carrying out subsection (a) of this section, section 165(b) of the Federal-aid Highway Act of 1973, and section 504 of the Rehabilitation Act of 1973, the Secretary, not later than 90 days after the date of the enactment of this paragraph, shall publish in the Federal Register for public comment, proposed regulations and, not later than 180 days after the date of such enactment, shall promulgate final regulations, establishing (A) minimum criteria for each recipient of Federal financial assistance under this Act or the Federal-aid Highway Act of 1973 to provide handicapped and elderly individuals with transportation services that such individuals can use and that are the same as or comparable to those which such recipient provides to the general public, and (B) procedures for the Secretary to monitor and ensure compliance with such criteria. Such regulations shall include provisions for ensuring that organizations and groups representing such individuals are fully consulted by such recipients in the process of determining and carrying out actions to provide such transportation services to such individuals.

Senators Cranston and Riegle, in discussing their proposed amendment, made several points. First, they made it clear that their amendment did not mandate a return to the full accessibility standards of the Department's 1979 section 504 regulation. For example, Senator Riegle said

> I am not proposing an enormously costly burden for transit systems or requiring an immediate return to the controversial, tough standards that were in place before July 1981. (128 Cong. Rec. S15714).

Second, the sponsors of the amendment said that provision of service by recipients under the Department's July 1981 Interim Final Rule was inadequate. They cited a General Accounting Office (GAO) survey of 84 transit systems. This survey showed, they said, that only 30 of the systems surveyed intended to have 50 percent or more of their buses lift-equipped. Of the 66 that offered paratransit service, 22 had waiting lists, 61 required 24 hours or more advance notice, 38 set service priorities by trip purpose and only 6 did not deny requests for service. Compared to the bus service in these 66 systems, 45 systems had shorter service hours, 35 operated on fewer days, and the geographical area covered by paratransit service was less extensive in 15 cases. In addition, 25 percent of the paratransit vehicles these systems used were not wheelchair accessible. (128 Cong. Rec. S14741, statement of Sen. Cranston). Both Senator Riegle and Senator Cranston later referred to the survey as showing "wide-spread deficiencies" in paratransit service. (128 Cong. Rec. S14719, S15716).

The sponsors of the amendment proposed the minimum service criteria requirement as a response to these perceived deficiencies. In describing this requirement, Senator Cranston said

> It would require the Secretary to establish national criteria for providing handicapped and elderly persons with compatible usable transportation services. In this regard, I would note that the Secretary would have broad discretion to formulate those criteria, and I am not sure that I or many others deeply concerned about these issues would

necessarily be satisfied with the criteria that the Secretary would develop. But I believe it is even less productive to have regulations implementing section 504 and UMTA section 16 that set no minimum standards, no bottom line. (128 Cong. Rec. S14742, S15715).

Senator Riegle described the kinds of issues that the "comparability" standard raises:

> Services for handicapped and elderly persons should cover the same general geographic area as do services for the general public. The fares charged handicapped and elderly persons should not on the average exceed the fares charged the general public for trips between the same destinations. Services for handicapped and elderly persons should not be denied or delayed based on the purpose of their trips.
>
> The response time for services for handicapped and elderly persons should not impose an undue burden upon them. I would hope the Secretary would allow no more than 24 hours advance notice—preferably less—to be required. He could provide for progressively diminishing advance-notice maximums. (128 Cong. Rec. S15715).

The sponsors denied proposing an "enormously costly burden for transit systems." (128 Cong. Rec. S14741). As a means of dealing with the costs of providing such service, the Senators referred to the discretionary 3.5 percent "set-aside" provision of their amendment. In this context, Senator Cranston said

> Recognizing that the proposed gas tax would provide a new source of funding for transit for capital improvements, this amendment would authorize—but not require—the Secretary of Transportation to set aside a modest portion of that new funding for capital improvements specifically for the purpose of enabling the needs of elderly and handicapped persons to be met . . . These funds could well be spent to help correct the situation (128 Cong. Rec. S 14742; see also 128 Cong. Rec. S 15714–15715, statement of Sen. Riegle).

Senator Riegle also commented on the issue of costs, saying that

> With respect to the requirement that regulations be promulgated, as I am sure Senators can appreciate, since the criteria that this amendment would require would be developed by the Secretary of Transportation, it is not possible to forecast specifically what cost they might entail for transit systems. Obviously, for those systems that have continued to make progress toward providing adequate service for handicapped persons, the costs would be minimal. For those who have neglected the needs of these individuals the costs can be expected to be more substantial. In any event, through the use of the discretionary set-aside, the Secretary would be able to minimize the cost impact. (128 Cong. Rec. S15715).

A Conference Committee wrote the final version of the statute. The Committee dropped the "same or comparable" language and substituted minimum criteria "for the provision of transportation services to elderly and handicapped individuals." In addition, the Conference Committee version requires that elderly and handicapped individuals be "given notice of and opportunity to comment on the proposed activities of recipients for the purpose of achieving compliance with such regulations," instead of being "fully consulted" about "determining and carrying out" recipients' actions.

In discussing the Conference version of section 317, Senator Cranston made several points. He mentioned again that the Secretary has the authority "to set aside up to 3.5 percent [of UMTA appropriations] for the provision of section 16(b) assistance for handicapped and elderly individuals' transportation."

Senator Cranston also asserted that the provision in the compromise version was

> Faithful to the purposes of the Senate-passed amendment—to make clear the fundamental Federal responsibility to make provision for the transportation needs of handicapped and elderly individuals. It requires the Secretary of Transportation to establish national uniform criteria for the provision of transportation services to handicapped and elderly persons: thus the compromise rejects as unsatisfactory the Department of Transportation's July 1981 Interim Final Rule, which fails to establish any such criteria. (128 Cong. Rec. S16029).

Senator Cranston's statement does not mention the deletion of the "same or comparable" language.

Senator Cranston also said that the Conference version requires that

> The Secretary's regulations establish procedures for monitoring transit system activities in order to ensure compliance with the newly established criteria and include provisions for ensuring that handicapped and elderly persons are provided, through groups representing them, with a meaningful role in the planning of services meeting their needs by requiring that they be afforded adequate notice of and the opportunity to comment on proposed activities of recipients to achieve compliance with the new criteria. (*Id.*)

Neither Senator Cranston's proposed amendment nor anything similar to it was ever independently considered by the House of Representatives. Consequently, there is no legislative history from the House.

Legal Issues Affecting the Final Rule

(a) *"Comparability".* Many commenters asserted that key portions of the NPRM were legally wrong. The American Public Transit Association (APTA) provided the most thorough statement of transit industry arguments. Representative statements of the position of advocacy groups for disabled persons are found in the comments of the Disability Rights Education and Defense Fund and the Paralyzed Veterans of America.

APTA's first major argument is that the service criteria of the NPRM, taken singly or together, create, in effect, a requirement for providing the same or comparable service. Referring to the deletion in conference of the "same or comparable" language of the original Senate version of section 317(c), APTA argues that the statute cannot be viewed as a justification for criteria having this effect. APTA also asserts that the criteria represent an overly expansive response to section 317(c), saying that

> There is no evidence or justification for the inclusion of regulatory language covering any or all of the six specific criteria included in the proposal. Achieving compliance with the service criteria, as presently proposed, even under a cost cap, is likely to result in fundamental alterations to recipients' existing programs . . ., in direct contradiction of the Supreme Court decision in *Southeastern Community College* vs. *Davis*. . . .

The deletion by the Conference Committee of the "same or comparable" language of the original version of the amendment may reasonably be interpreted as meaning that the minimum criteria required by this statute do not have to result in service for handicapped persons that is the same as or comparable to that provided to the general public. However, it is not reasonable to read the statute as saying that the Department is prohibited from establishing criteria that, to some degree, approach having that effect. Senator Cranston's post-conference statement specifically said that the statute was faithful to the purposes of his amendment, and that it required the Secretary to establish "national uniform criteria" for the provision of transportation services to handicapped persons. (128 Cong. Rec. S 16028).

(b) *Service Criteria.* APTA's claim that "there is no evidence or justification for the inclusion of regulatory language covering any or all the six specific criteria included in the proposal" is at odds with the legislative history of section 317(c). The criteria address, for example, several of the deficiencies in service in current service cited by Senators Cranston and Riegle on the basis of the GAO Study. The two Senators explicitly sought to correct these deficiencies through the service criteria provision of their amendment. The criteria also are very similar to those incorporated in 1980 legislative proposals on this subject, which formed

an important part of the background for the amendment.

(c) *"Fundamental Alteration" of Transit Programs.* We do not agree that achieving compliance with the NPRM's service criteria, given the limit on required expenditures, would result in a "fundamental alteration to recipients' existing programs." The Circuit Court in *Dopico* made a persuasive distinction between fundamental changes, in the sense discussed by *Davis*, and other changes to accommodate handicapped persons in mass transit systems. The plaintiffs in *Dopico*, the court said, were not seeking fundamental changes in the nature of a program analogous to those in *Davis*. Rather, in the court's view, they were simply seeking to eliminate incidental physical barriers to the participation of handicapped persons in a program that would continue to operate in its usual way. *See* 687 F.2nd at 683.

A nursing program without a clinical component is clearly a very different kind of program. There is no such dramatic qualitative difference between an inaccessible bus system and a bus system that handicapped people can use because its buses have lifts. A paratransit system that provides curb-to-curb service to wheelchair users is not fundamentally changed by a requirement that it provide that same service on weekends as well as Monday through Friday. Under these circumstances, the nature of the program does not undergo a fundamental change.

(d) *Undue Financial Burden.* APTA also said that expenditures to comply with the NPRM, even though constrained by the regulatory cost limit, would represent such a significant increase in funding devoted to transportation for elderly and handicapped persons as to constitute an "undue financial and administrative burden" on recipients, contrary to the D.C. Circuit Court's ruling in the *APTA* case.

The court in *APTA* was quite specific about the things it considered to impose unacceptably heavy burdens. The court said that the 1979 regulations

> Require extensive modifications of existing systems and impose extremely heavy financial burdens on local transit authorities. Every new bus or subway car must be accessible to wheelchair users regardless of cost; elevators and other modifications must be added to existing subways. . . . These are the kinds of burdensome modifications that the *Davis* court held to be beyond the scope of section 504.

695 F.2nd at 1260.

This final rule differs markedly from the 1979 regulations. Recipients have a choice of how to meet their obligations and can choose a less costly, rather than more costly, approach to compliance. Even if a recipient chooses to comply through bus accessibility, every new bus need not be accessible to wheelchair users. Only those buses needed to meet service criteria must be accessible. Accessibility requirements are not "regardless of cost;" a limit is explicitly provided to constrain the cost exposure of recipients. Accessibility modifications to subway facilities and vehicles are not required at all.

As noted in the section of the preamble concerning the cost limit, many recipients are likely to be able to comply for less than their "limit" amounts. This is particularly true for recipients in larger cities and those who choose a less costly and more cost-effective means of providing service, such as user-side subsidies through private sector service providers. The phase-in period of up to six years will prevent recipients from having to incur unreasonably high start-up costs, or from having abruptly to increase their expenditures. The overall projected costs of this rule are far lower than those of the 1979 rule. We project the following 30-year discounted present value:

1979 rule (DOT estimate)—$3.99 billion
1979 rule (Congressional Budget Office estimate)—$9.04 billion
1986 rule cost limit (3.0% of nationwide operating costs)—$2.37 billion
1986 rule, Paratransit alternative costs—$.98 billion
1986 rule, 50% accessible bus system costs—$.59 billion

All costs are expressed in 1983 dollars.

We would also point out that the rule, and its requirements for service criteria, rest, in addition to section 504, on section 317(c), a statute passed since the *APTA* case, and section 16(a), to which the *APTA* holding does not specifically apply. While the Department may reasonably consider and limit the cost impacts of a regulation promulgated under all these authorities, the *APTA* "undue burdens" strictures apply directly only to section 504.

(e) *Consistency of a Limit on Required Expenditures with Section 317(c).* Many handicapped commenters argued that it was inconsistent with section 317(c) for the Department to provide a cost cap to limit the expenditures that transit authorities are required to make in meeting the regulation's service criteria. The Disability Rights Education and Defense Fund, for example, said that

> The two concepts, minimum service criteria and spending limitation, are mutually exclusive. If service criteria can be traded-off for cost considerations, there is no minimum level of service. Therefore, the DOT proposed rule does not adequately implement section 317(c).

In other words, the Fund contends, section 317(c) requires the Secretary to establish "minimum" criteria for the provision of transportation service to handicapped persons. If a recipient is able to avoid meeting some of the prescribed criteria because it has reached a certain level of expenditure, then the criteria are not truly "minimums."

Because the *APTA* case's "undue burdens" language was not specifically applied to section 16 and section 165(b), the Fund believes, the Department's view that regulations should be designed to avoid the imposition of undue financial and administrative burdens is mistaken. Though none of the commenters making this argument explicitly say so, their argument clearly implies that the Department has an obligation under section 16 to impose minimum service criteria without any regard to the cost of compliance.

Much of the weight of these commenters' position that the Department cannot establish a limit on required expenditures rests on what is, in context, an overly literal reading of the word "minimum." We do not believe that this reading will bear the weight. The Department's approach is consistent with the directions of Congress.

Case law, and section 317(c) itself, suggest that recipients' obligations under all the relevant statutes should be viewed together. There is no evidence that Congress considered, let lone intended to mandate, that section 317(c) would require the Department to do what it is prohibited from doing under section 504—impose open-ended, undue administrative and financial burdens in order to improve service for handicapped persons. Indeed, section 317(c) says that this rule must be "consistent with any applicable government-wide standard for the implementation of [section 504]. . . ." These standards, of course, are read in light of the *Davis* and *APTA* cases.

Both sponsors of section 317(c) said "I am not proposing an enormously costly burden for transit systems. . . ." (128 Cong. Rec. S 14741, S 15719). Senator Riegle differentiated between recipients that have already made progress toward making adequate service for handicapped persons, saying that their costs would be minimal, and recipients who have neglected the needs of handicapped individuals, whose costs could be expected to be more substantial (128 Cong. Rec. S 15715).

This statement recognizes that costs will be imposed on transit authorities, in varying degrees, but does not suggest that these costs cannot be limited. Indeed, Senator Riegle said that "since the criteria that this amendment requires would be developed by the Secretary of Transportation, it is not possible to forecast specifically what cost they may entail for transit systems." *(Id.)* This statement suggests that the sponsors of the amendment contemplated that the Secretary could exercise discretion and control with respect to the imposition of costs.

As noted above, both Senators referred to the authorized 3.5 percent set-aside under the section 317(a) of UMTA discretionary funds for use in transportation for elderly and handicapped persons. The maximum amount available to the Secretary under this set-aside would have been approximately 43 million dollars for fiscal year 1984 and 38 million dollars for fiscal years 1985 and 1986. If these amounts would be able to "help" or "minimize" the cost impact of the criteria established by the Secretary, then the sponsors of the amendment did not contemplate that the Secretary's criteria would have massive, open-ended cost impacts on recipients.

Senator Cranston, after noting that the Secretary would have discretion to formulate criteria, said that even if he might not be satisfied with the criteria the Secretary established, it was "even less productive to have regulations implementing section 504 and UMTA section 16 that set no minimum standards, no bottom line." (128 Cong. Rec. S14712). In discussing the conference version of the amendment, he added that it rejected as "unsatisfactory the Department of Transportation's July 1981 Interim Final Rule which fails to establish any such criteria." (128 Cong. Rec. S16028). From these and similar statements in the legislative history, it is clear that the central thrust of the amendment was to ensure the replacement of the interim final rule with a regulation that had a "bottom line." A rule incorporating a set of specific service criteria, and a limit on the money that recipients are required to spend to achieve them, constitutes a "bottom line" approach that differs substantially from the approach of the 1981 interim final regulation and is consistent with section 317(c).

Section-by-Section Analysis

This portion of the preamble discusses each section of the final rule, focusing on the significant comments on each issue, the Department's response to these comments, and the Department's reasons for making the decisions incorporated in the final rule. Additional guidance concerning the Department's interpretations of the regulatory provisions themselves is found in the appendix that follows the text of the regulations.

Amendments to Section 27.5 Definitions.

In addition to creating a new Subpart E of 49 CFR Part 27, the Department has decided to add two new terms to the definitions in § 27.5 of the regulation. These two terms, "special service system" and "mixed system," are used frequently in Subpart E, making the publication of definitions useful for the sake of clarity.

"Special service system" is defined as a transportation system specifically designed to serve the needs of persons who, by reason of handicap, are unable to use mass transit systems designed for the use of the general public. This definition encompasses a wide variety of ways of providing service. The second sentence of the definition is intended to identify the typical characteristics of a special service system.

The Department recognizes that some recipients will probably choose not to use the same mode of providing service to handicapped persons at all times and in all places. For instance, a recipient might provide transit authority operated dial-a-van service during peak hours, but rely on a user-side subsidy system through private providers for off-peak service. A number of combinations of accessible bus and special service are possible. A "mixed system" is any one of these combinations.

Section 27.61 Program requirement.

The NPRM required that all recipients create a program for the provision of transportation services to handicapped persons. This requirement attracted little comment. In the Department's view, this requirement is necessary in order to serve as a focus for the planning process and to produce documentation that the public, the Metropolitan Planning Organization (MPO), and UMTA can review to ensure that the recipient's service for handicapped persons will be adequate and consistent with regulatory requirements.

In response to suggestions from transit authorities and other commenters that the regulation should allow a phase-in period for substantive compliance with this rule, the Department has decided to permit recipients to take up to six years to reach the full performance level, if this time is necessary. The recipient will be expected to plan to provide service at the full performance level as soon as reasonably feasible, within this six year period. This phase-in period is set forth in section 27.95 of this Subpart. Consistent with this provision, paragraph (a) requires the recipient's program to call for providing service at the full performance level within the phase-in period. In addition, in response to comments from handicapped advocacy groups and planning agencies, paragraph (a) requires recipients' programs to include "milestones" showing how, year-by-year, the recipient will progress toward the full performance level.

The NPRM proposed that section 18 recipients (section 18 of the UMT Act establishes a program of financial assistance to small urban and rural areas) would not have to create a program like that of urban mass transit authorities, since the needs for service and the resources and means for providing service and administering Federal regulatory requirements in rural areas are likely to differ from the situation of cities.

Almost all the transit agencies commenting on this issue supported the NPRM approach, and there were few objections from handicapped persons. The Department will continue to treat section 18 recipients separately. Several commenters suggested that we extend the separate treatment afforded section 18 recipients to small rural and urban systems which may also receive funds under other UMTA programs. We have decided to adopt this comment, and the reference to recipients covered by § 27.91(a) excepts from the program requirement all recipients which do not serve an urban area of over 50,000 population.

Some commenters were concerned about recipients which do not themselves provide transportation services, but merely pass on UMTA funds to other transit providers. For example, an MPO or a city government may receive section 9 money, which it passes on to a transit authority. Only the transit authority actually provides service. Paragraph (a) requires only the public agency that actually provides the service to prepare and submit a program. This provision is intended to ensure that local agencies do not have to duplicate one another's efforts.

In addition, a few rail-only operators, whose service facilities are either already accessible pursuant to Architectural Barriers Act requirements or whose rail systems are not covered by the rule, said that the rule should not impose program requirements on them. We agree. Therefore, the program

requirement will apply only to recipients which provide transportation services to the public by bus.

A few comments discussed special problems of section 16(b)(2) recipients. These recipients (normally private, non-profit social service agencies) typically provide services only to handicapped persons. One recipient, whose UMTA funds come from sources other than section 16(b)(2), also said that its system served only elderly and handicapped persons, the rest of the public being served by a privately-operated bus system.

The Department agrees that section 16(b)(2) recipients, and other recipients who provide service only to elderly and/or handicapped persons, are a special case, and they will not have to submit programs under this section.

Section 27.83 Public participation and coordination.

Section 27.77(g)(1)–(4) of the NPRM set forth public participation requirements. Recipients were to consult with handicapped persons and other interested individuals and groups, have a 60-day public comment period and at least one public hearing, submit their program to the local MPO for comment, and respond to the significant comments made by the public or the MPO.

A large number of handicapped persons and groups representing handicapped persons commented on this portion of the NPRM. Relatively few transit authorities addressed the section. Some social service agencies, private transportation providers, and other persons also commented on public participation.

Almost all of the handicapped commenters said that the public participation mechanism of the proposed rule was inadequate. A primary reason for this inadequacy, they said, is that it required public participation only at the time that the recipient was putting its program together. Public participation should be required, according to these commenters, at all stages of the planning and implementation of the recipients' service.

The Conference Committee version of section 317(c), unlike the original amendment, required only an opportunity for notice and comment on the recipient's program. This is precisely what the NPRM proposed. However, the Department believes that a reasonable degree of continuing public participation is valuable to the effective implementation of recipients' programs. Continuing participation permits users of the services, and other interested persons, to have access to the recipient with respect to questions and problems that arise concerning the provision of service. In addition to allowing the voices of consumers to be heard, such participation can also provide useful information to the recipient that will help it to respond quickly and appropriately to service-related problems.

Therefore, the Department has added a provision that requires the recipient to establish a mechanism for continuing public participation. This provision is drawn from § 27.107(b) of the Department's 1979 section 504 regulation. Recipients appeared to have little problem with establishing such mechanisms under the 1979 rule; several recipients commented to the docket that they had such mechanisms in operation. The Department believes that this requirement will create little additional burden for recipients.

Many handicapped commenters wanted further requirements in this area, suggesting that DOT mandate the creation of handicapped advisory committees. Some of these comments also requested that DOT establish rules for the membership and operation of these committees and require recipients to obtain the committees' approval for their programs.

The Department is not adopting these suggestions. Advisory committees can be a useful tool. Many such committees already exist, and the Department encourages their formation and effective use. However, the Department does not believe it should be mandatory for all recipients to establish such committees. In some localities, other mechanisms could be equally effective in ensuring continuing public participation.

Some comments mentioned problems with some existing advisory committees. For example, it is alleged that recipients have "packed" advisory committees with individuals who favored the recipients' positions, excluding critics. It is also alleged that recipients have failed to provide the committees with adequate information, or have ignored the committees' recommendations.

The Department believes that it would not be feasible to impose a Federal requirement concerning the membership of advisory committees. A reasonable specific membership requirement would be very difficult to devise on a national basis, and a more general requirement would be difficult to interpret and implement. Any such requirement would be very intrusive. While a broadly representative committee is desirable, its membership should be determined locally.

Advisory committees, and other mechanisms for continuing public participation, are intended to provide advice and recommendations. A prudent transit authority will thoroughly consider and make appropriate use of the advice and recommendations it receives. However, UMTA does not require transit authorities to be bound by consumer and interest group input concerning any aspect of public mass transportation. Giving any local group a veto over transit decisions would not be consistent with the way the UMTA program is designed.

The NPRM proposed requiring that the recipient pursue a public participation process, like the one required for the initial program submission, for significant changes in the recipient's program. Almost all handicapped commenters addressing public participation favored this requirement; a few transit operators opposed the requirement as adding an unnecessary administrative burden. The Department believes this requirement is necessary, lest a significant alteration in the nature or direction of a recipient's service undermine the utility of public participation. For example, a recipient might follow the public participation process and submit a program for a paratransit system, which UMTA approves. The next year, after a change in leadership, the transit authority might decide that it made more sense to comply with the rule by creating an accessible bus system. In such a situation, the public should not lose its opportunity to participate because the transit authority was making its second, rather than its first, decision on the subject.

The NPRM proposed that recipients respond to comments made during the public participation process. The formulation of this response—that recipients would accommodate significant comments or explain why they did not—is very similar to that used by Federal agencies in rulemaking or in intergovernmental relations matters. Most handicapped commenters who addressed this issue favored the requirement; a few transit industry commenters opposed it, saying that it was an inappropriate intrusion in the local planning process as well as an administrative burden.

This provision of the rule asks no more of recipients than the Department is required to do in a rulemaking. The provision, which has been modified from the NPRM version to stress that recipients are not required to adopt commenters' suggestions, requires responses only to significant comments (i.e., those of some substantive

importance, not comments that are trivial or irrelevant).

Section 27.85 Submission and review of program.

This section is derived from, and modifies, §§ 27.77(a) (1) and (3) and (g)(5)–(7) of the NPRM. Section 27.77(a)(1) provided that all section 3, 5, 9, and 9A recipients would certify that they had in effect a program meeting the requirements of the regulation. Section 27.77(a)(3) provided that this certification would be regarded by the Department as constituting compliance with recipients' obligations under section 504 and section 16.

Section 27.77(g)(5)–(7) provided that, along with its certification, a recipient would have to submit to UMTA a copy of its program, cost estimates, and public comments on the program and the recipient's response to the comments. This material had to be submitted within nine months of the effective date of the final rule. UMTA could reject the program or require the recipient to modify it, but the certification and its accompanying material would be deemed to be accepted if UMTA has not done so within 90 days of its submission.

A substantial number of handicapped commenters said that DOT should require recipients of all DOT funds, not only mass transit funds, to certify their compliance with section 504. This comment appears to be based on a misunderstanding of this rulemaking, which is concerned solely with mass transit services. Other DOT financial assistance programs (e.g., intercity rail service, airport and highway construction) are already covered under 49 CFR Part 27. Most of the relatively few transit authorities that commented on certification acceptance favored the NPRM approach. A few transit authorities also said that submitting the certification and its accompanying material was an administrative burden.

A substantial number of comments from disabled persons and groups representing them opposed certification acceptance, saying that certification acceptance would permit transit authorities to get away with providing inadequate service. In addition, some commenters expressed the concern that because UMTA would have a heavy workload in reviewing recipients' submissions, inadequate programs might go into effect by default if UMTA staff had not had time to review them within 90 days. A number of commenters wanted UMTA, MPOs, or handicapped persons' organizations to review and approve recipient's programs instead of, or in addition to, the proposed certification acceptance by UMTA.

The Department has decided to require recipients to submit their programs for prior approval by UMTA. There are several reasons for this decision. First, the transportation systems that recipients will establish for providing service to handicapped persons will probably be in place for a substantial period of time. The Department believes that it is important that these programs be reviewed carefully to ensure that the service they call for will be fully adequate and consistent with the regulation.

Second, the problem of inadequate programs going into effect by default could be a real one. We recognize that a prior approval approach may have the corresponding problem of delays in program approval and implementation. However, UMTA is committed to employing sufficient resources to minimize any such problems. The regulation establishes a 120-day deadline for UMTA action on programs that are submitted.

Third, the major reason for establishing a certification acceptance approach in any regulation is to reduce administrative burdens for recipients. In a "pure" certification acceptance system, the recipient sends only its certification, and is not required to prepare or submit any additional information. The approach proposed by the NPRM was far from a "pure" certification acceptance approach, and some transit industry comments suggested that the Department should establish something more similar to a pure certification acceptance system.

The Department decided that it was not feasible to take a pure certification acceptance approach. Such an approach would virtually eliminate the accountability of recipients concerning the substance of their programs and the procedures for adopting them. While we might attempt to compensate by increasing accountability measures at the local level (e.g., by requiring the MPO or a handicapped advisory committee to approve the program), it is likely that this would be at least as burdensome as submitting material to UMTA. Given the emphasis on DOT oversight and monitoring in section 317(c), it could also be difficult to reconcile this approach with the intent of Congress.

The Department, therefore, does not believe that it is practicable to reduce the program submission requirement to less than it was in the NPRM. The final rule, though it replaces a certification acceptance approach with a prior approval approach, demands nothing more of recipients than the NPRM with respect to the material required to be prepared and transmitted to UMTA. The content of the recipient's submission to UMTA, specified in paragraph (b), closely follows the proposals of § 27.77(g)(5) of the NPRM. In response to some transit industry comments, UMTA will accept reasonable summaries of public comments in lieu of copies of the actual comments.

A substantial number of transit authorities, state transportation agencies, and other transportation providers commented on the issue of what the deadline should be for recipients to submit their programs after this rule goes into effect. About two-fifths of the commenters believed the NPRM's proposal of nine months was adequate. The remainder favored extending the deadline to a year or more. There was also support in these comments for a provision allowing recipients to apply to UMTA for an extension of up to six months, for good cause, or to automatically receive such an extension if they wanted it.

In response to these comments, the Department has decided to increase the time permitted for recipients to submit their programs to 12 months from the effective date of the regulation. This increase is made in recognition of the legitimate problems transit authorities could have in planning and obtaining local approval of a program before submitting it to UMTA.

However, the Department does not believe it is necessary or advisable to extend the deadline further or permit individual recipients to extend the deadline. Doing so could unreasonably prolong the planning period. Reasonably tight deadlines are one way of ensuring that work does not "slip" unnecessarily. This problem would be especially acute if recipients could automatically extend the deadline by six months. This would effectively make the deadline 18 rather than 12 months, and would still not guarantee timely submission of programs.

Permitting applications to UMTA for "good cause" extensions of the deadline could have two additional negative effects: transit authorities might divert time and effort away from the job of completing their programs to produce justifications of why the programs could not be completed in a timely manner, and UMTA might be faced with potentially difficult, time-consuming decisions to make on extension requests at the same time as other transit authorities were submitting their programs for approval.

Section 27.87 Provision of service.

This section is derived from two paragraphs of the NPRM: § 27.77(f), "provision of service", and § 27.77(i), "disparate treatment". Because the subjects of these provisions are closely related, the Department decided to combine them.

A substantial number of handicapped persons objected to the provision of service paragraph of the NPRM, which stated that recipients must ensure that services are provided to handicapped persons as set forth in the recipient's program. These commenters objected because providing the service set forth in the program might not be the same thing as providing service meeting the service criteria of the regulation.

The Department believes that this concern has been adequately addressed in the final regulation. UMTA will review and approve the recipient's program. UMTA will not approve any recipient's program that does not meet all of the requirements of the regulation, including the service criteria (subject to the limit on required expenditures). Consequently, a recipient providing service as set forth in its program, as approved by UMTA, will be meeting the requirements of the regulation.

The NPRM also required recipients to ensure that equipment is maintained, personnel are properly trained and supervised, and program administration is carried out in a manner that does not permit actual service to fall below the level set forth in the recipient's program. Some comments asked for greater specificity in these requirements, particularly with respect to the maintenance of lift-equipped buses. For the sake of clarity, the final rule spells out these requirements in greater detail. They concern maintenance of vehicles and equipment, provision of sufficient spare vehicles, training of personnel, and provision of sufficient assistance and information concerning the use of service to handicapped users.

Several comments, primarily from handicapped individuals and groups representing them, requested a specific provision concerning interim service. Some of these comments requested the reissuance of the interim accessible service provision of the 1979 DOT regulation. The Department does not believe it is necessary to reintroduce the 1979 provision; moreover, such a specific interim transportation requirement would be too difficult to apply accurately to the choices recipients would make under this rule.

Finally, several commenters requested that the rule include a "maintenance of effort" provision. Section 27.77(g)(8) of the NPRM proposed that the recipient's certification under the July 1981 interim final rule remain in effect until its new program goes into effect. The Department believes that this requirement is sufficient for "maintenance of effort" purposes under this section. Therefore, the final rule provides that, in the time between the effective date of this rule and the recipient's achievement of the full performance level, the recipient's certification under the July 1981 interim final rule—and the service provided pursuant to that certification—must remain in effect.

Most of the relatively small number of comments on the "disparate treatment" section of the NPRM, from handicapped persons and other commenters, favored the retention of this requirement. The Department will retain the requirement, with only minor editorial changes from the language proposed in the NPRM.

Section 27.89 Monitoring.

The NPRM's monitoring provision would have required each recipient to send an annual report to UMTA containing information about transportation services provided, any problems meeting the service criteria in light of the cost cap, the recipient's progress toward meeting its service requirements, any changes in the program, and a description of any actual or expected alterations in service to handicapped persons. Both handicapped persons and their groups and transit authorities objected to this proposal.

The principal objection to the annual report provision from handicapped persons was that the reporting requirement was too passive. What these parties meant by "monitoring," they said, was an active effort by UMTA to conduct compliance reviews of recipients. Anything less would be inadequate from a programmatic point of view and would fail to carry out the intent of Congress.

Most of the transit authority commenters argued that an annual report was administratively burdensome. They suggested that the monitoring or reporting function be carried out in conjunction with section 9 audits or evaluations, the transportation improvement program process, or other existing reporting or monitoring requirements.

The monitoring provision of the final rule responds, in part, to both lines of comment. An annual report will not be required. This will reduce the paperwork burden on recipients. Monitoring will take place, as transit authorities requested, in connection with the section 9 triennial review and evaluation process. As handicapped commenters requested, this review and evaluation will be performed by UMTA personnel, and will constitute, in effect, a compliance review of the recipient's activities with respect to transportation services. In connection with the reviews, UMTA may, of course, request that certain materials be provided by recipients. This will be an "active" monitoring process by UMTA, but will not occur so frequently as to constitute an additional, significant burden upon transit authorities.

In establishing this triennial review process, the Department was concerned that it might not become aware of problems happening in the intervening years unless a complaint were filed with the Department. Consequently, the final rule establishes a "slippage report." If the recipient falls behind its UMTA-approved implementation schedule, or below its approved level of service, the recipient must forward a report to UMTA no later than the anniversary date of the approval of its program. The report would describe the delay or problem, explain the reasons for it, and set forth the recipient's corrective action. On the basis of this report UMTA could, it necessary, undertake a special compliance review or other corrective action.

The Department is concerned that, as UMTA reviews and evaluates the compliance of recipients with their obligations under this regulation, users and other interested members of the public have the opportunity for input. Consequently, as part of its review and evaluation, UMTA will consult informally with persons involved in the continuing public participation mechanism established under § 27.83 of this regulation.

Section 27.91 Requirements for small recipients.

Section 27.77(a)(2) of the NPRM proposed that, instead of following the requirements of the proposed rule applicable to other recipients, recipients of funds only under section 18 of the UMT Act would certify that special efforts were being made in their service area to provide transportation service for handicapped persons.

Section 18 is an UMTA program for rural and small urban areas. The NPRM proposed that the service that section 18 recipients make available to handicapped persons would have to be reasonable in comparison to that provided to the general public and would have to meet a significant fraction of the actual transportation needs of handicapped persons. These

two criteria are substantively identical to those that section 18 recipients were required to meet under the July 1981 interim final rule and the Federal Highway Administration/UMTA rules that previously governed the section 18 program.

Relatively few commenters addressed requirements for section 18 recipients. Many of the state and local transportation agencies that commented supported the NPRM provision. Some of these commenters suggested that the coverage of the provision be expanded to cover section 18 recipients who also receive funds under section 3 or 9 or other recipients serving small cities. For example, commenters suggested that the "small recipients" provision should apply to all recipients with 50 or fewer buses, or who served areas of up to 50,000 or 200,000 population.

Other commenters recommended that the final rule include more stringent provisions for small recipients than the NPRM did. Some of the suggestions for additional requirements included annual recertifications of compliance, additional public participation and planning requirements, application of the six proposed service criteria and cost cap to small recipients, a specific requirement to furnish accessible vehicles, and greater reporting by recipients and monitoring by UMTA to ensure compliance.

The Department believes that the NPRM's basic approach is sound. Section 18 recipients operate diverse services in areas of low population concentration, usually with little administrative staff and budget. It makes sense to establish separate, more flexible, less administration-intensive requirements for these smaller recipients.

Therefore, the Department will retain the certification acceptance approach for small recipients who, unlike their counterparts in larger cities, will not be required to submit or to obtain prior UMTA approval of a program for providing transportation service to handicapped persons. As suggested by some commenters, the Department will make this provision applicable to any recipients who serve only non-urbanized areas, even if they receive UMTA funds from sources other than section 18. The Department did not extend the reach of this section farther, however, since we were not persuaded by the comments that cities of up to 200,000 did not share important characteristics with larger cities with respect to providing transportation service to handicapped persons.

We did not adopt additional or more stringent requirements because doing so would go counter to the objective of fashioning a more flexible, less burdensome set of requirements for small recipients. In addition, some of the suggestions (e.g., annual recertifications) would add paperwork without improving service for handicapped persons.

The Department has, however, responded to concerns about public participation and monitoring by adding new provisions to this section. Following the statutory language of section 317(c), this section will now require small recipients to ensure adequate notice of and opportunity to comment on the recipients' present and proposed activities for complying with this regulation. This requirement also applies to significant changes in the recipient's service. In order to permit UMTA monitoring of the more than 900 small recipients, these recipients will be required to submit brief status reports (a year after this Subpart goes in effect) and updates (every three years thereafter) concerning their service. For section 18 recipients, these reports will be submitted to the designated section 18 state agency, where UMTA personnel will periodically review them. Other UMTA recipients in areas of less than 50,000 population will submit these reports to the UMTA Regional Administrator. Finally, the section specifies that the provision of service (§ 27.87) requirements apply to small recipients as well as to their larger-city counterparts.

Several comments, particularly from handicapped commenters, requested precise definitions for terms such as "reasonable in comparison" or "significant fraction," saying that these terms were too vague. The Department has decided that it would not be appropriate to define these terms more precisely. In order for this section to apply to small recipients with appropriate flexibility, the Department believes that the generality of these terms is advantageous. They constitute minimum service criteria that UMTA can apply, on a case-by-case basis, to the great variety of local situations and types of service that exist in the section 18 program.

Moreover, these terms have governed the section 18 program for several years, and recipients are familiar with them. In the absence of compelling evidence that these terms have caused serious problems that can be remedied by the introduction of regulatory definitions, the Department believes that it is better to leave them as they are.

Section 27.83 Multi-recipient areas.

Several recipients and MPOs from major urban areas having several transit providers requested that the rule include some provision permitting multi-recipient regions to be treated as a single entity for purposes of compliance with the Department's final regulation. The rationale for this request was that, in a major urbanized area with several recipients providing service, it would be very difficult for individual recipients to plan rationally for efficient service to the area's handicapped persons. A combined approach, these commenters reasoned, would permit better planning, a more efficient use of resources, and service that was well-coordinated and easier to use.

The Department agrees that a unified regional approach to transportation for handicapped persons would have important benefits. The Department also believes that it is important that a regional approach has the full support and cooperation of the area's recipients, provides a mechanism that will ensure adequate service and funding for the service, and does not permit recipients to evade their responsibility for complying with the requirements of this regulation. The Department has therefore decided to permit the recipients in a given urbanized area to form a compact for purposes of compliance with this rule. If a compact is not formed, then each of the recipients in the urbanized area is individually responsible for meeting the requirements of the rule.

Section 27.95 Full performance level.

Section 317(c) of the STAA requires the Department to establish minimum criteria for the provision of transportation service to handicapped and elderly persons. This section prescribes the minimum criteria that each recipient has to meet in order to comply with this Part. For convenience, we use the term "full performance level" to describe the situation of a recipient that is meeting all the criteria that apply to it, subject to the limit on required expenditures.

Timing

Section 27.77(g)(8) of the NPRM provided that the recipient's program should "go into effect" on the first day of the recipient's next fiscal year following the date the recipient was required to submit its certification and program material to the UMTA Administrator.

Approximately equal numbers of commenters took the position that the NPRM's effective date provision was reasonable and the contrary position

BEST COPY AVAILABLE

that the effective date of recipients' programs should be extended or that a phase-in period should be provided. Another group of commenters sought clarification of the NPRM provision. Finally, a smaller group of handicapped and other commenters said that the total time from the effective date of the regulation to the point where service meeting the criteria was operating was too long.

A number of transit industry commenters also alleged that the transition between compliance with the present § 27.77 and compliance with the NPRM's provisions could be a very large and abrupt one. That is, a transit authority spending at a level equivalent to 3.5 percent of its FY 1983 section 5 funds the year before the final rule goes into effect might have to spend five times that amount the next year in order to meet the service criteria, even with the NPRM's cost limit in effect. This rapid increase itself, these commenters argued, would constitute an undue financial burden.

The Department does not necessarily accept the commenters' estimates of cost increases that would be caused by compliance with this regulation. However, we do recognize that, where an increase in recipient spending would be necessary to comply with this rule, requiring a rapid, abrupt increase in spending levels could create some hardship even though the overall amount of expenditure would not be unreasonable. This consideration, in addition to the comments on the NPRM's effective date provision, has led us to put a phase-in period into this final rule. The phase-in period will permit a gradual, orderly, well-planned transition to the full-performance level.

Commenters had varying suggestions for how long a phase-in period should be, ranging from several months to several years. The Department has chosen a maximum six-year period. The six-year figure derives fromn UMTA's experience with bus procurements. Typically, the expected useful life of a transit bus is twelve years. In six years, it is reasonable to expect, as a general matter, that most transit authorities would be able to replace up to half of their non-accessible buses with accessible buses as part of their normal bus replacement cycles, without having to retrofit older buses. This should be sufficient to permit most recipients to acquire sufficient new vehicles to meet the full performance level.

The phase-in period is intended to be for a maximum of six years. Recipients are required to plan for service at the full performance level at the earliest reasonably feasible time. Depending on the amount of work and time needed to bring the recipient from where it is to the full performance level, UMTA will approve a phase-in period of up to the six-year maximum. The phase-in period approved by UMTA might well be less than the maximum for a recipient who had little left to accomplish to get to the full performance level, however.

The Department believes that it is reasonable to permit the same phase-in period for special service or mixed systems as for accessible bus systems. In addition to maintaining parity among the options available to recipients, the phase-in period is likely to reduce overall, long-term costs of compliance with this regulation.

For example, if all recipients were forced to phase in service at the full performance level within one year instead of within six years of the approval by UMTA of their plan, the 30-year discounted present value of the accessible bus option would rise about $190 million and the comparable cost for paratransit would rise about $270 million.

Service Options

The remainder of § 27.95 establishes the service criteria applicable to various kinds of systems. This section describes how these criteria apply to special service, accessible bus, and mixed systems. Recipients may elect to comply with the regulation by meeting the full performance level for any one of these three approaches. This local discretion to choose the mode of compliance is consistent with the Department's policy, stated in the NPRM, of permitting local areas to choose how they will provide transportation services to handicapped persons.

Generally speaking, transit industry commenters strongly favored this policy, as did some handicapped and other commenters. Providers and users of existing paratransit services also favored local discretion. The majority of handicapped commenters, however, said that local option would not result in adequate, nondiscriminatory service. They argued that accessible bus service should be mandatory. Failure to so require, it was argued, would result in a segregated, "separate but equal," system that would also fail to provide adequate service. A number of handicapped commenters, recognizing that accessible bus systems could not serve the needs of all handicapped persons, suggested that both accessible bus and supplementary special service be required. Finally, a number of handicapped and other commenters said that the final rule should require that light, rapid, and commuter rail systems (particularly new systems) be required to be accessible.

The Department's 1979 regulation on this subject took the approach advocated by many of these commenters. In the Department's experience, this approach was not successful. The high cost of making old rail systems accessible was one of the most important factors leading the Court of Appeals in the *APTA* case to declare that the 1979 rule imposed undue burdens. Also, urban light and rapid rail systems typically cover the same basic geographic service area as the local bus system. Consequently, as long as an accessible bus or special service system provides transportation to disabled persons in the area, disabled persons are not denied transportation. (See discussion of commuter rail in the NPRM accompanying this final rule.) We are aware that bus or other motor vehicle transportation may not be as fast or convenient as rail transportation. However, section 317(c) does not require that service available to disabled persons be the same as service for the general public, and we believe that the rule, as drafted, satisfies our statutory responsibilities.

Where accessible rail systems exist, recipients may use the service these systems provide to help meet their service criteria, whether their service to disabled persons is by accessible bus or special service. See § 27.95(f) and the appendix discussion of it for further information on this point.

The *APTA* v. *Lewis* decision aside, the Department has been impressed by the variety of different local conditions, preferences, and programs in the area of transportation services for handicapped persons, and by the difficulty of forcing all these differing situations into a single, made-in-Washington, mold. The reaction to the 1979 rule, including the 1980 Congressional initiatives to provide greater flexibility to localities, as well as the comments to the docket for this rulemaking, strongly support the proposition that local discretion is essential. Moreover, the statutory and case law does not support the proposition that the Department must mandate mainline accessibility. Of course, facilities of recipients subject to the Architectural Barriers Act of 1968, as amended (e.g., new rail facilities), must be constructed in accordance with accessibility requirements under that law.

Special Service Criteria

There are six service criteria for special service systems. A majority of comments on this subject approved the

service criteria in the NPRM, though many of the comments from handicapped persons objected to the relationship between the criteria and the limitation on required expenditures.

As noted in the discussion of legal issues concerning the rulemaking, the Department does not agree with transit industry comments that the criteria are not legally proper. One of the themes running through transit industry comments on the service criteria was that local transit authorities should have the discretion to decide for themselves the operational issues affected by the service criteria. While the Department favors local discretion, Congress has directed that the Department establish uniform nationwide criteria. Such criteria necessarily constrain local discretion to some extent.

Transit industry commenters also said that applying the service criteria to special service systems "biased" the regulation in favor of accessible bus service. That is, a recipient could comply more cheaply by making its bus system accessible and hence would have an incentive to do so, even if a special service system would provide better service.

The NPRM proposed that 50 percent of a recipient's bus fleet would have to be accessible, and the Department's economic studies of accessible bus systems were based on that proposal. As discussed in greater detail below, the final rule does not establish a specific minimum percentage of accessible buses that a recipient must have. Nevertheless, we believe that the Department's information is useful in estimating regulatory compliance costs. Under the final rule, it is very likely that the average percentage of buses needed to comply with the service criteria would be 50 percent or less. Consequently, the Department's cost estimates for 50 percent accessible bus service are likely to represent a reasonable upper limit of average accessible bus compliance costs under the final rule.

The Department's studies indicate that creating a 50 percent accessible bus system would be less costly, in cities under about 250,000 population, than a special service system meeting the service criteria. In larger cities, the reverse is true, if the special system is a user-side subsidy (e.g., taxi voucher) system. Transit authority-operated paratransit, with its own vehicles and drivers, is the most expensive option in all cases. The Department has modified some of the NPRM criteria in order to reduce the cost differences among the various service options.

We conclude that there is no across-the-board "bias" toward accessible bus service inherent in the Department's regulation. At the same time, we believe that there is nothing improper or unwise about offering recipients and the public a choice among different options of providing service, even though the costs of these modes may differ. We believe it is appropriate for recipients to take all cost and service factors into account in planning the service that they will provide.

A number of commenters, primarily handicapped persons and their groups, advocated additional service criteria. Those most frequently mentioned concerned dwell time (i.e., how long a vehicle remains at a given stop), ride length time, quality of phone service for paratransit (e.g., sufficient phone capacity to handle incoming calls for service in a timely fashion; use of TDDs to facilitate communication with hearing-impaired individuals), service across jurisdictional lines, training for transit personnel, maintenance of facilities and vehicles, transfer frequency, adequate marketing of and publicity for service to handicapped persons, provision for out-of-town visitors and persons with temporary disabilities, and a general requirement for "same or comparable" service.

The Department has incorporated some of these suggestions in § 27.87, "Provision of Service," since it concerns steps that recipients would take to ensure that the service they plan is delivered adequately. Section 27.87 requires, for example, that vehicles and facilities be adequately maintained, that personnel be appropriately trained, that assistance and information be available to persons with vision and hearing impairments and that there be sufficient communications capacity to enable users to get information about and obtain service. The question of service to out-of-town visitors and persons with temporary disabilities is discussed in connection with the service criterion on eligibility.

We decided not to incorporate several of the other suggestions. As noted in the discussion of legal issues, section 317(c) does not require "same or comparable" service. Dwell time, ride length time, marketing and transfer frequency are all legitimate concerns of transit users. However, it would be very difficult to devise meaningful service criteria on these aspects of service that did not involve more detailed "micromanagement" of transit operations or recordkeeping than the Department believes is practical or desirable. In addition, the Department does not believe these factors are as central to the provision of quality service for handicapped persons as the criteria included in the rule.

The Department strongly urges recipients who provide service in a given region to work together to coordinate their service so that jurisdictional lines do not create barriers to the movement of disabled persons, even where recipients do not form a compact under § 27.93. The Department believes, however, that a regulatory service criterion on the subject of interjurisdictional coordination would be neither enforceable nor particularly meaningful.

A number of the service criteria involve relationships between special service and the recipient's mass transit service for the general public. Several commenters asked whether the recipient's rail service was the point of reference. As these comments pointed out, the service characteristics of rail service often differ from bus service. In addition, this rule does not impose any specific service requirements concerning rapid or light rail systems. Special service, which, like bus transportation, uses road vehicles and public highways, is more readily compared to bus service than to rail service. For these reasons, we do not believe it would be appropriate to base service criteria for special service systems on comparisons to rail systems, and the service criteria explicitly refer to bus service. Of course, this refinement of the language of the criteria will not affect the vast majority of UMTA recipients, who have no rail service.

Eligibility

Section 27.77(b)(2) of the NPRM proposed that all elderly and handicapped persons in the recipient's service area who are unable, by reason of their handicap or age, to use the recipient's service for the general public would be eligible to use the recipient's special service system.

A substantial number of comments from handicapped persons, transit authorities and other transportation providers, social service agencies, and other commenters supported the NPRM's criterion. A majority of the transit authority commenters, however, said either that eligibility should be restricted (e.g., to persons with mobility handicaps) or that transit authorities should have the discretion to establish their own criteria for eligibility.

Among the types of eligibility standards mentioned by commenters were so-called functional standards. For example, a transit authority might regard as eligible persons who could not walk ¼ mile, wait outdoors in moderate

temperatures for more than 10 minutes, or negotiate bus steps.

Some transit authority commenters said that the eligibility requirement would force recipients to serve a larger number of people with special service than with an accessible bus system. The result, the commenters said, would be higher costs for special service systems.

Other comments by a smaller number of commenters suggested that elderly persons should be permitted eligibility only if their mobility were limited, that eligibility should be expanded beyond the NPRM criterion, and that there was no objection to the establishment by recipients of appropriate procedures for certifying eligibility.

Eligibility is a key determinant of the capacity and cost of special service systems. For example, the Department's information indicates that approximately 1.4 million persons can be regarded as "severely disabled" (essentially, persons with physical disabilities making them unable to use regular mass transit service). Another six million persons are regarded as "transportation handicapped" (i.e., persons whose disabilities in any way makes their use of transit more difficult, but not impossible). The Department's studies indicate that making these additional persons eligible could increase operating costs of special service systems, on average, about 60 percent, or between $80,000 and $325,000, depending on the size of the city involved. If the Department required all elderly and handicapped persons to be eligible, another 21.9 million persons would have to be accommodated, raising costs even higher.

This being the case, the Department does not believe it would be feasible to broaden the NPRM's eligibility requirement to include transportation for all elderly and handicapped persons. In addition, the Department believes that there is merit to the comment that requiring a recipient to transport all persons who may not be as readily capable of using the bus system as able bodied members of the general public could effectively be so cost prohibitive to remove any real prospect that the recipient would choose a special service system over an accessible bus system.

In this regard, there are a substantial number of persons whose inability to use the bus system for the general public, due to cognitive disabilities, age or illness, would not be helped by making that system physically accessible. For example, the Regulatory Impact Analysis indicates that up to four million mentally or developmentally disabled persons (not included among the 1.4 million persons in the "severely disabled" population referred to in the Analysis) may fall into this category. Inclusion of people in this category could increase special service costs by 10 to 38 percent and could clearly affect the recipient's choice among modes of service.

The Department recognizes that persons with cognitive disabilities also have a need for transportation. Many such persons, however, would be able to use the regular system with appropriate training. The Department encourages recipients to provide such training. It is expected that drivers would also have to be trained to understand, be patient with, and appropriately respond to questions from mentally retarded persons.

Consistent with other parts of this regulation, this provision does not require recipients to provide special service to able-bodied persons with mental disabilities. Recipients may, however, choose to provide transportation to them even though their condition does not render them physically unable to use the bus service for the general public. In this situation, it would be inappropriate for the recipient to count costs for this special service towards the limit on required expenditures.

The final rule, therefore, requires the recipients choosing special service systems to treat as eligible only those persons who, by reason of handicap, are physically unable to use the bus system for the general public. These are the individuals who would be likely to benefit from an accessible bus system.

Section 16 speaks of transportation service for elderly and handicapped persons. This criterion, however, is not intended to make elderly persons eligible for special service solely on the basis of age. As noted above, doing so would substantially increase costs. Moreover, the Department does not believe that it is necessary, under the statute, to require that special service be provided for elderly persons who are, in fact, physically capable of using the regular service for the general public.

Waiting Lists

Section 27.77(c)(6) of the NPRM proposed that there could not be a waiting list for the provision of service to eligible users. Relatively few comments addressed this criterion; most of those that did favored retaining it. Most of the transit authorities commenting opposed the criterion or said they preferred local option concerning waiting lists. Based on the comments, it appears that waiting lists are not a subject of major concern to the transit industry or to consumers; it also appears that relatively few recipients actually use waiting lists. (The GAO study cited in Congress found only 22.)

As a result, the Department has decided not to include a criterion concerning waiting lists in the final rule. It does not appear that waiting lists are a major, central concern on a level with the other subjects of service criteria in the final rule. Like dwell time, ride length time, and other such relevant but relatively less important service characteristics, the subject of waiting lists does not, in our view, warrant a separate service criterion. A specific service criterion on this subject is unnecessary, in any event, given the eligibility criterion and the provision of service requirement.

Response Time

Section 27.77(c)(5) of the NPRM proposed that users of the special service shall not be required to wait for the service more than a reasonable time. The NPRM asked for comment on whether there should be a regulatory maximum waiting period.

Most of the comments on this criterion came from transit authorities and handicapped commenters. Most of the latter favored including a regulatory maximum waiting period; most of the former opposed doing so, saying that this was an issue that should be decided at the local level without a Federal criterion.

Commenters had varying ideas on the appropriate length for a regulatory maximum waiting period. Twenty-four hours was the time mentioned most frequently by commenters. A majority of these comments said that the maximum waiting period should be no more than 24 hours; others said that the maximum waiting period should be no less than 24 hours. Some handicapped commenters recommended shorter maximums, in the one to four hour range. Another suggestion was that the waiting time should not be longer than that encountered by the public generally for regular mass transit.

The Department studied the effect of different response time requirements on recipients' costs. The studies showed that requiring a response time shorter than 24 hours would add considerably to the costs of providing special service. For transit-authority operated paratransit, a shorter response time would increase costs about 70 percent on the average, adding $104,000 to $324,000 to operating costs, depending on city size.

The Department believes that a specific maximum will be easier to understand and enforce than the

"reasonable time" proposed in the NPRM. In a special service system, 24 hours seems a reasonable time for providers to schedule and "package" trips in an efficient manner. We believe that a response time longer than 24 hours could unduly inconvenience users. We also note that prolonged response times were one of the "deficiencies" in current systems mentioned in the legislative history of 317(c). These considerations all favor establishing a 24-hour response requirement.

Restrictions or Priorities Based on Trip Purpose

Section 27.77(c)(4) of the NPRM proposed that use of special service could not be restricted by priorities or conditions based on trip purpose. The preamble to the NPRM noted that this provision was intended to prevent recipients from refusing to provide service for some trip purposes, or providing service for certain purposes only after demand for trips with other purposes is satisfied.

Most handicapped commenters favored this service criterion. Most transit industry commenters opposed it, or recommended that the decision about restrictions and priorities be a matter of local discretion. Other commenters were roughly evenly divided on the issue.

The Department has decided to retain this criterion. The general public can use the recipient's mass transit system at any time that it operates, for any purpose. We believe that it is inappropriate for recipients to administratively limit transportation service for disabled persons to certain purposes. For a transit authority to decide that some trip purposes are more deserving of service than others can involve a kind of paternalism that disabled individuals understandably may resent.

The Department understands the concern of some commenters that, taken literally, this criterion might be thought to foreclose subscription service for work or other essential trips, which our studies show to be a very cost-effective form of special service. The Department does not intend, through this subparagraph, to prohibit recipients from providing this kind of service.

The Department's studies did not directly estimate the costs of providing service without trip purpose restrictions. However, they did include data on so-called "many-to-few" systems, in which transportation service is provided from multiple origin points to a limited number of destinations (e.g., universities, hospitals, employment centers). There are clear differences between a "many-to-few" system (which provides service for any purpose to a limited number of points) and a system with trip purpose restrictions (which provides service for the approved purposes to any point). As noted in the discussion of the trip purpose restrictions criterion in the appendix, a "many-to-few" system would not be consistent with this criterion.

However, cost data about many-to-few systems may serve as a rough surrogate for cost data about systems with trip purpose restrictions. The Department's data indicates that a "many-to-few" paratransit system operated by a recipient would cost about $75–195 thousand less per year than a destination-unrestricted system, depending on city size. The Department does not view this level of potential savings as sufficient to justify eliminating this service criterion.

Fares

Section 27.77(c)(3) of the NPRM proposed that the cost of a trip on the special service would have to be comparable to a trip of similar length, at a similar time of day, to a user of the recipient's service to the general public. The preamble explained that this did not mean the fares had to be identical; rather, the variance between the regular and special service should be relatively small and be justifiable in terms of the actual differences in cost between the two types of service.

A majority of the comments expressing approval or disapproval of the NPRM provision (including most from handicapped commenters) favored it. Some of the handicapped commenters wanted the criterion strengthened, so that it would require special service fares to be no higher than fares for similar trips on the regular mass transit system. The others, including most transit industry comments, opposed the proposed criterion or said that local discretion should be permitted concerning fares. Another sizeable group of comments asked for clarification of what a "comparable" fare was, suggesting that retaining the NPRM language would lead to uncertainty about the meaning of the criterion.

The Department considered retaining the NPRM criterion. This long-established standard is familiar to transit providers and provides a general guideline to recipients and the public and can forestall outlandish fare differentials without involving any potentially arbitrary arithmetical formula. This approach does require some exercise of judgment on a case-by-case basis, however.

The Department also considered a variety of ideas suggested by commenters, such as fares based on a percentage or regular transit fare box recovery, multiples or percentages of regular transit fares, or a specific dollar ceiling. All of these suggestions are likely to be too difficult to apply reasonably under the wide variety of local situations to which the rule must apply. They could also result in handicapped persons having to pay disproportionately high fares in some cases.

The Department also considered comments which said that the charge to the handicapped person from Point A to Point B should be the same, regardless of the mode of service. This approach has the advantages of simplicity and apparent equality. However, the approach could increase net costs of operating a special service system 40 percent or more and, by encouraging marginal trips, increase gross costs as well. This effect could help to "tilt" recipients in the direction of an accessible bus system, contrary to the Department's desire to give recipients an even-handed choice among modes of transportation service.

The Department has decided to retain the "comparable fares" criterion of the NPRM. This approach recognizes the need to keep special service fares within reasonable bounds, compared to regular transit fares. It also recognizes, however, that special service is different from bus service in a number of respects, including convenience of service and cost. Recipients should not have to charge exactly the same prices for different services. While it is necessary to work out the implications of the comparable fares requirement on a case-by-case basis, we believe that the disadvantages of other, less flexible, approaches are more serious.

Hours and Days of Service

Section 27.77(c)(2) of the NPRM proposed that the recipient's special service would have to be available on the same days and during the same hours as the recipient's service for the general public. A majority of transit industry commenters opposed the criterion, or thought that localities should have discretion concerning this service characteristic. A majority of handicapped commenters favored retaining the criterion, and other commenters divided roughly equally.

Commenters opposing this criterion said that it would not be cost-effective to maintain the availability of special service during certain non-peak hours, such as late at night or on weekends.

The Department believes that the cost-effectiveness of service during times of relatively low demand can be improved significantly by the use of user-side subsidy systems to cover those periods. For example, a transit authority that runs a relatively costly paratransit system during peak hours might shut down that system after the evening rush hour and substitute a taxi voucher system.

The Department's national computer model study did not include data from which estimates could be made of the incremental cost impact of this criterion. Neither did commenters present any information useful for analysis on this point. Data from four of the case studies suggests that this criterion could increase costs of a special service system from two to 15 percent in those cities. However, given that the rule includes a limitation on required expenditures by recipients, the inclusion of this criterion will not, in any event, result in undue financial burdens being imposed on transit providers.

Disabled persons, like other members of the public, have use for public transportation on evenings and weekends. The times when service is available is one of the key determinants of the utility of mass transit to its users. Consequently, the Department has decided to retain this criterion.

Service Area

Section 27.77(c)(1) of the NPRM proposed that special service would have to be available throughout the same service area as the recipient's service for the general public. The preamble asked for comment on how the final rule should treat extended commuter service that went well outside the normal service area.

The largest group of commenters on this issued favored a requirement for providing special service within the same area that the system for the general public serves. These commenters included some transit authorities as well as handicapped individuals and groups representing them, social service agencies, paratransit providers, and other members of the public. A few commenters said that the decision about the area served should be left to local discretion.

Almost all handicapped commenters on the issue of "extended" service said that service going beyond the normal service area should be accessible or that special service should be available. Almost all transit authorities said this matter should be left to local decision, or that requirements for service beyond the normal service area should be less stringent. There was also some comment on the question of how the "service area" should be defined. Some commenters favored defining the service area as the urbanized area, or alternatively, the "normal urban area" in which the recipient provides service to the general public. Others asked for clarification of the requirements for special service within the normal service area—did the criterion mean that special service must serve any points within the urbanized area, or did the special service have to serve only points along bus routes? Some transit authorities said the definition should be left to local discretion. A few of these pointed out that certain existing special service systems already serve a larger area than the regular bus system, asserting that a "same service area" criterion could reduce the geographic area now served.

The Department's information shows that permitting recipients to restrict the geographic area they serve to an area smaller than is served by the regular transit system can reduce expenditures. A geographic area-restricted paratransit system operated by a recipient, on average, would cost between $70 and $200 thousand less per year, depending on city size, than a similar system serving the same geographic area as the regular transit system. The corresponding difference for the less costly user-side subsidy approach would range from $20 to $45 thousand annually.

Principally because of this cost differential, the Department seriously considered eliminating or modifying the service area criterion. However, in view of the decision to include a limit on recipients' required expenditures, the Department decided that the cost differential was not sufficient to outweigh the importance of the criterion in ensuring adequate service for handicapped persons. The absence of geographic restrictions on service is among the most important factors making special service genuinely useful for disabled riders. For example, in many localities, the bus system serves a central city and its surrounding suburbs. If the special service system serves only the central city, or provides service only within certain jurisdictional or "zone" boundaries, the ability of a handicapped person to move around the area by mass transit is severely limited.

Consequently, we are retaining this criterion in the final rule. In terms of defining the service area, we have decided to adopt the suggestion to use the normal area served by the recipient's bus system (exclusive of extended commuter runs). This area is the best analog to the area in which service is available to the general public.

We recognize that it is somewhat more difficult for recipients to "draw the map" of their service area than to use the urbanized area as the basis for the service area. The boundaries of the urbanized area, as determined by the Bureau of the Census, are clearly defined. However, the Department's studies indicate that the service areas in which many recipients actually run their bus systems are smaller than urbanized areas, and using the urbanized area definition could force them to expand their service for handicapped persons well beyond the area in which the general public is served. This is not necessary as a matter of equity, and it would increase costs.

Service is required to be "throughout" the service area. Limiting service to bus stops or to areas within a certain distance of bus routes would not, therefore, meet this criterion. With respect to "extended" service, the Department believes, as handicapped commenters argued, that disabled persons should be able to take advantage of "extended" service. At the same time, the Department agrees that requirements for special service outside the normal service area should be less stringent. Therefore, the Department will require recipients to provide service for handicapped persons to only those points (e.g., terminals, bus stops) reached directly by the bus service extending outside the normal service area.

Service Criteria for Accessible Bus Systems

Section 27.77(b)(2) of the NPRM proposed that one of the ways a recipient could comply with the rule was to make 50 percent of its fixed route bus service accessible. Fifty percent of the fixed route service would be deemed accessible when half the buses the recipient used during both peak and off-peak times were accessible. The preamble explained that this meant that 50 percent of the buses "on the street" at any time had to be accessible, adding that this meant that a sufficient number of accessible buses would have to exist in the reserve fleet to ensure that 50 percent of the buses actually operating were accessible.

The preamble also asked two questions with respect to accessible bus service. First, should recipients be required to permit semiambulatory persons to use lifts? Second, how would the service criteria apply to bus service?

As a response to handicapped commenters' requests for 100 percent accessible service, and to recipients' concern that the relatively low cost of accessible bus service "biased" the rule in its favor, the Department considered requiring 100 percent accessible service, which would provide the level of service requested by the handicapped commenters while substantially reducing or eliminating the cost differential between bus and paratransit modes.

Depending on city size, the Department projects that 100 percent accessible bus service would cost between $40 and $420 thousand more per year than 50 percent accessible service, for the average transit authority. While this would reduce the cost differential with paratransit, the Department is not persuaded that it would be cost-effective to require 100 percent accessible service. It is reasonable to believe that, while a 100 percent accessible system would be more convenient for handicapped persons to use, a majority of the persons who would use accessible bus service at all would use a system in which substantially fewer than 100 percent of the buses were accessible. The overall higher costs of 100 percent accessible bus service are themselves a reason for choosing not to require service at this level.

The Department was aware that recipients will have to have some accessible buses in their reserve fleets. The NPRM mentioned this fact, and the Department's cost estimates for accessible bus service have taken it into consideration. The Department is not persuaded, however, that 50 percent accessible bus service is too costly. The Department's data indicates that such service can, in most cases, be provided well within the rule's cost limit.

There were also several comments that accessible bus service would not be fully adequate to meet the needs of disabled persons. These comments pointed out that not all handicapped persons could use accessible bus service, for reasons such as distance from bus stops, inability to use a lift, physical barriers between the bus stop and the user's origin or destination, bad weather, etc.

The Department is aware that not all handicapped persons can use accessible fixed route buses, and we agree that the ideal transportation system for handicapped persons would include both 100 percent accessible fixed route service and a substantial amount of special service. However, given the limitations of Federal and local resources, and the constraints of the *Davis* and *APTA* cases, the Department believes that it is not in a position to mandate an "ideal" system.

Rather, we believe that by giving localities a choice among various approaches that are reasonably effective, even if short of ideal, we will comply with the intent of Congress and improve considerably the services available to disabled persons. An accessible bus system meeting the final rule's service criteria is one of these reasonably effective approaches.

A number of transit authorities said that if 50 percent of the recipient's fleet was accessible, it should be regarded as in compliance, whether or not 50 percent of the buses actually operating on the street were accessible. However, accessible buses sitting in the garage or on the parking lot do not provide transportation services to handicapped persons. Use, as well as ownership, of accessible buses is necessary for the accessible bus option to work. This is as true under the final rule as under the 50 percent requirement proposed in the NPRM. In this connection, it should be remembered that, in conformity with section 317(c), the Department is required to establish criteria for the provision of service, not simply for the possession of equipment.

Some handicapped commenters said that, during off-peak hours, all buses should be accessible, or that the recipient's accessible buses should be used before inaccessible buses (this latter requirement was part of the Department's 1979 rule). It is true that off-peak schedules involve less frequent service. Consequently, off-peak accessible service could be very infrequent. Therefore, the Department encourages recipients to deploy their buses so that as many as possible of the buses in use during non-peak hours are accessible, to make service for handicapped persons more convenient.

However, the Department does not believe that it is appropriate to establish a regulatory requirement to this effect. Such a requirement is less compatible with the service criteria-centered approach of the final rule than the 50 percent accessibility proposal of the NPRM. Also, the deployment of additional accessible buses during off-peak hours is a matter best left to the discretion of local operators.

The final rule does not require that 50 percent or any other fixed percentage of the recipient's buses be accessible. Rather, the final rule requires that the recipient operate, on the street, a sufficient number of accessible buses to meet the other service criteria for bus systems. The Department has decided to take this approach because, consistent with section 317(c), the emphasis of this rule is on meeting service criteria. There is no magic percentage of buses that will ensure that the service criteria are met.

The Department is aware that recipients now operate accessible bus service in two principal ways. The majority do so by making part of their scheduled bus service accessible. However, it is also possible for a recipient to provide "on-call" accessible bus service. That is, a user calls the recipient and says that he would like an accessible bus to be on a particular route at a particular time. The recipient makes sure that the accessible bus is provided.

In the preamble to the NPRM, the Department mentioned such an arrangement as an example of a mixed system. We believe, however, that it is more reasonable to treat such an approach as a type of accessible bus system, since it is based on the use of regular accessible transit buses on regular bus routes.

It is the Department's intention to establish, as Congress intended, a set of uniform national service criteria for transportation service to handicapped persons. This is important for reasons of equity to users and providers alike. Inherent characteristics of various modes of transportation require some modifications in the way the criteria are stated, however.

Three of the six service criteria are met automatically by a scheduled accessible bus system. Scheduled accessible bus systems have no administrative eligibility requirements. They do not restrict or prioritize the availability of service based on trip purpose. Buses meet schedules, rather than arriving in response to a specific request for service. This satisfies the purpose of the response time criterion.

Of the remaining criteria, the first requires service throughout the same days and hours as the recipient's bus service for the general public. This criterion, like its parallel for special service, is designed to ensure that a recipient does not make accessible service available during only a part of the time it makes service available to the general public (e.g., peak hours).

The "reasonable intervals" language, like the requirement that the service be provided "throughout" the same days and hours as service for the general public, responds to comments that the effectiveness of some existing accessible systems has been limited by the irregularity and infrequency of accessible bus service. At the same time, this language avoids the objection of transit industry commenters to very

specific service distribution and scheduling requirements. This language is included in this criterion because intervals between vehicles is a special characteristic of a scheduled bus system not present in demand-responsive modes of service.

Accessible bus service is limited to certain routes, and does not directly serve origins and destinations throughout a circumferential area. The service area for scheduled accessible bus service, therefore, states that service must be provided on all the recipient's bus routes on which a need for accessible bus service has been established through the rule's planning process.

The reference to the planning and public participation process, also unique to this mode of providing service, responds to those commenters who stressed the need for local flexibility in the design of accessible service and the need to avoid a rigid requirement for service on routes on which there is no demand for it.

In an accessible bus system, all passengers use the same vehicle and travel the same routes. Therefore, the differences between bus and special service that led us to require "comparable" rather than the same fares for the latter do not apply in this context. Recipients must therefore charge all passengers, including handicapped persons, the same fare for the same trip (leaving aside, of course, the off-peak half fares required for elderly and handicapped persons by 49 CFR 609.23).

Some of the criteria for on-call accessible bus service are identical to those for special service. The eligibility, response time, and restrictions or priorities based on trip purpose criteria fall into this category. The fares criterion is identical to the fares criterion for scheduled accessible bus service. The "same days and hours" criterion is the same as the first sentence of the corresponding provision for scheduled accessible bus service. The second sentence is dropped because it is not meaningful to talk of "reasonable intervals" in the context of demand-responsive accessible bus service.

The service area criterion is somewhat different than its scheduled accessible bus service counterpart. In the scheduled accessible bus service context, the schedule of accessible buses which run regularly on various routes at various times is a matter for the planning process. In an on-call accessible bus system, however, the need for and scheduling of accessible service is determined by calls requesting such service in each specific instance. Consequently, the statement of the service area criterion for on-call accessible bus service simply requires accessible service to be provided on all the recipient's routes, upon request.

This criterion also addresses a unique feature of on-call accessible bus service by stating that "all the buses needed to complete the handicapped person's trip" must be provided. Obviously, on-call accessible bus service will not be useful to a handicapped person if the first bus he or she needs to get to his or her destination is accessible, but the bus he or she needs to transfer to in order to complete the trip is inaccessible.

Some handicapped and other commenters suggested various additional criteria concerning the use of accessible buses. For example, every other bus could be required to be accessible. There could be requirements governing transfer frequency or trip length.

The "every other bus" criterion would be a surrogate for the "same days and hours" and "same service area" criteria. However, it could be unduly rigid in application, denying recipients and other participants in the planning process the opportunity to concentrate accessible service where it is most needed. In addition, it could be confusing to state the service criteria in a markedly different way for this mode. For these reasons, we decided not to adopt such a criterion. We also decided against including transfer frequency and trip length criteria, believing that these matters are best determined as a part of the local planning process.

One of the most vexing issues concerning accessible bus service is whether there should be a service criterion requiring recipients to permit semiambulatory persons and other standees to use bus lifts. At the present time, transit authority practices, as described in the comments, appear to vary widely.

Virtually all transit industry comments on this issue said that the operator should have the discretion to decide whether semiambulatory persons should be able to use lifts or that the Department should prohibit the use of lifts by such persons. Virtually all the handicapped commenters urged the Department to require recipients to allow semiambulatory persons to use lifts. A few other comments suggested that UMTA sponsor research into lifts that standees can use safely, that the Department require additional safety devices for lifts, or that semiambulatory persons be permitted to use lifts if they sign a waiver of liability.

Both major positions on this issue have merit. It is true, as handicapped commenters pointed out, that unless semiambulatory persons are permitted to use lifts of a recipient who complies through an accessible bus system, these individuals will have no access to public transportation. This is contrary to the intent of the statute and regulation, the commenters assert.

It is also true, as transit industry commenters point out, that at least some kinds of lifts are not designed to accommodate standees. Not all lifts, for example, have handrails a standee can grasp. Some may operate in a fashion that makes retaining one's balance while standing difficult, particularly for some elderly or handicapped persons. Other lifts may enter the bus at a level, relative to the door opening, that could cause a standee of a certain height to hit his or her head on the entranceway. Transit authorities are properly concerned about the safety and legal liability implications of these problems.

The Department does not have, at this time, sufficient information to evaluate the safety implications of requiring recipients to allow semiambulatory persons and other standees to use lifts. Nor are we now in a position to establish design or performance standards, or safety feature requirements, for lifts. Particularly in view of the Department's policy emphasis on transportation safety, we do not believe that it would be advisable for us to require a practice that could create safety hazards for the individuals that the rule is intended to help.

For this reason, the final rule does not include such a requirement. However, the Department will consider further the safety implications of standee use of lifts and determine what, if any, additional steps are appropriate to address this problem.

Service Criteria for Mixed Systems

Section 27.77(b)(3) of the NPRM proposed that recipients could comply with the rule by establishing a mix of accessible bus and special service. The preamble discussion of this proposed section stated that the accessible bus and special service components of the mixed system, taken together, would have to meet all the service criteria. The preamble also suggested that, in a mixed system, the recipient would not have to provide both accessible bus and paratransit service between the same two points, and it asked whether the final rule should contain any requirements concerning transfer frequency.

There was relatively little comment on this provision. Most of these comments did not object to the notion of a mixed system envisioned by the NPRM and appeared to like the flexibility that such systems provide.

A few commenters objected to the preamble's suggestion that accessible bus and special service components of a mixed system would not have to duplicate one another's routes and efforts. The idea of non-duplication, however, is essential to a mixed system. If a recipient could have a mixed system only if it provided both sorts of service everywhere at all times, then there would be little reason for the recipient to establish a mixed system.

The final rule (see amendment to section 27.5) defines a "mixed system" simply as one that provides accessible bus service at certain times in certain areas and special service at other times and/or in other areas. The full performance level for a mixed system is reached when, subject to the overall limit on required expenditures, each component of that system meets the service criteria applicable to accessible bus systems or special service systems, as the case may be.

Comments from handicapped persons emphasized the importance of convenient travel using all components of a mixed system, and most of these comments favored some limitation on the number of transfers that could be required. Most transit industry commenters favored local discretion on this matter.

The Department does not believe that a discrete national limit on transfers is feasible. The variables are too numerous, and the comparison between the mass transit system for the general public and a mixed system for handicapped persons too difficult, to make such a criterion workable in the great variety of local circumstances to which this rule has to apply. On the other hand, we believe that recipients have a responsibility to coordinate the parts of mixed systems to minimize inconvenience to users, including inconvenience related to transfers. Therefore the Department will require the recipient to ensure such coordination.

Section 27.97 Limit on required expenditures.

Section 27.77(d) of the NPRM proposed that no recipient would be required, in order to meet the NPRM's service criteria, to spend more than a certain annual sum. The NPRM set forth two different ways of calculating that sum for comment, both averaged over the current and two previous fiscal years: 7.1 percent of the recipient's annual UMTA assistance, and 3.0 percent of the recipient's operating budget.

Many commenters addressed the cost limitation issue. The largest group of comments, including virtually all those from handicapped commenters as well as members of most other categories (especially social service agencies), opposed the concept of a limitation on recipient costs like that proposed by the NPRM. As a policy matter, these comments asserted, the limit would vitiate the effect of the service criteria and result in inadequate transportation service for handicapped persons. As a legal matter, these comments said, the proposal would be inconsistent with section 317(c). If there were a limitation on required costs for recipients, many of these same commenters said, it should be set at a higher level. Some of the comments recommended setting the limit as high as 30 percent of the recipient's Federal assistance or 15 percent of its overall operating budget.

On the other hand, virtually all the transit authority comments on the subject, as well as several comments in other categories, approved the concept of the limit on required expenditures. However, these commenters said that the limit was too high to avoid the imposition of undue financial burdens.

Many of the transit industry comments suggested that the Department should ensure that recipients be required to spend no more than they would have to spend under the present § 27.77. To accomplish this objective, several comments suggested that the cost limit be established at about two percent of section 9 funds.

Transit authorities' comments about the base for the cost limit were divided. A majority favored a Federal assistance-based approach. Several MPOs and commenters in other categories also favored a Federal assistance-based limit.

One argument that proponents of a Federal assistance-based cap made was that of proportionality. That is, the amount they spend on complying with a Federal regulatory requirement should remain proportional to the amount of Federal assistance they receive.

All handicapped commenters commenting on the subject, plus about a quarter of the transit authority comments and several comments from commenters in other categories, favored an operating budget approach to the limitation on recipient expenditures. Two main arguments were advanced for this preference. First, the recipient's operating budget was viewed as a relatively more stable base for calculating the limit, since it is drawn from a variety of sources and appears less subject to fluctuation than Federal assistance. Second, these commenters view the transit service for handicapped persons as simply one aspect of a transit authority's overall service to the public. From this viewpoint, fairness requires a reasonable portion of the transit authority's overall resources to be devoted to that portion of the service to the public that handicapped persons can use.

A smaller number of commenters, from various categories, favored either letting recipients choose which base for the limit would apply in their case, or calculating both and using the higher figure. Because this approach would involve more paperwork, and create greater uncertainty, than choosing a single cost limit, the Department did not adopt this suggestion.

The Department has decided to adopt a limit on required expenditures. We have done so for a number of reasons. First, under section 504, as interpreted by the courts, the Department cannot impose undue financial burdens on recipients. The limit is designed to prevent such undue burdens.

Second, predictability is important in planning and budgeting for any public expenditure. The provision will ensure that recipients know, and can plan on the basis of, a predictable limit to their cost exposure for compliance with this rule.

Third, the provision will avoid, to a substantial degree, inequities among recipients. From the information available to the Department, it appears that the cost of providing various sorts of service to handicapped persons may vary substantially from recipient to recipient. In the absence of a limit on required expenditures, the compliance cost to one recipient (even among recipients the populations of whose service areas are similar) could be much higher than for another. The limit will help to avoid major discrepancies in the proportion of resources that recipients must devote to transportation for handicapped persons.

In addition, the Department is convinced that the limit will not result in the failure of this regulation to achieve its principal purpose—the improvement of transportation services for handicapped persons, consistent with the Department's service criteria. The Department's studies show that many recipients, including those serving the largest urban populations in the country, should be able to meet all service criteria for less than the cost limit regardless of which approach to service

VOL 51 ISS 100 MAY 23 1986 UMI

they choose. By choosing cost-effective alternatives (such as user-side subsidy or coordination/brokerage programs), many other recipients can do so as well. Other recipients will make tradeoffs which still result in substantially improved service; in these situations, the public participation process is available to help determine the most productive allocation of resources.

One alternative to a limit on required expenditures that the Department considered was to provide for individual, case-by-case, "undue hardship" waivers of the requirements of the rule. Some commenters said this approach was preferable to the proposed cost limit because it did not establish an across-the-board "exemption" from the service criteria. This approach has several problems. First, the Department would have to devise neutral, broadly applicable standards for what constitutes an undue hardship or burden. Such standards might well have to include a cost limit-like threshold expenditure level. Also, the lack of clear legal definition of what constitutes an undue hardship could make standard-setting very difficult.

Second, the Department would have to deal with what, based on experience in previous rulemakings, could be a large number of waiver requests. Processing these requests could be a very time-consuming and burdensome job for the Department, leading to substantial uncertainty about and delay in providing the services for handicapped persons. In effect, the Department would be substituting a series of rulemakings of particular applicability for a rule of general applicability. Moreover, this approach would shift the emphasis in decisionmaking about service from local areas to Washington, which is contrary to the Administration's policy.

Third, it would probably be necessary to eliminate or scale back some of the service criteria in order to prevent the overall compliance costs of the rule from becoming too large. This would be undesirable, particularly in that it could result in less improvement of service in those many localities that can meet all the criteria without exceeding the limit on required expenditures.

With respect to the alternatives for the limit on required expenditures and their effects on projected recipient costs, the Department presents the following tables, based on information it gathered in studies made in connection with the Department's Regulatory Impact Analysis (RIA). These figures, and the way they were derived, are discussed in greater detail in the RIA.

TABLE 1.—ANNUAL COSTS OF SERVICE MEETING ALL SERVICE CRITERIA

City size	3.0 limit	7.1 limit	Para-transit	User-side subsidy	50 percent bus
(1) Less than 250,000	61	78	247	92	35
(2) 250,000 to 500,000	193	194	393	128	193
(3) 500,000 to 1,000,000	356	356	515	165	300
(4) Over 1 million [1]	2,400	3,456	1,918	196	885

[1] Does not include data from New York, Chicago, Los Angeles, Philadelphia, San Francisco, and Boston.

The data in Table 1 are expressed in thousands of 1983 dollars, and represent annual operating and capital costs and cost limit figures for a system serving an average-sized city in each city size category. The accessible bus costs assume a six-year phase-in period and a 25 percent spare ratio. The user-side subsidy costs assume that supplementary lift-equipped vehicle service would be provided for persons unable to use regular taxis. The paratransit (i.e., transit authority-operated paratransit) and user side subsidy figures are projections of the cost of systems in which the service criteria are as close as possible, given the data available, to those required by the final rule. The 7.1 percent cost limit is based on all UMTA assistance in FY 1985. The 3.0 percent cost limit is based on recipient operating costs as shown in the 1981–82 reports under Section 15 of the UMT Act.

becoming too large. This would be

Table 2.—Nationwide, 30-Year Present Value of Compliance Costs

Paratransit	.98
50 percent Accessible Bus	.69
7.1 percent cost limit	2.72
3.0 cost limit	2.37

This table covers all cities, including the six largest, and assumes that all cities chose one option or the other. The numbers are expressed in billions of 1983 dollars and are based on 1983 UMTA assistance and operating budget levels. The cost limits and service figures are computed as in Table 1.

TABLE 3.—DATA FROM SEVEN CASE STUDIES

City	Present costs	Adjusted costs	7.1 percent limit	3.0 percent limit	2.0 percent of 3.0 limit
Cleveland	3,800	3,119	5,300	3,165	800
Pittsburgh	2,700	2,550	7,350	3,300	850
Seattle	1,218	1,260	2,500	3,250	885
Kansas City (Missouri)	1,079	956	887	783	185
Akron (Ohio)	1,145	242	312	547	85
Hampton (Virginia)	93	103	305	162	58
Brockton (Mass.)	585	245	129	159	28

The figures in Table 3 are expressed in thousands of FY 1983 dollars (except the present costs figures for Cleveland and Seattle (Calendar Year 1980 dollars) and Akron (Calendar Year 1982 dollars). The present costs to which the table refers are the costs of the recipient's existing service for elderly and handicapped persons, whether or not the service meets the criteria of this rule. The adjusted costs are the Department's projection of what it would cost each city to operate a system meeting the service criteria while serving the eligible population defined by the rule. The costs cited are total costs. In the case studies, the systems were credited with all capital costs from 1970–present, and, although annualized, overstate actual compliance costs under the final rule. The 3.0 percent cost limit is based on 1983 total operating expenditures. The 7.1 percent cost limit is based on 1984 section 9 grant apportionments and section 3 capital funds. The 2.0 percent of section 9 limit, suggested by transit industry comments, is shown for purposes of comparison (calculated in FY 1984 funds).

Looking first at the overall, long-term picture (Table 2), the Department's figures show that, over 30 years, the present value of recipients' aggregate maximum cost exposure under the final rule would be about a third of a billion dollars less under the NPRM's 3.0 percent of operating costs limit than under the 7.1 percent of all UMTA assistance alternative. What is more interesting in Table 2 is that the 30-year present value of aggregate compliance costs for either transit authority-operated paratransit or 50 percent bus accessibility is far less than either of the proposed cost limits. (These figures are projections of what the nationwide compliance cost would be if all recipients chose one mode or the other.)

Table 1 projects the annual costs of compliance and cost limits in average-sized cities in each of four city size categories. The 3.0 percent cost limit results in a lower potential cost exposure in city size categories 1 and 4, an equal potential exposure in city size category 3, and a slightly higher potential cost exposure in category 2.

In city size categories 2, 3, and 4, both a user-side subsidy and a 50 percent accessible bus system, meeting all service criteria of the final rule, could be provided for less than either proposed cost limit amount. In each case, the user-side subsidy approach would be less costly. Transit authority-operated paratransit meeting the service criteria, in every case the most expensive alternative, could be provided for less than the cost limit amounts only in cities of more than 1,000,000 population (category 4), though cities in category 3 could come close.

Small cities would have the most difficult time meeting all the criteria for less than their cost limit amounts.

According to Table 1, the cities in category 1 (under 250,000 population) would be able to meet the criteria without exceeding the cost limit only by using an accessible bus system. Even a user side subsidy system's costs would exceed the limit on required expenditures to some extent, and a transit authority-operated paratransit system would exceed the cost limit level substantially.

One of the interesting results of the case studies displayed in Table 3 is that the present expenditures of four of the cities (Cleveland, Kansas City, Akron, and Brockton) are higher than one or both of the proposed limits on required expenditures. These expenditures are not mandated by Federal regulation. It is difficult to argue that expenditures at the cost limit levels proposed by the NPRM would constitute "undue financial burdens" for cities which have already voluntarily exceeded these levels.

Six of the seven cities (all except Brockton) could comply with the all of the final rule's service criteria by spending less than the 3.0 percent cost limit figure applicable to them. Five of the seven cities could comply with all the final rule's service criteria by spending less than the 7.1 percent cost limit figure applicable to them. The exceptions are Cleveland and Brockton. These results suggest that the proposed approaches to limiting recipients' required expenditures are reasonably related to the provision of transportation services meeting the final rule's service criteria. The figures show that cities' costs of compliance do vary substantially, which supports the argument that a cost limit is useful to prevent cities with higher costs (e.g., Cleveland) from suffering substantially higher compliance burdens than other cities.

On the other hand, the 2.0 percent of section 9 funding basis for the limit on required expenditures, recommended by transit industry comments, would fall far short of either the seven systems' current expenditures or the expenditures necessary to meet all service criteria under the final regulation. The 2.0 percent limit amounts for the seven systems average 30.9 percent of the systems' current expenditures. The same 2.0 percent limit amounts average 42 percent of the adjusted compliance costs for the seven systems. It is clear that, if the Department were to adopt the 2.0 percent of section 9 basis for the cost limit, the seven systems could comply with the regulation while providing much less service than they do now or would provide under the 3.0 or 7.1 percent cost limits.

The Department has concluded that the 2.0 percent of section 9 approach to establishing a limit on required expenditures would not be adequate. Congress clearly intended, through section 317(c), that the Department should publish a rule that would result in improved transportation services for disabled persons. The 2.0 percent of section 9 approach is explicitly intended to avoid any required increase in the aggregate resources devoted to such services. It is unlikely that expenditures at this level could improve service as Congress intended. As Table 3 shows, expenditures at this level could drastically reduce services below present levels in many cases.

The Department has decided that of the two proposed approaches to the limit on required expenditures, the 3.0 percent of operating costs approach is preferable. First, the Department is persuaded that the greater likelihood of stability, from year to year, in a figure based on overall operating costs is a significant programatic advantage. This stability should facilitate recipients' planning for service to disabled persons. It should help to avoid fluctuations in that service that would disrupt the transportation opportunities of its users. Second, the overall potential cost exposure to the transit industry is significantly less under this approach than under the 7.1 percent of UMTA assistance alternative, based on 1985 program levels. Not only is this true for the 30-year cost limit level, but it is also true in two of the three city size categories on an annual basis in which the two differ.

In addition, the Department agrees with those commenters who said that service to handicapped persons should be viewed—and funded—simply as one portion of the recipient's overall service to the public. The Department believes that it is equitable to relate the limit on required expenditures to the funds the recipient expends on services for the entire public.

Finally, this way of calculating the cost cap is based on a standardized, readily available source (UMTA section 15 data). This will facilitate administration and monitoring of the cost limit.

We understand the argument, made by proponents of linking the cost limit to UMTA assistance, that the Department should maintain proportionality between Federal funds and expenditures for Federally-mandated service. However, we do not believe that this argument outweighs the considerations favoring the 3.0 percent of operating costs basis for the limit on required expenditures.

Some commenters recommended deleting, from the base from which the cost limit is calculated, expenditures specifically for service to handicapped persons, such as the costs of a special service system or the incremental costs of operating an accessible bus system. The basic rationale of this suggestion appears to be that to use these costs as part of the base for calculating the cost limit would be a sort of double counting. We have not adopted this suggestion. The cost limit relates to the overall operating expenses of the recipient for all purposes, including transportation provided to all users. It would be inconsistent with this rationale, and with the idea that service to handicapped persons is simply one facet of service to the public, to base the cost limit on three percent of 97 percent of the recipient's operating expenses. Doing so would also make administering the rule more complicated.

The NPRM proposed that the recipient could average its operating costs for the two previous fiscal years and its projected operating cost for the current fiscal year in order to form the base from which the cost limit is calculated. The rationale of this provision was to permit greater predictability and stability in the cost limit figures (e.g., to smooth out "bumps" in cost limit levels that might be caused by short-term changes in operating costs). Relatively few comments addressed this proposal, and most of them were favorable. The final rule retains this feature.

The preamble of the NPRM also asked for comment on so-called "carryover credit." This idea would involve permitting a recipient which voluntarily spends more than its cost limit in one year to take credit for the overage in subsequent years. For example, a recipient that made heavy capital expenditures in one year, spending $100,000 over its cost limit figure, would be able to comply with the rule the following year even though it spent up to $100,000 less than its cost limit figure.

The majority of the comments on carryover credit, most of which came from transit authorities, favored the concept. Other commenters favored various ways of amortizing capital investments over a period of time. The Department agrees with commenters who expressed concern that crediting the total amount of capital purchases in the year in which the purchases took place would create an uneven pattern in reported expenditures. This could result

in a recipient exceeding its cost limit some years and not others because of capital expenditures, causing fluctuations in the level of service.

As a result, we have decided to require recipients to annualize capital expenditures over the expected useful life of the item. This requirement is expected to result in less fluctuation and greater predictability of eligible expense levels, as they relate to the limit on required expenditures. This approach will also, we believe, accommodate the concerns of those commenters who favored a "carryover credit" approach.

Section 27.89 Eligible expenses.

Since the rule includes a limitation on the costs recipients are required to incur to comply with the regulation, it is necessary to establish what kinds of expenditures by the recipient may be counted in determining whether the recipient has reached the limit.

Section 27.77(e) of the NPRM said that incremental operating costs of accessible rolling stock, operating costs of special service, capital costs for special service components and accessible rolling stock, payment of expenses of indirect methods of providing service, and incremental costs of training and coordinating service were eligible. Other costs, even if related to service for handicapped persons, were not. For example, if recipients served both eligible handicapped persons and other persons with the same service, then only the portion of the cost of the service attributable to the former could be counted. The preamble to the NPRM added that only expenditures by the recipient itself, and not expenditures by other parties, could be counted.

The latter point was a major focus of comment. Virtually all transit industry commenters said that expenditures by agencies other than the recipient itself should be counted as eligible expenses. These comments said, first, that such expenditures were intended to provide transportation service to handicapped persons. Second, the comment alleged that the cost limitation provision acted, in effect, as a minimum expenditure criterion, and, like the minimum expenditure guideline in the July 1981 interim final rule and its 1976 predecessor, should permit expenditures by other agencies to be counted. Third, the comments said that NPRM's proposal would discourage effective coordination between the recipients' services and those provided by other agencies. The larger number of handicapped commenters addressing this subject were equally united in asserting that only expenses incurred by the recipient itself should be counted.

The Department has concluded that only expenditures by recipients of their own funds should count in determining whether a recipient has reached its limit on required compliance expenditures. This conclusion follows directly from the nature of the limit on required expenditures itself.

The limit's reason for being is to prevent the requirements of this rule from imposing an undue financial burden on recipients. A recipient can suffer an undue financial burden only if it has to expend too many of its own dollars on compliance with the regulation. If a United Fund agency or a state or local public social service agency spends its dollars on transportation services for disabled individuals, the recipient's revenues are not any further depleted or burdened. If a transit authority buys ten accessible buses, the cost it has to incur is not increased by the fact that the local Center for Independent Living has bought a van. In logic and in reality, no one suffers a burden because someone else spends money.

We disagree with the objections of transit industry commenters to this approach. It is true, of course, that the expenditures of other public or private agencies for transportation services for disabled persons have a purpose similar to the purpose of this rule. But this rule imposes requirements and compliance costs only on UMTA recipients. Services provided by other agencies, and funded from other sources, create no additional costs for the UMTA recipients.

To the extent that the comments characterize the limit on required expenditures as a "minimum expenditure" provision, we believe they are mistaken. A minimum expenditure provision would require recipients to spend (or to ensure that they and some combination of other agencies spend) a certain amount of money, regardless of what service is provided.

For example, the Department's analysis projects that an average city of between 500,000 and 1,000,000 population could meet special service criteria through a user-side subsidy system for about $200,000 per year. The limit on required expenditures for such a city would be $508,000. If the cost limit were instead a minimum expenditure requirement, the city would be required to spend another $300,000 per year, notwithstanding the fact that it had already met all service criteria. Obviously, such an approach would penalize recipients who selected an economical mode of compliance with the rule.

The rule establishes minimum criteria for service; recipients can meet these criteria in a variety of ways. Given the variety of means open to recipients to comply with the rule, which can result in compliance costs below the cost limit levels in many instances, we do not believe it fair to say, even figuratively, that § 27.97 creates a minimum expenditure requirement.

We are also unpersuaded that this approach to eligible project expenses will harm coordination efforts. The recipient's program must ensure that service meeting the service criteria is provided to disabled persons. It does not matter who provides this service. That is, while expenditures made by other agencies are not eligible to be counted in connection with the recipient's limit on required expenditures, service provided by other agencies can help to meet the service requirements imposed by this rule. If there is a significant amount of service provided by various public and private agencies in an urbanized area, the recipient may coordinate that service, supplement it as needed to meet the service criteria, and possibly spend a relatively low amount of transit authority funds (see § 27.95(e)). This situation creates a strong incentive, not a disincentive, for coordination of transportation services for disabled persons, since it will help to reduce the cost of compliance for recipients.

The final rule provides that only those expenditures incurred specifically to comply with the requirements of this Subpart are eligible in connection with the limitation on required recipient expenditures. This regulation does not compel any transit authority to expend funds except to comply with its own requirements. The fact that another Federal, state, or local legal requirement or policy choice may result in expenditures beyond those required by this regulation does not convert these additional costs into burdens imposed by this regulation.

Some commenters said that costs related to improving accessibility of rail systems (e.g., facilities and vehicles for light rail and subway systems) should be eligible. This rule, however, imposes no requirements related to rail systems. No recipient has to make any changes in its rapid or light rail system in order to comply with this regulation. Therefore, any costs the recipient incurs to improve its rail system cannot be construed as burdens imposed by this rule, although the costs of improvements to permit the transfer of disabled persons between

accessible rail systems and bus or special service systems can be eligible. (As noted above, service provided on accessible rail systems can help to meet service requirements, however.) The same principle applies to costs incurred by recipients to comply with the Architectural Barriers Act or state or local accessibility laws. These costs are not burdens of compliance with this regulation.

This principle is stated in paragraph (a) and elaborated in paragraphs (b) and (c) of this section. For example, only "incremental" capital costs of accessible buses are eligible (e.g., the extra cost of a lift-equipped bus over the bus without a lift, not the entire cost of the bus). Only the costs of a special service system attributable to transporting persons required to be treated as eligible under this regulation, and not the costs of carrying additional persons (e.g., non-handicapped elderly persons) can be counted.

Several comments from handicapped commenters said that administrative expenses should not be eligible. We do not agree. Ensuring that programs are properly administered is a very important part of ensuring that transportation services are provided effectively. Those administrative expenditures directly related to service to handicapped persons should be counted just as other expenditures for operating a transportation service.

Some handicapped and transit authority commenters mentioned "half-fare" subsidies to elderly and handicapped persons as a cost item, the former opposing considering it as an eligible expense and the latter favoring doing so. The half-fare requirement of 49 CFR Part 609 remains in effect, and we are proposing in the NPRM to incorporate it into this Part. It is clearly a program specifically designed to assist elderly and handicapped persons, which the Department requires recipients to implement. It is therefore reasonable to regard the incremental costs of compliance as eligible, and the Department has decided to do so.

Section 27.101 Technical exemptions.

The Department has drafted this rule with the intent of providing substantial flexibility to recipients. Nevertheless, we realize that there may be a few unusual situations in which application of the general requirements of the rule could prove unduly burdensome or unreasonable. The Department, therefore, has decided to include an exemption provision in the rule. The Department's experience under the 1979 regulation on this subject, as well as under other rules, suggests that it is valuable to have a stated procedure for technical exemptions and standards for decision to guide recipients' applications and the Department's responses to them.

Section 27.103 Alternate Procedures for Recipients in States Administering Section 5, 9, and 9A Programs.

The Department has added a new procedural section for recipients in states which have elected to administer certain UMTA funding programs. The recipients have the same obligations as all other recipients, but they will send their program materials and other submissions to the state rather than to UMTA.

Technical Amendments to Part 27

Part 27, as published in 1979, refers throughout to the American National Standards Institute (ANSI) standards for physical accessibility of structures and other facilities. This reference is now obsolete. For purposes of all of Part 27, the new Uniform Federal Accessibility Standards (UFAS) are now the relevant accessibility standards. The General Services Administration has incorporated the UFAS into its mandatory accessibility standards for Federal and Federally-assisted facilities. These standards are already binding on DOT grantees, and we wish to update Part 27 to refer to them. This should help to avoid confusion.

Therefore, all references to the ANSI standards in Part 27 have been changed to refer to the UFAS. The language of the change to § 27.67, incorporating the principal UFAS reference, is drawn from a Department of Justice model amendment on the subject. The language of the various sections affected by this technical change is not changed substantively. However, we have inserted the word "apparent" in §§ 27.71(a) and 27.73(a) (". . . where there is *apparent* ambiguity or contradiction . . .") to emphasize that the intent of the rule is to read the UFAS and specific provisions of the DOT rule together, and that the one is not intended to allow noncompliance with the other.

When the Department published its section 504 rule in 1979, the section concerning the Federal Aviation Administration's airport programs contained a reference to "jetways." Subsequently, we learned that, like "Xerox" and "Kleenex," "Jetway" is a trade name not properly used in a generic sense. We promised to correct the oversight quite a while ago and, even though this rulemaking has to do with mass transit rather than airports, this seems like a good time to do it.

Comment Period

The Department originally established a 60-day comment period for the September 8, 1983, NPRM, which was scheduled to end on November 8. However, the Department received a number of requests, mostly from handicapped persons and their groups, requesting that the comment period be extended. These commenters suggested that the extension was needed in order to permit commenters—particularly disabled commenters—adequate time to frame their responses to the Department's proposal. The Department did extend its comment period for another 30 days, with the comment period closing on December 8, 1983.

Public Hearings

A number of commenters, primarily disabled persons and groups representing them, requested that the Department hold public hearings about the proposed regulation. In informal rulemaking under 5 U.S.C. 553, public hearings are not required by law. The Department decided that such hearings were not warranted in this rulemaking. The extended comment period gave all interested parties a fair opportunity to present their views, and the 650 persons and organizations who commented appear to represent a broad spectrum of points of view on the issues. Between the comments, and the studies that the Department conducted on transportation services for handicapped persons to provide more information on issues raised by the comments, the Department believes it has obtained the information it needs on which to base a reasonable final rule.

Impact on Small Entities

This rule could have a significant economic impact on a substantial number of small entities. The Department is required to consider and analyze such impacts by the Regulatory Flexibility Act. The small entities potentially affected include small UMTA recipients (including section 18 subrecipients), social service organizations, private transportation providers, and manufacturers of lifts and other specialized equipment used in transportation services for handicapped persons.

Transit systems in rural areas and cities under 50,000 population are not significantly affected by this regulation. These recipients of section 18 funds are subject to a special provision for small recipients, which imposes requirements less stringent and more flexible than those applying to larger cities. The small recipients will have no more substantive

requirements to meet than under present regulations. They will have small additional reporting burdens, though these too are less burdensome than the reporting requirements with which larger systems must comply.

Proportionately speaking, the rule will create the heaviest burdens on cities between 50–200 thousand population. That is, systems in these cities will have the most difficult time meeting the rule's service criteria for relatively low costs. The rule's limit on required expenditures is designed to prevent such systems from incurring undue financial burdens, by limiting required expenditures to 3.0 percent of the recipient's operating costs, as reflected in its section 15 report to UMTA. This "cost limit" device allows recipients to scale down services to those they can provide with a reasonable expenditure of resources.

The rule is likely to have a favorable impact on a number of small businesses, such as lift manufacturers, shops that customize small vehicles for use by handicapped persons, and private providers of transit services to handicapped persons (e.g., taxi cab companies, firms that operate specialized vans). The rule, by requiring more and better transportation for disabled persons, will increase the market for the products and services these businesses provide.

Notice of Proposed Rulemaking on Commuter Rail

The Department made no specific proposals concerning commuter rail systems in the September 1983 NPRM. That NPRM did request comment on what, if anything, the Department should require in the commuter rail area. The Department received few comments on this issue, most of which were from handicapped persons who wanted commuter and other rail systems to be accessible or from transit providers who said there should be no requirements concerning commuter rail.

These comments presented little, if any, data on the need for accessible commuter rail service, the population to be served, or the costs and other advantages and disadvantages of different approaches to commuter rail service. The Department does not have such data of its own, at the present time. In the absence of this information, it would be premature to promulgate a final rule.

Consequently, the Department decided to publish a new NPRM concerning commuter rail. This notice requests comment on specific alternatives for providing commuter rail service to disabled persons. In addition, it requests information concerning the need for and costs of such service. Before making a decision on whether to proceed to a final rule on this subject, the Department also intends to undertake or review studies on commuter rail accessibility, in order to ascertain whether there is a sufficient basis for such action.

This NPRM will also propose incorporation of some portions of 49 CFR Part 609 in 49 CFR Part 27 and to remove the rest of Part 609.

Environmental Considerations: Finding of No Significant Impact

The Department of Transporation finds, under the standards of the National Environmental Policy Act, that the implementation of this rule will not have a significant impact on the human environment. The regulation requires improvements in services for handicapped persons; these improvements will increase the mobility of handicapped persons, but should not have any significant impacts on the environments of communities generally. The economic impacts of the rule are discussed in detail in the Regulatory Impact Analysis.

In connection with its 1979 rule on this subject, the Department produced an Environmental Impact Statement (EIS). With respect to bus systems, the EIS considered the impacts of a 100 percent accessible bus system. (Since this rule does not require 100 percent bus accessibility, its impacts would be smaller than those of the 1979 rule). The 1979 EIS found that, to the extent that lift-assisted bus boardings cause traffic delays, additional carbon monoxide (CO) emissions would occur from the vehicles following the bus. In all cases analyzed, total annual additional CO emissions amounted to a very small fraction of areawide CO emissions. The increase in bus weight due to the lift would result in slightly increased nitrogen oxide (NO) emissions; the increase is estimated at 0.24 percent to 0.40 percent of total roadway NO emissions. The macroscale impact of this increase would be imperceptible. Construction to provide access to fixed facilities would cause short-term increases in suspended particulates only within 100 feet of the construction. These increases were well below EPA standards for suspended particulates.

The Department also considered potential impacts for paratransit systems. The most important air quality impact from paratransit services would be the additional emissions from this new fleet of vehicles added to general urban traffic. Depending upon the vehicles used for the paratransit service and the number of trips served, total CO emissions, if all recipients used paratransit, could vary from about 3,000 to 75,000 tons per year in urban areas across the country. The areawide CO emissions from paratransit would be insignificant compared to the total areawide CO emissions from all vehicles and other sources.

The likely noise impacts from accessible transit systems, such as those from operation of the lift and slightly increased dwell times, were found to be insignificant. Construction activities to make fixed facilities accessible might result in some very short-term impacts with peak noise levels exceeding recommended EPA levels, but not in the hearing loss range. Exposure to noise would be short since the activities creating those noise levels (such as operation of a jack hammer) are short-term and the unprotected passerby would not be in the immediate vicinity for long periods. Mitigation measures such as barrier enclosure or scheduling the work to reduce the number of passersby exposed would reduce the impacts.

For these reasons, we have concluded that there would be no significant impact on the human environment, and we have therefore not prepared an EIS for this rule.

Regulatory Process Matters

This rule is a significant rule under the Department of Transportation Regulatory Policies and Procedures and a major rule under Executive Order 12291. As a result, the Department has prepared a Regulatory Impact Analysis in connection with this rule. The analysis is available for public review in the rulemaking docket.

The Office of Management and Budget has approved, in connection with the NPRM for this rule, the information collection requirements it contains. These information collection requirements are virtually the same in the final rule as they were in the NPRM. The OMB Paperwork Reduction Act number for these information collection requirements is 2132–0530. The current OMB clearance for these requirements expires April 30, 1989.

The Department of Justice has reviewed and approved this rule under Executive Order 12250 and OMB has reviewed and approved the rule under Executive Order 12291.

List of Subjects in 49 CFR Part 27

Handicapped, Mass transportation.

Issued this 19th day of May, 1986, at Washington, DC.

Elizabeth Hanford Dole,
Secretary of Transportation.

For the reasons set forth in the preamble, the Department of Transporation takes the following actions:

PART 27—[AMENDED]

1. The authority citation for Part 27 is revised to read:

Authority: Sec. 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794); sec. 16(a) of the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1612(a)); sec. 165(b) of the Federal-Aid Highway Act of 1973, as amended, 23 U.S.C. 142nt. Subpart E is also issued under section 317 (c) of the Surface Transportation Assistance Act of 1982 (49 U.S.C. 1612(d)).

1a. Paragraph (a) of the definition of "Accessible" in § 27.5, in Subpart A of Part 27, in Title 49 of the Code of Federal Regulations, is revised to read as follows:

§ 27.5 Definitions.

* * * * *

"Accessible" means (a) with respect to new facilities, (1) conforming to the accessibility standards referenced in § 27.67(d) of this Part, with respect to buildings and facilities to which these standards are applicable; and (2) with respect to vehicles other moving conveyances, (or fixed facilities to which the standards referenced in § 27.67(d) of this Part do not apply,) able to be entered and used by a handicapped person;

* * * * *

2. Paragraph (d) of § 27.67, in Part 27 of Title 49 of the Code of Federal Regulations, is retitled *"Accessibility Standards"* and revised to read as follows:

§ 27.67 [Amended]

* * * * *

(d) *Accessibility standards.* Effective as of the effective date of this Subpart, design, construction, or alteration of buildings or other fixed facilities in conformance with sections 3–8 of the Uniform Federal Accessibility Standards (UFAS) (Appendix A to 41 CFR 101–19.6) shall be deemed to comply with the requirements of this section with respect to those buildings or other fixed facilities. Departures from particular technical and scoping requirements of UFAS by the use of other methods are permitted where substantially equivalent or greater access to and usability of the building or other fixed facilities is provided.

(1) For purposes of this section, section 4.1.6(1)(g) of UFAS shall be interpreted to exempt from the requirements of UFAS only mechanical rooms and other spaces that, because of their intended use, will not require accessibility to the public or beneficiaries or result in the employment or residence therein of physically handicapped persons.

(2) This section does not require recipients to make building alterations that have little likelihood of being accomplished without removing or altering a load-bearing structural member.

3. Paragraph (a)(1) of § 27.71, in Part 27 of Title 49 of the Code of Federal Regulations, is amended by removing the last two words of the first sentence and the second sentence. The following language is substituted:

§ 27.71 [Amended]

(a) * * *

(1) * * * accessibility standards referenced in § 27.67(d) of this Part. Where there is apparent ambiguity or contradiction between the definitions and the standards referenced in § 27.67(d) and the definitions and standards used in paragraph (a)(2) of this section, the terms in the standards referenced in § 27.67(d) should be interpreted in a manner that will make them consistent with the standards in paragraph (a)(2) of this section.

* * * * *

4. Paragraph (a)(1)(i) of section 27.73 in Part 27 of Title 49 of the Code of Federal Regulations is amended by removing, the last two words of the first sentence and the second sentence. The following language is substituted:

§ 27.73 [Amended]

(a) * * *

(1) * * *

(i) * * * accessibility standards referenced in § 27.67(d) of this Part. Where there is apparent ambiguity or contradiction between the definitions and the standards referenced in § 27.67(d) and the definitions and standards used in paragraph (a)(1)(ii) of this section, the terms in the standards referenced in § 27.67(d) should be interpreted in a manner that will make them consistent with the standards in paragraph (a)(1)(ii) of this section.

§§ 27.71, 27.73, and 27.75 [Amended]

5. In each of paragraphs 27.71(a)(2) introductory text, 27.71(a)(2)(ix), 27.71(a)(2)(xii), 27.73(a)(1)(ii) introductory text, 27.73(a)(1)(ii)(L), and 27.75(a)(1), all of which are in Part 27 of Title 49, Code of Federal Regulations, the words "ANSI standards" are removed, and the following words are substituted: "accessibility standards referenced in § 27.67(d) of this Part."

6. Paragraph 27.71(a)(2)(v), in Subpart D of 49 CFR Part 27, is amended by removing the word "jetways" therefrom and substituting the words "level entry boarding platforms".

§ 27.77 and Appendix B to Subpart D [Removed]

7. Section 27.77, in Subpart D of Part 27 and Appendix B to that Subpart, in Title 49 of the Code of Federal Regulations, are removed.

8. In Part 27, in Title 49 of the Code of Federal Regulations, the words "Mass Transit" are removed from the title of Subpart D.

9. The table of contents for Part 27 of Title 49 of the Code of Federal Regulations is amended by adding the following:

Subpart E—Mass Transportation Services for Handicapped Persons

Sec.
27.81 Program requirement.
27.83 Public participation and coordination.
27.85 Submission and review of program.
27.87 Provision of service.
27.89 Monitoring.
27.91 Requirements for small recipients.
27.93 Multi-recipient areas.
27.95 Full performance level.
27.97 Limit on required expenditures.
27.99 Eligible expenses.
27.101 Technical exemptions.
27.103 Alternate procedures for recipients in States. Administering the section 5, 9, and 9A programs.
27.105–119 [Reserved]
Appendix to Subpart E.

10. Part 27 of Title 49 of the Code of Federal Regulations is amended by adding the following definitions to § 27.5 thereof, placing them in alphabetical order among the existing definitions of that section:

§ 27.5 [Amended]

* * * * *

"Mixed System" means a transportation system that provides accessible bus service to handicapped persons in certain areas or during certain hours and provides special service to handicapped persons in the other areas or during the other hours in which the transportation system operates.

* * * * *

"Special service system" means a transportation system specifically designed to serve the needs of persons who, by reason of handicap, are physically unable to use bus systems designed for use by the general public. Special service is characterized by the use of vehicles smaller than a standard transit bus which are usable by handicapped persons, demand-

responsive service, point of origin to point of destination service, and flexible routing and scheduling.

* * * * *

11. Part 27 of Title 49, Code of Federal Regulations, is amended by adding a new Subpart E, which reads as follows:

Subpart E—Mass Transportation Services for Handicapped Persons

§ 27.81 Program requirement.

Except as provided in § 27.91(a) of this Subpart, each recipient of UMTA financial assistance under sections 3, 5, 9, or 9A of the UMT Act, which provides transportation services to the general public by bus, shall establish a program meeting the requirements of this Subpart. The program shall ensure provision of service to handicapped persons at the full performance level required by § 27.95 of this Subpart within the time called for by that section. The program shall include milestones describing the progress the recipient shall make each year until it achieves the full performance level.

§ 27.83 Public participation and coordination.

(a) Each recipient required to submit a program under this Subpart shall develop its program through a public participation process that includes, as a minimum, the following steps:

(1) The recipient shall consult, as early as possible in the planning process, with handicapped persons and groups representing them, transportation and social service organizations, concerned state and local officials, and the Metropolitan Planning Organization (MPO). This consultation shall concern the needs for service to handicapped persons in the area served by the recipient, any weaknesses or problems in present service or plans for service, and the types and characteristics of service to be provided under the recipient's program. In connection with this consultation, all cost estimates, plans, working papers, and other information pertaining to the recipient's program planning and service for handicapped persons shall be made available to all interested persons.

(2) The recipient shall provide a public comment period of at least 60 days upon the recipient's proposed program.

(3) The recipient shall hold at least one public hearing, to take place during the public comment period. Notice of the hearing shall be provided no fewer than 30 days before its scheduled date. The hearing shall be held in a facility accessible to handicapped persons, and the recipient shall take appropriate steps to facilitate the participation of handicapped persons in the hearing, including persons with impaired vision or hearing.

(4) The recipient shall ensure that all notices and materials pertaining to the program, comment period, and public hearings are made available in a form that persons with vision and hearing impairments can use.

(b) The recipient shall coordinate the development of its program with the MPO and submit its proposed program to the MPO for comment at the same time as the proposed program is made available for public comment.

(c) The recipient shall make efforts to accommodate, but is not required to adopt, significant comments on its proposed program made by the MPO and by the public, as part of the public participation and coordination process. The recipient shall make available to the public, no later than the time it adopts a program for transmittal to UMTA, a response to significant comments. This response shall include the recipient's reasons for not accommodating significant comments from the MPO and the public.

(d) All recipients subject to the program requirement of § 27.81 shall provide a mechanism for continuing public participation in the development and operation of its system of transportation for handicapped persons. The mechanism shall ensure consultation, with respect to planning, implementation, and operation, with handicapped persons, available advocacy groups of handicapped persons, public and private social service agencies, public and private operators of transportation services for handicapped persons, and other interested persons.

(e) Before making significant changes to its program, the recipient shall follow the public participation process outlined in paragraphs (a)–(c) of this section and secure UMTA approval of the altered program as provided in § 27.85 of this Subpart for initial program submissions.

§ 27.85 Submission and review of program.

(a) Each recipient required to establish a program under § 27.81 of this Subpart shall submit the following materials to the appropriate UMTA Regional Administrator within 12 months of the effective date of this Subpart:

(1) A copy of the program;

(2) The comments of the public (including handicapped persons and the MPO) on the program, together with the recipient's responses to these comments, or summaries thereof;

(3) Documentation of the projected costs of implementing the recipient's program, the costs of alternatives considered by the recipient, the projected amounts of the limitation on required expenditures for the recipient, and the rationale for any reduction of service quality below a level meeting fully the service criteria of § 27.95 (b), (c), or (d), as applicable.

(b) UMTA shall complete review of each recipient's program submission within 120 days of receiving it. UMTA may extend this review period; if UMTA does so, UMTA shall send the recipient a letter, before the end of the 120-day period, explaining the reasons for the extension and providing an estimated date for the completion of review.

(c) After UMTA has completed its review on each recipient's program submission, it shall notify the recipient, in writing, that the program is either approved as submitted, requires certain specified changes in order to be approved, or is disapproved. If the program is not approved as submitted, the notification shall set a time, not less than 30 nor more than 90 days from the date of the notification, within which the recipient shall submit a modified program to UMTA for approval. UMTA may condition approval of the resubmitted program on specified changes to its content or additional public participation activities.

§ 27.87 Provision of service.

(a) Each recipient shall, at all times, provide the service called for by its program, as approved by UMTA, or under its certification pursuant to § 27.91, as applicable, to all eligible handicapped persons.

(b) The recipient's obligation to ensure the provision of such service includes, but is not limited to, the following:

(1) Ensuring that vehicles and equipment are capable of accommodating all the users for which the service is designed, and are maintained in proper operating condition;

(2) Ensuring that sufficient spare vehicles are available to maintain the levels of service called for in the program, or as provided under the § 27.91 certification;

(3) Ensuring that personnel are trained and supervised so that they operate vehicles and equipment safely and properly and treat handicapped users of the service in a courteous and respectful way; and

(4) Ensuring that adequate assistance and information concerning the use of the service is available to handicapped persons, including those with vision or

hearing impairments. This obligation includes making adequate communications capacity available to enable users to obtain information about and to schedule service. In the case of a scheduled accessible bus system, this obligation also includes providing information on bus schedules and other sources of information about the service concerning which runs are made with accessible buses.

(5) Ensuring that service is provided in a timely manner, in accordance with scheduled pickup times.

(c) Notwithstanding the provision of any special service to handicapped persons, a recipient shall not, on the basis of handicap, deny to any handicapped person the opportunity to use the recipient's system of mass transportation for the general public, if the handicapped person is capable of using that system. Nor shall a recipient otherwise discriminate against a handicapped person in connection with the provision of its transportation service for the general public.

(d) In the time between the effective date of this Subpart and the recipient's achievement of the full performance level established by § 27.95, service at least at the level provided pursuant to the recipient's certification under former § 27.77 of this Part (46 FR 37488; July 20, 1981), as amended, shall remain in effect.

§ 27.89 Monitoring.

(a) In connection with the triennial section 9 review and evaluation of the recipient's activities conducted by UMTA under 49 U.S.C. 1607a(g)(2), UMTA shall review and evaluate compliance of the recipient with this Subpart and its approved program for providing transportation services to handicapped persons.

(b) With respect to any recipient required to submit a program under § 27.81 of this Subpart, but which is not subject to a section 9 triennial review audit, UMTA shall conduct a triennial review and evaluation of the recipient's compliance with this Subpart and its approved program for providing transportation services to handicapped persons.

(c) If the recipient has fallen behind its approved schedule for implementing service to handicapped persons or has fallen below its full performance level for that service, the recipient shall submit a report to the appropriate UMTA Regional Administrator on the annual anniversary date of the approval of its program. The report shall describe the problem or delay experienced, explain the reasons for it, and set forth the corrective action the recipient has taken or is taking to ensure that its approved implementation schedule or its full performance level is met.

§ 27.91 Requirements for small recipients.

(a) This section applies to all recipients which provide service to the general public only in areas of 50,000 population or less. Recipients in this category shall follow the requirements of this section instead of the other requirements of this Subpart, except that § 27.87 shall apply to recipients in this category.

(b) Within 12 months of the effective date of this Subpart, each recipient shall certify that special efforts are being made in its service area to provide transportation that handicapped persons, unable to use the recipient's service for the general public, can use. This transportation service shall be reasonable in comparison to the service provided to the general public and shall meet a significant fraction of the actual transportation needs of such persons within a reasonable time. Recipients who have a current certification to this effect are not required to recertify.

(c) Within nine months of the effective date of this Subpart, each recipient shall ensure that handicapped persons and groups representing them have adequate notice of and opportunity to comment on the present and proposed activities of the recipient for achieving compliance with the requirements of paragraph (b) of this section. This notice and opportunity for comment shall take place before the submission of the certification required by paragraph (b) of this section and the report required by paragraph (d) of this section. Each recipient shall also ensure that there is adequate notice and the opportunity for public comment on any subsequent significant changes to its service for handicapped persons.

(d) Within 12 months of the effective date of this Subpart, each recipient shall submit a status report including:

(1) A description of the service currently being provided to handicapped persons, as compared to the service for the general public;

(2) Copies or a summary of the comments of handicapped persons received in response to the opportunity for comment;

(3) A statement of any plans to modify the service significantly; and

(4) A statement of the resources devoted to the service for handicapped persons.

(e) Each recipient shall submit update reports concerning its service for handicapped persons. The recipient shall provide such a report every three years, on a schedule determined by UMTA. Each report will include the following information:

(1) A description of the service currently provided to handicapped persons, as compared to the service for the general public;

(2) Any significant modifications made in the service since the previous report, or planned for the next three-year period;

(3) Copies of a summary of the comments on any significant changes made in the service since the previous report; and

(4) A description of the resources that have been devoted to service for handicapped persons each year since the previous report and that are planned to be devoted to this purpose in each of the next three years.

(f) All certifications and reports under this section shall be submitted to the designated state section 18 agency or, for recipients who do not receive section 18 funds, to the appropriate UMTA Regional Administrator.

§ 27.93 Multi-recipient areas.

(a) This section applies to any multi-recipient area; i.e., an urbanized area including two or more recipients required to establish a program under § 27.81 of this Subpart.

(b) The recipients in a multi-recipient area may enter into a compact for purposes of compliance with this Subpart. The compact shall meet the following standards:

(1) The compact shall establish a cooperative mechanism among the recipients to ensure the provision of combined and/or coordinated service to handicapped persons that meet all requirements of this Subpart.

(2) The compact shall ensure the provision and sharing of funding adequate to provide such service.

(3) The compact shall include a reasonable dispute resolution mechanism concerning funding and service matters.

(4) The compact shall be a formal written document, signed by all participating recipients.

(c) In order for UMTA to recognize the compact as the means through which recipients in the multi-recipient area will comply with this Subpart, the members of a compact shall submit a copy of the signed compact to the appropriate UMTA Regional Administrator within six months of the effective date of this Subpart. Following such timely submission, UMTA shall acknowledge receipt of the compact within 30 days and then regard the members of the compact as if they constitute a single

recipient for purposes of all requirements of this Subpart.

(d) The deadline for the submission of a program under § 27.85 by a multi-recipient area compact shall be 12 months from the date on which the copy of the compact is acknowledged by UMTA under paragraph (c) of this section.

§ 27.95 Full performance level.

(a) *Scope and timing.* Each recipient shall provide transportation service to handicapped persons at the full performance level. The full performance level is defined as meeting the criteria set forth in either paragraph (b), paragraph (c), or paragraph (d) of this section, subject to the limit on required expenditures provided for in § 27.97 of this Subpart. The recipient shall meet this requirement as soon as reasonably feasible, as determined by UMTA, but in any case within six years of the initial determination by UMTA concerning the approval of its program.

(b) *Criteria for special service systems.* The following minimum service criteria apply to special service systems:

(1) *Eligibility.* All persons who, by reason of handicap, are physically unable to use the recipient's bus service for the general public shall be eligible to use the recipient's special service.

(2) *Response time.* The recipient shall ensure that service is provided to a handicapped person who requests it within 24 hours of the request.

(3) *Restrictions or priorities based on trip purpose.* The recipient shall not impose priorities or restrictions based on trip purpose on users of the special service.

(4) *Fares.* The fare for a trip charged to a user of the special service system shall be comparable to the fare for a trip of similar length, at a similar time of day, charged to a user of the recipient's bus service for the general public.

(5) *Hours and days of service.* The special service shall be available throughout the same hours of days as the recipient's bus service for the general public.

(6) *Service area.* The special service shall be available throughout the circumferential service area in which the recipient provides bus service (exclusive of extended express or commuter bus service) to the general public. The recipient shall also ensure that service to points outside this service area served by the recipient's extended express or commuter bus service shall be available to handicapped persons.

(c) *Criteria for accessible bus systems.* The following minimum service criteria apply to accessible bus systems:

(1) *Number of buses.* The recipient shall operate on the street a number of accessible buses sufficient to meet the other service criteria of paragraph (c)(2) and/or (3) of this section, as applicable.

(2) *Criteria for scheduled accessible bus systems.*

(i) *Hours and days of service.* Scheduled accessible bus service shall be available throughout the same hours and days as the recipient's bus service for the general public. The service shall be provided at reasonable intervals that make practicable the ready use of the accessible bus service by handicapped persons.

(ii) *Service area.* Accessible bus service shall be provided on all the recipient's bus routes on which a need for accessible bus service has been established through the planning and public participation process set forth in § 27.83.

(iii) *Fares.* The fare for a trip charged a handicapped person using an accessible bus shall be no higher than the fare charged other users of the recipient's bus service for the same trip. Reduced, off-peak fares for elderly and handicapped persons shall be in effect on accessible buses.

(3) *Criteria for on-call accessible bus service.*

(i) *Eligibility.* All persons who, by reason of handicap, are physically unable to use the recipient's bus service for the general public shall be eligible to use the recipient's on-call accessible bus service.

(ii) *Response time.* The recipient shall ensure that service is provided to a handicapped person who requests it within 24 hours of the request.

(iii) *Restrictions or priorities based on trip purpose.* The recipient shall not impose priorities or restrictions based on trip purpose on users of the on-call accessible bus service.

(iv) *Fares.* The fare charged a handicapped person using an accessible bus shall be no higher than the fare charged other users of the recipient's bus service for the same trip. Reduced, off-peak fares for elderly and handicapped persons shall be in effect on accessible buses.

(v) *Hours and days of service.* On-call accessible bus service shall be available throughout the same days and hours as the recipient's bus service for the general public.

(vi) *Service area.* On-call accessible bus service, including all buses needed to complete each handicapped person's trip, shall be provided, upon request, on all the recipient's bus routes.

(d) *Criteria for mixed systems.* The service criteria of paragraphs (b) and (c) of this section apply to the special service and accessible bus components of the system, respectively, for the portions of the service area, and/or days and times, in which each operates. The recipient shall ensure that the accessible bus and special service components of the mixed system are coordinated (including transfers between the components) so that inconvenience to handicapped users of the mixed system is minimized.

(e) *Services by other agencies and modes of transportation.* In meeting the service criteria, the recipient may use services provided, and funded, by agencies other than the recipient, and services delivered through other modes of transportation, if the services provided by the other agencies or through other modes of service are part of a system of transportation coordinated by the recipient.

§ 27.97 Limit on required expenditures.

(a) *Calculation.* To determine its limit on required expenditures for a given fiscal year, the recipient shall calculate 3.0 percent of its total annual average operating costs (as reported to UMTA in compliance with requirements under section 15 of the Urban Mass Transportation Act, as amended) it reasonably expects to incur in the current fiscal year and did incur during the previous two fiscal years.

(b) *Effect.* A recipient is not required, in any fiscal year, to spend more than the amount of its limit on required expenditures for that fiscal year in order to comply with this Subpart, even if, as a result, the recipient cannot provide service to handicapped persons that fully meets the service criteria specified by § 27.95 (b), (c) or (d), as applicable. Each recipient shall, in all cases, comply with § 27.95 (b)(1) or (c)(3)(i), as applicable.

(c) *Consultation.* In determining how to reduce service levels in order to avoid exceeding the limit on required expenditures, the recipient shall consult with handicapped persons and the public through the public participation mechanism established under § 27.83(d) of this Subpart.

§ 27.99 Eligible expenses.

(a) Only expenditures by the recipient of its own funds, specifically to comply with the requirements of this Subpart, are eligible to be counted in determining whether the recipient has exceeded its limitation on required expenditures.

(b) The expenditures by the recipient that may be counted in determining whether the recipient has exceeded its limitation on required expenditures are limited to those listed in this paragraph.

No other expenditures may be counted for this purpose:

(1) Capital and operating costs for special services systems;

(2) Incremental capital and operating costs for accessible bus systems;

(3) Administrative costs directly attributable to coordinating services for handicapped persons.

(4) Incremental costs of training the recipient's personnel to provide services to handicapped persons.

(5) Incremental costs of compliance with 49 CFR 609.23.

(6) Incremental costs of construction or modification of facilities to enable handicapped persons to transfer readily between accessible bus or special service systems and accessible rail systems, provided that such construction or modification is part of the recipient's program approved under § 27.85 of this Subpart.

(c) With respect to service provided to both handicapped persons eligible to receive service under this Subpart and to other persons, only expenditures attributable to the transportation of the eligible handicapped persons may be counted in determining whether the recipient has exceeded its limitation on required expenditures.

(d) Expenditures for the purchase of vehicles and other major capital expenditures shall be annualized over the expected useful life of the item. Only the portion of the expenditure attributable to a given fiscal year may be counted in determining the recipient's eligible expenses for that year.

§ 27.101 Technical exemptions.

(a) A recipient may request a technical exemption from any provision of this Subpart. Such a request shall be made in writing, to the Administrator of the Urban Mass Transportation Administration, through the appropriate UMTA Regional Administrator. The request may be made in conjunction with the submission of the recipient's program under § 27.85 of this Subpart.

(b) The Administrator may grant the request if—

(1) The recipient has demonstrated that special local circumstances, not contemplated or taken into account in the rulemaking establishing this Subpart, make it unduly burdensome or unreasonable for the recipient to comply with a generally applicable requirement; and

(2) The recipient has agreed to take action which the Administrator determines will result in substantial compliance with this Subpart despite the grant of a technical exemption from a particular provision of this Subpart.

(c) The Administrator may grant, partially grant, or deny any request for a technical exemption. The Administrator may also place any reasonable conditions upon the grant of a technical exemption. The Administrator's actions are subject to the concurrence of the Assistant Secretary for Policy and International Affairs.

§ 27.103 Alternate procedures for recipients in States administering the section 5, 9, and 9A programs.

(a) If a state has elected to administer UMTA's section 5, 9, and 9A programs for UMTA, the recipient shall submit the materials required by §§ 27.85, 27.89(c), 27.91(f), and 27.93(c) of this Subpart to the designated state agency rather than to UMTA. The designated state agency shall act for UMTA to review and approve, as required, the materials submitted by the recipients. The time limits and procedures imposed on UMTA in these provisions shall apply to the designated state agencies.

(b) After the designated state agency has approved the recipient's program under § 27.85, it shall certify to UMTA that the recipient is in compliance with this Subpart. This certification is due to UMTA within 30 days of the approval of the program and it shall state whether the recipient has entered into a compact under § 27.93.

§§ 27.105–110 [Reserved]

Appendix to Subpart E

The material in this appendix describes the Department's interpretation of the provisions of this regulation. (For additional information concerning these provisions, please refer to the preamble published with this regulation in the Federal Register.) This material may be supplemented or modified, in the future, by additional guidance from the Department, including UMTA, as questions arise during the implementation of the regulation.

Section 27.81 Program requirement.

This section directs UMTA recipients who receive funds under sections 3, 5, 9, or 9A; serve the general public; and operate a bus system in an urbanized area to establish a program, consistent with this regulation's requirements, for providing transportation services to handicapped persons. Each of the qualifications of this requirement is intended and important.

Recipients receiving funds only under another section (e.g., section 8 planning funds; section 18 small urban and rural transportation program funds) do not need to create a program.

Recipients who do not provide federally-assisted transportation services at all (e.g., an MPO that receives section 9 funds but merely passes them through to a transit provider) are not required to establish a program. "Providing transportation services," in this context, is not limited to actually operating a fleet of the recipient's own vehicles with the recipient's own personnel. For example, private provider may operate federally-assisted service (e.g., as part of a private-sector participation initiative). The recipient would be providing transportation service for purposes of this section, and be responsible for ensuring that service to handicapped persons that fully meets regulatory requirements is provided, directly or through the private provider.

Only recipients providing transportation services to the general public (as distinct from providing services only to elderly or handicapped persons) are required to establish a program. Even though section 16(b)(2) funds are taken from section 3 appropriations, agencies receiving funds solely under this program are not covered by this section's requirements.

Recipients under other UMTA funding programs, if they serve only elderly and/or handicapped persons, are exempted from this requirement for the same reason. Also, recipients who do not provide transit services "by bus" (i.e., rail-only operators) are not covered by this requirement.

Section 27.91(a) creates a separate, simpler system through which section 18 recipients and other recipients in non-urbanized areas (even though they receive some section 3,5,9, or 9A funds) will comply with the requirements of this Subpart. That section, and not § 27.81, applies to recipients providing service only in areas of less than 50,000 population.

The recipient's program must provide for meeting the full performance level for services to handicapped persons within the phase-in period provided for by § 27.85. The program must include "milestones": statements of the progress a recipient will make each year toward the full performance level.

For example, a recipient planning to comply by making its buses accessible would set forth how many accessible buses it would have by the end of year one, year two, etc., and to what degree it would meet each of the various service criteria at each stage. Similar items would be presented for other needed tasks, such as driver training, structural improvements to facilities, or information services. In its review of recipients' programs, UMTA will consider whether the milestones are realistic and provide for an appropriately phased build-up to the full performance level.

These milestones are very important, and recipients should think them out very carefully. The milestones in a recipient's program, once they are approved by UMTA, became the benchmarks against which the recipient's compliance is evaluated during the phase-in period. That is, the milestones to which a recipient commits itself during the phase-in period, like the full performance level subsequently, are the levels of performance that the recipient must meet to be considered in compliance.

The recipient has to include other information in its submission, along with the program itself. Much of the required information is listed in § 27.85. Other material that should be submitted, if applicable, concerns the continuing public participation mechanism, the criteria and procedure for

determining eligibility, and accessible bus system routing and scheduling.

Section 27.89 Public participation and coordination.

The requirements for this section apply only to those recipients which must submit a program, since the section mostly pertains to the public participation and coordination process involved with preparing and adopting a program. The requirements of this section are minimum requirements. Recipients may go beyond them (e.g., a comment period longer than 60 days).

Subparagraph (a)(1) requires recipients to consult, as early as possible in the planning process, with interested people and groups. The idea of early consultation is important. Handicapped persons and groups, transportation and social services agencies, state and local officials, and the Metropolitan Planning Organization (MPO) should be regarded as partners in the planning process from the outset, not simply as commenters upon a proposed program that is already fully developed by the recipient.

The recipient's consultation should deal with the entire spectrum of concerns involved in planning service for handicapped individuals. Subsection (a) (1) mentions specifically service needs, weaknesses or problems in present service or existing plans for service, and the types and characteristics of service to be provided under the recipient's program.

Some recipients may already have a public participation mechanism in place, such as an advisory committee. The recipient may use such an existing mechanism. However, the recipient should ensure that all relevant parties have the opportunity to be included in the consultation process, even if they have not regularly participated in the advisory committee. For example, a recipient may have an advisory committee with membership drawn from several, but not all, organizations concerned with disability issues in the area, but in which the MPO is not normally represented. The recipient could base its consultation required by this subparagraph on the advisory committee, being sure that members of the additional organizations of disabled persons, social service agencies, and the MPO also were consulted and had the opportunity to participate.

The last sentence of subparagraph (a)(1) provides that cost estimates, plans, working papers and other information pertaining to the recipient's program and service for handicapped persons must be made available to all interested individuals and groups. In order to participate constructively in the planning process, those parties with whom the recipient is working need to have access to the information available to and the thinking of members of the recipient's staff. Information relevant to service cannot be viewed as "classified" or withheld from interested persons. This requirement also applies to the continuing public participation process (e.g., relevant information must be provided to an advisory committee).

In the remainder of this section, there are several references to the recipient's "proposed program." A proposed program is a document that the recipient has developed through its planning process. It should reflect the view of the recipient concerning such key subjects as the type and characteristics of service, schedule for implementing the service, and the funding of the service. The proposed program should not be merely a general request for views or represent an immutable decision by the recipient on what it will provide. The proposal should be sufficiently thorough and detailed to permit commenters and speakers at the public hearing to make informed criticisms and suggestions for improving the recipient's plans.

Subparagraph (a)(2) requires the recipient to provide a public comment period of at least 60 days on the proposed program. During the 60-day comment period, subparagraph (a)(2) provides that the recipient shall hold at least one public hearing. Notice of the hearing must be provided at least 30 days before the date on which the hearing is scheduled. The recipient could, for example, in notifying the public of the comment period, set a date, at least 30 days later, for the hearing, thereby avoiding the necessity for a second notice.

All hearings must be held in an accessible facility, and, if it is reasonably anticipated that persons with vision or hearing impairments will participate in the hearing, the recipient must take appropriate steps to facilitate their participation. For example, the recipient would have to ensure that an interpreter for deaf persons, or an individual to help communicate information contained on charts, graphs, or other visual aids to blind persons, was present at the hearing. The recipient should also select a time and place for the hearing that maximizes convenience to handicapped persons.

The regulation does not require that the public hearing involved be dedicated solely to the recipient's proposed program. Adequate time should be provided to ensure that all interested parties who wish to participate in the hearing have the opportunity to do so. The recipient must ensure that participation concerning the recipient's proposed program is not deterred by such techniques as the placement of its discussion at the end of a lengthy and time-consuming agenda. The program need not be the only, but should be the primary, matter discussed at any hearing held to meet the requirements of this section.

Subparagraph (a)(4) provides that the recipient shall ensure that all notices and materials pertaining to the program, comment period, and public hearings are made available in a form that persons with vision and hearing impairments can use. This implies notice being given in print (i.e., notices, placards in buses, newspaper advertisements, etc.) and by oral means (e.g., radio spots). For written materials other than notices of the comment period and the hearing, such as program documents and supporting information, the recipient should ensure that there are means of assisting visually handicapped individuals in learning the contents of these materials. It should be emphasized that this does not mean the recipient's personnel necessarily have to be used for this purpose. The recipient could also work with local voluntary or social service organizations to ensure that this service is provided.

Paragraph (b) requires the recipient to coordinate the development of its program with the MPO as well as to submit the proposed program to the MPO for comment at the same time as it is submitted to the public. The MPO, and concerned state and local governments, are intended to work with the recipient throughout the planning and implementation of the program.

Paragraph (c) of this section is the so-called "accommodate or explain" requirement. It should be emphasized that this paragraph does not require a recipient to make a point-by-point response to every comment. Nor does it require a recipient to agree with or adopt any or all comments it has received. The recipient is required to respond to "significant" comments it receives. That is, the recipient should respond to comments raising important substantive issues about the proposed program. Nonsubstantive or trivial comments need not receive responses.

Recipients' responses to comments may be relatively brief, so long as they give cogent reasons for the recipient's decision not to adopt a particular comment, to make a change requested by a comment, or to respond to a concern expressed by a commenter in a way different from that a commenter suggested.

The recipient may respond to comments in a variety of ways, such as letters to commenters, a preamble to the final program submitted to UMTA and made available to the public, or a separate document made available to all interested commenters and other members of the public. This document or documents should make clear to the public and to UMTA which commenters (and/or categories of commenters, in the case of individuals) made certain comments and the reasons for the recipient's responses.

Paragraph (d) concerns continuing public participation. This paragraph is not, as such, a requirement for an advisory committee. The recipient, as part of its program, may decide upon a mechanism to assure continuing public participation other than an advisory committee. The adequacy of any such mechanism would, of course, be reviewed by UMTA as part of its review of the recipient's program submission.

In setting up its advisory committee or other mechanism, the recipient should ensure its mechanism is widely representative of groups, interests and points of view on its service. Sharing of all relevant information is extremely important. An advisory committee or other public participation mechanism is of little use—and is inconsistent with the intent of this regulation—if its members are kept in the dark and their recommendations are ignored.

However, the views of the advisory committee or other continuing public participation mechanism are not required to be more than advice or recommendations. The rule does not require that the recipient adopt the suggestions of the participants in the process, or that an advisory committee be given veto or "sign-off" authority. Recipients may provide for stronger or more extensive

roles for the participants in the continuing public participation process than the rule requires, however.

Paragraph (a) requires the recipient to follow the same public participation process for significant changes to its program as in the adoption of its initial program submitted to UMTA. The intent of this requirement is to ensure that interested persons and groups have the same opportunity to participate when the recipient makes significant changes in its program as when the initial program is put together. A re-run of the public participation process in this situation would not postpone the time at which the recipient is responsible for meeting the full performance level of § 27.95, however.

The Department intends this requirement to apply only to major alterations in the scope or direction of the recipient's program and service. It would apply, for example, if the recipient, having adopted, in its original program, a transit authority-operated paratransit system, decided to change to an accessible bus system. Even if the recipient was not changing the mode of delivering transit services to handicapped persons, the requirement could apply in the case of a major cutback or realignment of its existing service.

Recipients would not have to renew the public participation process in the case of fine tuning of or routine adjustments to service. (The recipient would have to consult through the continuing public participation mechanism on such changes, however.) If the recipient is in doubt about whether or not it should renew the public participation process of paragraph (a)–(c), the recipient should consult the UMTA Regional Office for guidance.

Section 27.85 Submission and review of program.

Paragraph (a) of this section directs all UMTA recipients who must create a program under § 27.81 to submit certain materials to the appropriate UMTA Regional Administrator for review and approval within 12 months of the effective date of this rule. Timely performance of this duty is a condition of compliance with the regulation.

Subparagraphs (a) [1] and [2] require the recipient to submit to UMTA copies of the comments on the recipient's program and the recipient's responses to these comments. The recipient could submit photocopies of the comment letters it received and the responses it sent back to commenters to whom the recipient replied by letter. The recipient could submit summaries of comments and responses. The recipient could send a copy of the transcript of the public hearing. The recipient could send summaries of the comments and its responses to them, including summaries of presentations at the public hearing. It is not intended that informal replies made by the recipient's officers and employees at a hearing would be sufficient to constitute replies to comments for purposes of the "accommodate or explain" requirement, however. Whatever way the information is provided, it should allow UMTA to learn the substance of the comments and the identity of the persons or groups making the comments.

The planning process should involve a thorough analysis of the alternatives for providing transportation services to handicapped persons. The supporting documentation for the program submission should clearly reflect this analysis of alternatives (see subparagraph (a)(3)). Given what appear to be potential significant cost and cost-effectiveness advantages for private-sector related alternatives like user-side subsidies and coordination of services, and consistent with UMTA policy statements on private sector participation and user-side subsidies, UMTA will pay particular attention to recipients' consideration of these alternatives.

In looking at the costs of alternatives, including the alternative recommended in the recipient's program, the recipient should document expected eligible costs, including recurring as well as one-time capital and operating costs. This consideration of costs should cover the phase-in period to the full performance level, as well as the projected cost of providing service at the full performance level.

Subparagraph (a)(3) also requires recipients to calculate their limit on required expenditures. These limits should be estimated for at least the phase-in period and the first year of service at the full performance level. Recipients requesting approval of programs providing service that does not fully meet the service criteria should also include information about the cost, and cost-effectiveness, of trade-offs that recipients propose to make in order to permit their costs to remain below the cost limits, as well as of alternative trade-offs that the recipients considered.

The Department emphasizes that the choice of the mode of service for handicapped persons is the recipient's. However, UMTA may question the planning process or its conclusions and, as part of its response to recipients' submissions, call for additional analytic work or a reconsideration of the recipient's recommendations.

Paragraph (b) sets a 120-day deadline for UMTA to complete review of recipients' programs. If UMTA fails to meet this deadline, it has the obligation to inform the recipient of an extension of the review period before the 120 days have passed. The written notice must state the reason for the extension. It will also include a reasonable estimate of the date on which UMTA will conclude review.

UMTA will carefully scrutinize the recipient's program to ensure that it provides for meeting the full performance level as soon as reasonably feasible, but within the 8-year maximum phase-in period in any event. (UMTA will have the final decision on the appropriate length of the phase-in period.) UMTA will also check the program to ensure that its milestones lead realistically toward the full performance level. UMTA will not approve a program that does not meet these tests.

When UMTA does complete review, paragraph (c) provides that it will send one of three responses to the recipient. First, UMTA can tell the recipient that its program is approved as submitted. In this case, the program may go into effect at once, and the program's schedule for the implementation of service begins to run on the date of UMTA's approval notice. Second, UMTA can specify certain changes that need to be made in the program before it can be approved. Such a response can require both substantive changes (e.g., a change in the time, place, or manner of providing service) and procedural changes (e.g., additional public participation or recipient response to comments if UMTA concludes that procedures had not been fully adequate). UMTA can also require the recipient to revise its analysis or conduct additional analytic work.

The phase-in period would begin at the time of the original UMTA decision not to approve the program as submitted. It would not be appropriate to permit the time necessary for the recipient to fix program deficiencies to delay the implementation of full service to disabled persons. Finally, if it appears to UMTA that the program is so seriously deficient that the recipient needs to completely rework it, or it has been submitted in bad faith, UMTA may disapprove the program. UMTA has the discretion to begin enforcement action under Subpart F at this point.

If the program is not approved as submitted, UMTA's notice will give the recipient a certain amount of time—between 30 and 90 days—to make necessary changes and resubmit it. Like failure to submit a program on time in the first place, failure to resubmit a modified program in the time required by UMTA subjects the recipient to being found in noncompliance with this rule. The time and notice provisions of paragraphs (c) and (d) apply to resubmissions just as they apply to initial submissions.

However, UMTA is not obligated to "bounce" deficient programs back to recipients indefinitely. UMTA may disapprove an original or a resubmitted program, conclude that the recipient is in noncompliance, and begin enforcement proceedings.

Section 27.87 Provision of service.

Recipients have the obligation to actually provide the service to disabled persons that their programs promise. Paragraph (a) of this section makes the general statement that each recipient shall, at all times, provide the service described in its program. The "at all times" language is intended to ensure the continuity of service. For example, a recipient could not, consistent with the requirements of this section, provide service meeting all the requirements of this regulation and its program for the first 2½ weeks of a given month and then provide no service for the remainder of the month. Nor could the recipient provide the service for only 8 months out of the year. The service, moreover, must be provided to all eligible persons. It would not be consistent with this requirement for the recipient to provide service to some eligible persons but not to others.

Paragraph (b) sets out in greater detail some of the specific obligations that compliance with the general service provision requirement of paragraph (a) entails. The first of these is ensuring that

BEST COPY AVAILABLE

vehicles and equipment are capable of being used by the users to which the service is directed, and are maintained in proper operating condition.

The recipient must ensure that all vehicles the recipient operates or relies upon to meet its obligations under this Subpart are consistently maintained so that the vehicles can get to where they need to go in order to provide service. The recipient must also ensure that lifts and other specialized equipment needed to make vehicles useable by handicapped persons work consistently so that handicapped persons can actually use the vehicles.

This paragraph also requires that the vehicles and equipment used by the recipient be capable of accommodating all users for which the service is designed. For example, a recipient which chose to comply with the rule by making its bus fleet accessible would have to ensure that the lifts, securement devices, etc. on its buses could accommodate all types of wheelchairs in common use. A lift which accommodates manual wheelchairs, but fails to accommodate common models of electric wheelchairs (including, for example, the increasingly popular three-wheel designs) does not make the buses accessible. Providing only such limited-use lifts is inconsistent with this section. (Of course, if a special services component of a mixed system transported persons whose wheelchairs could not use the lifts to all destinations in the service area, and otherwise met the service criteria, the limitation on the use of the lifts would be permissible.)

UMTA will not mandate a particular spare ratio; the recipient's obligation, however, is to ensure that it has sufficient numbers of vehicles in operating condition in reserve, so that if "front line" vehicles must be taken off the road for maintenance or repair, there will be no interruption or decrease in service to handicapped individuals.

The attitudes and skills of providers' personnel are one of the most significant factors in determining whether service for handicapped persons will be good or inadequate. The recipient must ensure that all personnel who may deal with handicapped individuals (whether as drivers or as administrative personnel) know, as necessary, how to operate lifts and other equipment properly, know how to recognize and deal with the different kinds of disabling conditions that the users may have, and deal with handicapped individuals respectfully and courteously. It is the responsibility of the recipient to make sure that this training does take place, and that handicapped users of the service are not treated poorly as the result of inadequate training.

In order to use a transportation system, any individual needs adequate information concerning that service. This is particularly true of handicapped individuals. This provision requires recipients operating scheduled accessible bus systems to provide information on schedules and in other sources of information concerning which bus runs are accessible. It is clear that, unless a potential user knows which bus on which route will be accessible, the user will be unable to take advantage of the service. A recipient need do nothing elaborate to comply with this requirement. For example, an asterisk or other symbol next to accessible bus runs on printed schedules would be adequate in most cases. If the recipient has a telephone information service for the public concerning routes and schedules, that service should provide the same information, and do so in a way useful to hearing-impaired persons (e.g., via a telecommunications device for deaf persons).

In addition to making sure that information and communications links are established, the recipient must also make sure that the communications links have sufficient capacity to accommodate the demand for their use. A paratransit system requiring phone-in reservations that has only one telephone, which is chronically busy, probably cannot provide the kind of service that the recipient's program calls for.

Paragraph (c) of this section is intended to make explicit that the regulation does not permit recipients to engage in disparate treatment, to the disadvantage of handicapped persons, with respect to transportation on the recipient's regular mass transit system. Even though the recipient may also provide special services for handicapped individuals, if a handicapped person is capable of using the recipient's regular service for the general public, then the transit operator cannot deny the service to the handicapped person on the ground of handicap. This means, for example, that a recipient must permit a person using means of assistance such as dog guides or crutches to use its vehicles and services for the general public, if the person can do so. This requirement and the nondiscrimination requirement of Subpart A would also bar actions by recipients that impose unreasonably different or separate treatment for handicapped persons (e.g., an unjustified requirement that a handicapped person, who is able to travel independently, travel with an attendant).

Because this regulation permits a phase-in period between the approval by UMTA of the recipient's program and the achievement by the recipient of the full performance level, paragraph (d) is intended to ensure that there will not be a gap in the provision of any service to handicapped persons by the recipient. In reviewing and approving programs, UMTA will, of course, seek to ensure that the recipient's service to meet the requirements of this Subpart is phased in at a reasonable pace so as to provide for a steady increase in the amount and quality of service provided up to the full performance level. If the recipient is phasing out its former type of service, and phasing in a new type of service, the exact point at which the new service has been phased in, such that the old service can be phased out, will be left to the recipient's judgment, subject to UMTA oversight.

Section 27.89 Monitoring.

Under section 9 of the UMT Act (49 U.S.C. 1607a (g)(2)), UMTA is required, every three years, to review and evaluate the entire spectrum of each recipient's federally-assisted mass transit activities. These triennial reviews will be held on a schedule to be determined by the UMTA Administrator; in all likelihood, they will be held in a staggered basis, so that approximately a third of all recipients are reviewed each year.

Paragraph (a) of this section declares that the review and evaluation of recipients' activities under this regulation will be conducted at the same time as the section 9 review and evaluation. The review and evaluation of transportation services for handicapped persons will be performed by, or at the direction of, UMTA personnel. UMTA may issue further guidance to recipients concerning the recipient's responsibilities in this process. This guidance may include, either on a general or a recipient-specific basis, requests for information necessary to assist the UMTA personnel in the review.

Some recipients will receive their first review and evaluation of performance under this regulation in the second year that their program has been in effect. Others will not receive their review and evaluation until sometime during the third or fourth year after their program has been reviewed and approved. Each recipient will, however, receive subsequent reviews and evaluations every three years after their first review occurs.

Paragraph (b) of this section concerns what is likely to be a very small group of recipients: recipients who are required to submit a program under § 27.81 of this regulation but who, for some reason, do not receive section 9 funds or otherwise are not required to go through a section 9 review and evaluation every three years. Some small recipients, for example, could fall into this category. For recipients in this category, UMTA will conduct a triennial review and evaluation of performance under this regulation just as if such a review were in conjunction with the section 9 review process.

Paragraph (c) of this section concerns what might be called a "slippage report." In its program, each recipient is required to establish a schedule for phasing in its service for handicapped persons until it reaches the full performance level. If recipients fall behind this schedule, paragraph (c) requires them to submit a report to UMTA no later than the program approval anniversary date of any year in which such slippage occurs. The report must detail the kind and degree of slippage that occurred, explain the reason for the problem, and set forth the corrective action that the recipient has taken or is taking to correct the problem and bring its entire program back on schedule. This same reporting requirement applies in any year, after achievement of the full performance level, in which the recipient's service, for any reason, falls below the full performance level.

This reporting requirement is a condition of compliance with the regulation. Failure to make the required report to UMTA is, in itself, a ground for a recipient being found in noncompliance with its obligations under the rule and being subject to sanctions under Subpart F.

Section 27.91 Requirements for small recipients.

This section sets forth a separate set of requirements that apply to section 18 recipients and other recipients (regardless of what UMTA funds they receive) which provide service to the general public only in non-urbanized areas (i.e., areas of 50,000 population or less). As with the requirements for recipients in urbanized areas, these requirements apply only to recipients that provide service to the general public. This section does not apply to section 16(b)(2) recipients or other recipients providing service only to elderly and/or handicapped persons. Recipients covered by this section are not required to follow the requirements of the rest of this Subpart, except for § 27.87, "Provision of Service."

For purposes of this section, the term "recipient" should be understood to refer to the local government agencies and other organizations actually providing transportation service in nonurbanized areas. We are aware that, in the section 18 program, a state agency is the initial recipient of UMTA funds, which the state then passes through to subrecipient service providers. However, the requirements of this section are not intended to apply to the state agencies involved.

Paragraph (b) requires all recipients covered by this section to certify, within a year of the effective date of this Subpart, that they are in compliance with this rule. If a certification of the kind required by this subsection has already been provided by the recipient under the July 1981, interim final rule, and is still in effect, a new certification need not be provided. This should be the case for present section 18 recipients. Otherwise, the certification must be provided within 12 months of the effective date of the Subpart.

The effect of this requirement is that recipients have service in place within the 12-month period following the effective date of this Subpart. Given the relatively small scale of operations by recipients in this category, the 12-month period should be sufficient. This constitutes the "reasonable time" mentioned in the regulation. A similar amount of time would be permitted future new recipients.

The substance of the transportation service that recipients are required to provide in order to be able to make this certification is similar to that required for section 18 recipients under the July 1981 interim final rule. Special efforts must be made to provide transportation that those handicapped persons unable to use the recipient's service for the general public can use. It should be noted that these efforts do not have to be made by the recipient itself; the certification goes to the presence of the "special efforts" service in the service area, not to whom is providing it.

The service provided by recipients must be "reasonable in comparison to the service provided to the general public." This statement embodies a minimum service criterion for the recipient's service to handicapped persons. It requires that the characteristics of service made available to handicapped persons be reasonably comparable to the characteristics of service for the general public. UMTA's monitoring of recipients' service will focus, on a case-by-case basis, on recipients' compliance with this criterion.

The second minimum service criterion requires that the service must meet a "significant fraction of the actual transportation needs" of handicapped persons. While the criterion stops short of requiring that all transportation needs of handicapped persons or all demand for service must be met, it does require that substantially more than a token effort be made to meet that demand. Rural and small urban systems are seldom designed to meet all transportation needs of the people of the service area. In monitoring recipients' service, however, UMTA will review whether the service proportionately meets the needs of handicapped as well as non-handicapped members of the community.

Paragraph (c) follows the statutory language of section 317(c) by directing recipients to ensure that handicapped persons and groups representing them have adequate notice of and the opportunity to comment on the present and proposed activities of recipients for achieving compliance with the requirements of this regulation. This notice and comment process may take place at any time within the first nine months after the effective date of this Subpart, but must precede the submission of any of the required certifications or reports.

This requirement applies to all recipients covered by this section, including present section 18 recipients who already have made the appropriate certificate of compliance. In the case of a present section 18 recipient or other provider of existing service, the purpose of the notice and comment period would be to identify problems in and suggest improvements to the existing service.

The same public participation requirement also applies whenever the recipient proposes significant changes in its service. The participation must occur before the change is finally decided upon and implemented.

Paragraph (d) requires each section 18 recipient to provide a one-time status report on its service. This requirement applies to all recipients covered by this section, including present section 18 recipients who have already made the certification of compliance. The report is intended to be a short summary of information concerning the four listed items.

In order to permit UMTA to continue monitoring the recipient's activities, each recipient is required, under paragraph (e), to provide a similar update report at three-year intervals. UMTA will establish a schedule for the transmission of these reports: some recipients will provide their first such report after the second year this Subpart has been in effect; others will not have to do so until after the third or fourth year. Reports under this section normally go to the designated state transportation agency (paragraph (f)). UMTA will review their reports in conjunction with its normal oversight of the section 18 program.

Section 27.93 Multi-recipient areas.

Paragraph (a) provides that this section applies to recipients in any multi-recipient area. A multi-recipient area is an urbanized area that includes two or more recipients required to prepare a program under § 27.81. The purpose of the section is to provide recipients in such an area the opportunity to combine their resources to provide service for handicapped persons on a regional basis.

This section is not mandatory. Recipients are not required to join a compact and provide service in conjunction with other recipients in their area, and recipients are free to comply with regulatory requirements on an individual basis.

In most cases, all recipients in the urbanized area required to prepare a program would have to be members of the compact in order for the compact to be workable. There could be cases in which a compact with less-than-unanimous membership could be viable, however; recipients should work with their UMTA regional office to ensure that any compact which is formed would be capable of providing service meeting the requirements of this rule. Recipients outside the urbanized area, or recipients who do not have to prepare a program, may also be members of a compact.

The compact must establish a cooperative mechanism among all its signatories to ensure the provision of combined and/or coordinated service meeting all regulatory requirements. Such a mechanism could take many forms, and this section does not attempt to prescribe the institutional form the arrangement would take.

In any multi-recipient or multi-jurisdictional agreement, a key question concerns where the money is coming from. The compact must answer this question. It must provide for how the costs of service for handicapped persons in the area would be apportioned among the members of the compact, ensure the provision of adequate funding, and include reasonable decision and dispute-resolution mechanisms concerning funding and service matters. The compact must be a formal, binding, written document, signed by each participating recipient. An informal understanding among recipients in an area is not sufficient for purposes of this section.

The recipients in an urbanized area have six months following the effective date of this Subpart to form a compact and submit their agreement to UMTA. If the recipients fail to reach agreement and do not submit a compact within the six-month period, then each recipient must comply with regulatory requirements (including the 12-month deadline for program submittal) on its own. This means that recipients should not, while negotiating about forming a compact, neglect the early stages of planning service of their own.

If a compact meeting the standards of this section is submitted to UMTA in a timely fashion, then the members of the compact are treated by UMTA as if they were a single recipient for all purposes under this Subpart, including planning, public participation, service provision, calculation of the limit on required expenditures, monitoring, and compliance and enforcement. It is important for recipients to understand that one of the consequences of joining a compact is that the members of the compact may be treated by

UMTA as collectively responsible for the failure of the compact to provide the service required by the regulation and called for by the compact's approved program.

After UMTA acknowledges the compact within 30 days of its receipt, the members of the compact would submit to UMTA a single combined program for approval under § 27.85. The program submitted on behalf of the compact's members would have to reach UMTA 12 months after the date the signed compact was acknowledged by UMTA, rather than 12 months after the effective date of this regulation. This provision is intended to permit adequate time for planning on an areawide basis.

If, subsequent to the six-month period, recipients that did not originally form a compact decided to do so, UMTA has the discretion to acknowledge it. However, in such a case, the compact members would have to submit, for UMTA's review and approval, a new, joint program for providing service to handicapped persons. This program would need to provide adequate information on how the transition from individual compliance to joint compliance with the rule would work. The individual programs that had been previously approved, and the service provided according to them, would remain in effect until the new combined program was approved.

By the same token, if an existing compact dissolves, the members would then have to submit individual programs to UMTA for approval. The same would hold true for a member that pulled out of a compact. If a recipient were to drop out of a compact, it would be required to continue to provide its services per the compact agreement until its own, new, independent program were approved and in operation.

Section 27.95 Full performance level.

(a) Timing. Under section 27.85, recipients have a year from the effective date of the new Subpart E to submit their program to UMTA. UMTA has 120 days to review it. Assuming UMTA acts on the program within that time (approval, disapproval, or remand to the recipient to fix deficiencies), the phase-in period would begin to run no later than 16 months from the effective date of the rule.

During this period, recipients are obligated to phase in their service. This is not intended to be a period of delay and inaction; the recipient is obligated to implement service according to the milestones set forth in its program on time (see discussion of § 27.81).

The phase-in period may run for a maximum of six years. Many recipients (e.g., those who are starting a new system or switching to a different mode of providing service) might need all or nearly all of the six-year period. On the other hand, some recipients have systems that may come close to meeting the full performance level at the present time. It would be contrary to the intent of the rule, for example, to permit a recipient that had 90 percent of the buses it needed to meet the service criteria for an accessible bus system to take six years to acquire the other ten percent.

The rule provides that the recipient's plan and milestones must provide for attaining the full performance level as soon as reasonably feasible. UMTA, in reviewing plans, will approve phase-in periods for each transit authority on a case-by-case basis, reflecting this policy as well as the realistic needs of each recipient for time to phase-in its service, up to the six-year maximum.

This paragraph notes that a recipient can comply by meeting the requirements of either paragraph (b), or (c), or (d). This language is intended to emphasize that the recipient may decide to operate either a special service system, an accessible bus system (of either type), or a mixed system. A recipient, for example, is not required to have both an accessible bus system and a special service system. The decision on which service option to implement is intended to be made by the local recipient.

The remainder of this section lists the service criteria applicable to special service, accessible bus, and mixed systems. The Department has established six service criteria that apply to all the modes of service to handicapped persons. These concern eligibility, hours and days of service, service area, fares, restrictions and priorities based on trip purpose, and response time. Paragraphs (b), (c), and (d) explain how these six basic criteria apply, specifically, to each mode of service. Though the criteria are essentially the same, the detail of their application to the various modes of service vary somewhat in order to make sense in view of the differing characteristics of the different types of transportation.

(b) Service criteria for special service systems. The following criteria apply no matter what type of special service the recipient provides (e.g., transit authority-operated paratransit, user-side subsidy).

(1) Eligibility. The eligibility criterion provides that the recipient must treat as eligible any individual who, at the time he or she would receive service is, by reason of a disability, physically unable to use the recipient's bus service for the general public. A recipient may, of course, voluntarily provide service to other persons as well, such as non-disabled elderly persons or mentally handicapped individuals. However, the cost of providing this service to additional users is not an eligible expense under § 27.99.

This provision is not intended to permit recipients to turn away from their special service systems users who would be unable to use an accessible bus system for reasons unrelated to the system's accessibility. For example, physical or terrain barriers, bad weather, or distance may prevent some handicapped persons from getting to a bus stop. These persons are still required to be treated as eligible for special service, because they could board and use fully accessible buses if they were able to get to a bus stop.

The Department recognizes that persons with cognitive disabilities also have a need for transportation. Many such persons, would be able to use the regular system with appropriate training, and the Department encourages the development and implementation of such training programs to increase the transportation opportunities for mentally handicapped persons. It is also necessary that training be provided for the drivers so that they will better understand, be patient with, and appropriately respond to questions from mentally retarded persons.

The rule does not specify the means a recipient may use to determine physical inability to use the regular bus system, although reasonable "functional criteria" may be used. The means the recipient would use to determine physical inability to use the regular bus system would be incorporated in the program submitted for UMTA approval.

The Department does not intend to require recipients to use age, by itself, as a basis for determining that an individual is physically unable to use the regular bus system. No one need be presumed to be physically unable to use the regular bus system just because he or she has reached a certain birthday. Many elerly persons may suffer mobility impairments or other handicaps that physically prevent them from using the regular bus system, but it is these disabilities, not age itself, that determines eligibility.

The key is whether or not a particular elderly person can physically use the service for the general public. Some 80 year old individuals may be able to physically use the service for the general public, and some 65 year old individuals may be unable to do so. If, because of age, an individual is physically unable to use the regular service—even if that individual does not have a specific medical condition—that individual is eligible for the special service.

A similar analysis applies to young children. If, because the recipient has a reasonable, nondiscriminatory policy against permitting very young children to ride buses unaccompanied, or because such children cannot read destination signs, such individuals cannot use the bus system, these facts do not make them eligible to use the special service. This is because their youth, rather than a handicap, caused their inability to use the regular bus system (which is not, in any event, a physical inability).

It would not be consistent with this rule, however, for a recipient to deny a non-disabled child the opportunity to accompany a disabled parent or other adult on the special service system. This could be very important, for example, in allowing the parent to take the child to a medical appointment. The converse is also true. A non-disabled parent or other adult would have to be given the opportunity to travel with a disabled child.

The rule does not prescribe any particular procedures that recipients must use to determine eligibility. Existing systems use such means as letters from a doctor, certifications by social service organizations, and eligibility determinations (e.g., concerning meeting functional criteria) by the transit provider itself. Whatever procedure is used, the recipient needs to ensure that the procedure is prompt, avoids unnecessary procedural obstacles, does not impose more than nominal costs on potential users, and is consistent with the dignity of handicapped persons applying for eligibility. The eligibility procedure should be spelled out in the recipient's program.

Section 27.97 provides that recipients must meet this eligibility criterion in all cases, regardless of whether the recipient can meet

all service criteria without exceeding the limit on required expenditures. In other words, the eligibility requirement of this rule is not subject to "tradeoff" in order to reduce recipient expenditures below the cost limit.

The Department intends that all users eligible under the Department's standard be permitted to use a recipient's special service, regardless of the user's place of residence. A visiting wheelchair user from City A is just as eligible, under the terms of this section and § 27.87, as a wheelchair user from City B to use the latter city's special service system. Recipients may need to waive or abbreviate the certification procedures they use for their regular local riders. The same point applies to persons with temporary, as opposed to permanent, disabilities.

(2) Response time. By response time, we mean the total period from the time the disabled person calls the special service provider to request service to the time the service is actually provided to the handicapped person (i.e., pickup). Recipients are obligated to provide, as well as schedule, service, within the required period. (see also § 27.87(b)(5), concerning timely provision of service).

We do not intend, however, to view recipients as being in noncompliance solely because of an occasional late pickup. Repeated, chronic failure to provide service within 24 hours of a request, however, is inconsistent with this criterion and with the recipient's obligations under this criterion.

The Department intends that this criterion be administered with reasonable administrative flexibility, for the benefit of both users and providers. For example, it may not be reasonable for a recipient to insist that a user call the recipient at 7:30 a.m. on Monday in order to get service at 7:30 a.m. Tuesday, even though this insistence would be literally consistent with the 24-hour response time criterion. A call at any point on Monday morning should usually be sufficient to permit the recipient to do the advance planning necessary for its morning trips on Tuesday.

Likewise, a recipient with no weekend bus service might not provide special service on weekends. Literally interpreted, the 24-hour criterion would force the recipient to open its call-in reservation office on Sunday to take reservations for Monday trips. The Department intends, in such a situation, that the recipient be able to keep its office closed on the weekend, taking reservations for Monday on the previous Friday.

The Department, then, interprets the 24-hour criterion to mean "a reasonable time on the previous business day" in many cases. In addition, this criterion is not intended to prohibit advance sign-up requirements for special-purpose trips (e.g., for a group field trip). Nor is it intended to prohibit a recipient from allowing a user to make a reservation for more than a day in advance (e.g., from calling on Monday to reserve a trip for Thursday).

(3) Restrictions or priorities based on trip purpose. This criterion is intended to prohibit recipients from determining that they will not provide service for certain sorts of trips, which they have determined to be of relatively low importance, or from providing trips for such purposes only after requests for the trips they deem to be of higher importance have been fulfilled. This criterion, however, is not intended to preclude recipients from establishing subscription services. Trips on the subscription service may be limited to certain purposes (e.g., recurring work or medical trips). However, a recipient which operates a subscription service may not deny or delay transportation to other individuals, for other purposes, on the ground that all capacity is exhausted by subscription service and still meet this criterion.

If a recipient cannot provide service that fully meets the criteria without exceeding its limit on required expenditures, it may make tradeoffs concerning trip purpose restrictions or priorities. For example, if after serving subscription work trips and medical trips, the recipient does not have enough other capacity to serve persons wishing trips for other purposes during peak hours, the recipient could "time-shift" the trips for other purposes to non-peak hours. The "time-shifted" trips would still be served during the requested day, at a non-peak time convenient for the user.

(4) Fares. The fare charged for a trip to a user of the special service is required to be comparable to a trip of similar length, at a similar time of day, on the recipient's bus system. We recognize that, in most cases, a trip taken on special service will not be identical, in route or in length, to similar trip taken on the regular bus system. We recognize also that the cost and convenience characteristics of special service systems differ from those of bus systems.

The key to determining an appropriate fare for the special service trip would be to calculate the cost of a similar trip on the regular bus system that the individual would take to get from his origin to his destination, if he or she were not handicapped, including the cost of transfers, if any (or zone change charges, express bus fares, etc.). Should there not be any reasonably equivalent trip that a user of the bus system could take, then the bus fare used for purposes of comparison would be derived by comparing the special service trip taken by the handicapped person to a bus trip of similar length elsewhere in the recipient's bus system.

Determining "comparability" between the bus fare for a similar trip and the special service fare is not an exact science. Decisions must be made on a case-by-case basis, taking into account such factors as the relative costs of providing the service, the time and convenience factors affecting users, and the Department's policy against pricing service out of the reach of users. It is likely, for example, that a $1.50 fare for special service would not be out of line, compared to a basic 50 cent fare for a similar bus trip, in most cases. At the other end of the scale, charging a special services user $20 for the same trip would be far removed from "comparability," because it would be grossly disproportionate to the bus fare and would deter disabled persons from using the service.

In doubtful cases falling in the middle of the scale, recipients should consult with UMTA. Fare levels for special service are, of course, one of the items that recipients should cover in their program submissions. While determinations are case-by-case, it is likely that UMTA would question fare levels that rose above two or three times the bus fare for a similar trip at a similar time of day.

This criterion deals with the fare charged the individual disabled user of the special service. If the bus fare between Point A and Point B is 80 cents, then the recipient can charge a special service user no more than a comparable fare for a similar bus trip. However, this requirement is not intended to preclude the common arrangements between recipients and social service agencies in which the social service agency subsidizes a considerable portion of the cost of a trip. The amount of such a subsidy is a matter between the recipient and the agency.

(5) Hours and days of service. If a recipient operates its bus service from 6:00 a.m. to midnight, seven days a week, then special service (e.g., paratransit or user-side subsidy) must be available throughout at least the hours 6:00 a.m. to midnight, seven days a week. By saying "throughout" this period, the Department intends that service be available at any time during these hours. Providing service only during peak hours, or only from 6–7 a.m. and 10–11 p.m. would not be consistent with this requirement.

This criterion is subject to "tradeoff" in a situation in which a recipient cannot meet all applicable service criteria without exceeding its limit on required expenditures. For example, a tradeoff (affecting the service area as well as the hours of service standard) might involve providing service to an area smaller than the urbanized area late at night and on Sundays, even though the regular bus system was operating at those times.

(6) Service area. A recipient must provide special service "throughout" the "circumferential" service area in which it provides regular bus service. This means that the recipient must provide this service not just along transportation corridors served by buses, but to all points of origin and destination within this area. (This is not intended to literally require door-to-door service, however. As long as the service is from the building or other location of origin to the building or other destination location, the criterion would be satisfied. Actually assisting a handicapped person from the door to the curb, for example, is not required.) A "many-to-few" system, with limited origins or destinations within the urbanized area, would not be consistent with the requirement to provide service "throughout" the area.

The recipient could determine the extent of the "circumferential" service area in a number of ways. As the term implies, the recipient could simply draw on a map a circle encompassing the area in which all its regular bus routes operate. Alternatively, a recipient could take the outer termination points of its routes and "connect the dots," resulting in boundaries for the service area that more precisely follow the contours of the actual bus service area. Where the normal service is within the urbanized area, the Department would also have no objection, in many cases, to a recipient using the urbanized area as a service area for this purpose. Particularly for a recipient that already provided bus service

to most parts of the suburban area, this approach could be administratively simpler.

In determining the extent of its service area, the recipient need not encompass extended commuter or express bus routes. For example, many recipients may have a city/suburban service area that is served regularly during peak and non-peak hours. In addition, the recipient may have peak-hour express commuter service to more distant exurban points. These commuter bus "spokes" do not extend the circumferential "hub" area that the recipient must serve with origin-to-destination special service.

For service (e.g., commuter bus) extending outside the basic service area, the recipient is required to provide service to handicapped persons only to and from the same points (e.g., bus stops) served by its buses for the general public. This service could be by special service following the bus route or accessible commuter bus, and would have to run only at the times when the commuter buses operated. Service to other origins and destinations outside the basic service area is not required.

The circumferential service area need not necessarily be the same at all times of the day or week. For example, some recipients might not offer any late-night or weekend bus service on many routes outside the central city. The service area for special service could shrink proportionately at these times.

The service area criterion is subject to "tradeoff" in the event that the recipient could not meet all applicable service criteria without exceeding its limit on required expenditures. As part of a tradeoff, a many-to-few system, a fixed route-deviation system, or another variation on special service that did not serve all origins or destinations could be employed.

(c) *Service criteria for accessible bus systems.* The final rule does not contain any specific requirement for the number of accessible buses a recipient must own and operate. Rather, subparagraph (1) of this paragraph says that the recipient must operate, on the street, enough buses to ensure that it meets the service criteria of subparagraphs (2) and/or (3).

To operate the number of buses on the street, recipients will need to consider the number of accessible buses they need in their reserve fleets. It is clear that in order to maintain the appropriate number of accessible buses on the street, a recipient will need to have some accessible buses in reserve in order to cover maintenance down time and other contingencies. A recipient would not comply with this subparagraph (or with § 27.89) if it owned sufficient accessible buses to meet the service criteria when all was operating, but, for lack of reserve accessible buses, was unable to keep enough buses actually on the street to meet the criteria at all times.

Subparagraph (2) sets forth the other service criteria for scheduled accessible bus systems. A scheduled accessible bus system is simply one in which accessible buses are scheduled to be used for (and are used for) certain runs on certain routes. This use must be regular and consistent.

Subparagraph (2)(i) requires the scheduled accessible bus service to be available throughout the same days and hours as the recipient's bus service for the general public. For example, if a recipient's regular bus service runs from 6 a.m. to 12 midnight, then the scheduled accessible bus service must be available throughout this 18-hour period. Running accessible buses only during peak hours, or having only the first and last bus runs on a route accessible, would not be consistent with this criterion.

The scheduled accessible bus service running throughout this 18-hour period would have to be provided at reasonable intervals that make readily practicable the use of the service by handicapped persons. The regulation does not establish a specific requirement for what these intervals must be. The recipient's judgment about appropriate intervals, which should be informed by the rule's public participation and planning process and which is subject to UMTA review as part of the recipient's program submission, may vary according to such factors as demand for accessible service on a particular route and the time of day.

Every interval on every route in the system need not be the same. But intervals so wide or irregular as to provide merely token or perfunctory service, or which are significantly inconsistent with demand for accessible service, would not comply with this criterion.

Subparagraph (2)(ii) requires accessible bus service to be provided on all routes throughout the recipient's service area on which a need for service has been established through the rule's planning and public participation process. By saying "throughout the service area," this provision is not limited to service within the basic circumferential service area. Any route on which the recipient provides regular bus service (including extended commuter routes and express bus service) is potentially required to have accessible service.

Whether the potential requirement for accessible service on a given route becomes actual depends on whether the planning and public participation process shows that a need exists for accessible service on that route. The Department intends that a need for accessible service on a route be regarded as having been established when it is shown that one or more handicapped persons are likely to make reasonably regular use of bus service along some part of the route.

For example, bus routes serving centers for independent living, important transportation terminals, major medical facilities, universities, major employment centers, and other origins and destinations that are likely to generate trips by handicapped persons would probably need to have accessible service. However, a need for accessible service could also arise on a suburban route because one or more handicapped persons wished to use that route for trips to work, shopping, or other purposes on a reasonably regular basis.

The Department believes that it would be desirable for recipients choosing a scheduled accessible bus system to make some provision for providing services to disabled persons whose origin or destination is not on an accessible route. The form of such service is up to the recipient, however.

As with service intervals, the routes served by accessible bus service may change over time, as new service needs arise and former service needs disappear. Changes in the route structure of accessible service are also appropriate subjects for consultation through the continuing public participation process.

Subparagraph (2)(iii) provides that the fare for a handicapped person using the accessible bus system cannot be higher than the bus fare paid by other passengers. Everyone who gets on the bus to go from Point A to Point B pays the same fare, except that the elderly and handicapped half-fare program of 49 CFR § 609.23 continues to apply in the accessible bus context.

Subparagraph (3) contains service criteria for on-call bus service. An on-call accessible bus system is one in which accessible buses are not regularly scheduled on any particular routes or runs. Instead, handicapped persons wanting to use accessible buses call the transit provider and arrange for an accessible bus to come by a particular bus stop on a given route at a certain time.

Some of the criteria for on-call accessible bus service are virtually identical to the special service criteria. The eligibility (subparagraph (3)(i)), response time (subparagraph (3)(ii)), and the restrictions and priorities based on trip purpose criterion (subparagraph (3)(iii)) are in this category. The fares criterion (subparagraph (3)(iv)) is identical to the fares criterion for scheduled accessible bus service.

Subparagraph (3)(v) concerns days and hours of service. Like its counterpart in the scheduled accessible bus service context, it requires service to be provided throughout the same days and hours as the recipient's bus service for the general public. This means that a handicapped person can request that any bus run the recipient makes, during any time the run is made for the general public, be made with an accessible bus. The recipient is obligated to fulfill the request. There is no provision concerning the intervals at which service is to be provided. Service is provided in response to all requests made for it.

The service area criterion (subparagraph (3)(vii)) requires accessible service to be provided on all the recipient's routes, on request. This means that when the recipient receives a request from a handicapped person for accessible service, the recipient must fulfill this request regardless of the route on which the service is requested (including extended commuter routes and express bus runs).

There is, however, no reference to establishing the need for bus service on particular routes through the planning process. This is because, in an on-call accessible bus system, need for service is established by each individual request for it, rather than on a generic basis for scheduled service on a route.

This subparagraph also specifies that "all buses needed to complete the handicapped person's trip" have to be provided. For example, suppose a handicapped person has to take a bus on route A to a given stop, and then transfer to a route B bus, in order to reach his or her destination. The recipient

must ensure that the B bus, as well as the A bus, is provided at the appropriate time.

A recipient may comply with the rule by setting up an accessible bus system incorporating elements of both scheduled and on-call accessible service. For example, the recipient could operate scheduled accessible bus service during peak hours while using on-call service during off-peak hours. A recipient could operate scheduled service on certain heavily-used corridors while using on-call service elsehwhere. The scheduled and on-call components of the service would each have to meet the service criteria for the respective types of service, and there could not be "gaps" in the overall service that left some routes, times, etc. unserved for handicapped persons.

For purposes of this rule, an accessible bus is one of that a handicapped person, including a wheelchair user, can enter and use. Currently, an accessible bus usually means a bus equipped with a lift. The Department does not intend to mandate the use of a particular piece of technology, however. If a device or bus design other than a lift-equipped standard transit bus can produce the same or better results for handicapped persons than present technology, then the Department will be willing to consider regarding it as meeting the accessible bus requirement.

(d) Service criteria for mixed systems. A mixed system is simply one in which some parts of the service area, or some days or times of day, are served by an accessible bus system, and others are served by a special service system. The key thing to remember about a mixed system is that each component must meet all criteria pertaining to that component. The overall system cannot have "gaps" that leave some areas, times, etc., unserved by service for handicapped persons.

In a mixed system, the special service and accessible bus components are not required to duplicate each other's efforts. Consequently, the special service system would not have to provide parallel service along accessible bus corridors. For example, the special service system would not have to honor a request from a handicapped person to be picked up at his home, situated reasonably close to a bus stop on an accessible corridor, and be transported to a destination served by a bus route using that stop.

The recipient might also reduce the scope of the special service it had to provide by linking the ends of or other strategic points on accessible routes with an accessible shuttle service, so that someone wanting to travel from a point along Route A to a destination at the end of Route B could complete his trip using only accessible buses and the shuttle. Except where it would duplicate accessible bus service, however, the recipient's special service would have to meet all service criteria applicable to any special service system (e.g., the special service system would have to pick up the same handicapped person from his or her home if he or she were going to a location not on the nearby accessible route or one accessibly connected with it).

The recipient is responsible for coordinating the components of its mixed system so as to minimize inconvenience to handicapped users. This coordination should include consideration of transfers between components. The coordination of mixed system components is one of the features UMTA will evaluate as it reviews the program submissions of recipients planning mixed systems.

(e) Services of other providers and through other modes. Paragraph (e) states the principle, for all service modes, that a recipient may count the services of other providers toward meeting the full performance level. This is true even though the expenditures of these other providers are not eligible expenses under § 27.99.

For example, suppose that a social service agency operates a subscription service that transports wheelchair users who need kidney dialysis to medical facilities where the treatment takes place. As part of a coordinated transportation system for handicapped persons in the urbanized area, the recipient is able to refer persons in this category to the social service agency, which provides the dialysis trips instead of the recipient itself. The recipient can count this service as part of the service meeting its full performance level.

This paragraph also provides that service provided through other modes of transportation may be counted toward meeting the service criteria. For instance, suppose a transit authority operates an accessible rail system. The recipient chooses to meet the full performance level through making its bus system accessible. Like many bus/rail operators, however, the recipient uses its buses to feed passengers into and out of the rail system. The recipient could feed disabled passengers into the accessible rail system in the same manner as it did other passengers, and would not have to run bus service that duplicated the rail lines. The recipient could treat both its bus service from Point A to a rail station and the accessible rail service from the station to Point B as contributing to meeting the service criteria.

The key is coordination by the recipient of these services into a coherent whole. The mere facts that a social service organization may be providing some transportation somewhere in the urbanized area, or that there may be an accessible rail system in the same area, unless these services are in a system coordinated by the recipient, are irrelevant to the recipient's ability to meet the full performance level.

Section 27.97 Limit on required expenditures.

Paragraph (a) sets forth the method recipients will use to calculate the limit on their required expenditures. First, the recipient calculates its average operating expenditures. It adds the operating costs reported to UMTA for the previous two fiscal years under section 15 to its projected operating costs for the current fiscal year and divides by three.

The estimate of operating costs for the current fiscal year must be a reasonable one, consistent with the budget estimates the transit authority makes for other purposes. (Obviously, the projection must concern the costs that will be reported under section 15.) An unrealistically low estimate, one at odds with the transit authority's recent operating cost experience, or one that differs significantly from estimates prepared for other local budgetary purposes, is not acceptable for this purpose.

Paragraph (b) concerns the effect of the cost limit. If a recipient can meet all the service criteria, for an amount less than the cost limit, then the cost limit is ignored during the fiscal year in question. However, the recipient is not required to spend more than the cost limit amount, even if, as a result, it cannot meet all the service criteria for the mode of service it has chosen.

For example, suppose a transit authority determined that meeting all the service criteria for its paratransit system would cost $800,000. If its cost limit is $650,000, it can voluntarily spend the entire $800,000 to meet all service criteria. However, this regulation does not require it to do so.

After consulting through the public participation mechanism established under § 27.83 of the final rule, the recipient could make decisions about the respects in which it paratransit service would fall short of one or more of the service criteria. For example, the recipient in the above example might determine that it could save $150,000 by not running the paratransit service on Sunday, raising fares above the level charged for similar bus trips, and not providing service to one segment of the service area which has relatively low demand for trips by handicapped persons. (In making tradeoffs, the recipient would have to act reasonably. For example, a recipient would not act reasonably in a tradeoff situation by raising fares to $30.00 a trip or restricting service to a 2 square block area.) These changes, though they result in service that does not fully meet the criteria, are allowed under the rule since the recipient need not spend more than $650,000 to comply with the rule.

Section 27.99 Eligible expenses.

To be eligible to count in determining whether the recipient has exceeded the § 27.97 limitation on required expenditures, an expenditure must meet two basis criteria. First, it must be an expenditure by the recipient of its own funds (including the UMTA assistance it receives). The total expenditures the recipient makes, not just the net expenditures after farebox revenues are considered, are counted. Second, it must be an expenditure specifically to comply with the requirements of 49 CFR Part 27, Subpart E.

This means that expenditures by other agencies (e.g., state and local government agencies, private social service organizations) on transportation services for handicapped persons cannot be counted for this purpose. As described in the discussion of § 27.95(e), the transportation services for disabled individuals that these other agencies provide can be "counted" by the recipient as part of the transportation services meeting the service criteria, however.

The same principle applies to the costs of operating an accessible rail system. No recipient need operate an accessible rail system to comply with this rule. However, a rail recipient may use an accessible rail

system to help meet its service requirements. But the expenses of building and operating the accessible rail system are not attributable to meeting these regulatory requirements, and they are not, therefore, eligible expenses.

Subparagraph (b)(2) provides, however, that the incremental cost of construction of modification of facilities to enable handicapped persons to transfer between accessible modes of transportation is an eligible expense, if the improvement is approved as part of the recipient's program. For example, suppose that a recipient is voluntarily making a rail line or station accessible. The cost of making the rail line or station accessible is not an eligible expense, since this cost is not incurred to meet the requirements of this rule. However, the incremental cost of a new or relocated bus stop to serve the station or line, together with curb cuts, signs for the use of handicapped persons, or other accessibility-related improvements that help disabled persons transfer between the accessible rail and accessible bus systems would be eligible. It is important to emphasize that only the incremental costs of such improvements, attributable to features specifically related to service for disabled persons, are eligible. In reviewing recipients' programs, UMTA will scrutinize closely plans for "interface" improvements of this sort to ensure that only eligible costs are claimed for purposes of the limit on required expenditures.

Only expenditures specifically to comply with the requirements of this regulation are eligible. If a recipient chooses to provide service above and beyond what this regulation requires, only the expenditures actually needed to meet the Federal regulatory requirements are eligible.

For example, the rule does not require non-handicapped elderly persons to receive service from a special service system. If a recipient provides service to non-handicapped elderly persons, in addition to eligible handicapped persons, only the costs of the special service system attributable to carrying the latter may be counted.

Only those items necessary to meet the full performance level for the mode of service selected by the recipient will be eligible expenses. "Gold-plating" (the practice of attributing to service for handicapped persons the cost of items that generally improve the recipient's entire service to the public or loading down the service to handicapped persons with features or facilities not essential to meeting the service criteria) will not be permitted to drive up the reported eligible expenses service for handicapped persons to the detriment of providing service meeting the criteria.

This provision applies even if the things the recipient does above and beyond the regulation's requirements are required by another legal authority, such as the Architectural Barriers Act of 1968 or state or local law. For example, a recipient might, as the result of the Architectural Barriers Act, install an elevator in an existing subway station where it has otherwise modified the means of vertical access. Such an expenditure would not be the result of the requirements of this rule; the cost of installing the elevator would not be a financial burden imposed by the Department of Transportation in order to comply with section 504 and section 317(c). Consequently, the cost of the elevator could not be counted in determining whether the recipient had exceeded the § 27.97 limitation on required expenditures by recipients.

Section 27.99(b) mentions that the capital and operating costs for special service systems, and the incremental capital and operating costs of accessible bus systems, are eligible expenditures. The language of the section does not explicitly mention mixed systems. A mixed system is, by definition, a system made up of accessible bus and special service components. In determining whether the costs of a mixed system exceed the limitation on required recipient expenditures, the recipient would add the capital and operating costs for the special service component of its system and the incremental capital and operating costs of the accessible bus component of its system.

By "incremental" capital and operating costs of an accessible bus system, we mean those costs of meeting the service criteria for accessible bus systems that are in addition to the costs of operating an inaccessible bus system. For example, suppose a lift-equipped bus costs $130,000. Without a lift, and other equipment necessary to make the vehicle safe and accessible for handicapped persons (e.g., wheelchair tiedowns), the bus costs $108,000. The incremental cost of buying the accessible bus is $12,000. Only that amount, not the entire cost of the bus, is an eligible expense. The same principle applies to operating costs. If maintaining the lift on an accessible bus can be demonstrated to take 20 work hours in a certain period of time, the wages of the mechanics for those 20 hours can be counted, but not the wages of the mechanics for the total number of work hours required on the entire bus during that period.

Section 27.99(b)(2) specifies that administrative costs of coordinating services are eligible. In addition, reasonable administrative costs of a special service system or an accessible bus system may be considered as a part of the eligible operating costs of such systems. UMTA will consider, on a case-by-case basis, whether specific administrative costs are eligible, following the general rule that if a cost is generally an allowable cost for reimbursement with UMTA funds, that part of it directly attributable to providing service for handicapped persons can be counted for purposes of this section.

Section 27.99(b)(4) specifies that the incremental cost of training personnel to provide service to handicapped persons is an eligible item. Again, by "incremental cost" we mean the portion of the cost of training directly attributable to service for handicapped persons. For example, if four hours of a bus driver training course are devoted to operating the lift and otherwise accommodating handicapped persons on an accessible bus system, the cost of those four hours of training, but not the cost of the entire course, is eligible.

Section 27.99(d) requires recipients to annualize the cost of capital expenditures, such as the purchase of vehicles, over the expected useful life of the item. This provision would also apply to other major capital items (e.g., a new fixed facility specifically devoted to the garaging and maintenance of special service vehicles), but not to minor or routine purchases of supplies, parts, and other equipment. In doubtful cases, recipients should contact their UMTA regional office for guidance.

The Department is aware that there may be a number of methods, of varying degrees of accounting sophistication, for annualizing a capital expenditure. In the interest of simplicity, however, the Department intends that recipients simply divide the number of years in the expected useful life of the item into its cost, and then count the result toward the cost limit in each of the years involved.

For example, suppose that the incremental cost of a lift-equipped bus is $12,000, and that the expected useful life of a bus is 12 years. The annualized cost of the bus would be $1,000. Therefore, the recipient would count $1,000 in its calculation of eligible expenses for year 1, year 2, and so forth, through year 12.

Where there is not a generally accepted industry standard (e.g., 12 years for buses) for a given capital item, recipients should consult with their UMTA regional office for guidance on how many years should be regarded as the item's expected useful life.

Section 27.101 Technical exemptions.

This provision permits any recipient to request a technical exemption from any provision of this Subpart. Such a request can be made at any time, as an independent request. It is also possible for a recipient to submit a technical exemption request as part of, or in connection with, the recipient's program submission. Section 27.101(b) clearly sets forth the standards for granting exemptions under this rule. These standards are consistent with the standards DOT has applied to requests for exemptions in the past. First, there must be special local circumstances. That is, the reasons specified for the requested exemption must be, if not literally unique, quite specific to the local area requesting the exemption. The Department will not grant an exemption based on circumstances common to a broad class of recipients. An exemption from a regulatory requirement based on circumstances common to many recipients would constitute, in effect, a rulemaking of general applicability, which may be made only through normal rulemaking procedures.

Second, the circumstances used to support the exemption request must involve matters not contemplated, or taken into account, as part of the rulemaking process for this rule. The Department is aware that it probably has not thought of all possible issues or situations that can arise. This exemption procedure is intended to apply to matters not dealt with in this rulemaking. If, on the other hand, the Department has received and considered comments on how a certain issue or situation has been handled, and then made a decision, the exemption process is not a mechanism for reconsidering a regulatory decision the Department has made.

Third, the applicant for an exemption must demonstrate that the circumstances cited

make compliance with the rule unduly burdensome or unreasonable. The undue burdens or unreasonableness, consistent with the two standards discussed above, must be specific to the particular grantee, and not something affecting grantees, or a broad class of them, in common.

Fourth, the recipient must show that, if it is granted the exemption, it will take some alternate action that will substantially comply with the regulation. The grant of an exemption is not a license for noncompliance; it is agreement by the Department and the recipient that the recipient will take action adequate to provide transportation services to handicapped persons, even though it is, in some respects, excused from following the letter of the regulation. It should be emphasized, however, that the exemption provision is not intended to permit recipients to fashion "do-it-yourself" modifications of the requirements of the regulation.

The Department may grant a request for a technical exemption, in whole or in part, or deny it. The Department may also place any reasonable conditions on the grant of the exemption. The UMTA Administrator will sign grants or denials of exemption requests, and such requests should be addressed to the Administrator. In keeping with existing DOT practice, the Assistant Secretary for Policy and International Affairs must concur in grants or denials of exemption requests under this rule.

Section 27.103 Alternate procedures for recipients in States administering the section 5, 9, and 9A programs

Section 27.103 provides a slightly different procedure for submitting documents under this Subpart if a state has elected to administer UMTA's sections 5, 9, and 9A programs for UMTA. This procedure applies to urbanized areas of under 200,000 population. If a state has made this election, the designated state agency is the actual recipient of the UMTA funds and the state agency, in turn, passes them through to the urbanized area. This is similar to the section 18 program.

If the election is made, the local recipient must send the program required under § 27.85, the slippage report under § 27.89(c), the certification and report under § 27.91(f), and any compact under § 27.93(c) to the designated state agency and not to UMTA. (The state would have to inform UMTA when a slippage report was received). The designated state agency acts for UMTA to review and, as necessary, approve these documents. In doing so, any deadlines which the regulation imposes on UMTA apply to the designated state agency. For example, the designated state agency would, under § 27.85(b), have to complete its review of the local recipient's program within 120 days of its submission. Similarly, the time extensions under § 27.85(c) would also apply to the designated state agency.

Section 27.103(b) requires the designated state agency to certify to UMTA that the recipients in its state are in compliance with this Subpart. This certification can cover more than one recipient, but it is due to UMTA no later than 30 days after the designated state agency approves the recipient's program.

It is important to note that the state's election to administer these programs is voluntary. Any recipient located in a state not so electing must send its material to UMTA. Also, the provisions in this section do not apply to small recipients covered by § 27.91.

Enforcement Procedures

Subpart F (§§ 27.121–27.129) of 49 CFR Part 27 concerns enforcement of the obligations of recipients under Subpart E, the mass transit program requirements, as well as all the other Subparts of this regulation. Briefly, Subpart F provides that when, as a result of a complaint, investigation or compliance review, the Department learns that a recipient appears to be in noncompliance, the Department first attempts to resolve the problem informally.

This informal resolution step is the most important part of the enforcement process, from the Department's view. At this stage, the Department works with the recipient to solve the planning, management, or operational problems that led to the enforcement action. The aim of the process is not to impose sanctions on the recipient, but to correct the situation so that the recipient provides service to handicapped persons as the regulation requires. Only if informal resolution fails does the Department resort to formal enforcement proceedings.

If there is reasonable cause for the Department to believe that the recipient is in noncompliance, and that the noncompliance cannot be resolved informally, the Department notifies the recipient that it proposes to suspend, terminate, or refuse to provide Federal financial assistance to the recipient. The recipient has the opportunity to present its case at a hearing before an administrative law judge. The judge makes a recommended decision to the Secretary, who may accept, reject, or modify the recommended decision. The Secretary's decision is administratively final (it may be reviewed by a Federal court under the Administrative Procedure Act) and the sanctions the Secretary orders remain in effect until the recipient comes into compliance with the regulation.

Any person who wishes to submit a complaint alleging that a recipient is in noncompliance with this regulation should send the complaint to the following address: Director, Departmental Office of Civil Rights, U.S. Department of Transportation, 400 7th Street, SW., Washington, DC 20590.

Noncompliance should be understood simply as the failure by a recipient to do what the regulations require of it, or action by a recipient contrary to regulatory prohibitions. The following are examples (not intended to be an exhaustive or exclusive list) of conduct under Subpart E that could be regarded as noncompliance, for recipients to which the various requirements apply:

- Failure to have a program consistent with the requirements of § 27.81;
- Failure to follow any of the public participation requirements of § 27.83;
- Failure to submit the program documents to UMTA within the time frames of § 27.85;
- Failure to make timely changes in a program UMTA did not approve as submitted under § 27.85, such that UMTA can approve the program as consistent with this regulation;
- Failure to provide service, as required under § 27.87;
- Failure to submit a "slippage report" in the circumstances in which § 27.89(c) requires one;
- Failure by a small recipient to certify, provide for public participation, or provide reports as required under § 27.91.

The OMB Paperwork Reduction Act number for the information collection requirements in Subpart E is 2132–0530.

[FR Doc. 86–11571 Filed 5–20–86; 8:45 am]
BILLING CODE 4910–62–M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Parts 27 and 609

[Docket No. 56d; Notice 86-5]

Nondiscrimination on the Basis of Handicap in Department of Transportation Financial Assistance Programs

AGENCY: Office of the Secretary, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice of proposed rulemaking (NPRM) requests comment on proposed requirements for service to handicapped persons on commuter rail systems. The proposed rule would implement section 504 of the Rehabilitation Act of 1973 [29 U.S.C. 794) and section 317(c) of the Surface Transportation Assistance Act of 1982 (49 U.S.C. 1612(d)) in commuter rail programs receiving financial assistance from the Department. The notice also proposes to remove 49 CFR Part 609 and incorporate certain of its provisions into 49 CFR Part 27.

DATE: Comments should be received by August 21, 1986.

ADDRESS: Comments should be addressed to Docket Clerk, Docket 56d, Department of Transportation, Room 4107, 400 7th Street, SW., Washington, DC, 20590. Comments will be available for review by the public at this address from 9:00 a.m. through 5:30 p.m., Monday through Friday. Commenters wishing acknowledgement of their comments should include a stamped, self-addressed postcard with their comment. The Docket Clerk will time and date stamp the card and return it to the commenter.

FOR FURTHER INFORMATION CONTACT: Robert C. Ashby, Deputy Assistant General Counsel for Regulation and Enforcement, U.S. Department of Transportation, Room 10424, 400 7th Street, SW., Washington, DC 20590; (202) 426–4723 (voice) or (202) 755–7687 (TDD). The Department of Transportation is currently installing a new telephone system. As a result, the voice number is expected to change, during July 1986, to (202) 366–9306. The TDD number is not expected to change. This NPRM has been taped for use by visually-impaired persons. Requests for taped copies of the rule should be made to Mr. Ashby.

SUPPLEMENTARY INFORMATION: The purpose of this NPRM is to request comments on several actions the Department is considering taking that are related to the final rule published today on mass transit services for handicapped persons. The September 3, 1985, NPRM that led to the final rule did not request comments on these specific proposals, and we received few comments relating to them. In addition, with respect to requirements for commuter rail systems, the Department does not have, at the present time, the information and analysis we need to decide whether to promulgate a final rule.

Commuter Rail

The preamble to the NPRM asked what, if any, provisions the regulation should include concerning commuter rail operations. The preamble also asked what form such a provision should take (e.g., a requirement for key station accessibility, special service, or a choice between the two).

Virtually all the handicapped commenters on this issue objected to the absence of specific commuter rail provisions from the NPRM, saying that commuter rail systems should be required to be fully accessible or that some alternative service be mandated. Some of these comments suggested that commuter rail services be required to meet the same criteria as other urban mass transit services. Others said that the interface between commuter rail and urban mass transit systems should also be required to be accessible, lest transfers from one to the other be precluded. A few social service organizations and other commenters took similar positions.

The relatively few transit industry comments suggested either that there be no commuter rail provisions in the final rule or that, if there were such requirements, the type of service be determined locally. Some transit industry comments also favored being able to count commuter rail accessibility costs toward the cost cap.

A few comments, from commenters in various categories, favored the "key stations/accessible rail vehicles" approach to commuter rail service. Others favored alternative service as a substitute for, or addition to, accessible mainline service.

In the final rule published today, the Department decided against requiring recipients to make urban mass transit rail systems, such as subways, other rapid rail systems, and light rail systems, accessible. Urban subway, rapid rail, and light rail systems provide service within an urbanized area which, in most cases, is also served by a recipient's bus system. An accessible bus system, or a special service system meeting service criteria keyed to the bus system, can provide service to handicapped persons throughout the area in which rail service is available to the general public.

Commuter rail may be a different case. While portions of commuter rail lines obviously lie within urbanized areas served by urban mass transportation systems, the major function of commuter rail lines is to bring commuters to an urban center from exurban areas often far outside the area served by urban mass transit bus or rail systems. A handicapped commuter living outside the urban mass transit service area would have no UMTA-assisted commuter rail service available to him or her at all, unless the commuter rail service itself were accessible or some substitute were provided for it. Consequently, the Department has decided to consider adding commuter rail requirements.

It should be emphasized that the Department has not made a decision concerning what, if any, commuter rail requirements we should promulgate. Therefore, we are proposing for comment various alternative provisions on important commuter rail issues. These options include mainline accessibility with all stations or with key stations made accessible, substitute service, and a provision that would allow recipients to choose between mainline accessibility and substitute service. The Department also seeks comment on other alternatives. If it appears that there is not sufficient justification for imposing commuter rail requirements, the Department could also decide not to promulgate a final rule on this subject.

The commuter rail provisions proposed in this NPRM include the following:

Section 27.5 Definitions. The definition of commuter rail, originally published as part of the Department's 1979 section 504 rule, and deleted by the July 1981 interim final rule (since it did not refer to commuter rail systems), would be restored. Because the vehicle standards proposed for incorporation from 49 CFR Part 609 (see discussion below) refer to "rapid rail" and "light rail," those definitions would likewise be restored.

Section 27.81 Program Requirement. A new paragraph (b) added to the end of this section would make the requirement to have a program under Subpart E of 49 CFR Part 27 applicable to recipients of financial assistance from the Department for commuter rail systems.

Section 27.85 Submission and Review of Program. A sentence added to paragraph (a) of this section would provide that commuter rail operators

would make their program submissions by 12 months from the effective date of this admendment to Subpart E.

Section 27.95 Full Performance Level. The NPRM proposes a new paragraph (e) to this section, setting forth requirements for commuter rail service. The NPRM proposes five alternatives for comment.

The first alternative is to make key stations, and at least one car per train, accessible to handicapped persons. The "key station" idea was developed as part of the Department's 1979 section 504 rule, and its purpose is to result in the most important stations being made accessible without causing the recipient to incur the expense of making all stations accessible. The key station criteria are also drawn from the 1979 rule. The Department estimated, for purposes of the 1979 rule, that these criteria would result in about 40 percent of stations becoming accessible. The Department seeks comment on whether, if this alternative is adopted, these criteria should be modified.

Because making a commuter rail line accessible is likely to be a relatively capital-intensive effort, this option would give recipients 30 years, rather than six, to meet the service criteria. This lengthened compliance period, which also was drawn from the 1979 rule, is intended to make compliance through this approach financially less burdensome. However, the recipient would, as some comments suggested, have to provide interim service (e.g., by demand-responsive motor vehicle) during the 30-year phase-in period. The Department seeks comment on whether this phase-in period is appropriate for commuter rail.

The second alternative is similar to the first, except that all stations, rather than only key stations, would have to be accessible. This would result in greater convenience for disabled users, possibly increasing ridership. However, costs for recipients would also be higher than under the first option.

The third proposed approach to meeting commuter rail requirements is substitute service. Substitute service would involve providing service by accessible motor vehicle from the commuter rail station nearest or most convenient to the person's point of origin to the station nearest or most convenient to his or her destination. There would be the same maximum six-year phase-in period as for other modes of mass transit. As some commenters to the September 1983 NPRM suggested, this station-to-station service would have to meet the same six service cirteria that apply to other modes of service under Subpart E of the regulation. The language of the criteria would be modified slightly to fit the commuter rail context (e.g., to refer to commuter rail lines and stations).

The fourth option would allow recipients to choose between substitute service and accessible mainline service. This approach would let each recipient choose, for each of its commuter rail lines, to comply either by meeting the requirements for accessible mainline service (as in option 1 or 2) or the requirements for substitute service (as in option 3). The only constraint on the recipient's discretion would be that all of any given commuter rail line would have to comply in the same way. Under all of the options, a commuter rail line that already met the requirements of § 27.73 (requirements for intercity rail systems) would be deemed to comply with the commuter rail requirements.

The Department also seeks comment on other options or variations of the options described above. For example, should the Department require feeder service to transport handicapped persons to accessible commuter rail stations? To improve cost-effectiveness of service, should recipients be able to terminate their accessible rail or substitute service at the first connecting point with other urban mass transit services that handicapped persons can use? On the other hand, would requiring handicapped persons to transfer in this situation be too inconvenient? Other suggestions are welcome.

The fifth option under consideration is a no-action alternative, under which no commuter rail provision would be added in the rule.

It is the Department's understanding that, like other mass transit programs, Federally-assisted commuter rail systems use their UMTA assistance to support overall operations. The Federally-assisted program or activity, therefore, is the entire commuter rail system. Section 504 of the Rehabilitation Act of 1973 is a basis for imposing requirements only on the specific program or activity for which Federal assistance is provided. If a particular commuter rail line, for example, does not receive Federal financial assistance, it is not covered under section 504. This is true even if the operator receives Federal assistance for other activities.

Section 27.97 Limit on Required Expenditures. A number of commenters on the September 1983 NPRM suggested that the limit on required expenditures apply to commuter rail systems, or that costs of commuter rail services for handicapped persons count toward recipients' overall cost limit. For the same reasons that we applied a cost limit to other modes of service for disabled persons, we are proposing that a cost limit should apply to commuter rail. For purposes of this NPRM, we are proposing two options for how the cost limit would apply to commuter rail.

We are concerned that counting costs of both commuter rail accessibility or substitute service and urban accessible bus or special service toward the same limit on required expenditures could create problems, such as a lack of balance between commuter rail and urban transit expenditures, that could impede progress toward the full performance level in one of the systems. Consequently, the Department's first option is that recipients which have both commuter rail and other urban mass transit systems would calculate the limit on required expenditures separately for each.

The Department's second option would modify this approach somewhat. It is possible that, for some recipients who operate both commuter rail and other urban mass transit systems, it would be more cost-effective to divert resources from commuter rail accessibility to other transit services for handicapped persons. A provision permitting recipients to lower their commuter rail cost limit by an amount equivalent to expenditures above their urban mass transit cost limit could give recipients greater flexibility in such situations. The Department also seeks comment on whether, if such a system were put into place, there should be a limit to "transfers" of this kind.

Section 27.99 Eligible Expenses. This section would be amended to provide that the capital and operating expenses of substitute service systems for commuter rail, and the incremental capital and operating expenses of accessible commuter rail systems, are eligible expenses. They would be eligible with respect to the separate commuter rail cost limit. This section would also regard costs of compliance with the facility and vehicle standards of §§ 27.105 and 27.107 as eligible.

Questions for Regulatory Analysis. In preparing a regulatory impact analysis or evaluation concerning commuter rail service for disabled persons, the Department will seek information to answer the following questions, among others:

1. How many handicapped persons live in corridors now served by commuter rail systems?

2. How many of these persons are unable, by reason of handicap, to use the existing commuter rail service?

3. How many of these persons now use other means of transportation for

destinations served by commuter rail service (e.g., private cars, van pools)?

4. How many of these persons would be likely to use an accessible commuter rail service in which (a) key stations, or (b) all stations, were accessible?

5. How many of these persons would be likely to use a motor vehicle-based substitute service system?

6. Given the likely user population, how many annual trips by handicapped persons who cannot now use the commuter rail system would be generated by (a) an accessible commuter rail system with key stations accessible, (b) an accessible commuter rail system with all stations accessible, or (c) a motor vehicle-based substitute service system?

7. What are likely to be the incremental capital and operating costs (per year and over 30 years) of the three alternatives described in question 6?

8. What is the likelihood that the benefits (i.e., usage) of the various alternatives under discussion will justify the costs?

The Department requests assistance from commenters in providing information to help answer these and other relevant questions. The Department is aware of two significant studies on commuter rail accessibility that are now underway. The Department hopes to make use of these studies and, to the extent still relevant, data from studies the Department has conducted in the past (e.g., the so-called "321 Studies" conducted some years ago). If the information from these studies is not sufficient to enable the Department to make a final decision on this subject, we anticipate performing a study (analogous to those used in the Regulatory Impact Analysis for the final rule published today) that would provide the information needed as a basis for a final decision.

Withdrawal of 49 CFR Part 609

49 CFR Part 609 contains a variety of standards for vehicles and fixed facilities, as well as procedural sections concerning special efforts to be made in providing transportation services to handicapped persons. There has been some confusion about the legal status of this Part. The preamble to the Department's 1979 section 504 rule mentioned that Part 609 had been "superseded," but Part 609 was never withdrawn from the Code of Federal Regulations. The Department's July 1981 interim final rule withdrew the mass transit portion of the 1979 rule, noting that Part 609 had never been withdrawn but not otherwise clarifying its status.

The Department believes that many of the provisions of Part 609 are obsolete and/or cover matters now covered by the new Subpart E. For these reasons, these provisions should be withdrawn. On the other hand, as discussed below, the provisions of Part 609 concerning vehicle and facility standards and the reduced fare program are still important. They should be retained and any uncertainty about their legal status ended (it is the Department's position that they remain in effect). For these reasons, the Department is proposing to withdraw Part 609 and to add to the new 49 CFR Part 27, Subpart E, revised and updated versions of Part 609's vehicle and facility standards and reduced fare program provision.

Facility and Vehicle Standards; Reduced Fare Program

The Department proposes to add a new § 27.105 to the regulation, which would incorporate fixed facility standards now found in § 609.13. This inclusion responds to requests by commenters on the September 1983 NPRM for fixed facility standards in the rule. These standards have been in place for some time, are familiar to recipients, and are not onerous or costly to comply with. This section would contain a provision concerning the station-rail car interface, which a commenter cited as a continuing problem in some new rail systems.

The proposed § 27.107 would contain standards related to accessibility features for bus, rapid rail, light rail, and other vehicles. The four paragraphs of this section would incorporate the substance of §§ 609.15–609.21.

There would be only one substantive change in these provisions. The NPRM would delete § 609.15(a) through (c), which deals with the so-called "Transbus" specifications, which the Department determined, in 1979, could not practically be implemented, and a requirement for an accessibility option on all transit buses, which is obsolete in light of the publication of the new Subpart E. It should be pointed out that the standards of § 27.107 would apply to all new vehicles in the categories covered by the section, not just those that are purchased specifically to meet the full performance level of § 27.95.

The Department seeks comment on any additional accessibility features which should be included in these provisions, or any modifications or deletions which the Department should make to these provisions.

The current 49 CFR 609.23 requires recipients to provide half fares for elderly and handicapped persons during off-peak travel times. This provision would be incorporated in the new 49 CFR 27.109. The only change between the present and proposed version of the provision involved the substitution of a reference to the current section 9 program for a reference to the section 5 program, which it replaced.

Definition of "Accessible"

The Department is proposing to delete, from § 27.5, the definition of "accessible." The rationale for this proposal is that the specific requirements for various modes of transportation and facilities, together with the references to the Uniform Federal Accessibility Standards (UFAS) now incorporated in Part 27, make this definition unnecessary. The Department seeks comment on whether there is any remaining need for this definition.

Regulatory Process Matters

This NPRM is a significant regulation under the Department's Regulatory Policies and Procedures, since its commuter rail provisions may be costly and controversial. The rule may be a major rule under Executive Order 12291; because the Department does not have sufficient data concerning the costs of compliance with its proposed commuter rail requirements, we are unsure of whether it would result in costs of over $100 million per year. The Department does not have sufficient information on which to base a regulatory evaluation or impact analysis, and we have not prepared such a document at this time. If we decide to promulgate a final rule on commuter rail systems, we intend to prepare a regulatory evaluation or impact analysis, as appropriate.

The other proposals in this NPRM—concerning the withdrawal of Part 609 and incorporation of some of its provisions in Part 27—are not expected to have any significant economic impacts. They basically involve moving existing provisions to a different part of the Code of Federal Regulations. We do not anticipate preparing a regulatory impact analysis or evaluation on these subjects.

The Department certifies under the criteria of the Regulatory Flexibility Act that this proposal, if promulgated as a final rule, would not have a significant effect on a substantial number of small entities. Only the commuter rail portion of this NPRM would have a significant economic effect. There are no commuter rail operators, to our knowledge, that could be considered small entities.

This NPRM has been reviewed and approved by the Department of Justice under Executive Order 12250 and by the Office of Management and Budget under Executive Order 12291.

List of Subjects in 49 CFR Part 27

Handicapped, Mass transportation.

Issued this 19th day of May, 1986, at Washington, DC.

Elizabeth Hanford Dole,

Secretary of Transportation.

For the reasons described in the preamble, the Department proposes the following:

PART 609—[REMOVED]

1. To amend Title 49, Code of Federal Regulations, by removing Part 609 thereof.

PART 27—[AMENDED]

1a. The authority citation for Part 27 continues to read:

Authority: Sec. 504 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 794); sec. 16(a) of the Urban Mass Transportation Act of 1964, as amended (49 U.S.C. 1612(a)); sec. 165(b) of the Federal-Aid Highway Act of 1973, as amended, 23 U.S.C. 142nt. Subpart E is also issued under sec. 317(c) of the Surface Transportation Assistance Act of 1982 (49 U.S.C. 1612(d)).

§ 27.5 [Amended]

2. To amend § 27.5 ("Definitions"), in Title 49, Code of Federal Regulations, by adding the following paragraphs, to be inserted among the existing paragraphs in alphabetical order:

"Commuter rail" means that portion of mainline railroad transportation operations which encompasses urban passenger train services for local short-distance travel between a central city and adjacent suburbs and which is characterized by multi-trip tickets, specific station-to-station fares, railroad employment practices, and usually only one or two stations in the central business district.

"Light rail" means a streetcar type transit vehicle railway operated on city streets, semi-private rights-of-way, or exclusive private rights-of-way.

"Rapid rail" means a subway-type transit vehicle railway operated on exclusive rights-of-way with high-level platform stations.

3. To amend § 27.5 ("Definitions") in Title 49, Code of Federal Regulations, by deleting the definition of "accessible."

4. To amend § 27.61 ("Program Requirement"), in Title 49, Code of Federal Regulations, by designating the existing paragraph of this section as paragraph (a) thereof, and by adding the following paragraph (b):

§ 27.61 [Amended]

* * * * *

(b) Recipients of financial assistance from the Department of Transportation for commuter rail systems shall establish a program meeting the requirements of paragraph (a) of this section. However, a recipient is not required to establish such a program concerning any commuter rail line which, on the date the program would otherwise be due, is in full compliance with the requirements of 49 CFR 27.73.

5. To amend § 27.65 ("Submission and Review of Program"), in Title 49, Code of Federal Regulations, by adding the following paragraph (d):

§ 27.65 [Amended]

* * * * *

(d) (1) With respect to commuter rail systems, commuter rail operators shall submit their programs and supporting materials within 12 months of the effective date of this paragraph.

(2) A commuter rail operator which, because a commuter rail line is in full compliance with 49 CFR 27.73 within 12 months of the effective date of this paragraph, is not required to establish a program with respect to that line shall submit, in lieu of a program, a certification of its compliance with § 27.73.

(3) If a commuter rail operator receives its federal financial assistance from the Federal Railroad Administration (FRA) rather than from UMTA, the recipient shall submit all required materials to FRA.

6. To amend § 27.95 ("Full Performance Level"), in Title 49, Code of Federal Regulations, by adding a new paragraph (f), to read as follows:

§ 27.95 [Amended]

* * * * *

Option 1

(f) *Criteria for Commuter Rail Systems.* The criteria applicable to each commuter rail line on a commuter rail system receiving financial assistance from the Department of Transportation are the following:

(1) All stations shall be accessible to handicapped persons who can use steps, and key stations shall be accessible to wheelchair users. For purposes of commuter rail service, key stations are those that are:

(i) Transfer points on a rail line or between rail lines;

(ii) Major interchange points with other transportation modes;

(iii) End stations, unless an end station is close to another accessible station;

(iv) Stations serving major activity centers, including government and employment centers, institutions of higher education, and hospitals or other major health care facilities;

(v) Stations that are special trip generators for large numbers of handicapped persons; and

(vi) Stations that are distant from other accessible stations.

(2) Existing key stations shall be deemed to be accessible for purposes of this paragraph if they—

(i) Include, or are altered to include, the features listed in sections 4.1.6(3)(a)—(d) and section 4.1.6(4) of the standards referenced in § 27.67(d) of this Part; and

(ii) Include the features described in § 27.73(a)(1)(ii) of this Part.

(3) Existing non-key stations shall be deemed to be accessible if they meet the requirements applicable to key stations, except that otherwise accessible routes that do not comply with section 4.3.8 of the standards referenced in § 27.67(d) of this Part shall comply with sections 4.9.2—4.9.6 of those standards.

(4) All vehicles shall be accessible to handicapped persons who can use steps, and at least one vehicle per train must be accessible to wheelchair users. All vehicles on commuter rail trains shall have clearly marked priority seating for handicapped persons, and vehicles accessible to wheelchair users shall display the international accessibility symbol.

(5) The fares charged handicapped persons using the accessible commuter rail service shall be no higher than those charged other users for a trip between the same stations at the same time. Reduced, off-peak fares for elderly and handicapped persons shall be in effect on the accessible commuter rail service.

(6) The recipient shall ensure that each accessible commuter rail line meets the requirements of this section by a date 30 years from the date UMTA approves its program. In the meantime, the recipient shall provide interim service by accessible motor vehicle which meets a significant fraction of the actual transportation needs of handicapped persons who cannot use the commuter rail line until it is made accessible.

Option 2

(f) *Criteria for Commuter Rail Systems.* The criteria applicable to each commuter rail line on a commuter rail system receiving financial assistance from the Department of Transportation are the following:

(1) All stations shall be accessible to handicapped persons who can use steps and to wheelchair users.

(2) Stations shall be deemed to be accessible for purposes of this paragraph if they

(i) Include, or are altered to include, the features listed in sections 4.1.6(3)(a)—(d) and section 4.1.6(4) of the standards referenced in §27.67(d) of this Part; and

(ii) Include the features described in §27.73(a)(1)(ii) of this Part.

(3) All vehicles shall be accessible to handicapped persons who can use steps, and at least one vehicle per train must be accessible to wheelchair users. All vehicles on commuter rail trains shall have clearly marked priority seating for handicapped persons, and vehicles accessible to wheelchair users shall display the international accessibility symbol.

(4) The fares charged handicapped persons using the accessible commuter rail service shall be no higher than those charged other users for a trip between the same stations at the same time. Reduced, off-peak fares for elderly and handicapped persons shall be in effect on the accessible commuter rail service.

(5) The recipient shall ensure that each accessible commuter rail line meets the requirements of this section by a date 30 years from the date UMTA approves its program. In the meantime, the recipient shall provide interim service by accessible motor vehicle which meets a significant fraction of the actual transportation needs of handicapped persons who cannot use the commuter rail line until it is made accessible.

Option 3

(f) *Criteria for Commuter Rail Systems.* Each commuter rail line on a commuter rail system receiving financial assistance from the Department of Transportation shall provide, on the request of an eligible handicapped person, substitute service by accessible motor vehicle from the commuter rail station nearest or most convenient to the handicapped person's point of origin to the commuter rail station nearest or most convenient to the person's destination. The substitute service shall meet the following service criteria:

(1) *Eligibility.* All persons who, by reason of handicap, are physically unable to use the recipient's commuter rail system shall be eligible to use the recipient's substitute service.

(2) *Response Time.* The recipient shall ensure that service is provided to a handicapped person who requests it within 24 hours of the request.

(3) *Restrictions or Priorities Based on Trip Purpose.* The recipient shall not impose priorities or restrictions based on trip purpose on users of the substitute service.

(4) *Service Area.* Substitute service shall be provided, upon request, among all stations served by the recipient's commuter rail service.

(5) *Fares.* The fare for a trip charged a handicapped person using the substitute service shall be comparable to that charged other users of the recipient's commuter rail service for a trip between the same stations at the same time.

(6) *Hours and Days of Service.* Substitute service shall be available throughout the same days and hours as the recipient's commuter rail service for the general public.

Option 4

(f) *Criteria for Commuter Rail Systems.* Each commuter rail line on a commuter rail system receiving financial assistance from the Department of Transportation shall consist of meeting the criteria of either subparagraph (1) [i.e., requirements for mainline accessibility] or subparagraph (2) [i.e., requirements for substitute service] of this paragraph. Each line shall meet the requirements of the applicable subparagraph for its entire length. A commuter rail line which is in full compliance with the requirements of § 27.73 shall be deemed to comply with this paragraph.

Option 5

No further regulatory action.

7. To amend § 27.97 ("Limit on Required Expenditures") in Title 49, Code of Federal Regulations, by adding a new paragraph (d), to read as follows:

§ 27.97 [Amended]

* * * * *

Option 1

(d) *Commuter Rail.* The limit on required expenditures for commuter rail service shall be computed separately by any recipient that provides both commuter rail service and urban mass transportation service by bus or other means.

Option 2

(d) *Commuter Rail.* The limit on required expenditures for commuter rail service shall be computed separately by any recipient that provides both commuter rail service and urban mass transportation service by bus or other means. *Provided,* that such a recipient may reduce the amount of its commuter rail limit on required expenditures for a given fiscal year by the amount in excess of its limit on required expenditures for other mass transit services for handicapped persons it expended for such services in the previous fiscal year.

§ 27.99 [Amended]

8. To amend § 27.99 ("Eligible Expenses") in Title 49, Code of Federal Regulations, by removing, in paragraph (b)(5) thereof, the words "49 CFR 609.23." and substituting the words "49 CFR 27.109."

9. To amend § 27.99 ("Eligible Expenses"), in Title 49, Code of Federal Regulations, by adding new subparagraphs (b)(7) and (b)(8) thereof, to read as follows:

(b) * * *

(7) Capital and operating costs of substitute service systems for commuter rail; incremental capital and operating costs of accessible commuter rail systems.

(8) Incremental costs of compliance with §§ 27.105 and 27.107 of this Subpart.

10. To amend Subpart E, in Title 49, Code of Federal Regulations, Part 27, by adding new §§ 27.105, 27.107, and 27.109, to read as follows:

§ 27.105 Standards for fixed facilities.

(a) Except as otherwise provided in paragraph (c) of this section, every fixed facility—including every station, terminal, building or other facility—designed, constructed, or altered after the effective date of this section with UMTA assistance, the intended use for which either will require that such fixed facility be accessible to the public or may result in the employment therein of physically handicapped persons, shall be designed, constructed, or altered in accordance with the accessibility standards referenced in § 27.67(d) of this Part.

(b) In addition to the standards of paragraph (a) of this section, the following standards apply to rail facilities covered by that paragraph:

(1) *Travel distance for wheelchair users.* In designing new underground or elevated transit stations, careful attention should be given to the location and number of elevators or other vertical circulation devices in order to minimize the extra distance which wheelchair users and other persons who cannot negotiate steps may have to travel compared to nonhandicapped persons.

(2) *International accessibility symbol.* The international accessibility symbol shall be displayed at wheelchair accessible entrance(s) to buildings that meet the standards.

(3) *Fare vending and collection systems.* Transit fare vending and collection systems shall be designed so as not to prevent effective utilization of the transportation system by elderly and

handicapped persons. Each station shall include a fare control area with at least one entrance with a clear opening at least 32 inches wide when open.

(4) *Boarding platforms.* All boarding platform edges bordering a drop-off or other dangerous condition shall be marked with a warning device consisting of a strip of floor material differing in color and texture from the remaining floor surface. The design of boarding platforms for level-entry vehicles shall be coordinated with the vehicle design in order to minimize the gap between platform and vehicle doorway and to permit safe passage by wheelchair users and other elderly and handicapped persons.

(c) The standards established in paragraphs (a) and (b) of this section do not apply to:

(1) The design, construction, or alteration of any portion of a fixed facility which need not, because of its intended use, be made accessible to, or usable by, the public or by physically handicapped persons;

(2) The alteration of an existing fixed facility to the extent that the alteration does not involve the installation of, or work on, existing stairs, doors, elevators, toilets, entrances, drinking fountains, floors, telephone locations, curbs, parking areas, or any other facilities susceptible of installation or improvements to accommodate the physically handicapped (the standards do not apply to unaltered elements or spaces of an existing fixed facility except as called for by section 4.1.6(3), of the standards referenced in § 27.67(d)(2);

(3) The alteration of an existing fixed facility, or of such portions thereof, to which application of the standards is not structurally possible; and

(4) The construction or alteration of a fixed facility for which a recipient has, prior to the effective date of this section, issued a formal invitation for bids to perform such construction or alteration.

(d) The final project application for any project that includes the design, construction, or alteration of a fixed facility subject to paragraph (a) of this section shall contain one of the following: (1) An assurance that the standards of paragraph (a) of this section will be adhered to in the design, construction, or alteration of such facility; (2) a request for a finding that the project is within one of the exceptions set out in paragraph (c) of this section (the specific exception being identified), with appropriate supporting material; or (3) a request pursuant to § 27.101 for the technical exemption from the standards of paragraphs (a) and (b) of this section, with appropriate supporting material (including, where applicable, a request for a waiver of the requirements of the Architectural Barriers Act of 1968, as amended).

§ 27.107 Standards for vehicles.

(a) *Buses.* The following standards apply to all new transit buses exceeding 22 feet in length for which procurement solicitations are issued after the date this section becomes effective:

(1) *Priority seating signs.* In order to maximize the safety of elderly and handicapped persons, each vehicle shall contain clearly legible signs which indicate that seats in the front of the vehicle are priority seats for elderly and handicapped persons, and which encourage other passengers to make such seats available to elderly and handicapped persons who wish to use them.

(2) *Interior handrails and stanchions.* (i) Handrails and stanchions shall be provided in the entranceway to the vehicle in a configuration which allows elderly and handicapped persons to grasp such assists from outside the vehicle while starting to board, and to continue using such assists throughout the boarding and fare collection processes. The configuration of the passenger assist system shall include a rail across the front of the interior of the vehicle which shall serve both as an assist and as a barrier to reduce the possibility of passengers sustaining injuries on the fare collection device or windshield in the event of sudden deceleration. The rail shall be located to allow passengers to lean against it for security while paying fares.

(ii) Overhead handrails shall be provided which shall be continuous except for a gap at the rear doorway.

(iii) Handrails and stanchions shall be provided which shall be sufficient to permit safe onboard circulation, seating and standing assistance, and upboarding by elderly and handicapped persons.

(3) *Floor and step surfaces.* (i) All floors and steps shall have slip-resistant surfaces.

(ii) All step edges shall have a band of bright contrasting color(s) running the full width of the step.

(4) *Lighting.* (i) Any stepwell immediately adjacent to the driver shall have, when the door is open, at least 2 foot-candles of illumination measured on the step tread.

(ii) Other stepwells shall have, at all times, at least 2 foot-candles of illumination measured on the step tread.

(iii) The vehicle doorways shall have outside light(s) which provide at least 1 foot-candle of illumination on the street surface for a distance of 3 feet from all points on the bottom step tread edge. Such light(s) shall be located below window level and shielded to protect the eyes of entering and exiting passengers.

(5) *Fare collection.* The farebox shall be located as far forward as practicable and shall not obstruct traffic in the vestibule.

(6) *Destination and route signs.* Each vehicle shall have illuminated signs on the front and boarding side of the vehicle.

(b) *Rapid Rail Vehicles.* The following standards apply to all rapid rail vehicles for which procurement solicitations are issued after the effective date of this section:

(1) *Doorways.* (i) Passenger doorways on vehicle sides shall have clear openings at least 32 inches wide when open.

(ii) The international accessibility symbol shall be displayed on the exterior of each vehicle operating on a wheelchair accessible rapid rail system.

(iii) Audible warning signals shall be provided to alert elderly and handicapped persons of closing doors.

(iv) Where the vehicle will operate in a wheelchair accessible station, the design of vehicles shall be coordinated with the boarding platform design in order to minimize the gap between vehicle doorway and the platform and to permit safe passage by wheelchair users and other elderly and handicapped persons.

(2) *Priority seating signs.* In order to maximize the safety of elderly and handicapped persons, each vehicle shall contain clearly legible signs which indicate that certain seats are priority seats for elderly and handicapped persons and which encourage other passengers to make such seats available to elderly and handicapped persons who wish to use them.

(3) *Interior handrails and stanchions.* (i) Handrails and stanchions shall be sufficient to permit safe boarding, onboard circulation, seating and standing assistance, and unboarding by elderly and handicapped persons.

(ii) Handrails, stanchions, and seats shall be located so as to allow a wheelchair user to enter the vehicle and position the wheelchair in a location which does not obstruct the movement of other passengers.

(iii) *Floor surfaces.* All floors shall have slip-resistant surfaces.

(c) *Light Rail Vehicles.* The following standards apply to all light rail vehicles for which procurement solicitations are issued after the effective date of this section:

(1) *Doorways.* (i) Passenger doorways on vehicles shall have clear openings at least 32 inches wide when open.

(ii) The international accessibility symbol shall be displayed on the exterior of each vehicle operating on a wheelchair accessible light rail system.

(iii) Audible warning signals shall be provided to alert elderly and handicapped persons of closing doors.

(iv) The design of level-entry vehicles shall be coordinated with the boarding platform design in order to minimize the gap between the vehicle doorway and the platform and to permit safe passage by wheelchair users and other elderly and handicapped persons.

(2) *Priority seating signs.* In order to maximize the safety of elderly and handicapped persons, each vehicle shall contain clearly legible signs which indicate that certain seats are priority seats for elderly and handicapped persons and which encourage other passengers to make such seats available to elderly and handicapped persons who wish to use them.

(3) *Interior handrails and stanchions.* (i) On vehicles which require use of steps in the boarding process, handrails and stanchions shall be provided in the entranceway to the vehicle in a configuration which allows elderly and handicapped persons to grasp such assists from outside the vehicle while starting to board, and to continue using such assists throughout the boarding process.

(ii) On level-entry vehicles, handrails, stanchions, and seats shall be located so as to allow a wheelchair user to enter the vehicle and position the wheelchair in a location which does not obstruct the movement of other passengers.

(iii) On all vehicles, handrails and stanchions shall be sufficient to permit safe boarding, onboard circulation, seating and standing assistance, and unboarding by elderly and handicapped persons.

(4) *Floor and step surfaces.* (i) All floors and steps shall have slip-resistant surfaces.

(ii) Any step edges shall have a band of bright contrasting color(s) running the full width of the step.

(5) *Lighting in step-entry.* (i) Any stepwell immediately adjacent to the driver shall have, when the door is open, at least 2 foot-candles of illumination measured on the step tread.

(ii) Other stepwells shall have, at all times, at least 2 foot-candles of illumination measured on the step tread.

(iii) The vehicle doorways shall have outside lights which provide at least 1 foot-candle of illumination on the street surface for a distance of 3 feet from all points on the bottom step tread edge. Such lights shall be located below window level and shielded to protect the eyes of entering and exiting passengers.

(d) *Other Vehicles.* Requirements for vehicles not covered by this section will be determined by UMTA on a case-by-case basis as part of the project approval process.

§ 37.139 Reduced fares.

Applicants for or recipients of financial assistance under section 9 of the Urban Mass Transportation Act of 1964, as amended, shall, as a condition of receiving such assistance, give satisfactory assurances, in such manner and form as may be required by the Urban Mass Transportation Administrator, that the rates charged elderly and handicapped persons during nonpeak hours for transportation utilizing or involving the facilities and equipment of the project financed with assistance under section 9 will not exceed one-half of the rates generally applicable to other persons at peak hours, whether the operation of such facilities and equipment is by the applicant or is by another entity under lease or otherwise.

14 CFR Part 67

Review of Medical Standards and Certification Procedures; Availability of Report and Request for Comments; Proposed Rule

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 67

[Docket No. 23190]

Review of Medical Standards and Certification Procedures; Availability of Report and Request for Comments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Announcement of the availability of a report and request for comments.

SUMMARY: This notice announces the availability of a report by the American Medical Association on its professional review of the medical standards for civil airmen. The report was produced as part of the Federal Aviation Administration's comprehensive review of the medical standards contained in Part 67 of the Federal Aviation Regulations. Interested persons are invited to submit comments.

DATES: Comments should be submitted on or before August 21, 1986.

ADDRESS: Comments regarding this report may be mailed in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Docket No. 23190, 800 Independence Avenue, SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: William H. Hark, M.D., Aeromedical Standards Division (AAM-200), Office of Aviation Medicine, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591, Telephone (202) 426-3802.

SUPPLEMENTARY INFORMATION:

Background

On July 9, 1982, the Federal Air Surgeon announced (47 FR 30795; July 15, 1982) the initial step of a comprehensive review of the medical standards contained in Part 67 of the Federal Aviation Regulations (FAR). Interested persons were invited to submit to the Federal Aviation Administration (FAA) (Docket No. 23190) for consideration during future rulemaking actions any comments or suggestions, either on a specific section or sections or on Part 67 in general. That docket will remain open until the date specified under "DATES," above. All comments received are available for inspection in the FAA Rules Docket.

As part of the review process, the FAA initiated a contract with the American Medical Association (AMA) for provision of the necessary professional and technical information. The FAA specified that the AMA's final report detail the results of a total and comprehensive review of the medical standards for airman medical certification and their application to enable the FAA to determine the medical fitness of applicants for exercise of airman privileges. The FAA directed that the report consider pertinent advances in the field of medicine since 1959, determine what changes in FAA medical standards, if any, are warranted, and explain the rationale for such changes.

The AMA presented its report, "Review of Part 67 of the Federal Air Regulations and the Medical Certification of Civilian Airmen," on March 26, 1986. A synopsis of the 750-page, 2-volume study was published in the Journal of the American Medical Association (JAMA Vol. 255, No. 12, pp. 1589-1599) on March 28, 1986, and is available at many libraries. Copies of the synopsis also may be obtained without charge from Alan L. Engelberg, M.D., Department of Public Health Policy, American Medical Association, 535 North Dearborn Street, Chicago, Illinois 60610, or from William H. Hark, M.D., Aeromedical Standards Division (AAM-200), Office of Aviation Medicine, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591. Copies of the full report will be available from Dr. Hark until July 1, 1986. A check in the amount of $37.70, payable to the Treasurer of the United States, must accompany all requests for the full report. After July 1, 1986, the full report will be available from the National Technical Information Service (NTIS), Springfield, Virginia 22161 (accession numbers AD A166 464, Volume I, and AD A166 465, Volume II).

Comments Invited

Interested persons are invited to submit comments or suggestions, either on a specific section or sections of the FAR or to the AMA report in general. Comments should include the commenter's name and specifically identify the section of the FAR or the element of the AMA report being addressed. Comments will not be answered individually but will be considered during future rulemaking actions. All comments received will be available for inspection in the FAA Rules Docket, Room 916, 800 Independence Avenue SW., Washington, DC, between 8:30 a.m. and 5 p.m. weekdays, except Federal holidays. Persons who wish their comments to be considered should submit them on or before the close of the comment period indicated under "DATES," above.

Persons interested in being placed on the mailing list for future rulemaking actions resulting from this review should request a copy of Advisory Circular No. 11-2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure. The advisory circular may be obtained by writing to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Inquiry Center (APA-430), 800 Independence Avenue SW., Washington, DC 20591 or by calling (202) 426-8058.

Issued in Washington, DC, on May 16, 1986.

Frank H. Austin, Jr.,

Federal Air Surgeon.

Part IV

Department of the Interior

Minerals Management Service

Gulf of Mexico OCS Region; Proposed 1988 Lease Sales; Call for Information and Nominations and Notice of Intent To Prepare an Environmental Impact Statement

4310-MR

UNITED STATES
DEPARTMENT OF THE INTERIOR
MINERALS MANAGEMENT SERVICE
Proposed 1988 Lease Sales in the
Gulf of Mexico OCS Region
Call for Information and Nominations
and
Notice of Intent to Prepare an Environmental Impact Statement

CALL FOR INFORMATION AND NOMINATIONS

Purpose of Call

The purpose of the Call is to assist the Secretary of the Interior in carrying out his responsibilities under the Outer Continental Shelf Lands Act (OCSLA) (43 U.S.C. 1331-1343), as amended, and regulations appearing at 30 CFR 256.23 with regard to proposed OCS Lease Sales 113, 115, and 116, tentatively scheduled for March, August, and November 1988, respectively. The proposed lease sales are identified in the Proposed 5-Year Outer Continental Shelf Oil and Gas Leasing Program for January 1987 through December 1991, dated February 1986.

This initial information-gathering step is important for ensuring that all interests and concerns are communicated to the Department of the Interior (DOI) for future decision points in the leasing process. It should be recognized that this Notice does not indicate a preliminary decision to lease in the areas described below.

Information submitted in response to this Call will be used for several purposes. First, responses will be used to identify the areas of potential for oil and gas development. Second, comments on possible environmental effects and use conflicts will be used in the analysis of environmental conditions in and near the Call area. Together these two considerations will allow a preliminary determination of the potential advantages and disadvantages of oil and gas exploration and development to the region and the Nation. Thus, it may be possible to make key decisions in connection with the next step in the planning process--Area Identification--to resolve conflicts by deleting areas where there is sufficient information to justify that action. However, the Area Identification represents only a preliminary step to select the area to be analyzed in the environmental impact statement (EIS). The Area Identification is scheduled for August 1986.

A third purpose for this Notice is to use the comments collected to initiate scoping of the EIS, which will include public meetings, and to identify and analyze alternatives to the proposed action. A Notice of Intent to Prepare an EIS which covers scoping is located later in this document. Fourth, comments may be used in developing lease terms and conditions to assure safe offshore operations. Fifth, comments may be used in understanding and considering ways to avoid or mitigate potential conflicts between offshore oil and gas activities and the Gulf Coast States' Coastal Management Programs (CMP).

Description of Area

The general area of this Call covers the entire Gulf of Mexico which lies between approximately 81° W. longitude on the east and approximately 97° W. longitude on the west and extends from the Federal-State boundaries seaward to approximately 26° N. latitude and to approximately 24° N. latitude for southwest Florida. The entire Call area is offshore the states of Texas, Louisiana, Mississippi, Alabama, and Florida. This area is divided into three planning areas for individual 1988 lease sales in the Central, Western, and Eastern Gulf of Mexico.

The Central Gulf of Mexico (CGOM) planning area is bounded on the east by approximately 86° W. longitude. Its western boundary begins at the offshore boundary between Texas and Louisiana and proceeds southeasterly to approximately 28° N. latitude, thence east to approximately 92° W. longitude, and thence south to approximately 26° N. latitude. The northern part of the area is bounded by the Federal-State boundary offshore Louisiana, Mississippi, and Alabama. The area extends south to approximately 26° N. latitude.

The Western Gulf of Mexico (WGOM) planning area is bounded on the west and north by the Federal-State boundary and on the east by the Central Gulf of Mexico planning area. The area extends south to approximately 26° N. latitude.

The Eastern Gulf of Mexico (EGOM) planning area is described as follows: South from the territorial sea at approximately 87° 45' W. longitude to approximately 29° N. latitude thence west to approximately 87° 55' W. longitude thence south to approximately 26° N. latitude thence east to approximately 86° 55' W. longitude thence south to the limit of U.S. jurisdiction thence southeast to approximately 83° 58' W. longitude at approximately 23° 55' N. latitude thence east to 83° W. longitude thence north to the limits of the territorial sea thence east to approximately 82° 25' W. longitude thence north and east along the territorial sea to the limits of U.S. jurisdiction thence along the territorial sea to the point of origin.

The following list comprises the Leasing Maps and the OCS Official Protraction Diagrams used in identifying this Call area. These maps and diagrams may be purchased from the Public Information Unit, Gulf of Mexico OCS Region, at the address stated below under "Instructions on Call".

1. Central Gulf of Mexico (CGOM)

Leasing Maps

Outer Continental Shelf Leasing Maps - Louisiana Nos. 1 through 12.

This set of 27 maps sells for $17.00.

Outer Continental Shelf Official Protraction Diagrams

These diagrams sell for $2.00 each.

		Revision Date
NH 15-12	Ewing Bank	December 2, 1976
NH 16-4	Mobile	April 19, 1983
NH 16-7	Viosca Knoll	December 2, 1976
NH 16-10	Mississippi Canyon	December 2, 1976
NG 15-3	Green Canyon	December 2, 1976
NG 15-6	Walker Ridge	December 2, 1976
NG 16-1	Atwater Valley	November 10, 1983
NG 16-4	(No Name)	December 2, 1976

2. Western Gulf of Mexico (WGOM)

Leasing Maps

Outer Continental Shelf Leasing Maps - South Texas Nos. 1 through 4. This set of seven maps sells for $5.00

Outer Continental Shelf Leasing Maps - East Texas Nos. 5 through 8. This set of nine maps sells for $7.00.

Outer Continental Shelf Official Protraction Diagrams

These diagrams sell for $2.00 each.

		Revision Date
NG 14-3	Corpus Christi	January 27, 1976
NG 14-6	Port Isabel	January 27, 1976
NG 15-1	East Breaks	January 27, 1976
NG 15-2	Garden Banks	December 2, 1976
NG 15-4	Alaminos Canyon	March 26, 1976
NG 15-5	Keathley Canyon	December 2, 1976

3. Eastern Gulf of Mexico (EGOM)

Outer Continental Shelf Official Protraction Diagrams

These Diagrams sell for $2.00 each.

		Approval or Revision Date
NG 16-3	The Elbow	Revised December 2, 1976
NG 16-5	(No Name)	Approved December 2, 1976
NG 16-6	Vernon Basin	Revised November 10, 1983
NG 16-9	Howell Hook	Approved April 18, 1979

		Approval or Revision Date
NG 17-1	St. Petersburg	Revised June 2, 1983
NG 17-4	Charlotte Harbor	Revised June 2, 1983
NG 17-7	Pulley Ridge	Approved October 24, 1978
NG 17-8	Miami	Approved October 24, 1978
NG 17-10	Dry Tortugas	Approved April 8, 1981
NG 17-11	Key West	Approved January 29, 1979
NH 16-5	Pensacola	Revised June 2, 1983
NH 16-8	Destin Dome	Revised December 2, 1976
NH 16-9	Apalachicola	Revised June 2, 1983
NH 16-11	DeSoto Canyon	Revised December 2, 1976
NH 16-12	Florida Middle Ground	Revised December 2, 1976
NH 17-7	Gainesville	Revised June 2, 1983
NH 17-10	Tarpon Springs	Revised June 2, 1983

Areas Deferred from this Call

1. Seagrass beds - offshore Florida (EGOM).

2. Florida Middle Ground - offshore Florida (EGOM).

3. Naval Deferral Area, in NH 16-8, Destin Dome Area, includes the following blocks (EGOM) deferred for carrier operations in Warning Area W-155.

Blocks	Blocks
133 through 148	485 through 500
177 through 192	529 through 544
221 through 234	573 through 588
265 through 279	618 through 632
309 through 324	662 through 676
353 through 368	705 through 720
397 through 412	749 through 764
441 through 456	793 through 808

4. High Island Area, East Addition, South Extension, dated October 19, 1981, (Flower Gardens), Block A-375 and Block A-398 (WGOM).

Instructions on Call

A standard Call map specific to this event delineates the Call area and shows the area identified by the Minerals Management Service (MMS) as having potential for the discovery of accumulations of oil and gas. Respondents are requested to indicate interest in and comment on any or all of the Federal acreage within the boundaries of the Call area that they wish to have included in the 1988 Lease Sales. Boundaries of the Call area are shown on the standard Call for Information Map available free from the Public Information

BEST COPY AVAILABLE

BEST COPY AVAILABLE

Unit, Gulf of Mexico OCS Region, Minerals Management Service, Post Office Box 7944, 3301 N. Causeway Blvd., Metairie, Louisiana 70010, telephone (504) 838-0519. Although individual indications of interest are considered to be privileged and proprietary information, the names of persons or entities indicating interest or submitting comments will be of public record. Those indicating such interest are required to do so on the standard Call for Information Map. Interest should be shown by outlining the areas of interest along block lines.

Respondents should rank areas in which they have expressed interest according to priority of their interest (e.g., priority 1 (high), 2, or 3). If there are areas within the Call area in which respondents have no interest, no priority should be assigned to them. Areas where interest has been indicated but on which respondents have not indicated any priorities will be considered priority 3. The telephone number and name of a person to contact in the respondent's organization for additional information should be included. Information concerning both location and priority of interest submitted by individual companies will be held proprietary and will be used as criteria in determining the areas to be analyzed in the EIS. In addition to the indications of interest by respondents, further consideration of areas for analysis in the EIS will be based on hydrocarbon potential and environmental, economic, and multiple-use conditions.

Comments are requested on the technology presently available or anticipated for exploration and development operations in deepwater areas.

Comments are sought from all interested parties about particular geological, environmental, biological, archaeological, socioeconomic conditions, conflicts, or other information which might bear upon the potential leasing and development of particular areas. Comments are also sought on possible conflicts between future OCS oil and gas activities that may result from the proposed sales and State CMP's. If possible, these comments should identify specific CMP policies of concern, the nature of the conflict foreseen, and steps that the MMS could take to avoid or mitigate the potential conflict. Comments may either be in the terms of broad areas or restricted to particular blocks of concern. Those submitting comments are requested to outline the subject area on the standard Call map.

Indications of interest and comments must be received no later than 45 days following publication of this document in the Federal Register in envelopes labeled "Nominations for Proposed 1988 Lease Sales in the Gulf of Mexico" or "Comments on the Call for Information and Nominations for Proposed 1988 Lease Sales in the Gulf of Mexico."

The standard Call map and indications of interest and/or comments must be submitted to the Regional Supervisor, Leasing and Environment, Gulf of Mexico OCS Region, at the address stated above under "Instructions on Call."

Tentative Schedule

Final delineation of the areas for possible leasing will be made at a later date only after compliance with established Departmental procedures, all requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321-4347), and the OCSLA, as amended. A final Notice of Sale for each sale held will be published in the Federal Register detailing areas to be offered for competitive bidding, stating the terms and conditions for leasing, and announcing the location, date, and time bids will be received and opened.

The following is a list of tentative milestones which will precede these sales, proposed for 1988:

	CGOM Sale 113	WGOM Sale 115	EGOM Sale 116
Comments due on the Call	July 1986	July 1986	July 1986
Area Identification	August 1986	August 1986	August 1986
Scoping comments due	July 1986	July 1986	July 1986
Draft EIS published	April 1987	April 1987	April 1987
Hearings held on draft EIS	May 1987	May 1987	May 1987
Final EIS published	October 1987	October 1987	October 1987
Proposed Notice of Sale published	November 1987	April 1988	July 1988
Governor's comments due on proposed Notice	January 1988	June 1988	September 1988
Final Notice of Sale published	February 1988	July 1988	October 1988
Sale	March 1988	August 1988	November 1988

Existing Information

Information already available includes that previously gathered during the EIS process for the Proposed 5-Year Oil and Gas Leasing Program. In addition, comments previously received by the DOI from State and local governments, other Federal Agencies, environmental groups, and the oil and gas industry concerning past OCS actions will be used. The following is a list of other information which will be available to the DOI for consideration regarding the proposed 1988 OCS Lease Sales in the Gulf of Mexico.

Gulf of Mexico Indices and Summary Reports

1. Gulf of Mexico Index, December 1980 through August 1982, prepared for MMS.
2. Gulf of Mexico Index, September 1982 through July 1983, prepared for MMS.
3. Gulf of Mexico Summary Report, September 1983, prepared for MMS.
4. Gulf of Mexico Summary Report, September 1984, prepared for MMS.
5. Gulf of Mexico Summary Report, September 1985, prepared for MMS.

Environmental Studies Program Information in the Central, Western, and Eastern Gulf of Mexico

The DOI initiated studies in these areas in 1973. The emphasis, including continuing studies, has been on geological mapping, environmental characterization of biologically sensitive habitats, physical oceanography, ocean circulation modeling, and ecological effects of oil and gas activities. These studies will provide useful information for a number of environmental issues, including topographic features, deepwater biological communities on the continental slope, and coastal wetland habitats.

A complete listing of available study reports and information for ordering copies can be obtained from the Gulf of Mexico Regional Office at the address stated under "Instructions on Call," or by telephone at (504) 838-0519, Public Information Unit. The reports may also be ordered for a fee directly from the National Technical Information Service by calling (703) 487-4650. The mailing address is U.S. Department of Commerce, National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161.

In addition, a program status report for continuing studies in this area can be obtained from the Chief, Environmental Studies Section, Gulf of Mexico Regional Office at the address stated under "Instructions on Call" or by telephone at (504) 838-0896.

NOTICE OF INTENT TO PREPARE AN ENVIRONMENTAL IMPACT STATEMENT

Purpose of Notice of Intent

Pursuant to the regulation (40 CFR 1501.7) implementing the procedural provision of the National Environmental Policy Act of 1969 (42 U.S.C. 4321-4347), the MMS is announcing its intent to prepare an EIS regarding the oil and gas leasing proposals known as Sale 113 in the Central Gulf of Mexico, Sale 115 in the Western Gulf of Mexico, and Sale 116 in the Eastern Gulf of Mexico . The Notice of Intent also serves to announce the scoping process which will be followed for the EIS. The scoping process is intended to involve Federal, State and local governments and other interested parties in aiding the MMS in determining the significant issues and alternatives to be analyzed in the EIS.

The EIS analysis will focus on the potential environmental effects of leasing, exploration, and development of the blocks included in the areas defined in the Area Identification procedure as the proposed areas of the Federal actions. Alternatives to the proposal which may be considered for each sale are to delay the sale, cancel the sale, or modify the sale.

Instructions on Notice of Intent

Federal, State, and local governments and other interested parties are requested to send their written comments on the scope of the EIS, significant issues which should be addressed, and alternatives which should be considered to the Regional Supervisor, Leasing and Environment, Gulf of Mexico OCS Region, at the address stated under "Instructions on Call" above. Comments should be enclosed in an envelope labeled "Comments on the Notice of Intent to Prepare an EIS on the Proposed 1988 Lease Sales in the Gulf of Mexico. Comments are due no later than 45 days from the publication of this Notice. Also, scoping meetings will be held in appropriate locations for the purpose of obtaining additional comments and information regarding the scope of the EIS. The times and locations of these scoping meetings will be announced at a future date in the Federal Register and by press release.

Part V

Department of Energy

Minority Economic Impact Office

Minority Educational Institution Assistance Program; Notice

DEPARTMENT OF ENERGY

Office of Minority Economic Impact

Minority Educational Institution Assistance Program

AGENCY: Office of Minority Economic Impact, Energy.

ACTION: Notice of Program Interest.

General Information

The Department of Energy (DOE), Office of Minority Economic Impact, through the Oak Ridge Operations Office, in order to further the Office's goals of providing technical assistance to minority educational institutions, desires to encourage the submission of unsolicited proposals in support of the Department's Minority Educational Institution Assistanc Program at minority educational institutions. Such support is authorized by 42 U.S.C. 7141(d) and 7256(a); Executive Order 12320, which states that the Director of the Office of Minority Economic Impact may provide technical assistance to minority educational institutions. It is intended, in particular, to obtain proposals relating to the objectives identified below, from qualified minority educational institutions, or from teams of organizations including minority educational institutions. For purposes of this notice, a qualified minority educational institution is a school of higher learning (such as a college or university) that is a non-profit entity with more than 50 percent total minority enrollment. This notice describes the principal scope of the activity and provides some guidance on submitting proposals.

Nature of Proposals Sought

With this notice, it is DOE's intent to stimulate proposals for minority educational institution assistance for management and technical infrastructure support that would address the following program objectives:

1. Initiate energy-related research and development collaboration using the cluster model involving minority educational institutions.

2. Develop energy-related science and technology research centers at minority educational institutions.

3. Identify and institute arrangements between minority educational institutions that expand the private sector support provided to these institutions.

4. Develop linkages between minority community, technical, and junior colleges and minority four-year institutions to increase the pool of minorities engaged in science and technology.

5. Support the development of joint activities between minority educational institutions and the private sector.

Eligibility

Institution

To be eligible to participate in this program, an institution must have more than 50 percent minority enrollment, and award a masters degree or doctoral degree in the physical sciences or engineering. This program is open only to institutions within the United States and its territories. Institutions having more than one eligible component may choose whether to apply on behalf of the institution as a whole or to submit freestanding applications on behalf of one or more components. Individual components of a university, university system, or other institution are separately eligible.

Principal Investigator

The Principal Investigator should be the President/Chancellor of the applicant institution or another high-ranking official designated as the surrogate for the purpose of this award. The Principal Investigator is the representative and spokesperson for the institution in matters concerning the award. The Principal Investigator should be available for consultation with the Program Manager and assist in resolving issues or problems encountered by the Program Manager in the management of the project.

Award Size and Duration

The FY 1986 budget for this program is $300,000, and the FY 1987 budget is $350,000. It is estimated that these combined funds will support awards as follows:

1. Infrastructure Support—Two awards over a 24-month period.

2. Private Sector Interrelationships—Two awards over an 18-month period.

These estimates do not bind the U.S. Department of Energy to a specific number of awards unless otherwise specified by statute or regulations. Renewals of the awards may be negotiated not to exceed 24 months subject to availability of funds.

Evaluation Process and Selection Criteria

Proposals may be subjected to external review following preliminary screening based on the criteria listed below. Projects will be selected for funding based on their quality as determined by DOE staff evaluation of the merit of the proposal using the following general criteria as required by the Department of Energy Financial Assistance Regulations, 10 CFR Part 600, and the specific evaluation criteria outlined in the Guide for the Preparation of Proposals for the Minority Educational Institution Assistance Program—1986.

—The potential contribution which the proposed effort is expected to make to the program's objectives, if pursued at this time.

—Evidence of overall merit.

—Unique capabilities, related experience, facilities, techniques of the university staff, or combinations of these, as integral factors for achieving the scientific, technical, or socioeconomic objectives of the proposal.

—Use of unique, innovative, or meritorious methods, approaches, or ideas

—Qualifications, capabilities, and experience of the proposed principal university investigator and key personnel who are considered to be critical in achieving proposal objectives.

More specific evaluation criteria will be available in the "Guide for the Preparation of Proposals for the Minority Educational Institution Assistance Program—1986."

Proposal Preparation Guidelines

Unsolicited proposals submitted in response to this notice shall contain the information required in the "Guide for the Preparation of Proposals for the Minority Educational Institution Assistance Program—1986," Notice of Program Interest Number DE–PI05–86MI10093. Copies of the guide are expected to be ready for mailing by April 30, 1986. Qualified applicants may obtain a copy of the guide by writing to the U.S. Department of Energy, Oak Ridge Operations, Procurement and Contracts Division, Attention: Marlena Clark, 200 Administration Road, P.O. Box E, Oak Ridge, Tennessee 37831; Telephone Number: (615) 576–7599.

DOE assumes no responsibility for any costs associated with proposal preparation under this announcement.

Closing Date for Submission of Proposals

To be eligible, proposals must be received by the Department of Energy at the Oak Ridge, Tennessee address in the preceding section by 4:30 p.m., June 30, 1986.

FOR FURTHER INFORMATION CONTACT: All technical questions concerning this Notice of Program Interest should be directed to Mr. Rufus Smith, EEO

Manager, Oak Ridge Operations, U.S. Department of Energy, P.O. Box E, Oak Ridge, Tennessee 37831; Telephone: (615) 576–4668. All other inquiries should be directed to Mr. Charles Crowe, Contracting Officer, Procurement and Contracts Division, Oak Ridge Operations, U.S. Department of Energy, P.O. Box E, Oak Ridge, Tennessee 37831; Telephone: (615) 576–0794.

Dated: April 21, 1986.

Peter D. Dayton,

Director, Procurement and Contracts Division.

LIST OF PUBLIC LAWS

Last List May 22, 1986

This is a continuing list of public bills from the current session of Congress which have become Federal laws. The text of laws is not published in the Federal Register but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone 202–275–3030).

H.J. Res. 427 / Pub. L. 99–310

Designating the week beginning on May 11, 1986, as "National Asthma and Allergy Awareness Week." (May 20, 1986; 100 Stat. 483; 1 page) Price: $1.00

H.R. 1207 / Pub. L. 99–311

To award a special gold medal to the family of Harry

Chapin. (May 20, 1986; 100 Stat. 464; 1 page) Price: $1.00

S.J. Res. 347 / Pub. L. 99-313

To designate the week of June 1 through through June 7, 1986, as "National Theatre Week." (May 20, 1986; 100 Stat. 465; 1 page) Price: $1.00

S.J. Res. 351 / Pub. L. 99-312

To designate the week of May 11, 1986, through May 17, 1986, as "National Science Week, 1986." (May 20, 1986; 100 Stat. 466; 2 pages) Price: $1.00

S.J. Res. 323 / Pub. L. 99-314

To designate May 21, 1986, as "National Arched Eyebrows Day." (May 20, 1986; 100 Stat. 468; 2 pages) Price: $1.00

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The Federal Register will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the Federal Register.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:

1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

SEATTLE, WA

WHEN: July 22; at 1:30 pm.

WHERE: North Auditorium, Fourth Floor, Federal Building, 915 2nd Avenue, Seattle, WA.

RESERVATIONS: Call the Portland Federal Information Center on the following local numbers:

Seattle 206-442-0570
Tacoma 206-383-5230
Portland 503-221-2222

SAN FRANCISCO, CA

WHEN: July 24; at 1:30 pm.

WHERE: Room 2007, Federal Building, 450 Golden Gate Avenue, San Francisco, CA.

RESERVATIONS: Call the San Francisco Federal Information Center, 415-556-6600

Title 3—

The President

Proclamation 5488 of May 21, 1986

National Farm Safety Week, 1986

By the President of the United States of America

A Proclamation

Our remarkable agricultural system has enabled our Nation to make great strides in efforts to conquer hunger and to meet the food and fiber needs of our people as well as countless others around the world. But we cannot afford to let up in the battle against accidental injuries and illnesses that take an unduly high toll of those whose toil is responsible for this abundance.

Each year, many thousands of farm and ranch residents and workers are seriously or fatally injured at work, in the home, during recreation, and in traffic accidents.

Although much has been accomplished over the years to make farm life safer and healthier, much more remains to be done. Everyone in the agricultural community should make renewed efforts to be informed about potential hazards and take steps to minimize those dangers. This includes the conscientious use of mechanical safeguards like protective equipment and safety belts. I commend our farm equipment manufacturers for their emphasis on building safeguards into their equipment and warning of possible hazards in operational misuse, but there is no substitute for vigilance and common sense in using equipment. Awareness, on the job and off, is the surest way to avert mishaps and tragedies.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the week of September 21 through September 27, 1986, as National Farm Safety Week. I urge all those who live and work on farms or ranches to take necessary precautions to protect their safety and health—on the job and off. I also urge leaders in the agricultural community to bolster safety and health efforts in your area by example and by educational programs. I encourage all Americans to participate in appropriate events and activities in observance of National Farm Safety Week.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-first day of May, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 51, No. 101
Tuesday, May 27, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

Federal Aviation Administration

14 CFR Part 39

[Docket Number 86-ANE-1, Amdt. 39-5311]

Airworthiness Directives; General Electric Company (GE) CF6-50 and -45 Turbofan Engines.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires the removal from service of certain high pressure turbine rotor (HPTR) stage 1 disks installed on certain GE CF6-50 and -45 turbofan engines. The AD is needed to prevent crack initiation in the HPTR stage 1 disk forward embossment radii which could result in an uncontained HPTR stage 1 disk failure.

DATES: Effective June 29, 1986. Compliance required as indicated in the body of the AD. Incorporation by Reference—Approved by the Director of the Federal Register on June 29, 1986.

ADDRESSES: The applicable service bulletin (SB) may be obtained from General Electric Company, 1 Neumann Way, Cincinnati, Ohio 45215.

A copy of the SB is contained in the Rules Docket, Number 86-ANE-1, Office of the Regional Counsel, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, and may be examined between the hours of 8:00 a.m. to 4:30 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Jeff Blazey, Engine Certification Branch, ANE-142, Engine Certification Office, Aircraft Certification Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, telephone (617) 273-7090.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations (FAR) to include an AD which would require the removal from service of certain HPTR stage 1 disks installed on certain GE CF6-50 and -45 turbofan engines was published in the Federal Register on March 11, 1986, (51 FR 8332).

The proposal was prompted by the finding that certain CF6-50 and -45 HPTR stage 1 disks may contain forward embossment radii contours which do not conform to the FAA approved type design. This condition adversely affects the fatigue strength of the disk, requiring its removal from service.

Interested persons have been afforded an opportunity to participate in the making of this amendment. One comment was received. The commenter was in agreement with the proposal. Accordingly, the proposal is adopted without change to the compliance requirements.

Conclusion

The FAA has determined that this regulation involves 99 HPTR stage 1 disks installed in some CF6-50 and -45 engines, core modules, or stocked as spares, and that the approximate cost per disk is $99,000. It was also determined that a substantial number of small entities are not affected as these engines are installed on large transport aircraft, the operators of which are not small entities. Therefore, I certify that this action (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) will not have a significant impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified under the caption "FOR FURTHER INFORMATION CONTACT".

Engines, Air transportation, Aircraft, Aviation safety, Incorporation by reference.

PART 39—[AMENDED]

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) amends Part 39 of the Federal Aviation Regulation (FAR) as follows:

1. The authority citation for Part 39 continues to read as follows:

Authority: 49 U.S.C. 1354(a), 1421 and 1423; 49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983); and 14 CFR 11.89.

§ 39.13 [Amended]

2. By adding to § 39.13 the following new airworthiness directive (AD):

General Electric Company: Applies to General Electric (GE) CF6-50 and -45 turbofan engines.

To prevent possible failure of high pressure turbine rotor (HPTR) stage 1 disk, accomplish the following:

(a) Remove from service, in accordance with General Electric (GE) Alert Service Bulletin (SB) A72-650, Revision 1, dated January 1, 1986, those HPTR stage 1 disks identified by specific serial numbers listed in GE Alert SB A72-650, Revision 1, under Paragraph 2., Table 1, for inspection to determine conformance with the FAA approved type design.

(b) Compliance required as follows:

(1) For those disks with less than 5,400 flight cycles since new on the effective date of this AD, comply prior to the accumulation of 5,500 flight cycles

(2) For those disks with 5,400 or greater flight cycles since new on the effective date of this AD, comply within the next 10 flight cycles.

(c) Those HPTR stage 1 disks which do not conform to the FAA approved type design will be retired from services.

(d) Those HPTR stage 1 disks which conform to the FAA approved type design may be returned to service.

Note: For the purpose of this AD, the number of flight cycles equals the number of

flights that involve an engine operating sequence consisting of engine starting, takeoff operation, landing and engine shutdown.

Aircraft may be ferried in accordance with the provisions of FAR Part 21.197 and 21.199 to a base where the AD can be accomplished.

Upon request, an equivalent means of compliance with the requirements of this AD may be approved by the Manager, Engine Certification Office, Aircraft Certification Division, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803.

Upon submission of substantiating data by an owner or operator through an FAA maintenance inspector, the Manager, Engine Certification Office may adjust the compliance time specified in this AD.

GE Alert SB A72-253, Revision 1, dated January 1, 1986, identified and described in this document, is incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received this document from the manufacturer may obtain copies upon request to General Electric Company, 1 Neumann Way, Cincinnati, Ohio 45215. This document also may be examined at the Office of the Regional Counsel, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, between the hours of 8:00 a.m. and 4:30 p.m. Monday through Friday, except Federal holidays.

This amendment becomes effective on June 23, 1986.

Issued in Burlington, Massachusetts, on May 8, 1986.

Robert E. Whittington,

Director, New England Region.

14 CFR Part 71

[Airspace Docket No. 86-AGL-7]

Alteration of Control Zone and Transition Area; Muncie, IN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this action is to alter the Muncie, Indiana, control zone and transition area to accommodate increasing turbojet operations at Delaware County-Johnson Field, Indiana.

The intended effect of this action is to ensure segregation of the aircraft using approach procedures in instrument conditions from other aircraft operating under visual weather conditions in controlled airspace.

This docket action is being processed simultaneously along with control zone/transition area alterations at Alexandria and Anderson, Indiana, Docket Nos. 86-AGL-5 and 86-AGL-6, respectively.

EFFECTIVE DATE: 0901 UTC, August 28, 1986.

FOR FURTHER INFORMATION CONTACT: Edward R. Heape, Air Traffic Division, Airspace Branch, AGL-520, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694-7360.

SUPPLEMENTARY INFORMATION:

History

On Tuesday, March 25, 1986, the Federal Aviation Administration (FAA) proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Muncie, Indiana, control zone and transition area (51 FR 10225).

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received.

Except for editorial changes, this amendment is the same as that proposed in the notice. Sections 71.171 and 71.181 of Part 71 of the Federal Aviation Regulations were republished in Handbook 7400.8B dated January 2, 1986.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations alters the Muncie, Indiana, control zone and transition area to accommodate increasing turbojet operations at Delaware County-Johnson Field. The control zone is being expanded to the southeast and north and is being reduced to the northwest. The transition area radius is being expanded 1.5 miles and all extensions are being deleted.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zones, Transition areas.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C 106(g) (Revised Pub. L. 97-449), January 12, 1983); 14 CFR 11.69.

§ 71.171 [Amended]

2. Section 71.171 is amended as follows:

Muncie, IN [Amended]

Within a 5-mile radius of Delaware County-Johnson Field (lat. 40°14'31" N., long. 85°23'47" W.); within 3 miles each side of the Muncie VORTAC 125 radial, extending from the 5-mile radius zone to 8.5 miles southeast of the VORTAC; within 3 miles each side of the Muncie VORTAC 014 radial, extending from the 5-mile radius zone to 8.5 miles north of the VORTAC; and within 3 miles each side of the Muncie VORTAC 321 radial, extending from the 5-mile radius zone to 8.5 miles northwest of the VORTAC. This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport/Facility Directory.

§ 71.181 [Amended]

3. Section 71.181 is amended as follows:

Muncie, IN [Amended]

That airspace extending upward from 700 feet above the surface, within an 8.5-mile radius of Delaware County-Johnson Field (lat. 40°14'31" N., long. 85°23'47" W.).

Issued in Des Plaines, Illinois, on May 15, 1986.

Teddy W. Burcham,

Manager, Air Traffic Division.

14 CFR Part 71

[Airspace Docket No. 86-AGL-5]

Alteration of Transition Area—Alexandria, IN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this action is to alter the Alexandria, Indiana, transition area to accommodate an existing VOR Runway 27 Standard Instrument Approach Procedure (SIAP) to Alexandria, Indiana, Airport.

The intended effect of this action is to ensure segregation of the aircraft using approach procedures in instrument conditions from other aircraft operating under visual weather conditions in controlled airspace.

This docket action is being processed simultaneously along with control zone/transition area alterations at Anderson and Muncie, Indiana, Docket Nos. 86-AGL-6 and 86-AGL-7, respectively.

EFFECTIVE DATE: 0901 UTC, August 28, 1986.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Air Traffic Division, Airspace Branch AGL-520, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694-7300.

SUPPLEMENTARY INFORMATION:

History

On Tuesday, March 25, 1986, the Federal Aviation Administration (FAA) proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Alexandria, Indiana, transition area (51 FR 10224).

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received.

Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations alters the Alexandria, Indiana, transition area to accommodate an existing VOR Runway 27 SIAP to Alexandria, Indiana, Airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Aviation safety, Transition areas.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.18 [Amended]

2. Section 71.181 is amended as follows:

Alexandria, IN [Amended]

That airspace extending upward from 700 feet above the surface, within a 5 mile radius of Alexandria Airport (lat. 40°14'00" N., long. 85°38'15" W.) and within 1.5 miles each side of the 090° bearing from the airport, extending from the 5 mile radius area to 13 miles east of the airport excluding that portion which overlies the Anderson, Indiana, and Muncie, Indiana, transition areas.

Issued in Des Plaines, Illinois, on May 15, 1986.

Teddy W. Burcham,

Manager, Air Traffic Division.

14 CFR Part 71

[Airspace Docket No. 86-AGL-6]

Alteration of Control Zone and Transition Area, Anderson, IN

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this action is to alter the Anderson, Indiana, control zone and transition area to accommodate increasing turbojet operations at Anderson Municipal Airport.

The intent of this action is to eliminate the extensions to the control zone and transition area.

This docket action is being processed simultaneously along with control zone/transition area alterations at Alexandria and Muncie, Indiana, Docket Nos. 86-AGL-5 and 86-AGL-7, respectively.

EFFECTIVE DATE: 0901 UTC, August 28, 1986.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Air Traffic Division, Airspace Branch, AGL-520, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694-7300.

SUPPLEMENTARY INFORMATION:

History

On Tuesday, March 25, 1986, the Federal Aviation Administration (FAA) proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Anderson, Indiana, control zone and transition area (51 FR 10226).

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received.

Except for editorial changes, this amendment is the same as that proposed in the notice. Sections 71.171 and 71.181 of Part 71 of the Federal Aviation Regulations were republished in Handbook 7400.6B dated January 2, 1986.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations alters the Anderson, Indiana, control zone and transition area to accommodate increasing turbojet operations at Anderson Municipal Airport. This action eliminates all control zone and transition area extensions which were found to be unwarranted in accordance with present control zone and transition area criteria.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated

impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Aviation safety, Control zones, Transition areas.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.171 [Amended]

2. Section 71.171 is amended as follows:

Anderson, IN [Amended]

Within a 5-mile radius of Anderson Municipal Airport (lat. 40°06'32" N., long. 85°36'57" W.). This control zone is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport/Facility Directory.

§ 71.181 [Amended]

3. Section 71.181 is amended as follows:

Anderson, IN [Amended]

That airspace extending upward from 700 feet above the surface, within an 8.5-mile radius of Anderson Municipal Airport (lat. 40°06'32" N., long. 85°36'57" W.).

Issued in Des Plaines, Illinois, on May 15, 1986.

14 CFR Part 71

[Airspace Docket No. 86-AGL-9]

Alteration of Transition Area; Bellaire, MI

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this action is to alter the Bellaire, Michigan, transition area to accommodate a new VOR Runway 2 Standard Instrument Approach Procedure (SIAP) to Antrim County Airport.

The intended effect of this action is to ensure segregation of the aircraft using approach procedures in instrument conditions from other aircraft operating under visual weather conditions in controlled airspace.

EFFECTIVE DATE: 0901 UTC, August 28, 1986.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Air Traffic Division, Airspace Branch, AGL-520, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694-7360.

SUPPLEMENTARY INFORMATION:

History

On Tuesday, March 25, 1986, the Federal Aviation Administration (FAA) proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Bellaire, Michigan, transition area (51 FR 10228).

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received.

Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations alters the Bellaire, Michigan, transition area to accommodate a new VOR Runway 2 SIAP to Antrim County Airport. The alteration consists of an extension from the 11-mile radius to 27 miles southwest of the airport with a 4.75 mile width each side of the Traverse City VORTAC 037 radial.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Aviation safety, Transition areas.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Bellaire, MI [Amended]

That airspace extending upward from 700 feet above the surface, within an 11-mile radius of Antrim County Airport (lat. 44°59'19" N., long. 85°11'54" W.) and within 3 miles each side of the 166° bearing from the airport and extending from the 11-mile radius area to 14 miles south of the airport and within 4.75 miles each side of the Traverse City, MI VORTAC 037 radial, extending from the 11-mile radius to 27 miles southwest of the airport, excluding that portion which overlies the Traverse City, Michigan, transition area.

Issued in Des Plaines, Illinois, on May 15, 1986.

14 CFR Part 71

[Airspace Docket No. 86-AGL-10]

Alteration of Transition Area; Rice Lake, WI

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this action is to alter the Rice Lake, Wisconsin, transition area to accommodate a new VOR Runway 36 Standard Instrument Approach Procedure (SIAP) to Rice Lake Municipal Airport.

The intended effect of this action is to ensure segregation of the aircraft using approach procedures in instrument conditions from other aircraft operating under visual weather conditions in controlled airspace.

EFFECTIVE DATE: 0901 UTC, August 28, 1986.

FOR FURTHER INFORMATION CONTACT: Edward R. Heaps, Air Traffic Division, Airspace Branch, AGL–520, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (312) 694–7360.

SUPPLEMENTARY INFORMATION:

History

On Tuesday, March 25, 1986, the Federal Aviation Administration (FAA) proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Rice Lake, Wisconsin, transition area (51 FR 10227).

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received.

Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations alters the Rice Lake, Wisconsin, transition area to accommodate a new VOR Runway 36 SIAP to Rice Lake Municipal Airport. The alteration consists of an 8.5 miles expansion to the south of the VOR from the 5-mile radius with a width of 3 miles each side of the VOR 174 radial.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Aviation safety, Transition areas.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Rice Lake, WI [Amended]

Add the words "; and within 3 miles each side of the Rice Lake VOR 174 radial extending from the 5-mile radius area to 8.5 miles south of the VOR." to the end of the present transition area description.

Issued in Des Plaines, Illinois, on May 15, 1986.

Teddy W. Burcham,

Manager, Air Traffic Division.

14 CFR Part 71

[Airspace Docket No. 86–ANM–22]

Alteration of Billings, MT, Control Zone

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the size of the Billings, Montana, Control Zone. During an annual review, it was determined that the Billings Control Zone could be reduced in size and still contain the instrument approaches to the Logan Field Airport.

EFFECTIVE DATES: 0901 UTC, July 1, 1986.

FOR FURTHER INFORMATION CONTACT: Katherine G. Paul, ANM–535, Federal Aviation Administration, Docket No. 86–ANM–22, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168, Telephone: (206) 431–2535.

SUPPLEMENTARY INFORMATION:

History

On February 28, 1986, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the size of the Billings, Montana, Control Zone (51 FR 7061).

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Except for editorial changes, this amendment is the same as that proposed in the notice. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations alters the size of the Billings, Montana, Control Zone to contain all Instrument Flight Rule arrivals and departures.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Aviation safety, Control zones.

PART 71—[AMENDED]

Adoption of Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); 14 CFR 11.69.

2. § 71.171 is amended as follows:

Billings, Montana [Revised]

Within a 5-mile radius of the Logan International Airport (45°48'29" N lat./108°32'25" W long.) and within 2 miles each side of the 113° bearing from the airport extending from the 5-mile radius area to 7 miles east of the airport; and that airspace between the 220° bearing clockwise to the 170° bearing from the airport extending from the 5-mile radius area to a 6-mile radius.

Issued in Seattle, Washington, on May 14, 1986.

Temple H. Johnson, Jr.,

Acting Manager, Air Traffic Division, Northwest Mountain Region.

BILLING CODE 4910-13-M

DEPARTMENT OF COMMERCE

International Trade Administration

15 CFR Part 385

[Docket No. 60501-6091]

Export Licensing; Controls on Exports to South Africa; Information Collection Control Numbers

AGENCY: Export Administration, Commerce.

ACTION: Final rule; notice of OMB approval.

SUMMARY: The Export Administration Regulations (EAR) contain provisions relating to the licensing of all exports to the South African military and police and prohibits the exports of all computers, computer software, or goods or technology to service computers to all apartheid enforcing entities of the South African Government. The final rule containing these provisions was published in the Federal Register on November 18, 1985 (50 FR 47363) with an effective date of October 11, 1985. This document adds the Office of Management and Budget (OMB) control number 0625-0156 to the information collection requirements of the rule.

DATE: The regulation became effective on October 11, 1985.

FOR FURTHER INFORMATION CONTACT: Betty Ferrell, Regulations Branch, Export Administration, Telephone: (202)377-3856.

SUPPLEMENTARY INFORMATION: OMB control number 0625-0156.

As required by the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*, Export Administration submitted this regulation to OMB for approval of the reporting requirement on prohibiting the export of computers, computer software, or goods or technology to service computers to all apartheid enforcing entities of the South African Government, even though the export could be made under general license to other parties in South Africa. A license authorizing resale within the Republic of South Africa or Namibia, may also require identification of customers to whom the ultimate consignees have sold the computers, with further identification of customers at six month intervals until all computers exported under the license have been sold. As stated in the final rule, the approval of this reporting requirement was pending with OMB. On December 30, 1985, OMB approved this collection of information assigned control number 0625-0156.

List of Subjects in 15 CFR Part 385

Communist countries, Exports, Reporting and recordkeeping requirements.

Accordingly, Part 385 of the Export Administration Regulations (15 CFR Parts 368-399) is amended as follows:

PART 385—[AMENDED]

1. The authority citation for 15 CFR Part 385 continues to read as follows:

Authority: Pub. L. 96-72, 93 Stat. 503, 50 U.S.C. app 2401 *et. seq.*, as amended by Pub. L. 97-145 of December 29, 1981 and by Pub. L. 99-64 of July 12, 1985; E.O. 12525 of July 12, 1985 (50 FR 28757, July 16, 1985); Pub. L. 99-223, 50 U.S.C. 1701 *et seq.*; E.O. 12532 of September 9, 1985 (50 FR 36861, September 10, 1985).

2. OMB control number 0625-0156 is added to the end of § 385.4 to read as follows:

§ 385.4 Country Groups T & V.

BILLING CODE 3510-DT-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 176

[Docket No. 85F-0298]

Indirect Food Additives; Paper and Paperboard Components; Slimicide

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of *n*-dodecylguanidine hydrochloride as a slimicide in paper and paperboard intended for use in contact with food. This action responds to a petition filed by Betz Laboratories, Inc.

DATES: Effective May 27, 1986; objections by June 26, 1986.

ADDRESS: Written objections to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Hortense S. Macon, Center for Food Safety and Applied Nutrition (HFT-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In a notice published in the Federal Register of September 13, 1985 (50 FR 37437), FDA announced that a petition (FAP 5B3947) had been filed by Betz Laboratories, Inc., Trevose, PA 19047, proposing that § 176.300 *Slimicides* (21 CFR 176.300) be amended to provide for the safe use of *n*-dodecylguanidine hydrochloride as a slimicide in paper and paperboard intended for use in contact with food.

FDA has evaluated data in the petition and other relevant material. The agency concludes that the proposed use of the food additive is safe, and that the regulation should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition (address above) by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday. FDA's regulations implementing the National Environmental Policy Act (21 CFR Part 25) have been replaced by a rule published in the Federal Register of April 26, 1985 (50 FR 16636, effective July 25, 1985). Under the new rule, an action of this type would require an abbreviated environmental assessment under 21 CFR 25.31a(b)(1).

Any person who will be adversely affected by this regulation may at any time on or before June 26, 1986 file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 176

Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director of the Center for Food Safety and Applied Nutrition, Part 176 is amended as follows:

PART 176—INDIRECT FOOD ADDITIVES: PAPER AND PAPERBOARD COMPONENTS

1. The authority citation for 21 CFR Part 176 continues to read as follows:

Authority: Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

2. In § 176.300(c) by alphabetically inserting a new item in the list of substances to read as follows:

§ 176.300 Slimicides.

* * * * *

(c) * * *

List of substances	Limitations
* * *	* * *
n-Dodecylguanidine hydrochloride.	At a maximum level of 0.50 pound per ton of dry weight fiber.
* * *	* * *

Dated: May 15, 1986.

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

21 CFR PART 177

[Docket No. 85F-0518]

Indirect Food Additives; Polymers

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of ethyleneacrylic acid copolymers containing up to 25 weight-percent of polymer units derived from acrylic acid in contact with food. This action responds to a petition filed by the The Dow Chemical Co.

DATES: Effective May 27, 1986; objections by June 26, 1986.

ADDRESS: Written objections may be sent to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Hortense S. Macon, Center for Food Safety and Applied Nutrition (HFF-335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-472-5690.

SUPPLEMENTARY INFORMATION: In a notice published in the Federal Register of December 9, 1985 (50 FR 50233), FDA announced that a petition (FAP 5B3677) had been filed by The Dow Chemical Co., Midland, MI 48674, proposing that § 177.1310 *Ethylene acrylic acid copolymers* (21 CFR 177.1310) be amended to provide for the safe use of ethylene-acrylic copolymers containing up to 25 weight-percent of polymer units derived from acrylic acid in contact with food.

FDA has evaluated data in the petition and other relevant material. The agency concludes that the proposed use of the food additive is safe, and that the regulation should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition (address above) by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday. FDA's regulations implementing the National Environmental Policy Act (21 CFR Part 25) have been replaced by a rule published in the Federal Register of April 26, 1985 (50 FR 16636, effective July 25, 1985). Under the new rule, an action of this type would require an abbreviated environmental assessment under 21 CFR 25.31a(b)(1).

Any person who will be adversely affected by this regulation may at any time on or before June 26, 1986 file with the Dockets Management Branch (address above) written objections thereto. Each objection shall be separately numbered, and each numbered objection shall specify with particularity the provisions of the regulation to which objection is made and the grounds for the objection. Each numbered objection on which a hearing is requested shall specifically so state. Failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held. Failure to include such a description and analysis for any particular objection shall constitute a waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this document. Any objections received in response to the regulation may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 177

Food additives, Food packaging.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under

authority delegated to the Commissioner of Food and Drugs and redelegated to the Director, Center for Food Safety and Applied Nutrition, Part 177 is amended as follows:

PART 177—INDIRECT FOOD ADDITIVES: POLYMERS

1. The authority citation for 21 CFR Part 177 continues to read as follows:

Authority: Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

2. In § 177.1310 by revising paragraphs (a) and (b), by redesignating existing paragraph (c) as paragraph (d), and by adding new paragraph (c) to read as follows:

§ 177.1310 Ethylene-acrylic acid copolymers.

* * * * *

(a) The ethylene-acrylic acid copolymers consist of basic copolymers produced by the copolymerization of ethylene and acrylic acid such that the finished basic copolymers contain no more than:

(1) 10 weight-percent of total polymer units derived from acrylic acid when used in accordance with paragraph (b) of this section; and

(2) 25 weight-percent of total polymer units derived from acrylic acid when used in accordance with paragraph (c) of this section.

(b) The finished food-contact articles made with no more than 10 percent total polymer units derived from acrylic acid, when extracted with the solvent or solvents characterizing the type of food and under the conditions of its intended use as determined from tables 1 and 2 of § 176.170(c) of this chapter, yield net acidified chloroform-soluble extractives not to exceed 0.5 milligram per square inch of food-contact surface when tested by the methods prescribed in § 177.1330(c), except that net acidified chloroform-soluble extractives from paper and paperboard complying with § 176.170 of this chapter may be corrected for wax, petrolatum, and mineral oil as provided in § 176.170(d)(5)(iii)(b) of this chapter. If the finished food-contact article is itself the subject of a regulation in Parts 174, 175, 176, 177, 178 and § 179.45 of this chapter, it shall also comply with any specifications and limitations prescribed for it by that regulation.

Note.—In testing the finished food-contact article, use a separate test sample for each extracting solvent.

(c) The finished food-contact layer made with basic copolymers containing more than 10 weight-percent but no more than 25 weight-percent of total polymer units derived from acrylic acid and with a maximum thickness of 0.0025 inch (2.5 mils) may be used in contact with food types I, II, IVB, VIA, VIB, VIIB, and VIII identified in table 1 of § 176.170(c) of the chapter under conditions of use B through H as described in table 2 of § 176.170(c) of this chapter, and in contact with food types III, IVA, V, VIIA, and IX identified in table 1 of § 176.170(c) of this chapter under conditions of use E through G as described in table 2 of § 176.170(c) of this chapter.

* * * * *

Dated: May 15, 1986.

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160-01-M

---

21 CFR Part 178

[Docket No. 81F-0360]

Indirect Food Additives; Adjuvants, Production Aids, and Sanitizers

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the food additive regulations to provide for the safe use of butyric acid, 3,3-bis(3-*tert*-butyl-4-hydroxyphenyl)ethylene ester as an antioxidant for olefin polymers. This action responds to a petition filed by American Hoechst Corp.

DATES: Effective May 27, 1986. Objections by June 26, 1986.

ADDRESS: Written objections to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Andrew D. Laumbach, Center for Food Safety and Applied Nutrition (HFF–335), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–472–5690.

SUPPLEMENTARY INFORMATION: In a notice published in the Federal Register of November 24, 1981 (46 FR 57645), FDA announced that a petition (FAP 1B3584) had been filed by American Hoechst Corp., Somerville, NJ 08876, proposing that 21 CFR 178.2010 of the food additive regulations be amended to provide for the safe use of butyric acid, 3,3-bis(3-*tert*-butyl-4-hydroxyphenyl)ethylene ester as an antioxidant and/or stabilizer for olefin polymers by removing current restrictions on food type and temperature.

FDA has evaluated the data in the petition and other relevant material. The agency concludes that the proposed food additive use is safe, and that the regulations should be amended as set forth below.

In accordance with § 171.1(h) (21 CFR 171.1(h)), the petition and the documents that FDA considered and relied upon in reaching its decision to approve the petition are available for inspection at the Center for Food Safety and Applied Nutrition (address above) by appointment with the information contact person listed above. As provided in 21 CFR 171.1(h), the agency will delete from the documents any materials that are not available for public disclosure before making the documents available for inspection.

The agency has carefully considered the potential environmental effects of this action and has concluded that the action will not have a significant impact on the human environment and that an environmental impact statement is not required. The agency's finding of no significant impact and the evidence supporting that finding, contained in an environmental assessment, may be seen in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday. This action was considered under FDA's final rule implementing the National Environmental Policy Act (21 CFR Part 25) that was published in the Federal Register of April 26, 1985 (50 FR 16636, effective July 25, 1985). Under the new rule, an action of this type would require an environmental assessment under 21 CFR 25.31a(a).

Any person who will be adversely affected by this regulation may at any time on or before June 26, 1986 submit to the Dockets Management Branch (address above) written objections thereto and may make a written request for a public hearing on the stated objections. Each objection shall be separately numbered and each numbered objection shall specify with particularity the provision of the regulation to which objection is made. Each numbered objection on which a hearing is requested shall specifically so state; failure to request a hearing for any particular objection shall constitute a waiver of the right to a hearing on that objection. Each numbered objection for which a hearing is requested shall include a detailed description and analysis of the specific factual information intended to be presented in support of the objection in the event that a hearing is held; failure to include such a description and analysis for any particular objection shall constitute a

waiver of the right to a hearing on the objection. Three copies of all documents shall be submitted and shall be identified with the docket number found in brackets in the heading of this regulation. Received objections may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

List of Subjects in 21 CFR Part 178

Food additives; Food packaging; Sanitizing solutions.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Director of the Center for Food Safety and Applied Nutrition, Part 178 is amended as follows:

PART 178—INDIRECT FOOD ADDITIVES: ADJUVANTS, PRODUCTION AIDS, AND SANITIZERS

1. The authority citation for 21 CFR Part 178 continues to read as follows:

Authority: Secs. 201(s), 409, 72 Stat. 1784–1788 as amended (21 U.S.C. 321(s), 348); 21 CFR 5.10 and 5.61.

2. In § 178.2010(b) by revising the entry for "Butyric acid, 3,3-bis(3-*tert*-butyl-4-hydroxyphenyl)ethylene ester" to read as follows:

§ 178.2010 Antioxidants and/or stabilizers for polymers.

* * * * *

(b) * * *

Substances	Limitations
Butyric acid, 3,3-bis(3-*tert*-butyl-4-hydroxyphenyl)ethylene ester (CAS Reg. No. 32509-66-3).	For use only: 1. At levels not to exceed 0.5 percent by weight of olefin copolymers complying with § 177.1520(c) of this chapter, items 3.1 and 3.2 except that when used in contact with foods described as types III, IV-A, V, VII-A, and IX in Table 1 of § 176.170(c) of this chapter, the olefin copolymers may only be used under conditions of use E, F, and G set forth in Table 2 of § 176.170(c) of this chapter. 2. At levels not to exceed 0.5 percent by weight of olefin polymers complying with § 177.1630(e) of this chapter, items 3.1, 3.1, or 3.2 (where the copolymers complying with items 3.1 and 3.2 contain not less than 85 weight-percent of polymer units derived from propylene). 3. At levels not to exceed 0.2 percent by weight of olefin polymers complying with § 177.1630(e) of this chapter, items 2.1, 2.2, 2.1, and 2.2.

* * * * *

Dated: May 15, 1986.

Richard J. Ronk,

Acting Director, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 883

[Docket No. R-86-1292; FR-1675]

Section 8 Housing Assistance Payments Program—State Housing Agencies

AGENCY: Office of Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule; technical amendment.

SUMMARY: This rule corrects an erroneous cross reference in 24 CFR Part 883—Section 8 Housing Assistance Program—State Housing Agencies.

DATE: June 27, 1986.

FOR FURTHER INFORMATION CONTACT: Grady Norris, Assistant General Counsel for Regulations, Office of General Counsel, Room 10276, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, DC 20410, telephone (202) 755-7055. (This is not a toll-free number).

SUPPLEMENTARY INFORMATION: 24 CFR 883.406(b) deals with the possible effect that delays during the period an assisted project is being constructed or rehabilitated may have on section 8 contract rents. Through an error, reference is made in the paragraph to "paragraph (d) of this section". The reference should be to "§ 883.305(b)(2)".

This rule makes the necessary correction, which is technical only and is not intended to have any substantive effect, since the rule as amended on March 26, 1986 (48 FR 12709) was originally intended to make the same cross reference as this document supplies. (This conclusion is supported by the parallel provisions found in Part 880. In § 880.401(b), a cross-reference correctly identifies § 880.204(b)(2) as the provision stating the grounds for allowing an increase in contract rents where there are construction delays. Section 880.401(b) is parallel to § 883.406(b), the rule corrected here, and § 880.204(b)(2) is parallel to the corrected cross-reference provision—§ 883.305(b)(2).)

Procedural Requirements

This rule does not constitute a "major rule" as that term is defined in section 1(b) of Executive Order 12291 on Federal Regulation issued by the President on February 17, 1981. Analysis of the proposed rule indicates that it does not: (1) Have an annual effect on the economy of $100 million or more; (2) cause a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; or (3) have a significant adverse effect on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This rule was not listed in the Department's Semiannual Agenda of Regulations published on April 21, 1986 (51 FR 12036); under Executive Order 12291 and the Regulatory Flexibility Act.

The catalog of Federal Domestic Assistance program number is 14.156.

Under 5 U.S.C. 605(b) (The Regulatory Flexibility Act), the Undersigned hereby certifies that this rule would not have a significant economic impact on a substantial number of small entities.

List of Subjects in 24 CFR Part 883

Grant programs—Housing and community development, Rent subsidies, New construction and substantial rehabilitation.

Accordingly, 24 CFR Part 883 is amended to read as follows:

PART 883—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM—STATE HOUSING AGENCIES

1. Paragraph (b) of § 883.406 is revised to read as follows:

§ 883.406 Construction or rehabilitation period.

* * * * *

(b) Delays. Extensions of time may be granted for the reasons specified in the Agreement. However, contract rents will be increased only for the reasons stated in § 883.305(b)(2) of this part.

* * * * *

Dated: May 19, 1986.

Silvia J. Baltodanonis,

General Deputy Assistant Secretary for Housing—Deputy Federal Housing Commissioner.

[FR Doc. 86-11798 Filed 5-23-86; 8:45 am]

BILLING CODE 4210-27-M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 301

[T.D. 8062]

Procedure and Administration; Definition of Partnership Item; Correction

AGENCY: Internal Revenue Service, Treasury.

ACTION: Correction to final rule.

SUMMARY: This document contains two corrections to the final regulations that were published in the Federal Register on April 18, 1986 (51 FR 13212). Those regulations, issued as Treasury Decision 8062, relate to the definition of "partnership item" under the rules for the tax treatment of partnership items.

FOR FURTHER INFORMATION CONTACT: Cynthia Grigsby of the Legislation and Regulations Division, Office of Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC 20224 (Attention: CC:LR:T). Telephone 202-566-3318 (not a tollfree number).

SUPPLEMENTARY INFORMATION:

Background

Section 6231(a)(3) of the Internal Revenue Code provides that a "partnership item" is any item that must be taken into account for a taxable year of a partnership under any income tax provision to the extent that the regulations provide that the item is more appropriately determined at the partnership level rather than at the partner level. Treasury Decision 8062 set forth items that the Internal Revenue Service considers to be more appropriately determined at the partnership level.

Need for Correction

As published, T.D. 8062, in two locations, used the word "determination" when the intended word was "item".

Correction of Publication

Accordingly, the publication of Treasury Decision 8062, which was the subject of FR Doc. 86-8762, is corrected as follows:

§ 301.6231 [Corrected]

Paragraph 1. In § 301.6231(a)(3)-1, on page 13214, third column, in the 9th line of the flush material following paragraph (c)(2)(iv), the language "determination is not a partnership item." is removed and the language "item is not a partnership item." is added in its place.

§ 301.6231 [Corrected]

Par. 2. In § 301.6231(a)(3)-1, on page 13215, first column, in the first sentence of the flush material that follows paragraph (c)(3)(iv), the language "therefore, the determination" is removed and the language "therefore, that item" is added in its place.

Donald E. Osteen,

Acting Director, Legislation and Regulations Division.

BILLING CODE 4830-01-M

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Part 218

Collection of Royalties, Rentals, Bonuses, and Other Monies Due the Federal Government

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Final rule.

SUMMARY: The Minerals Management Service is amending 30 CFR 218.154 to correct cross-references to certain paragraphs in 30 CFR 250.12 resulting from previous amendments to that regulation.

EFFECTIVE DATE: May 27, 1986.

FOR FURTHER INFORMATION CONTACT: Dennis Whitcomb, Chief, Rules and Procedures Branch, (303) 231-3432 in Lakewood, Colorado.

SUPPLEMENTARY INFORMATION:

I. Background

Revisions to regulations in 1979 resulted in paragraphs (c) and (d) of 30 CFR 250.12 being redesignated as paragraphs (a) and (b). (44 FR 61668 October 26, 1979). In addition, a new paragraph (c) was added to 30 CFR 250.12 in 1984 covering deepwater leases. (49 FR 17449 April 24, 1984). The current 30 CFR 218.154 contains references to certain 30 CFR 250.12 paragraphs numbered prior to the 1979 and 1984 revisions. The following amendments to 30 CFR 218.154 are necessary to correct the cross-references to 30 CFR 250.12:

Paragraph	Current reference	Correct reference
218.154(a)	30 CFR 250.12(c).	30 CFR 250.12(a)(1)(ii).
	30 CFR 250.12(d)(1).	30 CFR 250.12(a)(1)(iii).
	30 CFR 250.12(d)(4).	30 CFR 250.12(a)(1)(iv).
218.154(b)(1)	30 CFR 250.12(d)(1).	30 CFR 250.12(b)(1).
	None	30 CFR 250.12(c).
218.154(b)(2)	30 CFR 250.12(d)(3).	30 CFR 250.12(a)(1)(i).
	None	30 CFR 250.12(c).

II. Procedural Matters

Administrative Procedure Act

The changes included in this rulemaking are technical corrections only and not substantive changes. Accordingly, pursuant to 5 U.S.C. 553(b), it has been determined that it is unnecessary to issue proposed regulations before the issuance of this final regulation. For the same reason, it has been determined that in accordance with 5 U.S.C. 553(d), there is good cause to make this regulation effective upon publication in the Federal Register.

Executive Order 12291 and Regulatory Flexibility Act

The Department of the Interior has determined that this document is not a major rule under E.O. 12291 and certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

Paperwork Reduction Act of 1980

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

National Environmental Policy Act of 1969

The Department of the Interior has determined that this action does not constitute a major Federal action significantly affecting the quality of the human environment. Therefore, an environmental impact statement is not required under the National Environmental Policy Act of 1969 [42 U.S.C. 4332(2)(C)].

List of Subjects in 30 CFR Part 218

Coal, Continental shelf, Electronic funds transfers, Geothermal energy, Government contracts, Indian lands, Mineral royalties, Oil and gas exploration, Public lands-mineral resources.

Under authority of the Secretary of the Interior contained in 43 U.S.C. 1334,

30 CFR Part 218 is hereby amended as set forth below:

Dated: May 14, 1986.

J. Steven Griles,

Assistant Secretary, Land and Minerals Management.

Subchapter A—Royalty Management

PART 218—[AMENDED]

30 CFR 218 is amended as follows:

1. The authority citation for Part 218 is revised as follows:

Authority: The Act of February 25, 1920 (30 U.S.C. 181 *et seq.*) as amended; the Act of May 21, 1930 (30 U.S.C. 301–306); the Mineral Leasing Act for Acquired Lands (30 U.S.C. 351–359), as amended; the Act of March 3, 1909 (25 U.S.C. 396), as amended; the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) as amended; the Act of May 11, 1938 (25 U.S.C. 396a–396g), as amended; the Act of February 26, 1931 (25 U.S.C. 397), as amended; the Act of May 29, 1924 (25 U.S.C. 398); the Act of March 3, 1927 (25 U.S.C. 398a–398e); the Act of June 30, 1919 (25 U.S.C. 399), as amended; R.S. § 441 (43 U.S.C. 1457), see also Attorney General's Opinion of April 2, 1941 (40 Op. Atty. Gen. 41); the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 471 *et seq.*), as amended; the Act of December 12, 1980 (Pub. L. 96–514, 94 Stat. 2964); the Combined Hydrocarbon Leasing Act of 1981 (Pub. L. 97–78, 95 Stat. 1070); the Outer Continental Shelf Lands Act (43 U.S.C. 1331 *et seq.*), as amended; Section 2 of Reorganization Plan No. 3 of 1950 (64 Stat. 1262); Secretarial Order No. 3071 of January 19, 1982, as amended; Secretarial Order 3087, as amended; The Indian Mineral Development Act of 1982 (25 U.S.C. 2010 *et seq.*); and the Federal Oil and Gas Royalty Management Act of 1982 (30 U.S.C. 1701 *et seq.*).

2. In § 218.154, paragraphs (a) and (b) are revised to read as follows:

§ 218.154 Effect of suspensions on royalty and rental.

(a) If under the provisions of 30 CFR 250.12(a)(1) (ii), (iii) or (iv), the Director, with respect to any lease, directs the suspension of both operations and production, or, with respect to a lease on which there is no producible well, directs the suspension of operations, no payment of rental or minimum royalty shall be required for or during the period of suspension.

(b) The lessee shall not be relieved of the obligation to pay rental, minimum royalty or royalty for or during the period of suspension if the Director:

(1) Under the provisions of 30 CFR 250.12 (b)(1) or (c) approves, at the request of a lessee, the suspension of operations or production, or both, or

(2) Under the provisions of 30 CFR 250.12 (a)(1)(i) or (c) suspends any operation, including production.

BILLING CODE 4310-MR-M

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 917

Approval of Permanent Program Amendments From the Commonwealth of Kentucky Under the Surface Mining Control and Reclamation Act of 1977

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Final rule.

SUMMARY: OSMRE is announcing the approval of program amendments submitted by Kentucky as modifications to the State's permanent regulatory program (hereinafter referred to as the Kentucky program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The amendments, submitted on August 3, 1984 and revised on October 12, 1984, pertain to the cancellation of surety bonds on undisturbed areas of permits which are not in compliance with all contemporaneous reclamation standards.

After providing for public comment and conducting a thorough review of the program amendments, the Director has determined that the amendments meet the requirements of SMCRA and the Federal regulations and is approving them. The Federal rules at 30 CFR Part 917 codifying decisions concerning the Kentucky program are being amended to implement this action. This final rule is being made effective immediately to expedite the State program amendment process and encourage States to conform their programs with the Federal standards without undue delay. Consistency of State and Federal standards is required by SMCRA.

EFFECTIVE DATE: May 27, 1986.

FOR FURTHER INFORMATION CONTACT: W. Hord Tipton, Director, Lexington Field Office, Office of Surface Mining Reclamation and Enforcement, 340 Legion Drive, Suite 28, Lexington, Kentucky 40504. Telephone: (606) 233–7327.

SUPPLEMENTARY INFORMATION:

I. Background

The Secretary of the Interior approved the Kentucky program (47 FR 21404–21435) on May 18, 1982. Information pertinent to the general background and revisions to the proposed permanent program submission, as well as the Secretary's findings, the disposition of comments and a detailed explanation of the conditions of approval, can be found in the May 18, 1982 **Federal Register**. Subsequent actions concerning the conditions of approval and program amendments are identified at 30 CFR 917.11, 30 CFR 917.15, 30 CFR 917.16 and 30 CFR 917.17.

II. Submission of Amendments

On August 3, 1984, Kentucky submitted a number of proposed amendments for OSMRE review (Administrative Record No. KY–592). These materials included Senate Bill 285, revising Sections 350.066 through 350.070 of the Kentucky Revised Statutes (KRS), and a new subchapter (405 KAR 10:035) of the Kentucky Administrative Regulations (KAR) to implement the statutory revisions. On August 31, 1984, OSMRE announced receipt of the proposed amendments and opened the public comment period (49 FR 34529–34530). Since only one person expressed an interest in a public hearing, a public meeting was held on September 25, 1984 in place of the scheduled hearing. A summary of the meeting can be found in the Kentucky Administrative Record (KY–603). On October 12, 1984, Kentucky submitted a revised version of 405 KAR 10:035, partially in response to concerns raised at the public meeting (Administrative Record No. KY–604). Accordingly, on January 23, 1985, OSMRE reopened the public comment period for 15 days (50 FR 2998).

On June 5, 1985, OSMRE notified Kentucky of its concerns with the proposed amendments and requested further clarification, which the Commonwealth provided by letter of July 24, 1985 (Administrative Record No. KY–652).

III. Director's Findings

After a thorough review pursuant to SMCRA and the Federal regulations at 30 CFR 732.15 and 732.17, the Director finds that the proposed amendments, as submitted on August 3, 1984 and revised on October 12, 1984, are no less stringent than SMCRA and no less effective than the Federal regulations.

Senate Bill 285 amends KRS 350.066 through 350.070 to provide that, upon receipt of a copy of a notice of noncompliance issued to a permittee for failure to maintain contemporaneous reclamation, a surety may notify the permittee that surety on any area disturbed after thirty days from the

effective date of the surety's notice may be refused unless the violation is abated. The bill further provides that the surety's notice shall become effective upon approval by the Natural Resources and Environmental Protection Cabinet ("NREPC" or "Cabinet") and that within thirty days of receipt of a notice of cancellation, the Cabinet shall: (1) Accept a suitable substitute bond or bonds, (2) amend the permit to delete the unbonded acreage or (3) revoke the permit for lack of bond.

The proposed regulations at 405 KAR 10:035 implement the provisions of Senate Bill 285 by requiring two separate notices with different effective dates. After issuance of a notice of noncompliance for failure to maintain contemporaneous reclamation, the surety may send a notice ("notice of intent to cancel") to the permittee and the Department of Surface Mining Reclamation and Enforcement ("Department") of its intent to request cancellation of bond coverage on any area disturbed after thirty days from the effective date of the surety's notice of intent to cancel, if the violation is not abated by that date. The effective date of this notice is the date of receipt by the insured or seven days after mailing, whichever occurs first. If the surety desires to cancel the bond after the thirty-day notice period, it must send a separate notice of cancellation to the permittee and the Department. This notice does not take effect until approved by the Cabinet. The regulations further provide that the Cabinet shall approve the notice of cancellation only if the operator has not abated the violation, the surety has complied with all notice requirements and the Cabinet has (1) revoked the permit, (2) deleted the area subject to cancellation from the permit, or (3) accepted and approved a substitute bond. To ensure that there is no confusion as to the extent of residual bond coverage, 405 KAR 10:035 section 1(2)(b)(8) requires that the surety acknowledge in the notice of cancellation that it will not be relieved of liability for areas disturbed prior to the State's approval of the cancellation, i.e., liability is not limited to lands disturbed prior to thirty days following the effective date of the notice of intent to cancel.

While the permittee may request a hearing on any order revoking the permit or revising its area, 405 KAR 10:035 section 2(2)(b) provides that the order shall be affirmed unless the permittee can establish that bond coverage was not cancelled and that the violation was abated at the time the order was issued, or that a substitute bond was approved by the Cabinet. At 405 KAR 10:035 section 3, Kentucky also forbids any release of bond after cancellation until the entire area originally covered by the bond has been reclaimed in accordance with the criteria and requirements of 405 KAR 10:040 section 2, unless a substitute bond is obtained.

The Federal regulations at 30 CFR 800.20(b) allow the cancellation of surety bond coverage on undisturbed lands upon request of the permittee, if approved by the regulatory authority. They also require that the regulatory authority decide whether to approve such a request within thirty days after receipt of a notice of cancellation. The regulations proposed by Kentucky (405 KAR 10:035 section 3) similarly require the Cabinet to act upon a notice of cancellation within thirty days of receipt. Therefore, while there is no direct Federal counterpart to this proposed amendment, the Director finds that Senate Bill 285 and 405 KAR 10:035, as submitted on August 3, 1984 and revised on October 12, 1984, are no less stringent than the requirements of section 509 of SMCRA and no less effective than the Federal regulations concerning bonding at 30 CFR Part 800.

IV. Public Comment

The Director solicited public comments on the proposed amendments by Federal Register notice published on August 31, 1984 (49 FR 34529–34530) and on revisions to those amendments by notice in the January 23, 1985 Federal Register (50 FR 2996). One person requested a public hearing, in response to which OSMRE held a public meeting on September 25, 1984, which was attended by two individuals, Leon Ellis and Mark McGraw, representing one surety company. A summary of the meeting appears in the Kentucky Administrative Record (KY–603). During the two comment periods (August 31, 1984 through October 1, 1984 and January 23, 1985 through February 7, 1985), OSMRE received written comments from the Surety Association of America and from Thomas J. FitzGerald. Comments of the latter party were submitted on behalf of the Kentucky Governmental Accountability Project of the Kentucky Resources Council, the Kentucky Conservation Committee and the Cumberland Chapter of the Sierra Club.

A summary of the comments received and the Director's response to them appears below.

1. The Surety Association of America states that the operator should be barred from disturbing additional land immediately upon receipt of the notice of noncompliance and that sureties should have the unilateral right to cancel a bond (without the prior approval of the Cabinet) by serving proper notice to the obligee and the principal. Mr. Ellis and Mr. McGraw also reiterated the latter point in the public meeting. As discussed in the Director's Findings section of this notice, the Federal regulations at 30 CFR 800.20(b) require that any proposed cancellation of a surety bond take effect only upon approval by the regulatory authority. In addition, the Director believes that the nature of the remedial action specified in any notice of noncompliance for noncontemporaneous reclamation is best determined on a site-specific basis at the discretion of the regulatory authority. An operator may be capable of both continued mining and timely abatement of the violation. Under such circumstances, barring the disturbance of any additional area might be inappropriate.

2. Mr. Ellis and Mr. McGraw objected to the requirement that the surety serve notice on the permittee by certified mail, stating that regular mail should be sufficient, or that provisions should be made for situations where certified service could not be made. In the revised version of 405 KAR 10:035 section 1(1)(b) submitted October 12, 1984, Kentucky has retained the requirement that both notices be sent to the permittee by certified mail; however, it has provided that the effective date of the notice of intent to cancel shall be the date of receipt by the permittee or seven days after mailing, whichever occurs first. In addition, the effective date of the notice of cancellation is dependent only upon the date of approval by the Cabinet, not the date of receipt by the permittee. Therefore, the commenter's objections have been addressed by the State.

3. Mr. Ellis and Mr. McGraw state that the length of time between the surety's mailing of a notice of cancellation and the Cabinet's approval of that notice is unknown and that the operator could continue to increase the area of disturbance and the surety's liability during the processing period. The Director agrees with this statement, but he finds that it is not in conflict with or less effective than any Federal requirement.

4. Mr. Ellis and Mr. McGraw expressed concern that certain provisions of 405 KAR 10:035 section 3, which requires that the bond for the entire permitted area at the time of cancellation be forfeited if the permit is revoked, will act as a disincentive to

sureties considering use of this amendment.

Without evaluating the validity of the commenters' concern, the Director finds that these provisions neither conflict with nor are no less effective than any Federal requirement.

5. Mr: Ellis and Mr. McGraw state that the escrow provisions of the State bond forfeiture program are unworkable and inequitable. Since this amendment does not involve the escrow provisions of the State forfeiture program, the Director is not addressing this comment.

6. Mr. FitzGerald states that Senate Bill 285 is internally inconsistent with respect to when bond coverage actually ceases and that the attempt of 405 KAR 10:035 to resolve this conflict is subject to attack as being *ultra vires*, especially under the provisions of Kentucky House Bill 334, which, Mr. FitzGerald alleges, strictly prohibits regulations from interpreting or expanding upon statutes. Specifically, he states that the statute does not clearly authorize the use of two separate notices. The Director agrees that the statute contains ambiguities, but he believes that the proposed regulations reasonably harmonize these differences and that no irreconcilable conflicts exist. In addition, the Director evaluates proposed State program amendments only for consistency with the approved State program, SMCRA and the Federal regulations, not for consistency with any State statutes (such as House Bill 334) or regulations governing the issuance of State regulations in general. Until otherwise adjudicated, the Director presumes that all regulations have been or will be promulgated in accordance with all applicable State legal requirements.

7. Mr. FitzGerald also states that Senate Bill 285 is arbitrary, unduly punitive and inconsistent with Federal law in that it has the effect of categorically limiting the time for abatement of a noncontemporaneous reclamation violation to thirty days without regard to conditions beyond the operator's control. The Director does not agree. The statute and proposed regulations do not alter the abatement periods available to the operator; they provide only that the surety may cancel bond coverage on undisturbed areas if the violation has not been abated by the time the Cabinet acts upon the surety's notice of cancellation. Although the time period during which the operator may abate the violation and avoid bond cancellation is indefinite, it may frequently be shorter than the time period for abatement specified in the notice of noncompliance. However, the Director finds that such provisions do not conflict with and are not less effective than the Federal requirements.

8. Mr. FitzGerald states that the provisions of this amendment requiring that, after cancellation, the surety remain obligated to the full extent of the bond, even where the Cabinet deletes all undisturbed acreage from the permit, presents an irreconcilable conflict with KRS 350.070(1), which requires that the Cabinet release the bond for each acre by which a permit is reduced. The Director is not convinced that a conflict exists, since KRS 350.070(1) applies to permit revision applications submitted by the permittee, not mandatory deletions by the Cabinet, and since Senate Bill 285 would take precedence by virtue of its more recent origin. Furthermore, even if the provisions of KRS 350.070(1) should prevail, the proposed amendment would still be no less effective than the Federal requirements since the Federal regulations at 30 CFR 800.20(b) and 800.15(c) allow the cancellation of surety bond coverage on undisturbed areas, with a concomitant reduction in bond amount upon approval by the regulatory authority.

9. Mr. FitzGerald expresses concern that, while the proposed amendment does not prohibit the permittee from further disturbing areas *not* deleted from the permit area, it does exempt the surety from any liability for such disturbances. The Director finds that the commenter is misinterpreting the term "disturbed area" and defined at 405 KAR 7:020 section 1(30) and is misreading the statute, which states that "Nothing contained herein shall be construed to relieve the surety of its liability for areas disturbed within the thirty day notice period. The surety shall remain obligated for the full extent of the bond for reclamation of all areas disturbed prior to the Cabinet's approval of the cancellation." The statute provides no liability exemption for disturbed areas redisturbed after cancellation; indeed, such redisturbance is a necessary part of reclamation. Proposed 405 KAR 10:035 section 3(1) provides that the Cabinet shall not release any portion of a bond for a permit area or increment thereof after cancellation unless and until all disturbed areas on the permit or increment have been reclaimed in accordance with the criteria and requirements of 405 KAR 10:040, or until a substitute bond is filed and approved. The definition of "disturbed area" at 405 KAR 7:020 section 1(30) provides that, once disturbed, an area remains classified as disturbed until reclamation is complete and the performance bond is released. Hence, the commenter's concerns are unfounded.

10. Mr. FitzGerald also states that the provisions of the proposed amendment which would allow cancellation of the bond and revocation of the permit to occur simultaneously without prior hearing conflict with KRS 350.028(4), and that an operator might thus be able to continue operating without bond while challenging the revocation of his permit. The Director believes that this scenario will not occur since KRS 350.028(4), which requires a public hearing prior to permit revocation, applies only to permit revocation proceedings resulting from pattern of violations determinations. While the general provisions of 405 KAR 7:090 section 1 may be interpreted as requiring a hearing prior to any permit revocation, proposed 405 KAR 10:035 section 2 specifically provides otherwise.

V. Director's Decision

The Director, based on the above findings, is approving the proposed amendments as submitted on August 3, 1984 and revised on October 12, 1984. The Federal rules at 30 CFR Part 917 are being amended to implement this decision.

VI. Additional Determinations

1. Compliance With the National Environmental Policy Act

The Secretary has determined that, pursuant to section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. Executive Order No. 12291 and the Regulatory Flexibility Act

On August 28, 1981, the Office of Management and Budget (OMB) granted OSMRE an exemption from sections 3, 4, 7 and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, for this action OSMRE is exempt from the requirement to prepare a Regulatory Impact Analysis and this action does not require regulatory review by OMB.

The Department of the Interior has determined that this rule will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule will not impose any new requirements; rather, it will ensure that existing requirements established by SMCRA and the Federal rules will be met by the State.

Vol. 51, No. 101
Tuesday, May 27, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Parts 0 and 2

Revision to Ex Parte and Separation of Functions Rules Applicable to Formal Adjudicatory Proceedings: Extension of Comment Period

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed rule; extension of comment period.

SUMMARY: On March 28, 1986 (51 FR 10393), the NRC published for public comment a proposed rule to revise its procedures dealing with ex parte communications and separation of adjudicatory and nonadjudicatory functions. The comment period for this proposed rule is to expire on May 27, 1986. The law firm of Shaw, Pittman, Potts & Trowbridge, on behalf of a number of its electric utility clients, has requested a thirty-day extension of the comment period. The request is granted. However, in view of the importance of the proposed rule and the desirability of developing a final rule as soon as practicable, the NRC will not grant any further extensions of the comment period. The extended comment period now expires on June 26, 1986.

DATE: The comment period has been extended and now expires June 26, 1986. Comments received after this date will be considered if it is practical to do so but assurance of consideration cannot be given except as to comments received before this date.

ADDRESSES: Send written comments or suggestions to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch. Copies of comments received may be examined at the NRC Public Document Room, 1717 H Street, NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Paul Bollwerk, Office of General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (202) 634–3224.

Dated at Washington, DC, this 20th day of May 1986.

For the Nuclear Regulatory Commission.

John C. Hoyle,
Assistance Secretary of the Commission.

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 86–ASO–21]

Proposed Designation of Transition Area, Falmouth, KY

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to designate the Falmouth, Kentucky, transition area to accommodate Instrument Flight Rule (IFR) operations at Gene Snyder Airport. This action will lower the base of controlled airspace from 1,200 to 700 feet above the surface in the vicinity of the airport. An instrument approach procedure is being developed to serve the airport and the controlled airspace is required for IFR aeronautical activities.

DATE: Comments must be received on or before: July 15, 1986.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, ASO–530, Manager, Airspace and Procedures Branch, Docket No. 86–ASO–21, P.O. Box 20636, Atlanta, Georgia 30320.

The official docket may be examined in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, telephone: (404) 763–7646.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Supervisor, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763–7640.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 86–ASO–21." The postcard will be date/time stamped and returned to the commenter. All communications received before the specific closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Office of the Regional Counsel, Room 652, 3400 Norman Berry Drive, East Point, Georgia 30344, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, Airspace and Procedures Branch (ASO–530), Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of Part 71 of the

Federal Aviation Regulations (14 CFR Part 71) that will designate the Falmouth, Kentucky, transition area. This action will provide controlled airspace for aircraft executing a new instrument approach procedure to Gene Snyder Airport. If the proposed designation of the transition area is found acceptable, the operating status of the airport will be changed to IFR. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6S dated January 2, 1986.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition area.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration (FAA) proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

PART 71—[AMENDED]

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449), January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. §71.181 is amended as follows:

Falmouth, KY—[New]

That Airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Gene Snyder Airport (Lat. 38°42'12" N., Long. 84°23'33" W); excluding that portion which coincides with the Cincinnati, KY, transition area.

Issued in East Point, Georgia, on May 15, 1986.

Thomas H. Prative,

Manager, Air Traffic Division, Southern Region.

14 CFR Part 71

[Airspace Docket No. 86-AWP-7]

Proposed Amendment to the Fort Huachuca, AZ, Transition Area

AGENCY: Federal Aviation Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend the description of the Fort Huachuca, Arizona, transition area. This action will expand the 700 foot transition area west of the Libby AAF/Sierra Vista Municipal Airport (lat. 31°35'00" N., long. 110°20'30" W.). This will provide controlled airspace for military radar approaches to Libby AAF.

DATE: Comments must be received on or before July 14, 1986.

ADDRESS: Send comments on the proposal in triplicate to: Federal Aviation Administration, Attn: Manager, Airspace Branch, AWP-520, Docket No. 86-AWP-7, Air Traffic Division, P.O. Box 92007 WWPC, Los Angeles, California 90009.

The official docket may be examined in the Office of the Regional Counsel, Western-Pacific Region, Federal Aviation Administration, Room 6W14, 15000 Aviation Boulevard, Lawndale, California.

An informal docket may also be examined during normal business hours at the Office of the Manager, Airspace Branch, Air Traffic Division, at the above address.

FOR FURTHER INFORMATION CONTACT: Frank T. Torikai, Airspace Specialist, Airspace Branch, AWP-520, Air Traffic Division, Western-Pacific Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90260; telephone (213) 297-1649.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 86-AWP-7." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. All comments submitted will be available for examination in the Airspace Branch, Air Traffic Division, 15000 Aviation Boulevard, Lawndale, California 90260, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Airspace Branch, Air Traffic Division, P.O. Box 92007 Worldway Postal Center, Los Angeles, California 90009. Communication must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to amend the description of the Fort Huachuca, Arizona, transition area. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not

warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Aviation safety/transition areas.

The Proposed Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 C.F.R. 11.69.

§ 71.181 [Amended]

2. § 71.181 is amended as follows:

Fort Huachuca, AZ—[Amended]

After "Fort Huachuca, AZ. (lat. 31°35'00" N., long. 110°20'30" W.)" add "within 5 miles each side of the Libby AAF VOR 275° radial, extending from the VOR to 12 miles west of the VOR."

Issued in Los Angeles, California, on May 15, 1986.

Wayne C. Newcomb,

Manager, Air Traffic Division.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, DC 20591, or by calling (202) 426-3058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2, which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish a transition airspace area near Pontiac, Illinios.

The development of a new VOR-A IAP requires that the FAA designate airspace to ensure that the procedure will be contained within controlled airspace.

The minimum descent altitudes for this procedure may be established below the floor of the 700-foot controlled airspace.

Aeronautical maps and charts will reflect the defined area which will enable other aircraft to circumnavigate the area in order to comply with applicable visual flight rule requirements.

Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
